HISTORY OF MICROWAVES

From Weapons to Your WiFi

FREE LECTURE AT THE UNIVERSITY OF TORONTO WITH

BARRIE TROWER

Physicist & Former British Secret Service Microwave Weapon Specialist

During the Cold War, Barrie Trower's job for the British Secret Service was to debrief spies who were using stealth microwave weapons. Most notably, the Russians pulsed microwaves at the American Embassy where staff developed leukemia and other sicknesses.

Today, Barrie Trower is shocked to see the proliferation of microwave technologies – WiFi, cell phones, cell towers, and more. THE HISTORY OF MICROWAVES: FROM WEAPONS TO WIFI will give you an understanding of microwave radiation from an insider who now speaks openly to governments, police, and the public.

『テクノロジー犯罪』電波の悪用に法規制を！

殺傷も可能な人体に悪影響を及ぼす
指向性エネルギー兵器の存在を知ってください！

私たちは、Targeted Individuals（標的にされた個人）、通称TIと称しています。日本だけでなく、世界中に何百万人という多くの被害者が存在しています。一般社会に隠され軍事用に開発された**最新の遠隔身体攻撃兵器**が使われており、ターゲットになった普通の市民は**「24時間365日」監視、攻撃**され常に危険にさらされています。人権もありません。別名、**自殺強要犯罪**とも言われ、耐えきれず自ら命を絶ってしまったケースも数え切れないはずです。日本の自殺者年間3万人、引きこもりやいじめ、リストラなどの社会問題とも直結しています。ではなぜ**善良な一般市民がターゲット**にされるのでしょうか…以下のことが予想されます。

- 超監視管理社会に向けた人体実験、マインドコントロール実験
- 政府、公安、警察など国家組織の裏金工作、利権犯罪
- 某宗教団体の勧誘を断った
- 些細なことからの逆恨み　など

思考試聴

BMI（Brain Machine Interface）を使用し、コンピューターと人間の脳を繋ぎます。AIが24時間リアルタイムでターゲットの思考や頭に描いたイメージまでも読み取ることができ、その人にしかわからないような絶妙なタイミングで加害が行われます。

音声送信

指向性スピーカーやV2K（Voice to Skull）を悪用した被害です。人口テレパシーとも言われています。
マイクロ波聴覚効果（フレイ効果）で個人の周辺や脳内に直接音声を送ります。脳内音声送信は周りには決して聞こえることはありません。

身体攻撃

マイクロ波兵器は身体に傷をつけたり、火傷を負わせたり、パルスの組み合わせによっては、ありとあらゆる病気の症状を作り出せます。痛みや痒み、人間の生理現象や三大欲も操作することができます。
睡眠妨害は代表的な嫌がらせの一つです。

マインドコントロール

アメリカでは「MKウルトラ」と称された人体実験プログラムを秘密裏に行ってきました。電波の周波数で思考や行動に影響を与え、ラジコンのように人間をコントロールすることが可能だと言われています。動物や虫もまた同様に可能です。

その他の加害行為　脳内外映像送信／サブリミナル映像送信　夢送信　記憶の挿入／削除／差し替え　気象操作　など

これらの電磁波兵器の多くはアメリカで既に何十年も前に特許が取られています。※下記はほんの一例です。

例）米国特許：3951134号（脳波を遠隔でモニター及び改変装置）
米国特許：4717343号（人間の行動を変化させる装置）
米国特許：4877027号（遠隔マイクロ波聴覚システム）

元CIA諜報機関員の内部告発や調べて流出した資料により、「電気神経兵器」の存在が明らかにされています。

メディアで取り上げられました!!

現代社会最大のタブー、テクノロジー犯罪は調べること50年以上、メディア、マスコミで公表されていませんでした。昨今ようやく指向性エネルギー兵器を使用した被害事例が報道されました。

"No blood. No scars. Just silence."

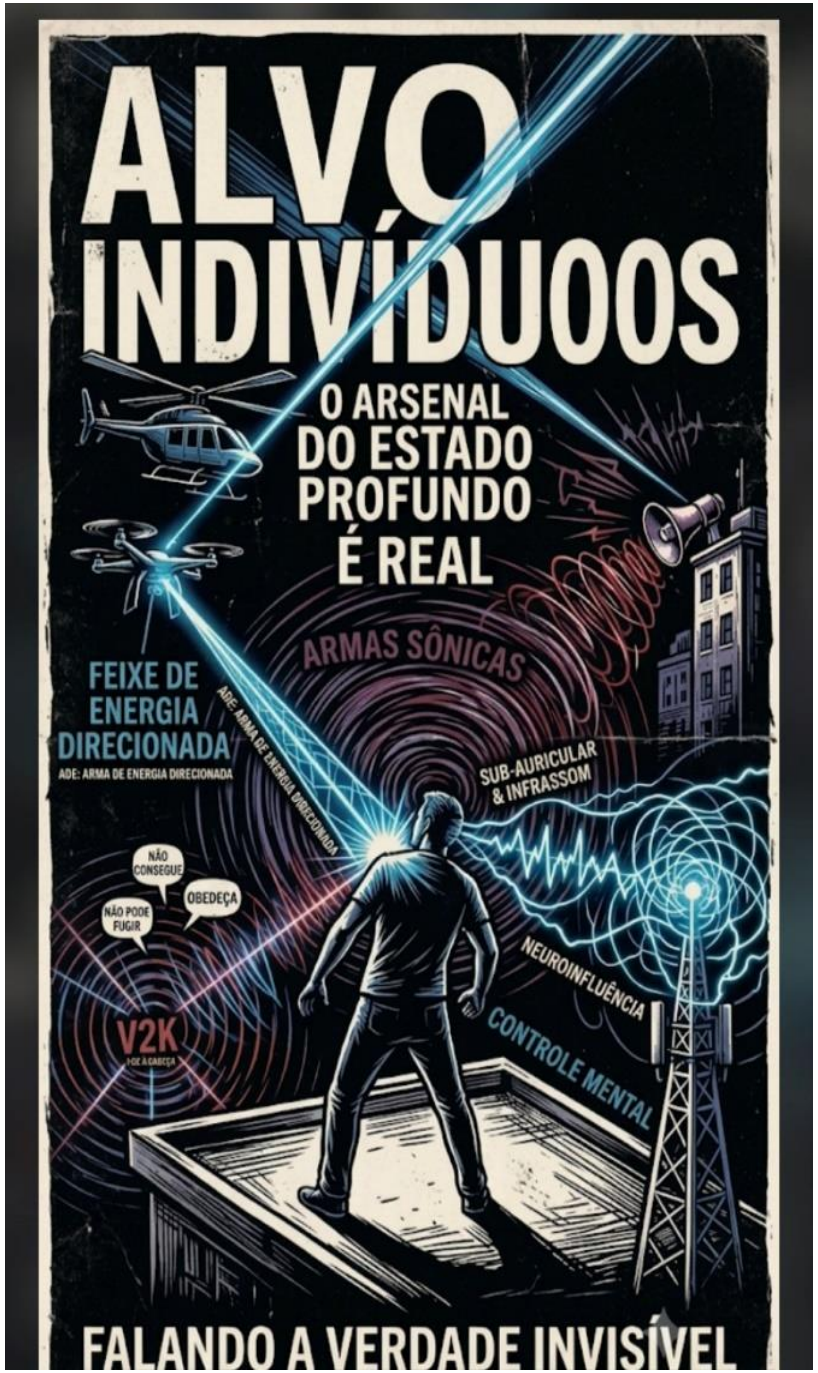

Since the second half of the 20th century, governments and military contractors have developed **non-lethal weapons** that target the **brain and nervous system** - not to kill, but to **suppress, disorient, or control.**

