# Havana Syndrome/ AHI Concerns In Our Nation

By KEN STROUD

# Havana Syndrome/Non- Kinetic Brain Injury (NKBI)/ Anomalous Heath Incidents (AHI)

- What is Havana Syndrome?
  - Per Google AI “Havana Syndrome" refers to a mysterious set of health issues, including neurological and sensory symptoms, that have affected U.S. diplomats and other government personnel, initially in Cuba, and later in other locations.
  - First diagnosed in 2016 by Dr. Michael Ellis Hoffer from the University of Miami - From my experience, he only diagnosis intelligence, federal, state, and military.
  - No longer associated with government personnel only - Civilians are affected
- EMF/ Directed Energy Weapon based attacks from wireless sources, such as radio frequency and microwave, to the brain, body, and nervous system are commonly associated. High levels of volts per meter seem to also be a part of some targeting
- V2K in many cases is a subset attack of Havana Syndrome – Voices from V2K operators or AI that mimic the patient has a schizophrenic like condition

# Emotional and Physical Components of Targeting

- What is it like emotionally to be affected by Havana Syndrome
  - Confusion – Constant V2K Chatter for many
  - Depression – Feeling it will never end
  - Loss of reputation - Sanity questioned – Job loss due to not being able to concentrate from V2k and/ or pain attacks.
  - Alcohol or substance abuse may be associated – Slow decay of the individual due to self harm from the constant suffering - cravings can even be artificially enhanced by wireless neurological approach
  - May lead to loss of properly
  - May lead to suicide
    - Some have called this form of suicide, artificial or coerced suicide, since the person is being pushed into the act by pain attacks/ subliminal thought placement/ V2K
- What physical symptoms do many neuro attacked individuals experience daily or intermittently
  - No silence – constant V2K chatter and/ or tinnitus for a large percentage of victims
  - Pain Attacks and other nervous system effects
  - Subliminal attacks
  - Image attacks
  - Sleep Depravation
  - Physical damage to brain and body from EMF exposure
  - Electronic Rape
  - Forced or withheld bowel movements

# V2K, RNM, and Wireless Neurological Approach

- **V2k**- Also known as the microwave auditory effect, or Frey effect, was first described by neuroscientist Allan H. Frey in the 1961. The effect of V2k works when pulsed microwave radiation rapidly heats brain tissue, causing a thermoelastic expansion that generates a pressure wave. This wave travels through the skull to the inner ear, where it is interpreted as sound
- **RNM** –Remote Neural Monitoring, as the name suggests, is a wireless technology that can be used to remotely monitor neural activity of a host
  - **The "voice of God" weapon**: In 2007, *The Washington Post* reported that the Pentagon had pursued a weapon based on the microwave auditory effect that could beam voices into people's minds.
- **US Patent for V2K**
  - US 6470214 V2k 13-Dec-96 22-Oct-02 James P. O'Loughlin, Diana L. Loree United States Air Force Remotely transmits intelligible subjective sound into target consciousness. ("Voice to Skull")
  - US 3393279 V2K 13-Mar-62 16-Jul-68 G.P. Flanagan Listening Incorporated Allows information to be remotely conveyed to subject via electromagnetic waves.
- **Possible Criminal Applications of V2k/ Wireless Neurological Approach**
  - Unauthorized human testing - Medical or technological advancement
  - Harassment – Constant abuse through wireless technology to the brain/ body can constitute as electronic harassment
  - Neural Piracy – Collection of data from neurological approach
  - Coerced Suicide – Pushed into self harm from suffering/ constant badgering of Electronic Torture
  - Battery – This charge is used for the unauthorized implant of technology in individuals
  - Surveillance Without a Warrant – Section 702 of the Foreign Intelligence Surveillance act is set to expire March 2027
  - Treson/ Espionage/ Domestic Terrorism – Leaders or civilians of our nation could be affected by subliminal/implanted thought or V2k
  - Torture - Directed energy weapons or neuro-weapons used to inflict psychological trauma are widely recognized by international legal frameworks as patterns of torture.
  - Rape/ molestation – Individuals affected by AHI’s commonly complain of effects similar to being raped/ molested

