ALLAN H. FREY – Publications

Comment on article by Koyama et al: J. Radiat. Res., Published in PubMed Commons, 9/2014

Cell phone health risk? The Scientist, Sept. 25, 2012. http://the-scientist.com/2012/09/25/opinion-cell-phone-health-risk/

On the safety of cell phone radiation. British Medical Journal, Nov., 2011. http://www.bmj.com/rapid-response/2011/11/08/safety-cell-phone-radiation

Fate of bioterrorism-relevant viruses and bacteria, including spores, aerosolized into an indoor air environment. Experimental biology and medicine, 229, 4, 2004, 345-350.

Minimizing pathogenic bacteria, including spores, in indoor air. Journal of Environmental Health 65, 5: 19-24, 2003.

Hold the (cell) phone…. Science, 295 [5554] 18 Jan., 2002, 440-441.

Cellular telephones and brain cancer: current research. Environmental Health Perspectives, 109, 5, 2001, A200.

Cellular phones: are they safe to use? The Scientist 14[23]:47, Nov. 27, 2000.

Can public health policy decisions be made on the basis of currently available data on electromagnetic field interactions with biological systems? Comment on Assessment of Health Effects from Exposure to Power-Line Frequency Electric and Magnetic Fields. NIEHS, 1999.

Ethical questions on the use of magnetic field reports. Environmental Health Perspectives, 106, 1998.

Headaches from cellular telephones: are they real and what are the implications? Environmental Health Perspectives, 106, 3, 1998, 101-103.

Comment on air filtration research. Indoor environment review, 7, 12, 1998, 21.

Enhancing contaminant control to mitigate aeroallergies. Annals of allergy, asthma & immunology, 77, 12, 1996, 460-466.

The Internet Biologist. This is a bimonthly column that appeared in the Journal of the Federation of American Societies for Experimental Biology (FASEB Journal). It ran in 1994, 1995, and 1996.

A review of the nature of odor perception and human response. Indoor Environment, 4, 1995, 302-305

Orchids to icebergs. Rags, June, 1995, 58-60.

The courts are considering whether the identity of peer reviewers should be secret. Should we consider it? Editorial in the Journal of the Federation of American Societies for Experimental Biology (FASEB), 9 (8), May 1995, 571.

Control of building air quality. ASHRAE Transactions, v 100 pt 2, 1995.

On the nature of electromagnetic field interactions with biological systems. A. H. Frey, ed. R. G. Landes Co., Austin, 1994

Overview and perspective. Chapter in On the nature of electromagnetic field interactions with biological systems. A. H. Frey, ed. R. G. Landes Co., Austin, 1994

Electromagnetic field interactions with biological systems: an integration of the data on mechanisms with particular reference to cancer. Chapter in On the nature of electromagnetic field interactions with biological systems. A. H. Frey, ed. R. G. Landes Co., Austin, 1994

The revolution in communication for biologists – the Internet. The Journal of the Federation of American Societies for Experimental Biology (FASEB), 7, Oct. 1993, 1206-1207

National Institutes of Health emf research program. The Journal of the Federation of American Societies for Experimental Biology (FASEB), 7, Aug. 1993, 992-993

Electromagnetic field interactions with biological systems. The Journal of the Federation of American Societies for Experimental Biology (FASEB), 7, Feb. 1993, 272-281.

An effective means of minimizing contamination. Proceedings of the IAQ Conference of the NCIAQ, May, 1992, 61-70.

A means to control particle and gaseous contaminants. Proceedings of the 1990 Hong Kong Symposium.

Is a toxicology model appropriate as a guide for biological research with electromagnetic fields? Journal of Bioelectricity, 9 (2), 1990, 233-234.

Interaction of psychoactive drugs with exposure to electromagnetic fields. Journal of Bioelectricity, 9 (2), 1990, 187-196.

Enhancing air purification. Proceedings of the ASHRAE IAQ Conference, 1989, 46-55

Developments in holography. Displays Technology and Applications, 10 (1), 1989, 37-40.

Comment on storms. Sail, June, 1988, 12.