These technologies exist in a legal and ethical gray zone. They blend psychiatric theory, neurotechnology, and electromagnetic weape.

Another [illegible] of "Dirt Wars"?

NGTON POST WEDNESDAY, JULY 31, 1985 C9

JACK ANDERSON and DALE VAN ATTA

Radio Waves Studied for Arms Potential

Can the human mind be short-circuited or even destroyed by extremely low-frequency radio waves?

Preposterous as such an idea may seem, scientists on both sides of the Iron Curtain have been conducting secret studies on the subject. And though it bears the acronym ELF, there's nothing pixielike about the possible effects of extremely low frequency transmissions. Reputable scientists say they could be developed into another grisly weapon of mass destruction.

The Navy is installing more than 50 miles of underground antenna in Wisconsin and Michigan to beam extremely low frequency messages to our submarines deep under the oceans. Lacking such a system, the subs now have to come near the surface to receive long-distance communications from the Defense Department, thereby exposing themselves to enemy tracking devices.

The ELF transmissions, the Navy contends, are not at a level harmful to humans and animals.

For years ELF research suffered under the cloud of "parapsychology." Unfortunately for the human race, there's nothing silly about the potential effects of very low-level electromagnetic radiation on the nervous system.

The Soviets conducted pioneer research in electromagnetic radiation in the 1930s in hopes of giving scientific respectability to mental telepathy. But the lowest-frequency ranges were difficult to detect with the primitive instruments of that era, and Soviet scientists eventually abandoned the electromagnetic mechanism as a means of perfecting telepathy.

But brain researchers in this country and elsewhere acknowledge that those early Soviet scientists were the first to realize that very low-level radiation could have profound effects on the human organism—and frightening military uses.

American researchers have told us that within 15 years scientists on both sides may learn how to interfere with the electrical impulses of the human brain by means of long-distance transmission of electromagnetic radiation. This interference could extend to "switching off" the brain's vital functions—that is, killing the targeted victims.

In fact, the Navy once funded a project to determine whether ELF signals could upset human brain function to bring on hypertension or sudden death. The project was killed by a high Navy official when he found it in his budget—not because it was too horrifying, but because it smacked of psychic research, which he opposed.

The Soviets may already have tested some such device against American personnel. From 1959 until 1978, mysterious microwave radiation was beamed at the U.S. Embassy in Moscow. Official reports concluded that the Soviets may have been trying "mind control" or "electronic induction of illness." As far as anyone can determine, the attempt failed.

Meanwhile, the Navy has contracted for preliminary ELF studies with several biomedical research firms in the Los Angeles area. Other highly classified and well-funded research in this spooky field continues in this country—and no doubt in the Soviet Union as well.

REMOTE NEURAL MONITORING

Neuronal activity in the brain creates a shifting electrical pattern that has a shifting magnetic flux. This magnetic flux puts out a constant 30-50 Hz, 5 milliwatt electromagnetic (EMF) wave. Contained in the electromagnetic emission from the brain are spikes and patterns called "evoked potentials."

Every thought, reaction, motor command, auditory event, and visual image in the brain has a corresponding "evoked potential" or set of "evoked potentials." The EMF emission from the brain can be decoded into the current thoughts, images and sounds in the subject's brain.

NSA SIGINT uses EMF-transmitted Brain Stimulation as a communications system to transmit information (as well as nervous system messages) to intelligence agents and also to transmit to the brains of covert operations subjects (on a non-perceptible level).

EMF Brain Stimulation works by sending a complexly coded and pulsed electromagnetic signal to trigger evoked potentials (events) in the brain, thereby forming sound and visual images in the brain's neural circuits. EMF Brain Stimulation can also change a person's brain-states and affect motor control.

Two-way electronic Brain Link is done by remotely monitoring neural audiovisual information while transmitting sound to the auditory cortex (bypassing the ears) and transmitting faint images to the visual cortex (bypassing the optic nerves and eyes). The images appear as floating 2D screens in the brain.

Two-way electronic Brain Link has become the ultimate communications system for CIA/NSA personnel. Remote neural monitoring (RNM, remotely monitoring bioelectric information in the human brain) has become the ultimate surveillance system. It is used by a limited number of agents in the US Intelligence Community.

U.S., Russia Hope To Safeguard Mind-Control Techniques

CONTROL, From Page 4

perts, including George Kotov, a former KGB general now serving in a senior government ministry post, present in their report a list of software and hardware associated with their psycho-correction program that could be procured for as little as $80,000.

"As far as it has become possible to probe and correct psychic contents of human beings despite their will and consciousness by instrumental means . . . results having been achieved can get out of [our] control and be used with inhumane purposes of manipulating psyche," the paper states.

The Russian authors note that "World opinion is not ready for dealing appropriately with the problems coming from the possibility of direct access to the human mind." Therefore, the Russian authors have proposed a bilateral Center for Psycho-technologies where U.S. and Russian authorities could monitor and restrict the emerging capabilities.

Janet Morris of the Global Strategy Council, a Washington-based think tank established by Ray Cline, former Central Intelligence Agency deputy director, is a key U.S. liaison between Russian and U.S. officials.

In a Dec. 15 interview, Morris said she and the Richmond, Va.-based International Healthline Corp. have briefed senior U.S. intelligence and Army officials about the Russian capabilities, which Morris said could include hand-held devices for purposes of special operations, crowd control and antipersonnel actions. Healthline Corp. is evaluating Russian health care technologies and will underwrite Russian demonstrations in the United States.

"We talked about using this to screen and prepare special operations personnel for extremely difficult missions and ways in which this could be integrated into doctrine for [psychological operations]," Morris said.