# Forensic and Medical Testing For Wireless Neurological Technology Abuse that can lead to Havana Syndrome

- Forensic Evidence – People that may be able to assist
  - Amy Holum – Subliminal Acoustic Fingerprinting/ SAF - IR imaging- Audacity software
  - Jesse Beltran – Implant/ RF/ Frequency readings from the body/ Non- Linear Junction Tests
  - John Kingston - Implant/ RF/ Frequency readings from the body/ Non- Linear Junction Tests
  - EMF Reader/ Signal Analyzers - Units can pick up high levels of Milliwatts per Square (mW/m2) also knows as Radio Frequency (RF), Volts per Meter (V/M) also know as Electrical Frequencies, and Milligauss (MG). All carry radiation. These conditions are commonly associated with individuals that are Targeted
- Medical Evidence
  - MRI
  - CT Scans
  - Ultrasound
  - EEG – Long and Short
  - Videonystagmography (VNG)
  - Nerve Conduction Testing
  - Vestibular Testing
  - Blood Tests to include check for heavy metals in the blood
  - Dr. Lydia Shajenko in New Jersey for medical diagnosis of civilians
  - Dr Michael Ellis Hoffer in Florida for government and intelligence diagnosis
  - Defense Health Agency (DHA) or DoW Warfighter Brain Health facility for military