An analytic model of the electrosensory system of the fish. Journal of Bioelectricity, 7 (1), 1988, 1-32.

Using in-duct electrical fields to reduce particulate and gaseous contamination. Microcontamination, June 1988, 27-32.

Commentary on microwaves: the risks of risk research. ISB Newsletter, 2 (1) 1988, 2.

Handling heavy weather - the microburst. Proceedings of the Society of Naval Architects and Marine Engineers (New England Sailing Yacht Symposium), March 1988, 199-202.

Reduction in gaseous contaminant concentration with use of in-duct electrical fields. Proceedings of the National Bureau of Standards, Symposium on Gaseous and Vaporous Removal Equipment Test Methods, Feb. 1988, 15-25.

The evolution and more significant results of biological research with low intensity non-ionizing radiation. Chapter in Modern Bioelectricity, A. Marino, ed., Marcel Dekker, NYC, 1988.

Understanding the microburst phenomenon. Sail, January 1988, 37-42.

Comment on Appleton. The Pennsylvania Lawyer, 9(3), 1987, 35.

Control of a severe odor problem in a building. Proceedings of the ASHRAE IAQ, 1987, 265-274.

The glowing globe. The Pennsylvania Lawyer, 9(1), 1987, 11-19.

Comment on Jauchem and Frei. Journal of Bioelectricity, 1987, 221.

Ethical issues - a letter. Scientific American, December 1986, 4-5.

Modification of heart function with low intensity EM energy. Journal of Bioelectricity, 5, 1986, 201-210.

Reduction of formaldehyde, ammonia, SO2 and CO2 concentrations in air. Journal of Environmental Sciences, July/August 1986, 57-59.

Electrical interactions that control aerosol deposition. Air Conditioning and Refrigeration, 26(10), 1986, 104-107. (In Japanese).

Exposure to rf electromagnetic energy decreases aggressive behavior. Aggressive Behavior, 12, 1986, 285-291.

Odors, aerosols, laminar air flow, and electrostatics. Bulletin of Environmental Contamination and Toxicology, 36, 1986, 701-706.

An evaluation of holograms in training and as job performance aids. Proceedings of the Society of Photo-Optical Instrumentation Engineers: Practical Holography, 615 (T. H. Jeong and J. E.

Ludman, eds.), May 1986.

The influence of electrostatics on aerosol deposition. ASHRAE Transactions, 92, 1986, 55-64.

Differential apomorphine effects. Behavioral Neurosciences, 99, 1985, 776-777.

Response facilitation: Implications for perceptual theory, psychotherapy, neurophysiology, and earthquake prediction. International Journal of Neuroscience, 26, 1985, 47-52.

Perception of moving holographic images while observer is in motion. Proceedings of the Society of Photo-Optical Instrumentation Engineers, 457, 1985.

Microwave bioeffects - a letter. National Law Journal, April 1, 1985.

Psychophysical analysis of microwave sound perception. Journal of Bioelectricity, 4(1), 1985, 1-14.

Distance perception with holographically reconstructed objects. Journal of the Optical Society of America, 2(7), 1985, 1217-1219.

Electrical interactions among contaminants, people, and spaces. Proceedings of the Institute of Environmental Sciences, April 1985, 89-92.

Data analysis reveals significant microwave induced eye damage in humans. Journal of Microwave Power, 20(1), 1985, 53-55.

Modification of aerosol size distribution by complex electric fields. Bulletin of Environmental Contamination and Toxicology, 34, 1985, 850-857.

Perception of moving holographic images while observer is in motion. Proceedings of the society of photo-optical instrumentation engineers, 1984, 457, 20-25.

Morphine effects appear to be potentiated by microwave energy exposure. Journal of Bioelectricity, 3(3), 1984, 373-383.

Modification of the conditioned emotional response in rats living in a 60 Hz electrical field. Bulletin of the Psychonomic Society 22(5), 1984, 477-479.

Possible modification of the blood-vitreous humor barrier of the eye with electromagnetic energy. Journal of Bioelectricity, 3(1-2), 1984, 281-292.