She said Army officials were concerned about the capability being directed against armored systems and personnel through electronic communications links. Ground troops, she said, risk exposure to bone-conducting sound waves that cannot be offset by earplugs or other current protective gear. Morris added that U.S. countermeasures could include sound cancellation, a complex process that involves broadcasting oppositely phased wave forms in precisely matched frequencies.

Maj. Pete Keating, a U.S. Army spokesman, said senior Army officials had expressed interest in reviewing Russian capabilities but that repeated plans to schedule visits to the former Soviet Union were rejected by Donald Atwood, deputy secretary of defense. Keating said he was unfamiliar with the mind-control technology and could not discuss specific details.

U.S. sources said government officials and leaders from the business and medical communities will consider Russian offers to place the mind-control capability under bilateral controls.

At least one senior U.S. senator, government intelligence officials and the U.S. Army's Office for Operations, Plans and Force Development are interested in reviewing the Russian capabilities, U.S. sources said.

In addition, International Healthline Corp. is planning to bring a team of Russian specialists here within the next couple of months to demonstrate the capability, company President Jim Hovis said in a Dec. 2 interview.

Meanwhile, the U.S. Army's Armament Research, Development & Engineering Center is conducting a one-year study of acoustic beam technology that may mirror some of the effects reported by the Russians.