# How the Cures Act Affects Unauthorized Medical Testing – Change.org Petition

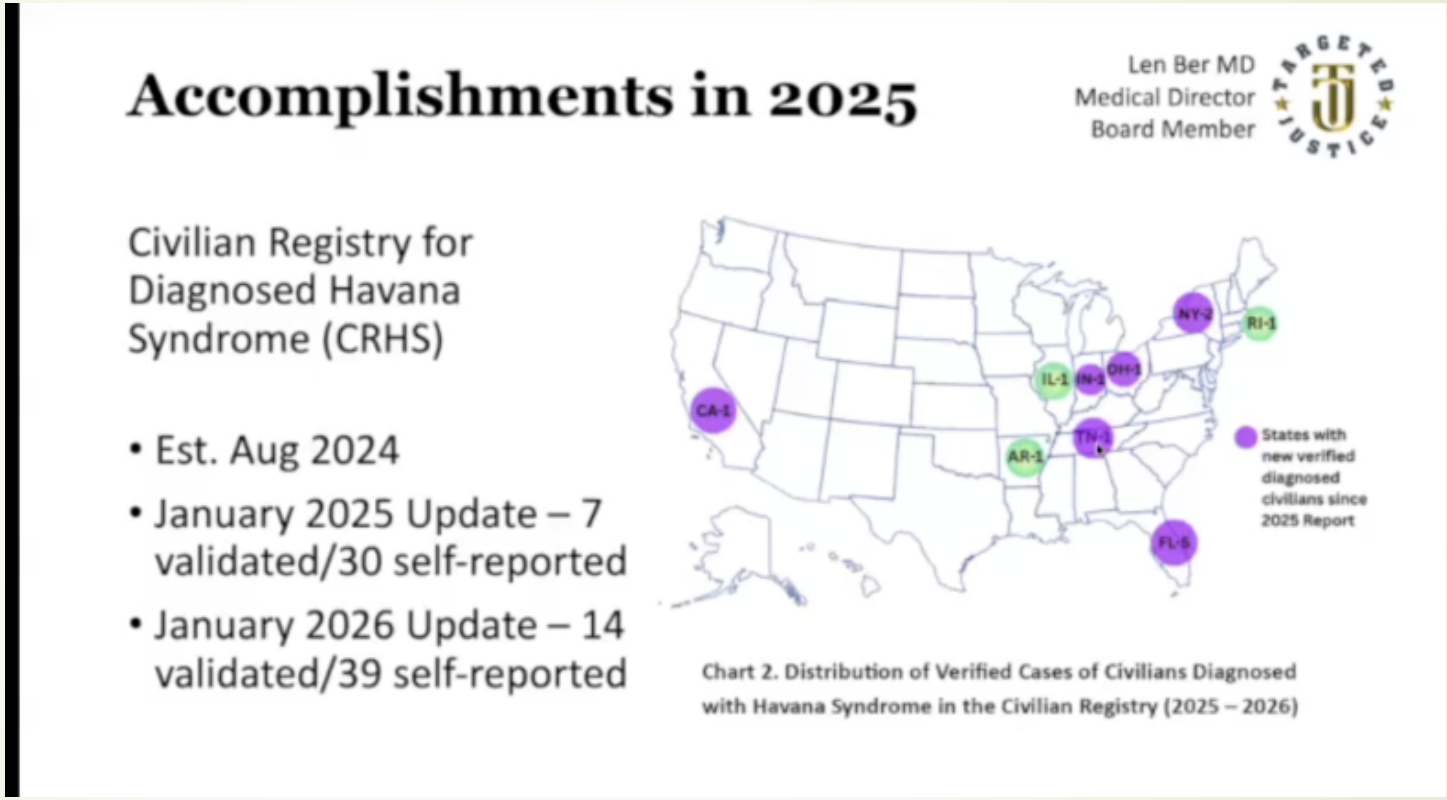

- The 21st Century Cures Act, according to the American Medical Association, promotes **data sharing and access to electronic health information** (EHI) to improve patient care and accelerate medical research. However, the issue of **wireless neural data testing without consent** presents a complex challenge that involves balancing the Cures Act's objectives with fundamental principles of **human subject protection and individual privacy**.
- **Informed consent is a cornerstone of ethical research**, particularly when dealing with sensitive information like neural data. The Cures Act acknowledges the importance of obtaining consent for research involving human subjects. However, it also allows for **waiver or alteration of informed consent** for certain minimal risk clinical investigations, under specific conditions approved by an Institutional Review Board (IRB).
- **Neural data is highly sensitive** and reveals intimate information about an individual's health, mental states, emotions, and cognitive functioning. This raises heightened privacy concerns regarding its collection and use.

# How Could the Patriot Act - Section 702 – Allow Wireless Neurotechnology Based Covert Surveillance

- The PATRIOT Act itself does not directly address or authorize the covert surveillance of individuals using neurotechnology, such as brain activity monitoring.
- However, some aspects of the Act, which were written before the widespread development of current neurotechnology, have raised concerns about potential future applications to such surveillance:
- **Expanding the scope of surveillance**: The PATRIOT Act broadened the definition of what constitutes "foreign intelligence information" and relaxed restrictions on surveillance, particularly under the Foreign Intelligence Surveillance Act (FISA) – Section 702. This expansion of surveillance powers could potentially be interpreted to include accessing and analyzing neural data if it were deemed relevant to national security investigations.
- **Adapting laws to new technologies**: A key goal of the Patriot Act was to update surveillance laws to account for evolving technologies. If courts were to interpret neural data as a form of ”wireless electronic communication" or "information" covered by the Act's provisions, it could theoretically open the door to such surveillance.
- **Potential for broad data collection**: The Patriot Act expanded the government's ability to obtain business records and other data held by third parties, such as internet service providers. As neurotechnology develops, there's concern that similar broad data collection powers could be applied to neural data, potentially without individuals' awareness or consent.
- Key points to consider
- **Lack of explicit authorization**: The PATRIOT Act does not specifically authorize or address the use of neurotechnology for covert surveillance.  This includes the use of V2k and RNM or other wireless forms of neurotechnology
- **Concerns about broad interpretations**: Some fear that the broad language of the Patriot Act and its adaptation to new technologies could be interpreted to justify future neurotechnology surveillance efforts.
- **Ongoing debates and developments**: The use of neurotechnology, particularly in non-medical contexts, raises significant human rights and privacy concerns. These debates will likely continue to evolve as technology advances and legal frameworks are considered to address these issues.
    - Section 702 (FISA) is now set to expire in March 2027 – This should push law enforcement to have a warrant for most surveillance – to include wireless neurological surveillance – if wireless neurological surveillance technology is being used.

# Medical Director, Dr. Len Ber's Havana Syndrome Civilian Database Map

# BER vs. CDC

## Civilians Sue CDC and NIH in Landmark Lawsuit “BER v. CDC”: Demand Equal Diagnostic Guidance and Care for Havana Syndrome/AHI Victims on U.S. Soil