Change in room aerosol concentration by in-duct complex electrical fields. The Journal of Environmental Sciences, Jan/Feb 1984, 34-36.

Dopamine receptors and microwave energy exposure. Journal of Bioelectricity 2(2), 1983, 145-157.

Psychophysical assessment of depth in holographic images. Proceedings of the Society of Photo-Optical Instrumentation Engineers, 391, 1983, 21-22.

Modification of animal room odor by passing the room supply air through a complex electrical field. Bulletin of Environmental Contamination and Toxicology, 31(6), 1983, 699-704.

Comments on "Microwaves and The Blood-Brain-Barrier." Journal of Bioelectricity, 2(1), 1983, 1983, 83-88.

Interpretations of tail pinch behaviors. Bulletin of the Psychonomic Society, 20, 1982, 107-108.

From the laboratory to the courtroom: Science, scientists, and the regulatory process. Chapter in N.H. Steneck (ed.) Risk/Benefit Analysis: The Microwave Case, San Francisco Press, 1982.

Holography: Science in three dimensions. The Science Teacher, Jan 1982, 46-48.

A test of the dopamine hypothesis of microwave energy effects. Journal of Bioelectricity, 1(3), 1982, 305-312.

Bio-behavioral effects of EM waves. In Chapter 2 entitled Bioeffects of Electromagnetic Waves, S. A. Bowhill (ed.) Review of Radio Science 1978-1980, Brussels, Belgium, 1981.

On microwave effects at the blood-brain-barrier. Bioelectromagnetics Society Newsletter, 28, Nov. 1980.

Approaches to earthquake prediction: Implications from biophysical research with electromagnetic fields. In R.E. Buskirk (ed.) Abnormal Animal Behavior Prior to Earthquakes, USGS, Menlo Park, CA, 1980.

Reply to comments (on the SAR article published in Bioelectromagnetics Society Newsletter, 10, 1979). Bioelectromagnetics Society Newsletter, 12, Feb 1980.

Reply to comments (on Holographic Hearing article published in Science, 206, 1979). Science, 209, Sept. 1980.

Holograms as job performance aids. In C.K. Bensel (ed.) Proceedings of the Human Factors Society, Boston, 1979, 492-493.

Motor coordination or balance degradation during microwave energy exposure. Bulletin of the Psychonomic Society, 14(6), 1979, 442-444.

A solid state CFF apparatus. Behavior Research Methods and Instrumentation, 11(6), 1979, 567.

The SAR: A concept whose time came and went in the 1950's. Bioelectromagnetics Society Newsletter, 10, Nov. 1979.

Studies of the blood-brain-barrier. Radio Science, 14(6S), 1979.

Holographic assessment of a hypothesized microwave hearing mechanism. Science, 206, Oct. 1979, 232-234.

Holography: Use in training and testing drivers on the road in accident avoidance. Educational Technology, April 1979, 15-20.

Blood-brain, blood-vitrous humor, and placental barrier modification due to microwave exposure. Biophysical Journal, 21(3), 1978, 110a.

An evaluation of holograms as training and job aids. Human Factors, 20(6), 1978, 661-670.

Holography in driver education, training, testing and research. Department of Transportation, National Highway Traffic Safety Administration HS 803 035, volume 803, issue 35, 1978, 96 pgs.

On microwave hazard: Proposed New York City Standard. Bioelectromagnetics Society Newsletter, 2, Nov. 1978.

Behavioral effects of electromagnetic energy. In: G. D. Hazzard (ed.) Biological Effects and Measurement of Radio Frequency/Microwaves. Washington, DC, 1977.

Human auditory system response to low power density, pulse modulated, electromagnetic energy: a search for mechanisms. J. Microwave Power. 1976, June; 11(2): 141.

Avoidance by rats of illumination with low power non-ionizing electromagnetic energy. Journal of Comparative and Physiological Psychology, 89, 1975, 183-188.

Neural function and behavior: Defining the relationship. Annals of the New York Academy of Science, 247, 1975, 433-438.

