INITIAL FREQUENCY REPORT
INDUSTRIAL TOXICOLOGY COMPDARATIVE REPORT ON EMISSION and/or RECEIVING OF FREQUENCY SIGNASL FROM THE HUMAN BODY WITH SCADA APPLICATIONS, MONITORING AND ASSESSMENT OF THEIR ORIGINS
RE: Ms. Kris Durschmidt

The following report is based upon the Industrial Toxicological Investigation, Architectural Applications, Evaluation and Assessment of the following reports as submitted by the following professionals and/or laboratory(-ies):

- Industrial Toxicological overview of Biological Monitoring Test Results as Associated with Specific Technology of Advanced Nano Materials and Bio-sensory Telemetric Technology Origins. Quest Diagnostic Laboratories Data: March-April 2014.
- Frequency Investigation Report. Author: Ms. Melinda Kidder, PI, CESCO and Member NREP/SCADA Special Task Force Committee Dated: May 28, 2014 (Testing performed on Ms. Kris Durschmidt and her residence Monday, May 19, 2014.)

Introduction

Ms. Kris Duschmidt's reports and laboratory test results were evaluated for specific exposures to advanced nano materials, nano-CMOS, Microbivores, micro-cantilevers, MEMS, MNTs, MOSFET<Monte Carlo method, MoleSensing Program, metal oxides, lithography, olfactory and/or other similar type of advanced bio-sensory materials that may be utilized in microwave and/or other similar RF/EMF applications to receive/generate a signal from one's body to a machine or form a machine to the body to another location as applied to SCADA Assessment and Origins applications.

The specific details contained in each of the reports referenced above, which were utilized to generate this report are to be reviewed in their entirety and then apply their findings to this report for a comprehensive whole aspect of the applications utilized as applied to advanced computer applications to nanotechnology under SCADA, telemetry, frequency signals and their application to the person, Ms. Kris Durschmidt. Ms. Durschmidt has stated that she has not had any surgeries, did experience childhood vaccinations and is not on any
