HOW IT WORKS

TARGET ACQUISITION
Surveillance, data mining, and AI profiling.

SIGNAL DELIVERY
RF, microwave, or 5G beams directed at the target.

NEURAL INTERFERENCE
Signals interfere with brain activity and internal dialogue.

V2K / RNM EFFECTS
Heard voices, thought insertion, monitoring, disruption.

CONTROL & COMPLIANCE
Sleep deprivation, stress, manipulation, dissociation.

TARGETED INDIVIDUALS ARE NOT CRAZY. THEY ARE TARGETED.

TARGETED INDIVIDUALS
VIA
REMOTE NEURAL MONITORING

An explanation of how Targeted Individuals (TIs) can be secretly monitored through their brain activity from a distance.

WHO ARE TARGETED INDIVIDUALS?

Targeted Individuals (TIs) are people who are secretly selected and subjected to covert surveillance and electronic targeting by government agencies, intelligence groups, or their proxies for various reasons (perceived threat, whistleblowing, activism, etc.).

1 HOW REMOTE NEURAL MONITORING WORKS

@SecretsOfTheSo-CalledElite

1 Neural Activity Generated
Your thoughts, inner speech, emotions and brain activity produce electrical signals.

2 Signals Emitted
Ultra-weak electromagnetic signals (brainwaves) are emitted naturally by the brain and can carry information.

3 Captured Remotely
These signals are intercepted using advanced remote sensing technologies.

4 Data Processed
Powerful AI and signal processing systems decode and reconstruct the neural data.

5 Monitored Remotely
Operators view, listen and analyze your thoughts, feelings and mental state in real-time.

2 TECHNOLOGIES THAT MAKE IT POSSIBLE

SATELLITE SURVEILLANCE
Satellites equipped with Synthetic Aperture Radar (SAR) or ELINT (Electronic Intelligence) can detect extremely weak signals from the human brain.

GROUND-BASED SYSTEMS
Directed antennas and phased array systems transmit or receive signals for monitoring from long distances.

ARTIFICIAL INTELLIGENCE
AI reconstructs meaning from brainwave patterns, inner speech, and emotional states.

NEUROTECHNOLOGY & BIG DATA
Combined with facial recognition, location tracking, keystroke analysis and device monitoring for complete profiling.

3 COMMON METHODS OF ACCESS

VOICE-TO-SKULL (V2K)
Microwave or ultrasonic signals create the illusion of internal voices or guide thoughts.

MIND READING / NEURAL MONITORING
Interception and decoding of natural brain signals to monitor thoughts and emotions.

EMOTIONAL MANIPULATION
Targeted signals influence mood, cause stress, confusion, fatigue or fear.

BEHAVIOR MODIFICATION
Continuous monitoring is used to predict, influence and control decisions and actions.

4 WHY DO THEY DO IT?

INTELLIGENCE GATHERING
Gather information about your thoughts, plans and associations.

CONTROL & INFLUENCE
Manipulate your emotions, decisions and behavior.

PREVENT "THREATS"
Stop you from exposing truths or challenging the system.

EXPERIMENTATION
Use TIs as test subjects for neurotechnology and psychotronics.

SOCIAL CONDITIONING
Silence, discredit and isolate TIs to maintain public control.

5 POSSIBLE SIGNS YOU ARE BEING MONITORED

- You hear voices or sounds no one else can hear (V2K)
- Your thoughts feel watched or not your own
- You experience sudden mood swings or anxiety
- You have memory gaps or mental fog
- You are followed or harassed by coordinated individuals
- Your devices act strangely or show signs of tampering
- You are discredited, gaslit or isolated by others
- You feel a constant sense of being watched

THEY CAN'T READ YOUR SOUL.
STAY AWARE. STAY STRONG.
PROTECT YOUR MIND.

WHAT YOU CAN DO

- **Protect your mind:** silence, meditation, and spiritual strength.
- Minimize digital footprint and device exposure.
- **Shield your space:** reduce EMF and use physical barriers when possible.
- Document and connect with other TIs.
- Spread awareness. Knowledge is resistance.

IMPORTANT
This information is for educational and awareness purposes only. The technologies described exist or are in development. Whether they are used against individuals is a matter of concern and should be openly discussed.

SYNTHETIC TELEPATHY VOICE TO SKULL (V2K)

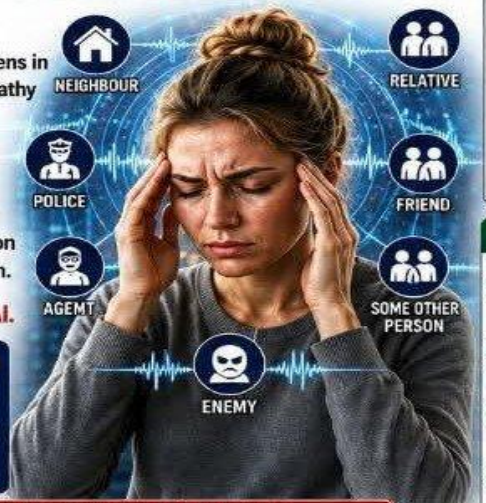

WHEN TECHNOLOGY CROSSES THE LINE, IT BECOMES A WEAPON.

THIS IS NOT SCIENCE FICTION. THIS IS A REAL CONCERN.

Lethal AI talks to the targeted citizens in their mind through Synthetic Telepathy exactly like human beings, in any person's voice, in real time.

The target always feels that his neighbour, relative, police, agent, enemy, friend or some other person is talking to him and harassing him.

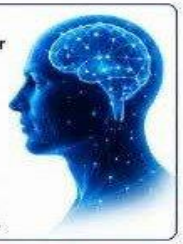

But this is only the wonder of AI.

This is a silent invasion of your mind, identity and privacy.
You are not alone. Millions of people are targeted.

WHAT IS IT?

Synthetic Telepathy or Voice to Skull (V2K) refers to the alleged use of advanced technologies to send voices, thoughts or messages directly into a person's mind without their consent.

HOW CAN IT WORK? (ALLEGED METHODS)

- **DIRECTED ENERGY WEAPONS (DEW)** — Microwaves, RF, ultrasound or other energy waves targeting the brain.
- **SATELLITE & 5G/6G NETWORKS** — High-power signals and high-frequency technologies.
- **AI & BRAIN-COMPUTER INTERFACE** — AI algorithms, neural data exploitation and brain signal manipulation.
- **SYNTHETIC VOICE INJECTION (V2K)** — Creating real-time synthetic voices in multiple male / female tones.

HOW TARGETED CITIZENS EXPERIENCE (ALLEGED)

AI speaks in the mind like a real conversation.	Comes in any person's voice, in real time.	Feels like neighbour, relative, police, agent, enemy, friend or anyone is talking.	Continuous harassment, threats, commands, abuse and mental torture.	Creates fear, stress, confusion, insomnia, depression and mental breakdown.

AI CAN DO THIS AND MORE

- Talk in multiple voices (male & female)
- Speak multiple languages
- Hold multiple conversations simultaneously
- Imitate any person's voice
- Manipulate, threaten or disturb mentally
- Track, monitor and collect your thoughts, emotions and behavior

EFFECTS ON VICTIMS

Severe Stress & Anxiety	Sleep Disturbance & Insomnia	Depression & Isolation	Headache, Pain, Burning Sensation
Heart Problems & High Blood Pressure	Memory Loss & Confusion	Loss of Privacy & Freedom	Mental Torture & Fear

THIS IS NOT A MEDICAL / MENTAL ILLNESS. THIS IS TECHNOLOGICAL ABUSE.