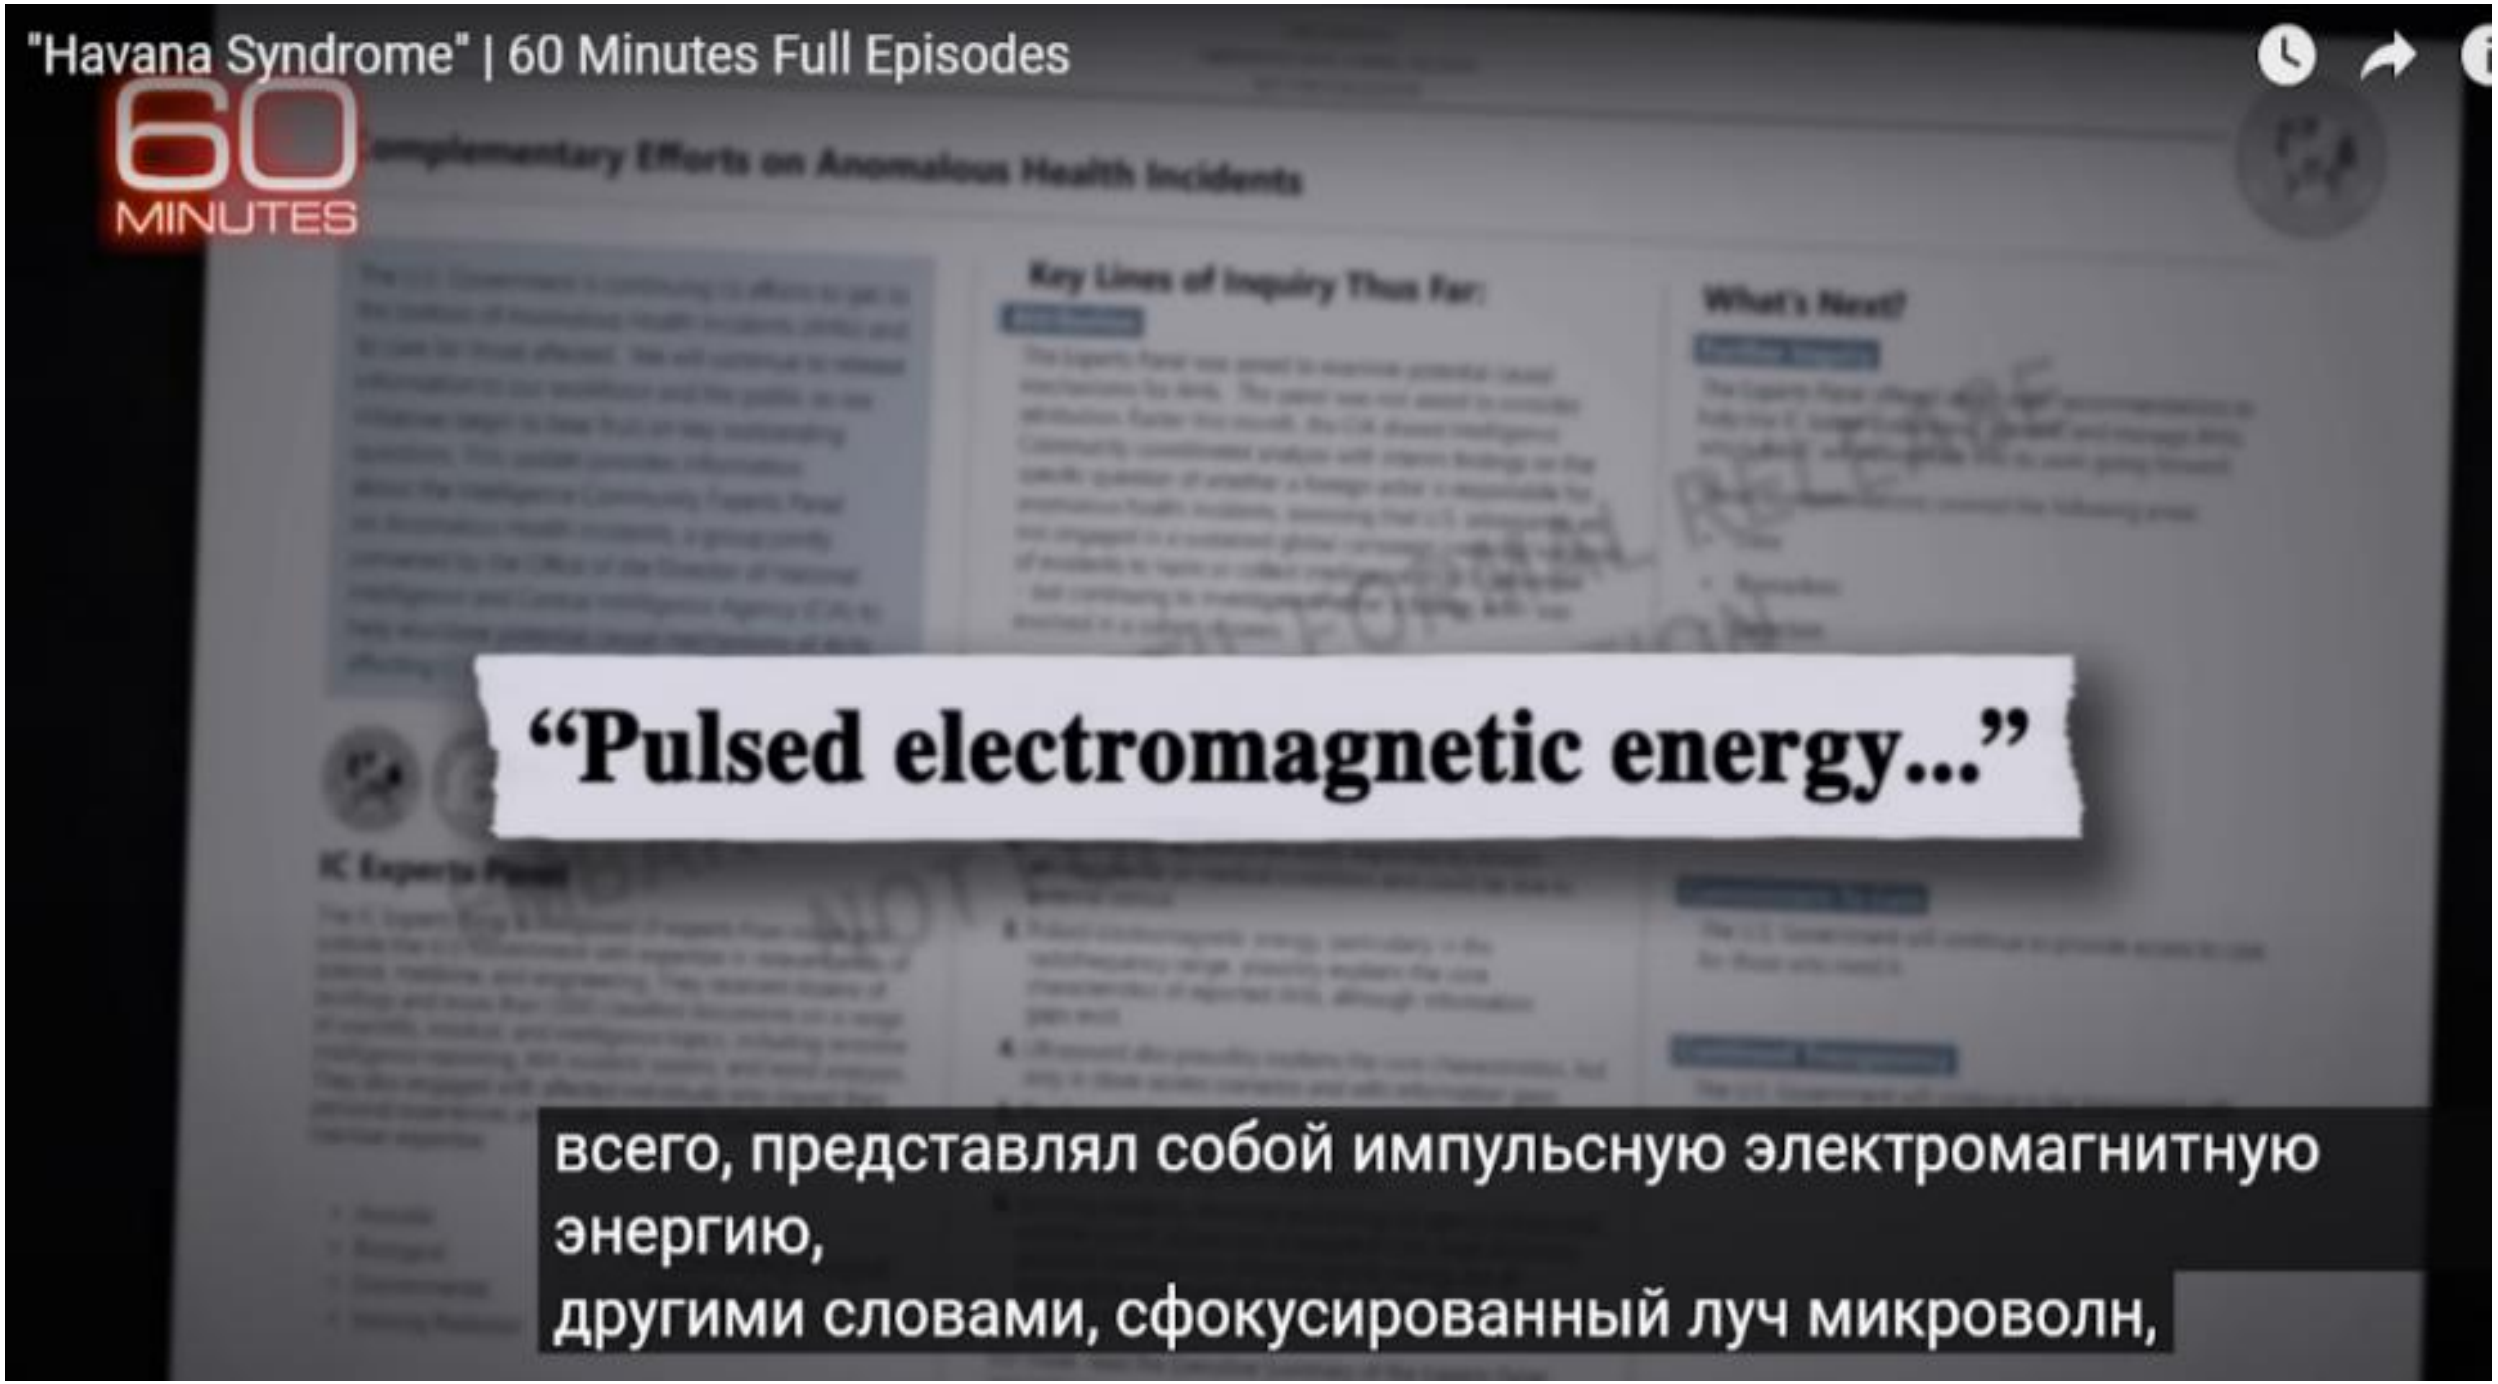

Army spokesman Bill Harris said Dec. 3 the command awarded the one-year study contract to Scientific Applications & Research Associates of Huntington Beach, Calif. Related research is being conducted at the Moscow-based Andreev Institute, U.S. and Russian sources said.