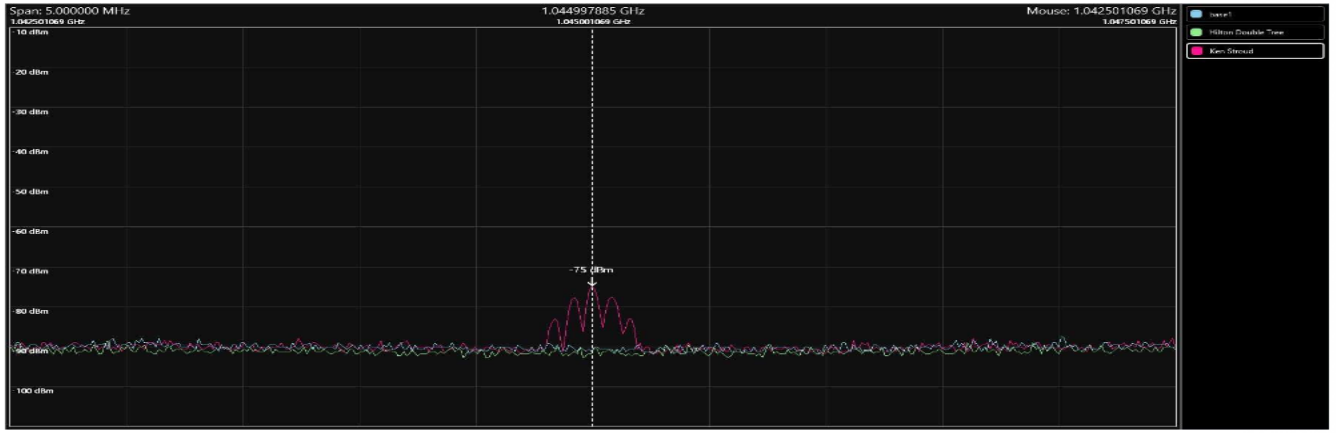

- Quoted from Dr. Len Ber’s Substack article (link below)
- TAMPA, Fla. – July 1 , 2026 – Seven individual civilian plaintiffs together with Targeted Justice, Inc., a 501(c)(3) nonprofit representing civilian victims of Anomalous Health Incidents (AHI), also known as Havana Syndrome, filed a federal lawsuit under the Administrative Procedure Act (APA) in the U.S. District Court for the Middle District of Florida against the Centers for Disease Control and Prevention (CDC), the National Institutes of Health (NIH), and Jay Bhattacharya, M.D., in his official capacity as Director of NIH and Acting Director of CDC.

  The complaint filed on June 23, 2026 (case number 8:26-cv-01822-KKK-LSG) alleges that the agencies have unlawfully withheld and unreasonably delayed their mandatory public-health duties by refusing to recognize, surveil, or issue diagnostic guidance and care protocols for civilians diagnosed with AHI/Havana Syndrome on U.S. soil—despite having done so for federal employees and their families for years. Plaintiffs seek declaratory and injunctive relief compelling the agencies to fulfill their statutory obligations under the APA.

RF Engineer John Kinston's analysis showing Ultra High frequencies coming from my body/brain that are normally used for GPS and Two-Way communication and some military telemetry as an L-Band. Humans should not put off frequencies of this sort.

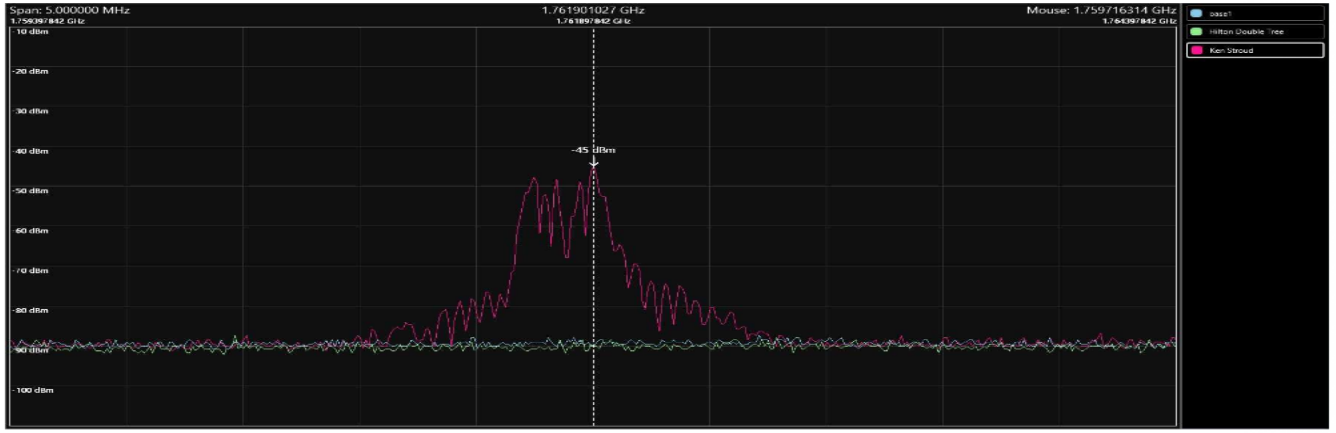

After intense review of all signals captured on the full spectrum analyzer during Ken Stroud scan we found the following signals. They are shown in detail on the following graph.

The following graph shows the signal at 1.04 GHz, that we captured during the scan of Ken Stroud on October 29th 2025.

All the signals shown are baseline and normal for the area except the signal shown in red. The red signal at 1.04 GHz with a magnitude of 15 dBm is only present during the P/N junction scan of Ken Stroud. This is a UHF (Ultra High Frequency) band. It is used for GPS and Two-Way communications.

The following graph shows the signal at 1.76 GHz, that we captured during the scan of Ken Stroud on October 29th 2025.