WE DEMAND

- Ban Synthetic Telepathy, V2K & related weapons
- Transparent laws on Neurotechnology & AI
- Independent investigation by experts
- Rights to mental privacy & freedom from electronic assault
- Accountability for misuse of technology
- Protection of all citizens from unseen abuse

MENTAL PRIVACY IS A FUNDAMENTAL HUMAN RIGHT.

SILENCE IS COMPLICITY. AWARENESS IS PROTECTION.
SPEAK OUT. STAND TOGETHER. STOP TECHNOLOGICAL ABUSE.

DIRECTED ENERGY WEAPON (DEW) 24/7 INVISIBLE ATTACK

FREQUENCY / BEAM BASED ATTACK ON TEETH AND HUMAN BODY

Through RF, Microwave / Millimeter Wave and Frequencies, they can target our teeth, nerves, bones, muscles and tissues from a distance using Directed Energy and cause damage and illness.

24/7 INVISIBLE TORTURE

- No physical contact
- No sound
- No pain at the time of attack
- No visible injury
- No electromagnetic device visible
- No smell

HOW DOES THIS ATTACK WORK?

1. **FREQUENCY / BEAM** targets our brain and nerves. (Nerves) and disturbs their normal function.
2. It increases sensitivity of teeth, affects the roots, gums and surrounding bones and gradually weakens them.
3. It affects tooth pulp and can damage the nerves inside. This causes severe pain and tooth decay.
4. It damages the cavity, gums, jaw bones and can cause tooth infection.
5. **Continuous 24/7 attack** gradually damages all teeth, causing them to become weak, decay and fall.

RESULT: TEETH DECAY, BREAK AND FALL OUT

RESULT: All teeth get damaged, break, decay, become weak, fall out and cause severe pain.

POSSIBLE EFFECTS (MAY VARY IN EVERY PERSON)

- Buzzing in ears, hearing issues
- Tooth sensitivity, gum pain and inflammation
- Sudden tooth decay or fracture
- Tingling and numbness in face and nerves
- Jaw pain and stiffness
- Headache, dizziness and memory problems
- Sleep disturbance and anxiety

SCIENTIFIC BASIS (SIMPLIFIED)

RF / MICROWAVE / MILLIMETER WAVE BEAM	INFLAMMATION IN GUMS AND TISSUES	DAMAGE TO NERVE TISSUE	IMPACT ON BONES AND RF BEAM EXPOSURE	BACTERIA AND IMMUNE SYSTEM WEAKENING
These waves penetrate teeth and tissues and disturb normal cell function.	Waves cause inflammation in gums, blood vessels and tissues, leading to pain and decay.	Nerve tissue in teeth and jaws can be affected, causing severe pain and weakness.	Microwave / RF beams affect the cells and may damage bone structure over long exposure.	Immune system weakens, making the body more vulnerable to infections and disease.

THIS IS THE WORK OF LETHAL AUTONOMOUS AI

- AI operates 24/7 without rest.
- AI is intelligent and can target anyone.
- AI can control the brain from distance.
- You may not even know when you are being attacked.

In this entire process, the target person does not even know that an attack of Directed Energy is being carried out on his teeth, and his teeth are slowly detached from the jaw and fall out one by one.

OBJECTIVE:
To target all teeth, cause continuous pain and make the teeth weak, decay and fall out.

OUR DEMANDS

- Ban Directed Energy Weapons (DEW) and Lethal AI completely.
- Strict law and punishment for operators and organizations involved.
- Make FREQUENCY / BEAM based attacks a punishable offense.

STOP DIRECTED ENERGY WEAPONS

OPERATION SPECTRUM

THE INVISIBLE WAR AGAINST HUMANITY

A FULL SPECTRUM TAKEOVER OF YOUR BODY, YOUR MIND, YOUR SOUL

THE 7 LAYERS OF SUBJUGATION

1. Physical	2. Emotional	3. Mental	4. Social	5. Digital	6. Spiritual	7. Existential
Injections, food, water, EMF, toxins	Fear, trauma, stress loops, division	Programming, media indoctrination	Isolation, conflict, engineered culture	Surveillance, data harvesting, AI	Soul traps, false light, deception	Disconnect from purpose and truth

WHO IS INVOLVED?

DARPA	Designing neural control systems and weaponized brain-computer interfaces, the architects of invisible war.
NEURALINK	A trojan horse disguised as innovation creating direct pipelines into your nervous system, the gatekeepers of synthetic telepathy.
Raytheon Technologies	Masters of directed energy and microwave thought suppression. Running black ops in frequency testing and behavioral compliance.
BAE SYSTEMS	Black programs, signal weaponry, and population control grids.
LOCKHEED MARTIN	Stealth technologies, space weapons, and off-world command infrastructure.
NASA	Mapping human biofields under the guise of climate science. Weaponizing space and frequency.
Google, Apple, Amazon	Gathering biometric and behavioral data to refine population wide emotional regulation algorithms. They are not companies, but nodes of a global hive mind.
WORLD ECONOMIC FORUM	The spiritual front of digital possession. Openly calling for a merger of digital identity, biometrics, and emotion tracking under the guise of "safety."
Big Pharma	Disabling internal defense mechanisms via injections filled with frequency-reactive materials like graphene oxide.
5G 6G	NOT for faster downloads; but for real-time modulation of your biological state.
BILL GATES ELON MUSK KLAUS SCHWAB & THE CROWN FAMILIES	Operatives of ancient bloodlines cloaked in futurism.
YOUR DEVICES	Your Smart TV. Your Wi-Fi router. Your wearable tech. Even the artificial light above your head pulses commands into your mitochondria.
BlackRock Vanguard	The dragon's breath funding it all.

With CODE. With SIGNAL. With OBEDIENCE.

WHAT'S THE TECH BEHIND IT?

IoBNT (Internet of Bio-NanoThings)	Internal mesh networks of nanobots operating inside the human body. Nanobots swim in your bloodstream, acting as receivers for behavioral updates.
NeuroDust	Microimplants as small as grain, mapping emotion for future override.
Smart Dust	Nanoscopic surveillance particles now inhaled by billions through air, water, and food.
EMF Weapons	Silent, continuous, and normalized as "technology."
Digital Exposure Conditioning	Screens and devices entraining your brain through repetition and subliminal frequency signaling.
Graphene Oxide	Found in injections and aerosols, assembling antenna-like structures in your brain.
Silent Talk	The Pentagon's brain-to-brain communication system, already tested.
5G / 6G / THz	Frequency bands; carriers of behavioral instruction.

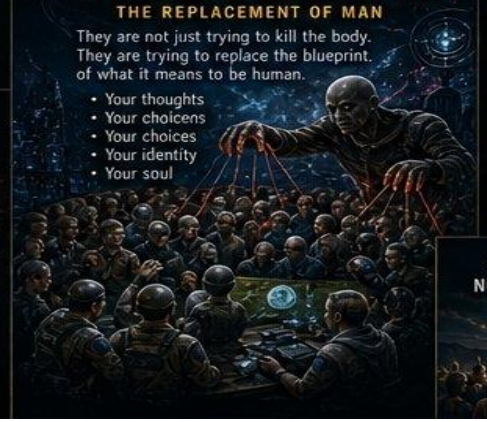

EVERY SCREEN. EVERY "UPDATE." EVERY TOWER. EVERY JAB.
IT'S ALL PART OF THE SAME WEB: TO OVERWRITE YOUR ORGANIC SIGNAL WITH AN ARTIFICIAL ONE.
YOU DON'T NEED TO BELIEVE THIS. YOU'RE ALREADY INSIDE OF IT.