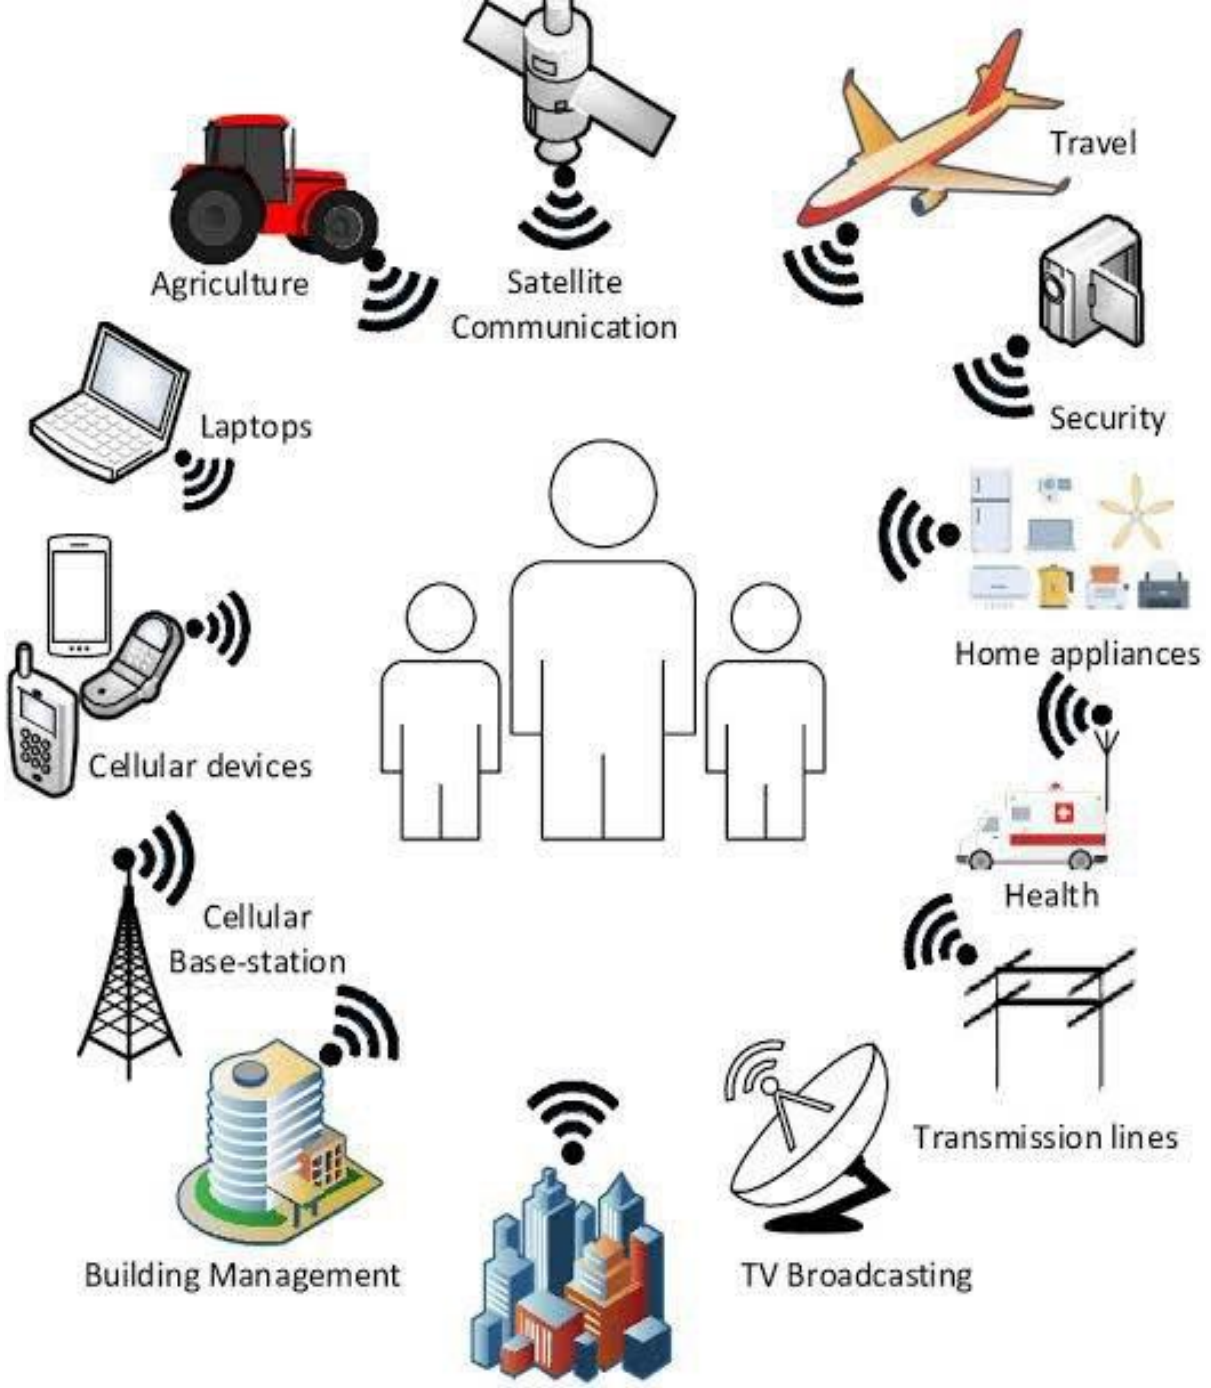

Despite the growing interest in a capability traditionally reserved for science fiction novels and cinema, industry and academic experts are cautious and skeptical about its potential battlefield use.