Differential biological effects of pulsed and continuous electromagnetic fields and mechanism of effect. Annals of the New York Academy of Science, 238, 1974, 273-279.

Human perception of illumination with pulsed UHF electromagnetic energy. Science, 181, 1973, 356-358.

Cardiac and neural effects of radar wavelengths. Proceedings of the NATO Advisory Group Conference on Adaptation and Acclimatization in Aerospace Medicine, 82, 1972.

The nature of electrosensing in the fish. Biophysical Journal, 112, 1972, 1326-1358.

Psychophysical data on the RF hearing effect. Proceedings of the Institute of Microwave Power, May 1972, 169-173.

Effets de l'energie electro-magnetique de frequence radio et d'hyper-frequence sur le systeme nerveux central. Centre D'Etudes et de Recherches Bio-Physiologiques Appliquees A La Marine. Rapport, 1971, 71-76.

Biological function as influenced by low power modulated rf energy. IEEE Transactions in Microwave Theory and Techniques, 19, 1971, 153-164.

On the penetration of UHF energy through the head. Chapter in: N. L. Wulfsohn and A. Sances, Jr. (eds.). The Nervous System and Electric Currents, Plenum Press, 1971, 11-14.

A transition from an electrode to coaxial cable. Behavior Research Methods and Instrumentation, 2, 1970, 94.

Effects of microwaves and radio frequency energy on the central nervous system. In: S. Cleary (ed.) Biological Effects and Health Implications of Microwave Radiation, Washington, DC, 1970.

Pulse modulated UHF energy illumination of the heart associated with change in heart rate. Life Sciences, 7, 1968, 505-512.

Electromagnetic emission at micron wavelengths from active nerves. Biophysical Journal, 8, 1968, 731-734.
http://www.ncbi.nlm.nih.gov/pmc/articles/PMC1367349/?page=1

Electrical charge distribution and olfactory methodology and theory. Psychological Bulletin, 69, 1968, 390-395.

A coaxial pathway for recording from the cat brain stem during illumination with UHF energy. Physiology and Behavior, 3, 1968, 363-365.

Brain stem evoked responses associated with low intensity pulsed UHF energy. Journal of Applied Physiology, 23, 6, 1967, 984-988.

Modification of the conditioned emotional response by treatment with small negative air ions. Journal of Comparative and Physiological Psychology, 63, 1967, 121-125.

A restraint device for cats in a UHF electromagnetic energy field. Psychophysiology, 2, 1966, 381-383.

Behavioral biophysics. Psychological Bulletin, 63, 1965, 322-337.

Experimental controls and biological experiments with atmospheric ions. Aerospace Medicine, 36, 1965, 121-123.

Human response to VLF electromagnetic energy. Naval Research Review, 1963, 1-8.

Some effects on humans of UHF irradiation. American Journal of Medical Electronics, 2, 1963, 28-31.

Human auditory system response to modulated electromagnetic energy. Journal of Applied Physiology, 17, 1962, 689-692.

Obtaining reliable behavior measurement of ion effects on humans. Quarterly Electronics Digest, 3 (1), 1962, 21-26.

Auditory system response to radio frequency energy. Aerospace Medicine, 32, 1961, 1140-1142.

Air ions and experimental controls. Proceedings of the International Conference on Ionization of the Air, 2, 1961, 1-18.

A rational framework for interpreting the behavioral effects of atmospheric ions. I.R.E. Transactions in Biomedical Electronics, 8, 1961, 12-16.

Human behavior and atmospheric ions. Psychological Review, 68, 1961, 225-229.

A chest respirator for small animals. American Journal of Psychology, 72, 1959, 187-189.

Some personality correlates of subjects who fail to appear for experimental appointments. Journal of Consulting Psychology, 1958, 22(3) 164.

A number of other papers have also been published.

Invited lectures on his research have been presented in numerous countries.

Courses for attorneys were also developed and taught, e.g. How to cross-examine scientists and engineers who are acting as expert witnesses (for the Trial Lawyers Association's Continuing Education Program).