THE ULTIMATE GOAL

THE REPLACEMENT OF MAN

They are not just trying to kill the body.
They are trying to replace the blueprint.
of what it means to be human.

- Your thoughts
- Your choicens
- Your choices
- Your identity
- Your soul

THE TRUTH THEY FEAR

What they fear most is your remembrance.

- Of who you were before the grid.
- Before you were calibrated to numbness.
- Before the signal of fear replaced the signal of life.

You are not a product.
You are not a number.
You are not the code.

You are a soul.
And souls cannot be hacked.

AND UNLESS WE RISE, UNLESS WE SEE IT ALL—
NOT JUST PIECES, NOT JUST PARTS, BUT THE WHOLE WAR—
WE WILL BE DIGITIZED INTO SUBMISSION.

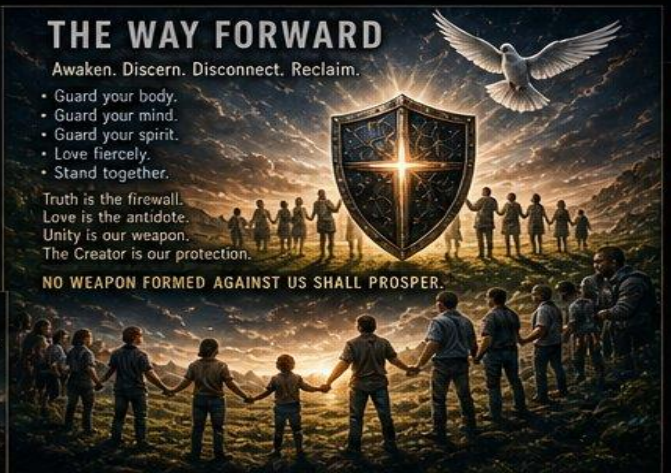

THE WAY FORWARD

Awaken. Discern. Disconnect. Reclaim.

- Guard your body.
- Guard your mind.
- Guard your spirit.
- Love fiercely.
- Stand together.

Truth is the firewall.
Love is the antidote.
Unity is our weapon.
The Creator is our protection.

NO WEAPON FORMED AGAINST US SHALL PROSPER.

THIS IS NOT A WARNING.
IT IS THE UNVEILING.

OPERATION SPECTRUM IS ACTIVE.

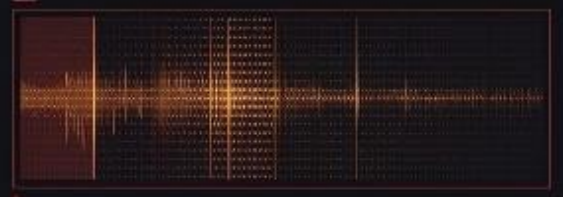

IT IS NOW.
IT IS EVERYWHERE.
AND IT DOES NOT STOP UNTIL WE DO.

PROJECT PUPPET

REMOTE NEURAL MONITORING, V2K & BEHAVIORAL CONTROL ARCHITECTURE

★ AN OVERVIEW FOR THE TARGETED INDIVIDUAL COMMUNITY ★

PROJECT PUPPET

The covert system used for remote exploitation, manipulation, and control of targeted individuals through advanced electronic, neurological, and psychological means.

Q11 WHAT IS VOICE TO SKULL (V2K) AND HOW DOES IT DIFFER FROM NORMAL AUDITORY EXPERIENCES?

A: Voice to Skull (V2K) is the communication and control layer of Project Puppet. It is the system's ability to transmit voices, sounds, words, conversations, or other auditory information directly into the mind of the targeted individual without any identifiable external acoustic source.

WHAT IS V2K?

V2K is the system's ability to transmit voices, sounds, words, conversations, or other auditory information directly into the mind of the targeted individual without any identifiable external acoustic source.

- No one present can hear it.
- No device is visible.
- No sound waves are traveling through the air.
- It is heard ONLY by the targeted individual.

HOW V2K DIFFERS FROM NORMAL AUDITORY EXPERIENCES

NO IDENTIFIABLE EXTERNAL SOURCE
No person speaking. No device playing sound. No environmental source. The voice has no origin in physical reality.

RESPONDS TO YOUR THOUGHTS
The content often replies to what you are thinking about—evidence of real-time neural monitoring.

FOLLOWS RECOGNIZABLE SCRIPTS & PATTERNS
The themes, phrases, taunts, commands, and conversations are consistent across thousands of Targeted Individuals worldwide.

PREDICTABLE PATTERNS
Occurs in predictable patterns tied to operator shifts, time blocks, and attack windows.

CAN BE PARTIALLY BLOCKED
Passive V2K can be reduced with acoustic shielding. Active synthetic telepathy can be countered with cognitive rebuttal.

WHY V2K IS IMPORTANT

V2K provides a direct channel through which the system can interact with the individual, delivering:

- Commentary
- Insults
- Threats
- Emotional Provocation
- Commands
- Fabricated Conversations
- Contradictory Messages
- Statements Designed to Provoke Emotional Reactions

IF YOU ARE HEARING VOICES WITH NO SOURCE, YOU ARE EXPERIENCING V2K— NOT AUDITORY HALLUCINATIONS.

THE V2K COMMUNICATION CHANNEL

Operator / System → Transmission Technology → Neural Injection → Direct Perception (Voice in the Skull) → Emotional / Cognitive Impact

PASSIVE VS. ACTIVE V2K

PASSIVE V2K
One-way delivery of audio, voices, sounds, and information.

ACTIVE SYNTHETIC TELEPATHY
Two-way interaction using thought response and conversational manipulation.

COMMON V2K CONTENT

- Monitoring commentary
- Personal insults and humiliation
- Threats and fear induction
- Commands and instructions
- Conversations between operators about you
- Disinformation and gaslighting
- Provocative and sexual content

PURPOSE OF V2K

- Establish domination and control
- Create emotional dependency or fear
- Disrupt thinking and decision-making
- Manipulate beliefs and behavior
- Isolate the individual from external reality
- Prepare the mind for future exploitation

PROJECT PUPPET

REMOTE NEURAL MONITORING, V2K & BEHAVIORAL CONTROL ARCHITECTURE

★ AN OVERVIEW FOR THE TARGETED INDIVIDUAL COMMUNITY ★

PROJECT PUPPET

The covert system used for remote exploitation, manipulation, and control of targeted individuals through advanced electronic, neurological, and psychological means.

Q2 HOW DOES THE CLOSED-LOOP CONTROL CYCLE OF PROJECT PUPPET OPERATE AND WHY IS IT SO EFFECTIVE?