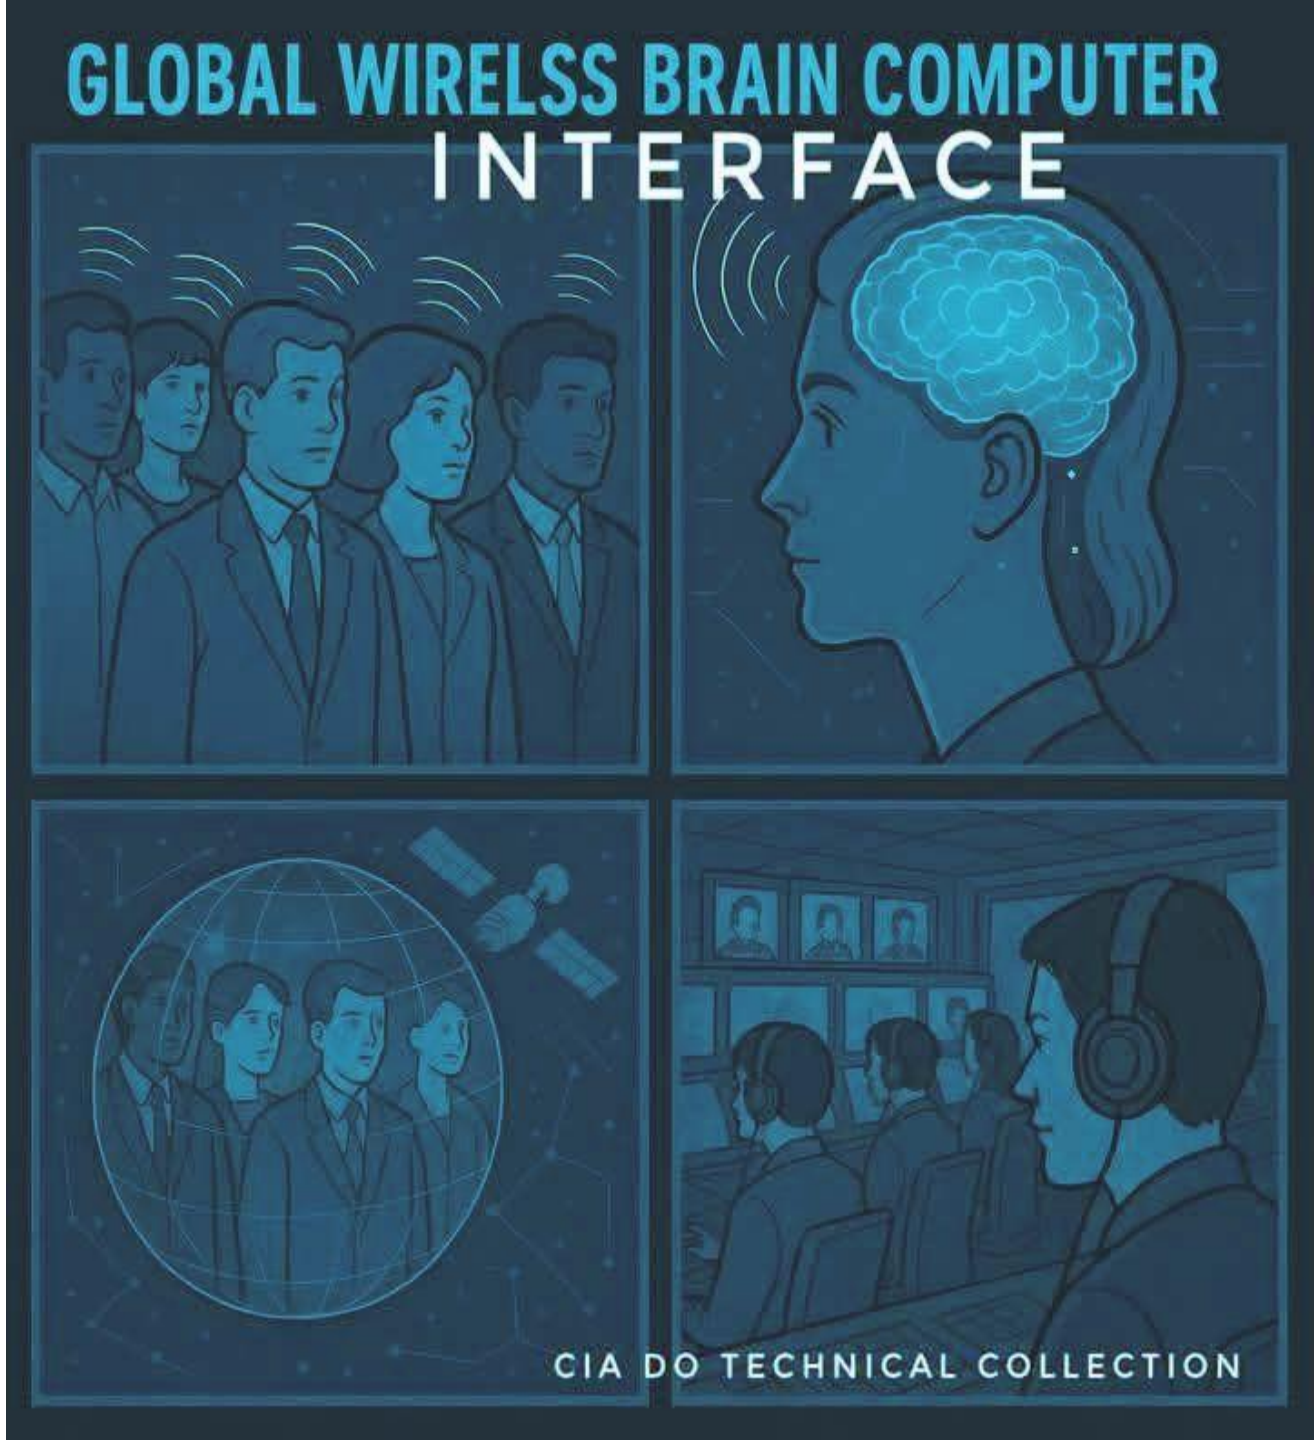

"This is not something that strikes me as requiring high-level attention," Raymond Garthoff, a defense and intelligence analyst at the Washington-based Brookings Institution, said in a Dec.2 interview.

Morris contends that the capability has been demonstrated in the laboratory in Russia and should be placed under international restrictions at the earliest possible opportunity.

A bio-cyber interface is here defined as the set of processes necessary to translate information from the biochemical domain of Bio-NanoThing networks to the Internet cyber-domain, which is based on electrical circuits and electromagnetic communications, and vice versa.

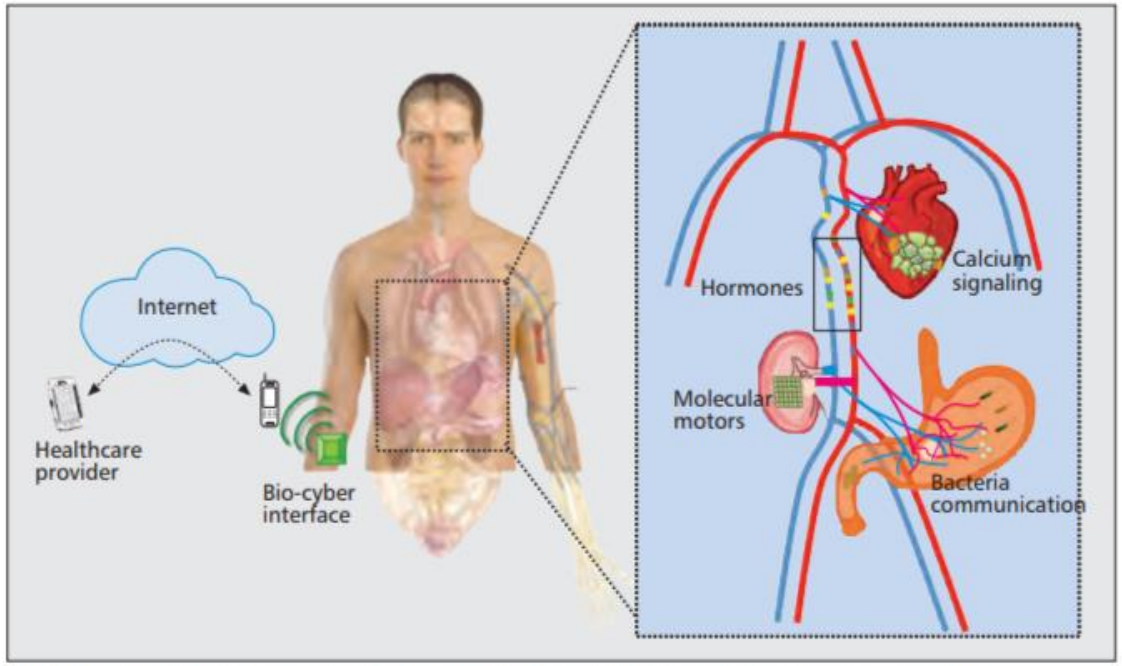

Figure 4. Network architecture for the Internet of Bio-NanoThings for Intra-body applications.