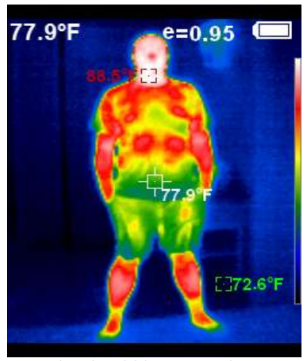

All the signals shown are baseline and normal for the area except the signal shown in red. The red signal at 1.76 GHz with a magnitude of 15 dBm is only present during the P/N junction scan of Ken Stroud. This is a UHF (Ultra High Frequency) band. It used for Two-Way communications and some military telemetry as an L-band.

# AAA Security/ John Kingston's Report Continued

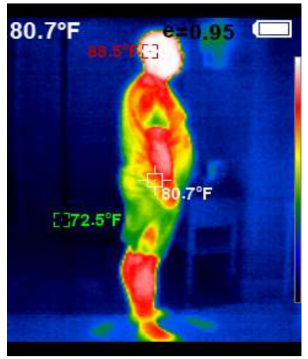

All Procedures were performed and conducted in accordance with the National Standards as set forth and taught by the equipment manufacture. All Engineers and Representatives of AAA that were involved with the procedures are trained and certified on the equipment used and procedures conducted.

Various power settings were used on the Non-Linear Junction Detector equipment during the scan at different depths and levels. After multiple passes are equipment indicated the following at the listed value:

**Location Semiconductor**
Top of Head 25%
Just Below Right Ear 30%
Left Ear 30%
Behind Left Eye 20%
Heart Area 32%
Right Lower Abdomen 10%
Left Lower Abdomen 20%
Brain Stem 35%
Back Of Left Knee 30%

NOTE: Temperatures normal, energy levels within expected range. Except on the Abdomen, reading higher than expected energy levels.

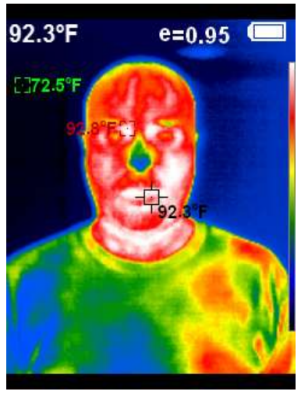

NOTE: Temperatures normal, energy levels reading higher than expected in the Right Ear area.

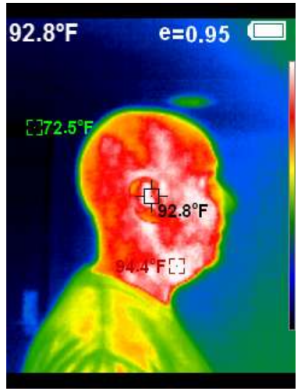

NOTE: Temperatures normal, energy levels reading higher than expected on back of Neck.

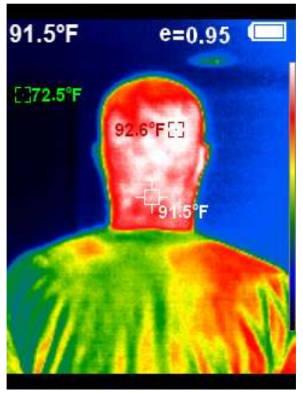

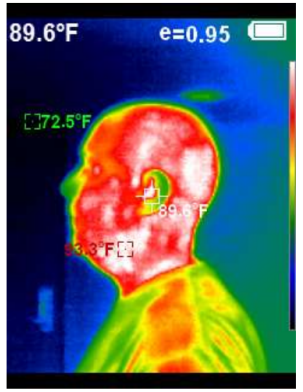

NOTE: Temperatures normal, energy levels normal.

NOTE: Temperatures normal, energy levels slightly higher than expected on Right Ear.

NOTE: Temperatures normal, energy levels slightly higher than expected on back of head.

# Conclusion – Recommendations for the State of Arkansas

- Clearly defined diagnosis and treatment options for Havana Syndrome/ AHI's in Arkansas, as hundreds, if not thousands, are making claims to be affected nationwide
- Support structure for those affected by AHI's/ Havana Syndrome
- Investigations into criminal activity using wireless neurological technology – process for law enforcement to follow that assists those affected by AHI's/ Havana Syndrome – This is not currently happening in relation to my own situation/ or for many others I have communicated with
- Awareness of wireless neurological technology and how it can affect the public
- Disability options available for those affected by Havana Syndrome/ AHI's
- Laws built to protect against Neural Piracy and Electronic Torture that can lead to Havana Syndrome
- Tracking system for those that make claims of experiencing AHI's to gain an understanding of how many may be affected