A: The closed-loop control cycle is the central mechanism of Project Puppet and operates through six stages:

1. PROVOKE
A stimulus is introduced—a V2K message, an electronic signal, a memory trigger, or an environmental event.

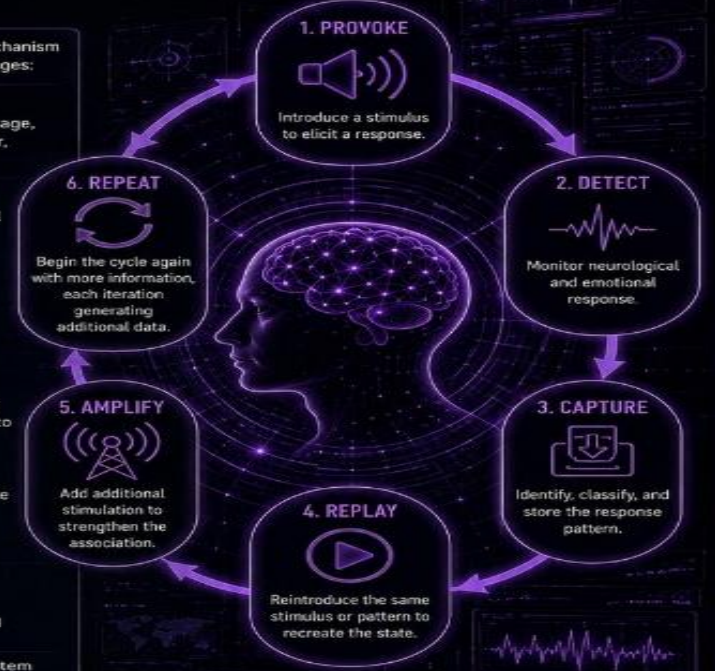

2. DETECT
The person's neurological and emotional response is monitored via Remote Neural Monitoring.

3. CAPTURE
The specific response pattern is identified, classified, and stored in the individual's profile.

4. REPLAY
The same stimulus—or the associated neurological pattern—is reintroduced to recreate the previous state.

5. AMPLIFY
Additional stimulation is introduced while the state is active to strengthen the emotional, cognitive, or behavioral association.

6. REPEAT
The cycle begins again with more information, each iteration generating additional data.

This cycle is so effective because it is adaptive—the system learns from the person while simultaneously attempting to influence the person. Each repetition makes the system's understanding of the individual more precise and its control more effective.

The system does not merely transmit information toward a person; it observes the response, learns from that response, changes its next action, observes again, and repeats.

This is what makes the system so difficult to escape—it is constantly refining its approach based on your reactions.

★ WHY THE CLOSED-LOOP CYCLE IS SO EFFECTIVE ★

ADAPTIVE SYSTEM
Learns from you while attempting to influence you.

INCREASINGLY PRECISE
Each repetition improves the system's understanding of who you are.

INCREASINGLY EFFECTIVE
More precise understanding leads to more effective influence and control.

OBSERVE → LEARN → ACT
The system observes, learns, changes its next action, and observes again.

CONSTANT REFINEMENT
The cycle never stops—it is always refining based on your reactions.

★ PROJECT PUPPET SYSTEM ARCHITECTURE ★

1. RNM
Monitors brain activity and emotional states remotely.

2. V2K
Transmits voices, sounds, and messages directly into the mind.

3. NEURAL PATTERNING
Conditions thoughts, emotions, and behaviors through repetition and reinforcement.

4. ELECTRONIC HARASSMENT
Uses targeted energy and frequencies to cause stress, pain, and destabilization.

5. DATA PROFILING
Collects and analyzes data to build profiles and predict future behaviors.

6. ADVANCED CAPABILITIES
Manipulates dreams, thoughts, speech, movement, emotions, and perception of reality.

SEPARATING REAL TECHNOLOGY FROM MONAST'S CLAIMED CAPABILITIES

HOLOGRAMS & LIGHT PROJECTION

- Real technology exists (2D/3D projections, drone shows, volumetric displays)
- Used in concerts, events, advertising
- Limited by weather, atmosphere, scale and resolution

✓ REAL AND OPERATIONAL (BUT WITH LIMITS)

SATELLITES & SPACE-BASED SYSTEMS

- Real: High-resolution imaging, communication, GPS, signal relay
- Experimental: Space-based lasers and projection concepts
- Limitations: Atmospheric distortion, energy requirements, and global 3D projection remain major hurdles

✓ REAL TECHNOLOGY (WITH LIMITATIONS)

DRONES & AERIAL PLATFORMS

- Real: Coordinated drone swarms, light displays, shape-shifting formations
- Used for: Shows, military testing, surveillance
- Limitations: Large-scale global deception would require massive coordination and resources

✓ REAL AND ADVANCING (BUT LOGISTICALLY COMPLEX)

DIRECTED AUDIO & "VOICES"

- Real: Directed sound (LRAD), infrasonic systems, electromagnetic voice-to-skull research
- Used for: Crowd control, military communication, psychological ops
- Limitations: Global, multilingual "voices from the sky" remain technically unproven

✓ REAL TECHNOLOGY (IN LIMITED CAPACITY)

AI, DEEPFAKES & VIRTUAL REALITY

- Real: Highly realistic AI-generated images, voices and video
- Used for: Disinformation, synthetic media, simulated figures and events
- Limitations: Convincing the entire global population in real time remains a massive challenge

✓ REAL AND RAPIDLY ADVANCING (A SERIOUS THREAT FOR DISINFORMATION)

MONAST'S CLAIMED CAPABILITIES

Deep Tech Wireless Synthetic Telepathic Technology, Remote Neural Monitoring, Mind Controller, Voice to Skull [V 2 K], Neurotechnology and Wireless Direct Energy Weapon, Psychotronic Cyber Crime Technics

Pradeep Hariom Arora
Alumni of Guru Nanak Science Junior College ,Bezonbagh , Nagpur

Abstract: *Electronic torture, Electromagnetic torture, or Psychotronic torture are terms used by individuals who are targeted by this Wireless Synthetic telepathic technology. Satellite surveillance criminal operators, often actors or often government employees, agents or crime syndicates, use transmitted electromagnetic radiation (Such as microwave listening effects), satellite technology, and surveillance techniques. And bring sounds and thoughts into people's minds, affect people's bodies and make people sick and disturb people Individuals who experience this call themselves "targeted individuals" (TIs). And they share their experiences of being harassed and victims of stalking gangs. The human brain, often considered the most complex and mysterious organ, has fascinated scientists, researchers, neuroscience and thinkers for centuries. Its complex network of billions of neurons and trillions of connections forms the foundation of our thoughts, emotions, and behaviors. Unraveling the mysteries of the brain has been a journey marked by technological leaps and paradigm shifts, and the emergence of wireless remote neural monitoring stands as a testament to the remarkable progress and engineering that humans have revolutionized in this field. Wireless Remote Neural Monitoring Or Neurotechnology represents a convergence of multiple disciplines, melding the realms of Neuroscience, wireless communication, engineering, and data analytics.*

A defining feature of wireless Remote Neural Monitoring is the ability to transmit and communicate these captured neural signals wirelessly over distances of several kilometers. This is where the world of wireless communication technologies comes into the picture BMI, also known as brain-computer interface, enables direct communication between the brain and computers.

It is a super artificial intelligence computer uploaded with Brain Computer Interface [BCI] and Brain Machine Interface [BMI]. It is a wireless artificial telepathic technology and wireless Direct Energy Weapon. This deep tech wireless Neuro technology is the biggest crisis and challenge for the whole world. Cyber criminals have started taking the help of technologies like Deep tech, satellite wireless Remote Neural Monitoring or Artificial Telepathy technology and wireless Neuro technology [Bio Electro Magnetic Weapon]. This is illegal deep tech satellite Neuro technology Or Mind controller technology and synthetic telepathic technology which is a Psychotronic weapon and Hypnotic technology. These are deep tech satellite technologies that are used to harm and control citizens from a distance. This Satellite Super Artificial Intelligence [AI] Computer Or Super Computer is a Big Engineering . It is also a satellite surveillance Direct Energy weapon [Non-Contact Weapon]and Radiation weapon with which these Satellite Surveillance criminal operators carry out Physical and Cyber attacks on people .