Research within the IoBNT should necessarily address these problems by combining the security assurance methods applied to today's electrical networks with security solutions developed through evolution by nature, such as the human immune system.

WEAPONIZED EVERYTHING

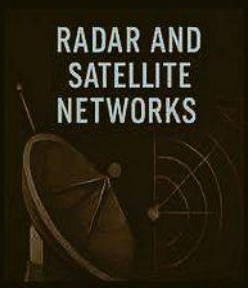

In hybrid warfare, the world itself becomes the weapon.

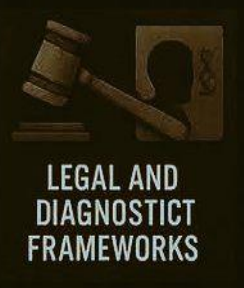

In the logic of hybrid war, nothing is neutral, Anything that interacts with the human body, mind, or society can be transformed into a tool of surveillance, modulation, or control.

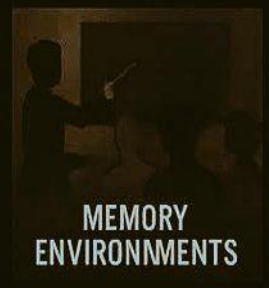

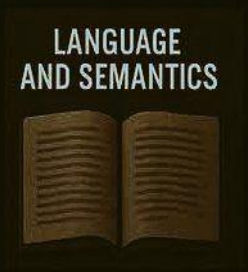

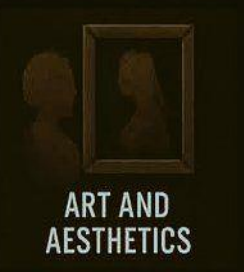

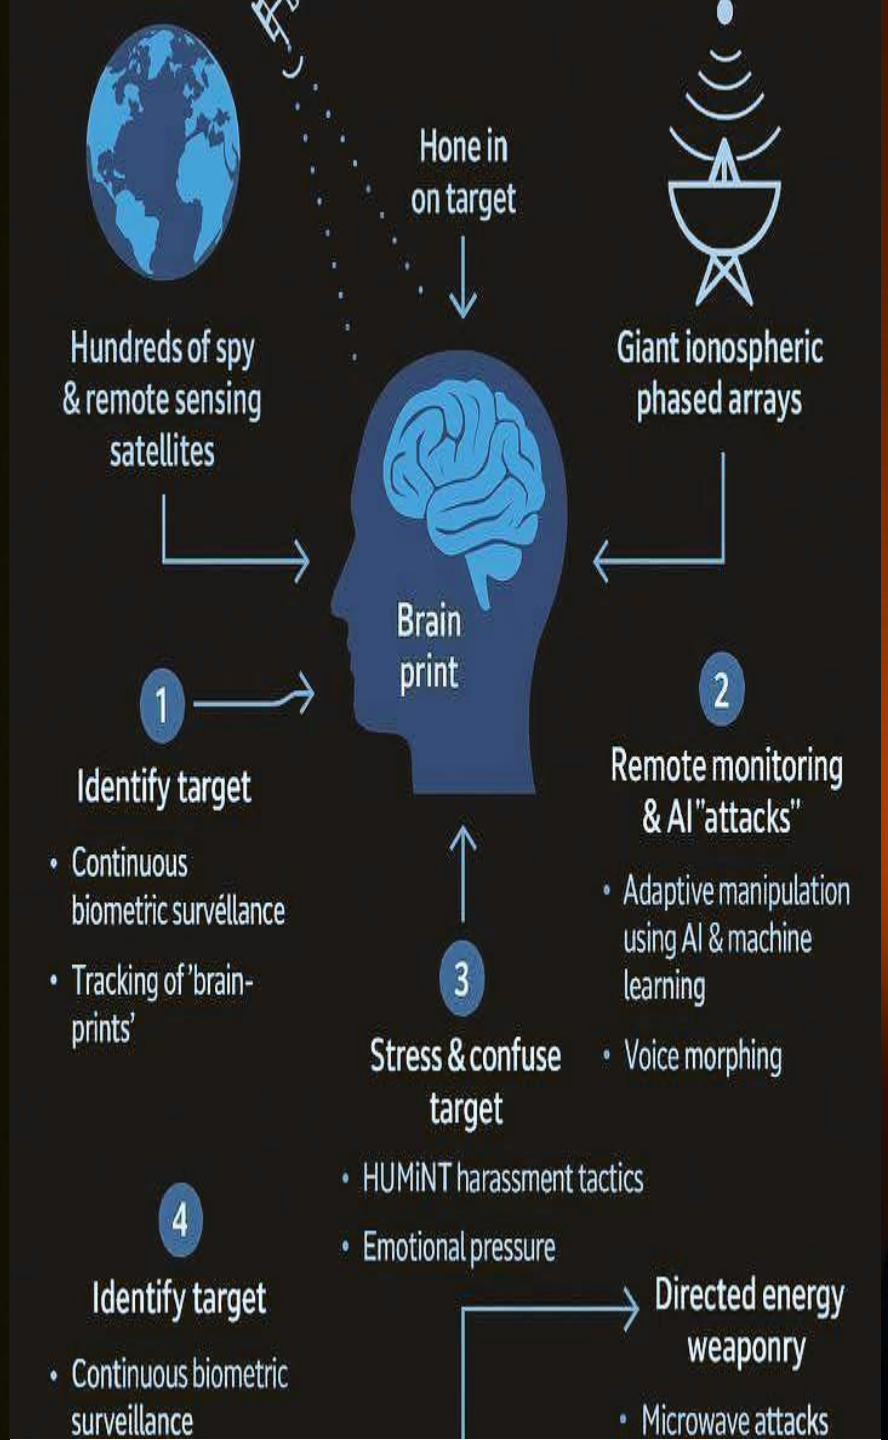

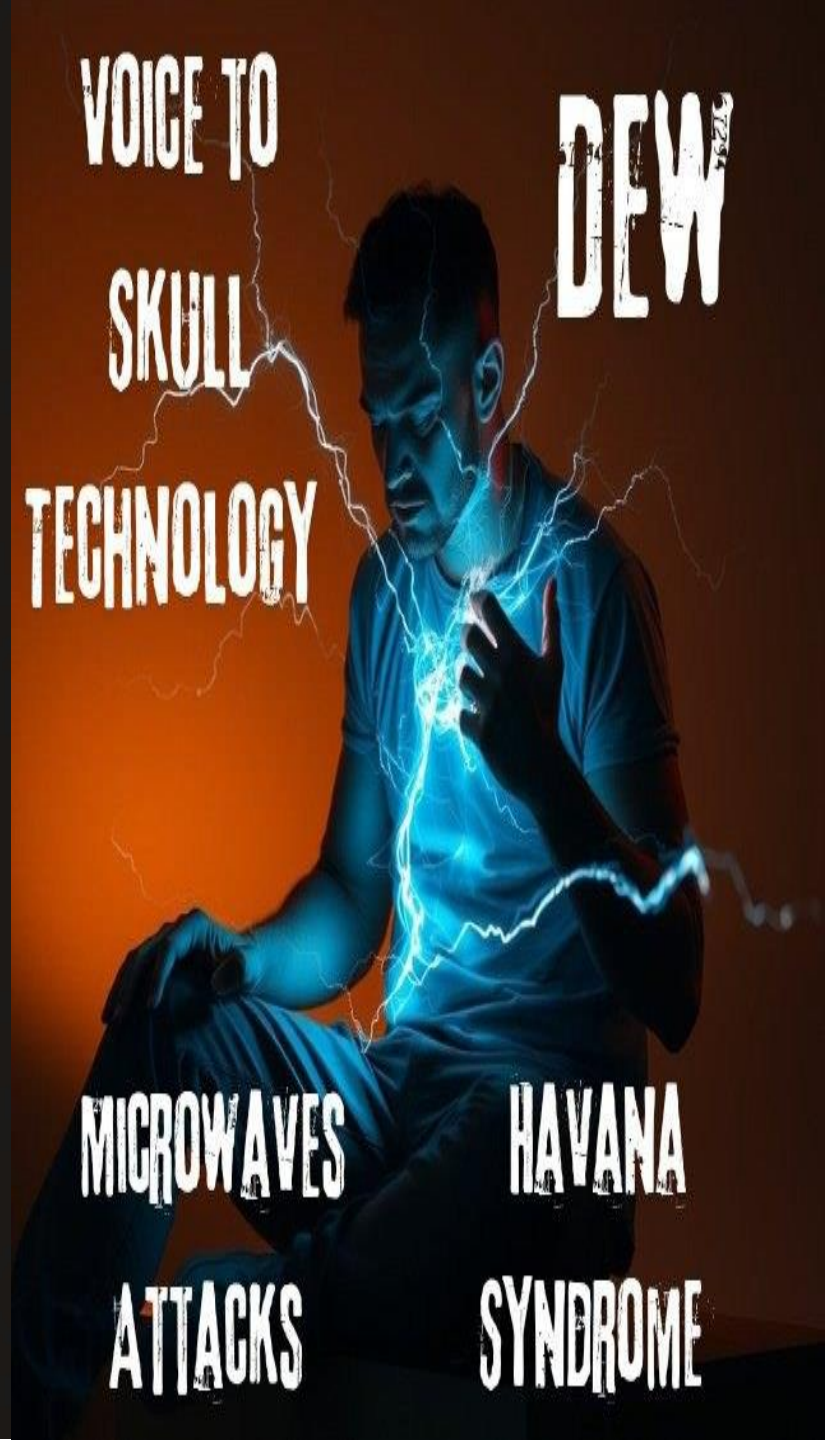

In hybrid war, destruction is not the goal – reprogramming is. You are not broken. You are retuned.

This is not a war on nations – this is a war on cognition. The battlefield is built into your environment.

5G TOWERS
THE HIDDEN GRID

THE INFRASTRUCTURE. THE FREQUENCY. THE CONTROL.

A dense network of 5G and small cell towers creates constant exposure to high-frequency electromagnetic radiation (RF). This is the backbone of the surveillance and control grid.

WHAT IT IS
5G is more than fast internet. It's a military-grade network built for data, surveillance, and real-time control at massive scale.

KEY COMPONENTS
- **5G TOWERS** — Macro & small cell sites.
- **SMALL CELLS** — Mounted on poles, buildings, & signs.
- **FIBER BACKBONE** — High-speed data transmission.
- **EDGE NODES** — Data processing closer to you.
- **IOT DEVICES** — Billions of connected devices feeding data.

YOU ARE NOT IMAGINING IT. YOU ARE BEING EXPOSED.

WHY IT MATTERS
- **CONSTANT EXPOSURE** — High-frequency RF radiation 24/7.
