Public Experiences and Reported Potential Adverse Health Effects- 5G and related technology

My name is Hailey Wischnak. I am an individual consumer, patient, and healthcare professional in North Dakota writing to address the abuse of 5G and related technology.

The types of wireless technology or RF/EMF sources include mobile phones, Wi-Fi, smart meters, wireless infrastructure, smart dust, and wearable devices.

The nature, duration, frequency, and approximate timing of the reported exposures are detailed as follows

January- April of 2023

I started pleading online on TikTok to keep me safe so I could testify, that I knew what was happening to the kids that were going missing at the border. I believe I was targeted with directed energy weapons by the corrupt DOJ under The Biden Administration, which we know has been weaponized relentlessly against whistleblowers.

I remember being unable to sleep for 6 days straight. I ended up in the lobby of my local mental health office completely debilitated. I couldn't even tell you my own name or where I was from but I do remember telling them I was a victim of MK Ultra. They transferred me to a psychiatric facility where I wasn't able to speak at all with the psychiatrist, but I could make clicking noises with my tongue. Since then, I have become completely mentally disabled. It feels like healing from a brain injury. They first diagnosed me with delusional disorder, then schizoaffective disorder.

I've flown planes and know a great deal about them. Back in March of 2023 I remember seeing a low flying aircraft that was spraying thick clouds of chemtrails over my location. I was searching for a person to contact or number to call to report it, as you're meant to, and was hospitalized for “delusions”. They sent me to the state hospital where I was put on lithium. After they put me on lithium, I began to hear voices for the first time. Microwaves and lithium, what kind of reaction would that have on the brain?

Around May of 2023 I remember sitting at my desk completing some research about missing and murdered indigenous people. Suddenly, I saw lines in my vision as if I had been uploaded into a computer simulation. It lasted only a few seconds but the message was clear, to stop what I was doing and comply.

November 2024

Hearing voices became a daily occurrence after I sent off a letter to Kristi Noem detailing that the United States Government was trafficking children. There was 2 sets of voices, one set trying to help me and the other set trying to destroy me, constantly at battle inside of my head. I began to hear the voices of famous people, friends, and family constantly coercing me to do and say different things. **They're able to do this with 5G.** They target people on government watch lists through infragaurd and fusion centers across the United States. They don't need a microchip implanted in your brain to beam voices in your head. **They use directed energy weapons.**

For a long time, doctors and police have been taught to hospitalize and drug us instead of listening to our pleas for help. I have come in contact with many people in psychiatric facilities who suffer from the same “delusions”. That the government is conspiring and using some form of weapons against them. ***What if these aren't delusions?*** The government may be causing symptoms in a large population with the end goal of getting patients medicated and destroying their credibility, thus neutralizing them. MK Ultra Never Ended, it has been perfected and is still in use today. There is an entire community of individuals who believe they have been targeted. They refer to themselves as targeted individuals, and I am one of them.
The potential adverse health effects experienced include inability to speak as well as forced speech, inability to sleep which caused aggression, psychosis, and audio hallucinations.

Additional comments:
The rollout of 6G will be paired with a pandemic, just like with 5G. **Radiation exposure causes flu-like symptoms.** So what was COVID really?

Supporting information:

V2K is designed to mimic the symptoms of "schizophrenia" listed below.

- Extreme paranoia
- Making you appear delusional to others
- Emotional instability (always sad, angry, paranoid)
- Hyper vigilant (clearly suspicious of everyone)
- Sleep deprivation (wears on your mental health)
- Suicidal and Homicidal Ideation

Understand that Law Enforcement and medical personnel have been trained to believe that you are mentally il since the 1950's if...

- You are hearing voices (V2K)
- You believe that a group of people within your own community are conspiring against you (Gangstalking)
- Anything to do a plot involving the police, CIA, or other government organizations against you

Yes, lithium and lithium-containing items (like lithium-ion batteries) are severely and dangerously affected by microwaves. YouTube · TKOR

How Microwaves Affect Lithium and Batteries

- **Extreme Danger (Lithium-Ion Batteries):** Putting a lithium-ion battery in a microwave causes violent sparking, heavy smoke, plasma creation, and explosions. The metal casing and internal components act as conductors that reflect and concentrate microwave energy, causing rapid internal short-circuiting and extreme heat.