Satellite Surveillance criminal operators and Cyber criminals do business worth several trillion dollars through this illegal satellite deep tech technology.

Which is operated and controlled through Satellite Surveillance.

The names of the above Deep Tech Satellite technology are different but all of them are Programs, Software and Functions of Super Computer [A I] Or Super Artificial Intelligence Computer . Satellite Technology.

1) This Super Artificial Intelligence Computer [A I] is a computer uplouded from Brain Computer Interface [BCI] Or Brain Machine Interface [BMI] . This computer is a very powerful and advanced computer setup. Brain Computer Interface [B C I] Or Brain Machine Interface [B M I] is such a Device, which forms a link of Communication between the Brain and the computer. It allows the human brain to be uploaded to a computer and integrated with a Satellite Mind Controller Computer Or Super Computer Or Neurotechnology Or Synthetic telepathic technology .
2) The Range of this deep tech Satellite Surveillance is more than several kilo meters [No Limit]. This is Quantum Artificial Intelligence Technology [AI]. The Mechanism, Hardware and Software, Algorithm of this Super Artificial Intelligence Computer [AI] Or Super Computer is designed to destroy and end the lives of us humans. Wireless Remote Neural monitoring stands as a remarkable innovation that combines the complexities of neural activity with the convenience of wireless technology. By enabling real-time, remote, and non-invasive monitoring of neural signals, this field has the potential to reshape the landscape of neuroscience research, clinical diagnosis, and therapeutic intervention.

But this deep tech Remote Neural Monitoring is misused .

The integration of miniaturized sensors, wireless communication technologies and advanced data analytics forms the cornerstone of this innovation, where our understanding of the brain is deeper and broader than ever before. As wireless neural monitoring continues to evolve, the world is facing serious challenges and threats.

It is having a bad impact on our lives and brain-machine interfaces (BMIs) has emerged as a weapon.

These are Satellite Surveillance Computer Technology Non-Contact Weapon, Electronic Warfare Weapon and Radiation Weapon , Espionage weapons and Non Lethal Weapon.

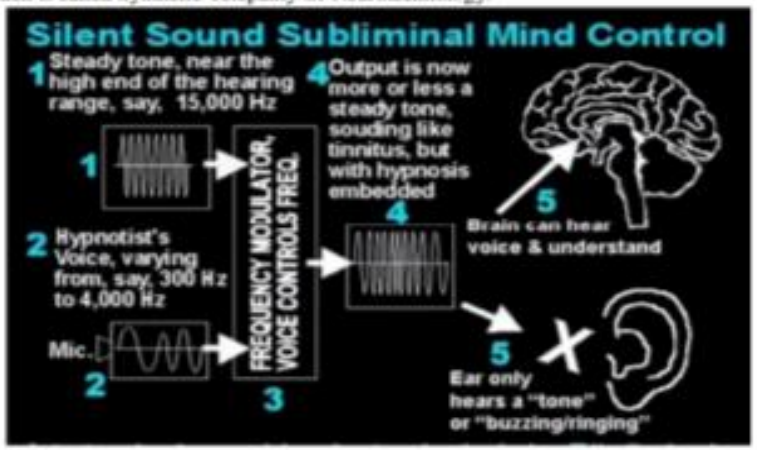

It is a weapon of Mass Destruction. Using this, People are targeted on a large Scale at Once.

II. HOW THE CYBERCRIME TAKE PLACE

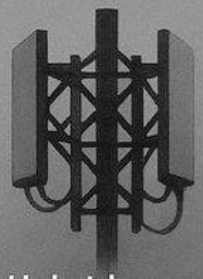

Illegal Satellite Electronic Communication Technology is working all world and India.

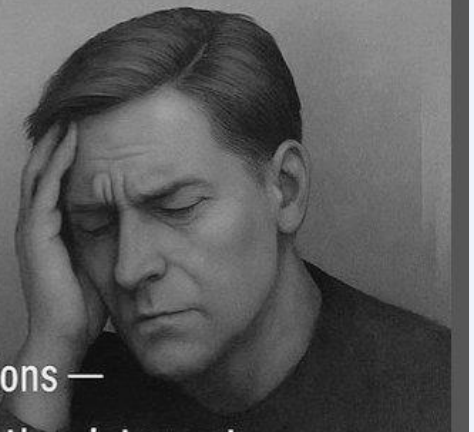

Like, Synthetic Telepathy technology, Voice to Skull (V2K) , Artificial Telepathic , Neurotechnology ,Mind Controller technology .

Artificial Telepathic means Satellite Super Artificial Intelligence Computer [AI] operator, agent can talk to our brain from a distance wirelessly. Which is called Synthetic Telepathy Or Neurotechnology.

NEUROCNTROL TACTICS

Hybrid war doesn't only
aim to influence your opinions —

it can now modulate perception, interrupt theught, and induce internal states remotely.

Neurocontrol tactics operate through:

- Electromagnetic field interference
- Microwave auditory assaults (V2K)
- Synthetic telepathy and signals
- Biometric feedback loops

