TO WHOM IT MAY CONCERN

Re: Mrs Simone Simon DOB:23/02/1965
Unbreakable, Rue Des Barras, Vale, Guernsey, GY3 5RF

I am writing as the GP of Mrs Simone Simon to formally confirm that, in my clinical judgment, she should be considered medically exempt from exposure to the smart meter currently installed at her private residence.

Mrs Simon has experienced severe and ongoing health deterioration since the forced installation of the device on the 21st February 2024. Symptoms have included:

- Severe sleep disturbance, sleep deprivation having to stay at family or friends for rest
- Increased PTSD triggers
- Chronic fatigue, dizziness, nerve pain in fingers and toes (infection left big toe), nauseous
- Blistering and skin inflammation and irritation
- Heightened anxiety, palpitations, diagnosed with severe tachycardia for which she is now taking prescribed medication for this new recent diagnosed condition
- Physical displacement from her own home due to symptoms for the radiation/emf exposure

She has been hospitalised with cellulitis to the right arm in October 2024 and has not returned to reside in her home since that time due to continued harm and verified high radiation readings.

She has provided me with pages of information recording the lack of safety data for the installed meter (apparently now confirmed by the States) and in light of Mrs Simon's vulnerable medical status, I recommend that the smart meter be removed or replaced with a non-communicating alternative (e.g. a standard digital meter) as a matter of medical necessity and patient safety.