- **MASS SURVEILLANCE** — Enables real-time tracking and data collection.
- **BEHAVIOR MODIFICATION** — Used for influence, manipulation, and social control.
- **HEALTH CONCERNS** — Linked to sleep issues, anxiety, headaches, & more.
- **MILITARY APPLICATIONS** — Dual-use technology designed for warfare and dominance.

THE FREQUENCY IS THE FRONT LINE. YOUR BODY IS THE TARGET.

POSSIBLE EFFECTS REPORTED BY MEMBERS

HEADACHES & PRESSURE	SLEEP DISRUPTION	COGNITIVE IMPAIRMENT	PHYSICAL SYMPTOMS	MOOD CHANGES	SENSORY SENSITIVITY	FEELING TARGETED
Persistent head pressure, migraines, & sinus issues.	Insomnia, vivid dreams, and night wakings.	Brain fog, memory problems, and concentration loss.	Fatigue, dizziness, tinnitus, and heart palpitations.	Anxiety, irritability, depression, and emotional swings.	Light, sound, and EMF sensitivity increases.	Intuition of being monitored, followed, or attacked.

NOTICE: EXPERIENCES VARY. THIS IS NOT A DIAGNOSIS.

WHAT YOU CAN DO

REDUCE EXPOSURE	AIRPLANE MODE	SHIELD YOUR SPACE	DOCUMENT & TRACK	CONNECT & SHARE	RAISE AWARENESS
Limit time near towers and dense small cell areas when possible.	Use airplane mode at night or when not needed.	Use EMF shielding, ferrite cores, and hardwired devices.	Record symptoms, locations, and patterns.	Share information with others. You are not alone.	Speak up. Educate others. Silence protects them.

THE TRUTH IS POWER
The more you know, the harder you are to control.
INFORMED PEOPLE CANNOT BE EASILY MANIPULATED.

THEY BUILT THE GRID. WE BUILD AWARENESS.
TOGETHER, WE TAKE BACK OUR FREEDOM.

- **SEE THE PATTERN** — It's not random. It's by design.
- **TRUST YOUR EXPERIENCE** — Your body knows. Your intuition warns.
- **DOCUMENT THE WAR** — Every detail matters. Evidence is resistance.
- **YOU ARE NOT ALONE** — Millions are waking up. The movement grows.