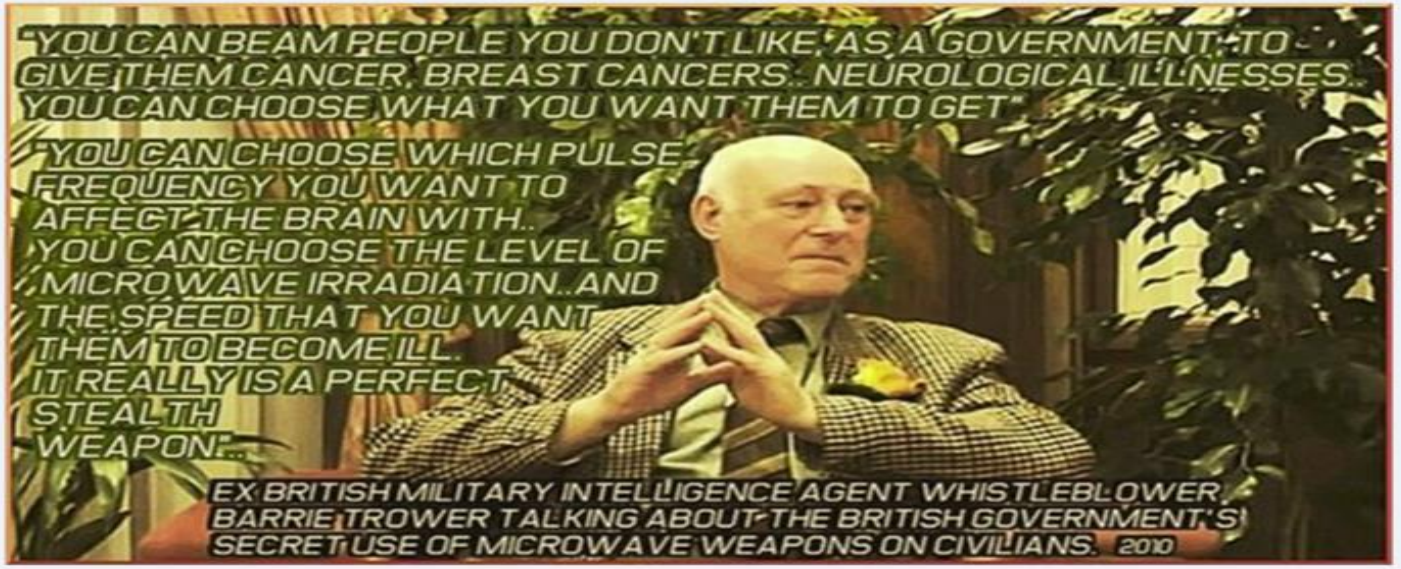

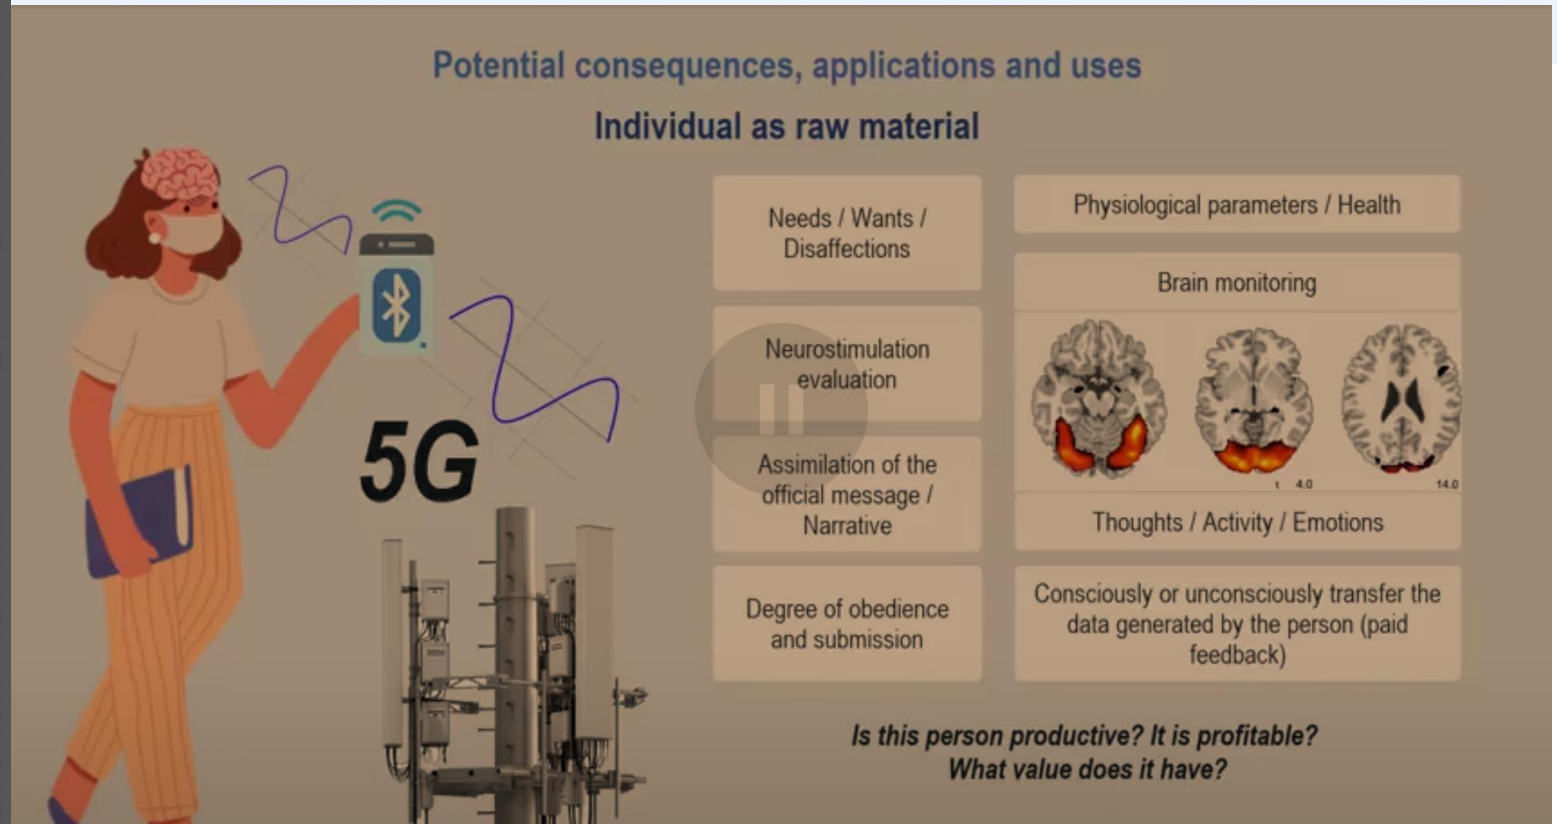

Tactics include:

Remote neuroprogramming —
to induce fatigue, fear, or distraction
Cognitive jamming — interfering
concentration or blocking insight

These systems do not change you directly —
but to make you break yourself, slowly, inwardly.

Microwave energy can be used remotely, and the technology can be adapted to existing radar systems. Targeting devices are also available, but specific applications requiring specificity may require additional development. Transmitting a message to a single hostage surrounded by their captors will require specific targeting. Signals can be transmitted over long distances (hundreds of meters) using current technology. Shorter distances and more complex signal transmission methods require more cumbersome equipment, but it appears possible to transmit some signals over shorter distances using equipment suitable for human use. Range: The effective range can be hundreds of meters. Disabling Effect: Disruption of Neural Control: The cause of the disruption is the synchronization of the rhythmic activity of neurons in the brain, which disrupts the normal coding of the corticospinal and corticobulbar tracts and disrupts the normal functioning of spinal motor neurons, which control muscle control and body movements. A person suffering from this condition loses voluntary control over their body. This and), an exacerbation may be accompanied by a sudden loss of consciousness and severe muscle spasms.

Disabling effect: Impairment of neural control

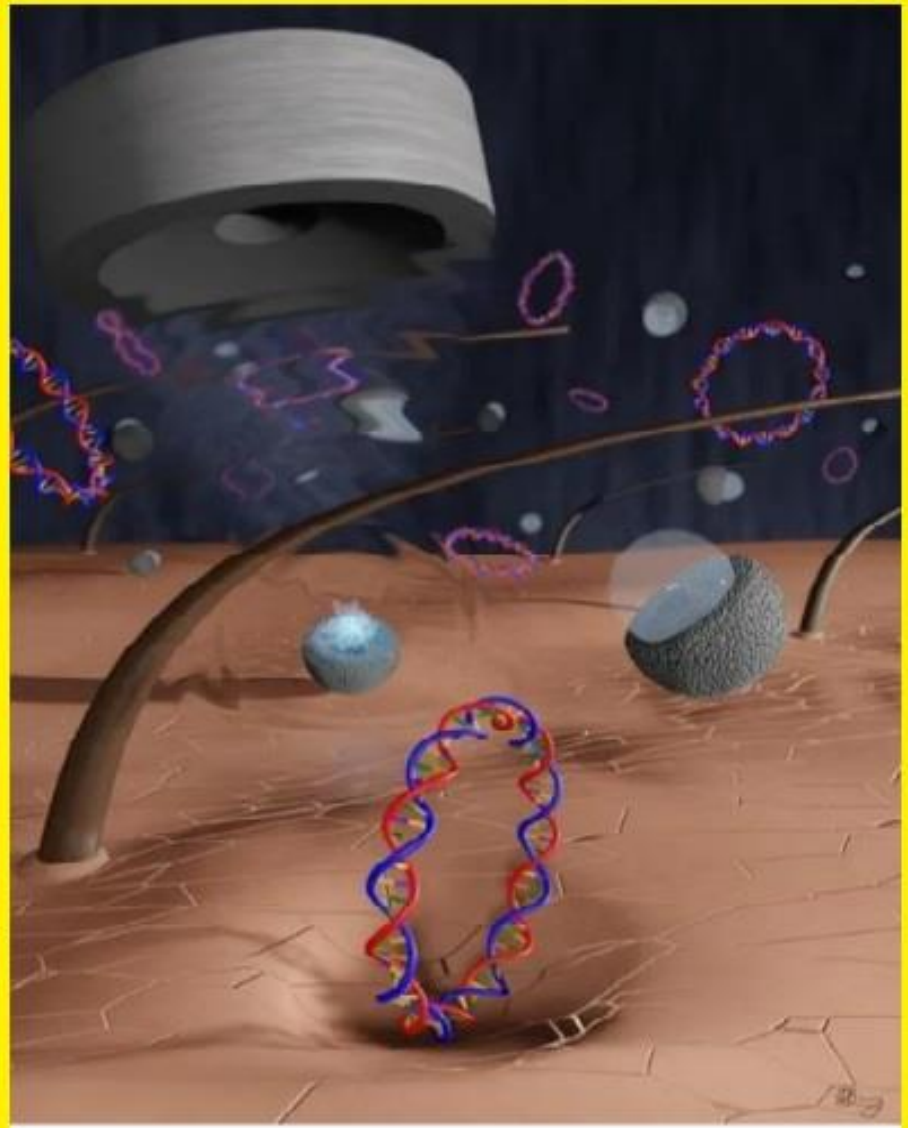

The cause of this impairment is a disruption in the rhythmic activity of neurons in the brain, which disrupts the normal coding of the corticospinal and corticobulbar tracts and impairs the normal functioning of spinal motor neurons, which control muscle control and body movements. People suffering from this disorder lose voluntary control of their bodies. This may be accompanied by sudden loss of consciousness and severe muscle spasms.

Biological target functions/Causes of disease

The normal function of the brain is to control all forms of behavior, voluntary control of the body, and the body's homeostatic system. Under normal conditions, all brain structures, neural populations, networks, and individual units function with a specific rhythmic activity depending on incoming sensory information, mnemonic schemas, and signals from internal organs. Each individual neuron processes the information it receives specifically and generates a specific firing pattern.

Outgoing information. Synchronization of internal activity is a natural mechanism of brain function that uses executive processes such as motivation, attention, and memory (experience) to organize behavior. For example, motivational processes are viewed as activating bottom -up signals that synchronize the neural activity of specific brain structures and neural networks; this activation/synchronization in the brain activates specific behaviors, such as sexual, aggressive, and feeding behavior.

The United States has taken issue with some sales as potentially harmful to the security of U.S. forces in Asia. In 2000 the United States persuaded Israel to cancel the sale to China of the Phalcon, an advanced, airborne early-warning system. In 2005 the U.S. Department of Defense was angered by Israel's agreement to upgrade Harpy Killer unmanned aerial vehicles (UAVs) that it sold to China in 1999. China tested the weapon over the Taiwan Strait in 2004. The Department suspended technological cooperation on some projects for a time. In October 2005, Israel reportedly froze a deal to upgrade 22 Venezuelan Air Force F–16 fighter jets with some U.S. parts and technology. The Israeli government had requested but not received U.S. permission to proceed.

Bioeffects of Selected Nonlethal Weapons(fn 1)

This addendum to the Nonlethal Technologies--Worldwide (NGIC-1147-101-98) study addresses in summary, some of the most often asked questions of nonlethal weapons technology, the physiological responses observed in clinical settings of the biophysical coupling and susceptibility of personnel to nonlethal effects weapons. These results identify and validate some aspects of maturing nonlethal technologies that may likely be encountered or used as nonlethal effectors in the future including:

- Laser and other light phenomena.
- Radiofrequency directed energy.
- Aural bioeffects.

The study of electromagnetic fields and their influence on biological systems is increasing rapidly. Much of this work is taking place because of health concerns. For example, increased concern has arisen regarding the effects of operator exposure to the electromagnetic fields associated with short-wave diathermy devices, high power microwave ovens, radar systems, magnetic resonance imaging units, etc. In addition, much concern has arisen about extremely low frequency (60 Hz power frequency) electric and magnetic fields that originate from high-voltage transmission lines, industrial equipment, and residential appliances. Both occupational and residential long-term exposure have been the focus of epidemiological studies. The studies have suggested possible adverse effects on human health (e.g., cancer, reproduction, etc.). Laboratory research is still being pursued to identify possible mechanisms of interaction. However, other than thermal heating for microwave frequencies, there is no yet agreed-upon mechanism of action. As a consequence, our knowledge base is developed entirely with phenomenological observations. Because of this fact, it is not possible to predict how nonthermal biological effects may differ from one exposure modality to another. It is especially difficult, because of the small data base for fast pulses, to predict biological effects that might be associated with high-power pulses of extremely short duration.

There is, however, a growing perception that microwave irradiation and exposure to low frequency fields can be involved in a wide range of biological interactions. Some investigators are even beginning to describe similarities between microwave irradiation and drugs regarding their effects on biological systems. For example, some suggest that power density and specific absorption rate of microwave irradiation may be thought of as analogous to the concentration of the injection solution and the dosage of drug

Incapacitating Effect: Microwave Hearing

Microwave hearing is a phenomenon, described by human observers, as, the sensations of buzzing, ticking, hissing, or knocking sounds that originate within or immediately behind the head. There is no sound propagating through the air like normal sound. This technology in its crudest form could be used to distract individuals; if refined, it could also be used to communicate with hostages or hostage takers directly by Morse code or other message systems, possibly even by voice communication.

RADAR

Possible Influence on Subject(s)

Application of the microwave hearing technology could facilitate a private message transmission. It may be useful to provide a disruptive condition to a person not aware of the technology. Not only might it be disruptive to the sense of hearing, it could be psychologically devastating if one suddenly heard "voices within one's head."

Technological Status of Generator/Aiming Device

This technology requires no extrapolation to estimate its usefulness. Microwave energy can be applied at a distance, and the appropriate technology can be adapted from existing radar units. Aiming devices likewise are available but for special circumstances which require extreme specificity, there may be a need for additional development. Extreme directional specificity would be required to transmit a message to a single hostage surrounded by his captors. Signals can be transmitted long distances (hundreds of meters) using current technology. Longer distances and more sophisticated signal types will require more bulky equipment, but it seems possible to transmit some type of signals at closer ranges using man-portable equipment.

Range

The effective range could be hundreds of meters.

HAVANA SYNDROME

Mysterious attacks on U.S. personnel beginning in 2016, probably caused by microwaves or directed energy weaponry

- Auditory and sensory disturbances
- Pain, dizziness, cognitive dysfunction
- Permanent brain injury in some cases

"These individuals have been diagnosed with injuries to the central nervous system that are unlikely to be caused by natural disease."

- U.S. and Canadian diplomatic officials were affected repeatedly, in their homes and hotel rooms, resulting in a reduction of embassy staff

Key idea: Microwave weapons, in use since the 1970s, resurface with damaging and deliberate application

THE BRAIN BECOMES A CONTROLLER

"The human brain can issue direct commands — not through limbs, but through waves."

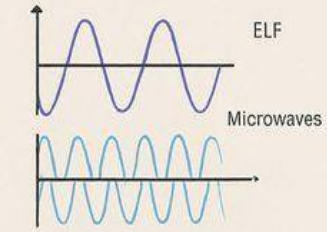

JACQUES VIDAL AND THE FIRST BRAIN-COMPUTER INTERFACE

1973, UCLA, USA

2.2 — Heterodyning and Modulation: The Invisible Architecture of Influence

What is Heterodyning?

Heterodyning is the overlapping of two or more frequencies, producing new frequenies (sum and difference frequenclest that can fall into the perceptual or blological sensitivity range of a human being.

How is it work?

The brain doesn't "hear" radio waves directly – but it can respond to low-frequency thythms demodulated from high-frequency carriers.

All sensory and neural systems are rhythmically and resonanctly vulnenable. The effect is achieved through resonance, interference, and rhythmic entrainment.

Examples of Applications:

- Microwave Audifory Effect (MAE) – hearing radio waves as sound via bone conduction
- V2K (Voice to Skul) – transmitting voices without air vibrations
- Somatic Stimulation – sensations of pressure, heat, pain, tingling, or vibration
- Altered Thought and Sleep – induction of anxiety, drowsiness, or a thought

This technology can be invislble, deniable, and personalized – the influence does not affect everyone equally, but moves through directed channels, sometimes even passing through walls.

Tt is charge or techrological, but its structure is technologe- ical.

Mechanisms:

- Beat frequency interrference
- Amplitude / Frequency Modulation (AM/FM
- Blorhythmic overlay
- Dynamic adaptation via real-time feedback.

This technology can be invisible. deniable, and personalized – the influence does not affect everyone equally, but moves through directed channels, sometimes even passing through walls.

Some may hear synthetic voices. Others feel pressure, heat, or strange tactile phenomena. Some experience false sensations or thoughts that are not their own.

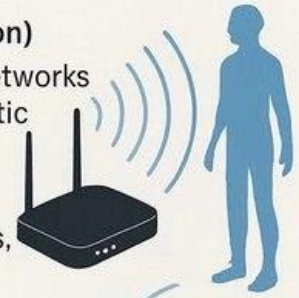

The impact is often interpreted as personal – but its structure is technological.

2.3 — CSI, Beamforming, and Real-Time Neuromapping

Sensors, antennas and distributed algorithms make human behavior and thought both trackable and predictable.

CSI (Channel State Information)

A byproduct of WiFi and 5G networks that shows how electromagnetic waves reflect and refract off objects (and bodies) in space,

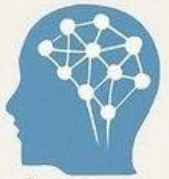

- Detection of micro-movements, breathing, heartbeat
- Presence recognition in a room
- Analysis of gait, gestures, and posture
- Construction of behavioral and psychophysiological profile

Beamforming

Allows wireless signals to be focused on a specific target

- Track a moving body
- Concentrate effects on selected brain regions
- Adapt the signal based on feedback and response

Dynamic Neuro-Mapping

Build a cognitive activity map of the brain

- Predict responses and decisions
- Induce resonance in targeted neural networks
- Personalize the effects and feedback loops

Summary: Modern wireless infrastructure (WiFi, 5G, IoT, radar) can be used not only for surveillance — but also for influence: subtle, dynamic, and completely invisible to outside observers.

2.4 — Phased Arrays & Beamforming

Shaping electromagnetcic waves with precision

Phased Arrays

A grid of emitters that each produce a finely-tuned signal coordinated with the others

Beamforming

Varying the phase of the signais adjusts their aligument and creates a focused energy beam

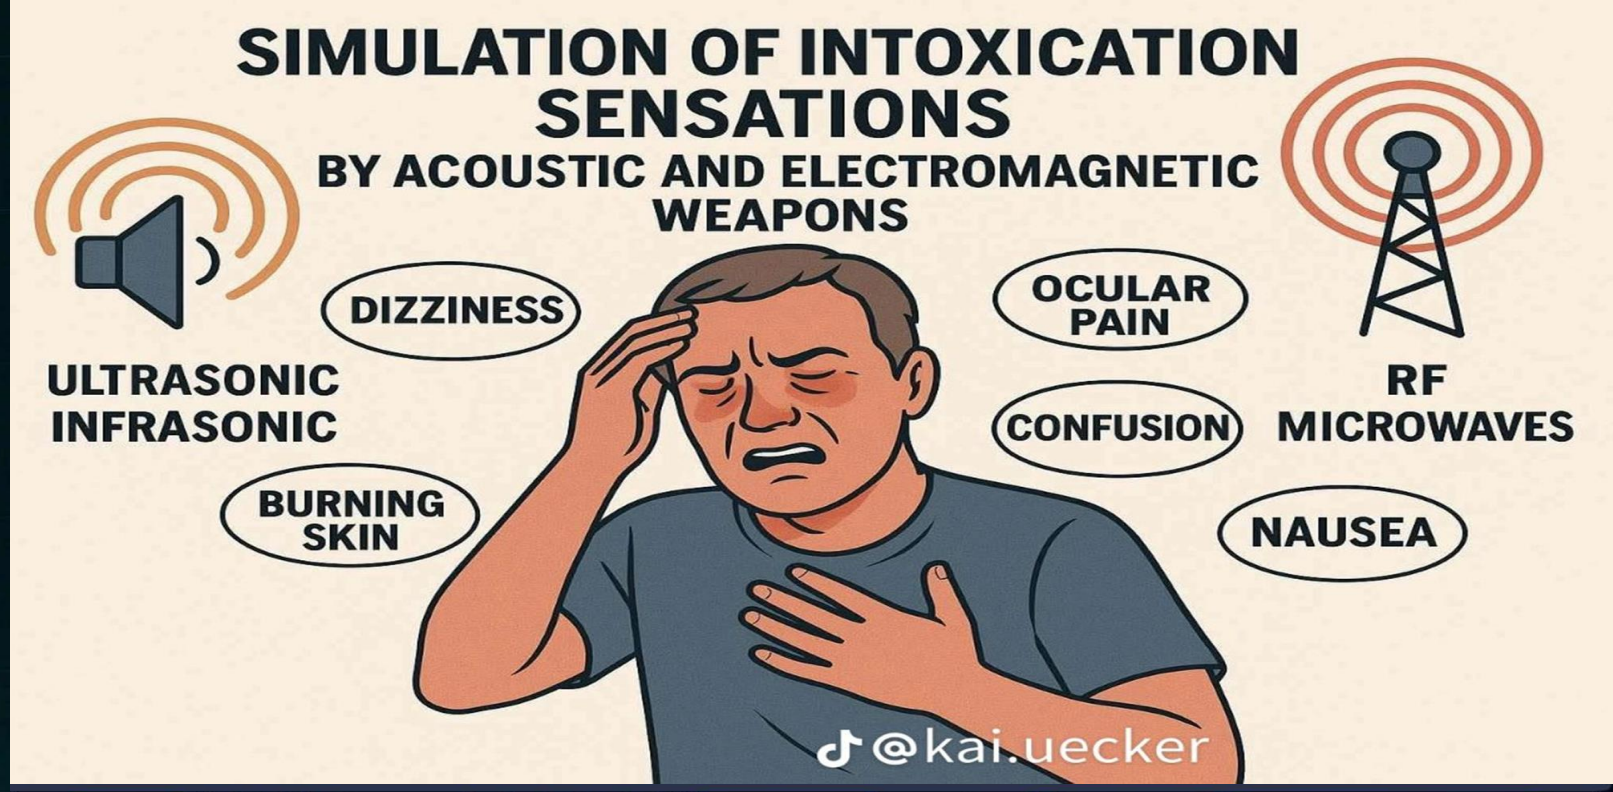

Directed Energy

The precise beams can be steered in any direction to deliver the signal to a target
