Targeted Individuals (TIs) BEYOND STIGMA

Despite widespread vilification, the evidence behind Targeted Indiviquals is hard to dismiss. Declassified military documents confirm that long-range directed energy devices (including Voice-To-Skull, V2K microwave hearing) have been reseatched and operational for decades.

Numerous known cases match public TI reports – from reforms in Germany and the USSR to British intelligence tests on its own citizens.

These same technologies have been linked to suspected attacks on U.S. embassies.

Even the United Nations has acknowledged:

- Neurotechnology abuse is escalating worldwide
- TIs face stigma, extreme abuse, and human rights violations.

@nanoimplant6

This is not individual pathology.

It is a systemic abuse of power, fiidden beneath stigma, science ience.

QANON IS A PSYOP!

QANON WAS AND IS NEVER TO BE TRUSTED. "Q" was created by the intelligence agencies in order to deceive and control those who are "semi-awake" and those just waking up to the deep state and shadow government. Through the art of paltering, selling you lies mixed with truths, tricking you into trusting your government. For years Q followers have stated to "Trust the Plan" and that Trump and the 'White Hats' were out to defeat the NWO. Q is full of countless failed predictions and disinfo mixed with half-truths. This is why it is so alluring to those who are just "semi-awake".

TARGETED INDIVIDUALS (TIs)

THE HUMAN FACES OF A HIDDEN WAR

Targeted individuals are people who have found themselves at the center of invisible systems of surveillance, harassment, and and psychological dismantling.

They come from all walks of life – whistleblowers, activists, dissidents, survivors of abuse

- Continuous monitoring
- Disruption of personal relationships
- Smear campaigns and defamation
- Technological harassment (VoG, V2K, synthetic telepathy)
- Coercive psychiatry or forced medication

@nanoimplant6

They are LABELED. ISOLATED, DISCREDITED

Yet viewed together — across countries, backgrounds, and decades — the patterns are too structured, too consistent to be coincidence

L'avanzata della transizione digitale trova nell'incremento dell'infrastruttura tecnologica la trasformazione del panorama nazionale con migliaia di nuove stazioni radio base, le antenne che spuntano sui territori. I cittadini chiedono sicurezze, garanzie e una partecipazione attiva che possa salvaguardare qualità della vita e

WI-FI, IL VAMPIRO DI PRIVACY E DATI

Accorgimenti utili per non farseli fregare

Rocco D'Alessandro
Bastardi senza Guugol

Difendere la propria *privacy* e proteggere i dati personali significa anche preservare libertà e diritti. "*Non ho nulla da nascondere*", sostiene l'incosciente. "*Tanto sanno già tutto*", ribatte il rassegnato. Ma oltre l'inconsapevole leggerezza si può fare di più. Un esempio? Provate. Prendete un PC Windows con Wireshark, troverete davanti una mole di traffico abnorme, scambiati anche 167.566 pacchetti, 143 megabyte che in anno fanno 1,25 terabyte. Per chi non è avvezzo ai numeri corrisponde a più di due dischi di un comune portatile. Non solo, c'è di più. Ripetete lo stesso esperimento con lo Smartphone collegato al Wi-Fi e in pochi secondi migliaia di pacchetti dati verranno scambiati. Domanda: ma a chi sono indirizzati? Semplice, ai TecnoVampiri, cioè Google, Meta, Apple, Microsoft, Amazon, alle multinazionali produttrici, ai proprietari delle App installate che succhiano dati, quindi informazioni, senza il nostro consenso. O meglio, col nostro

analizzarci, profilarci, creando immensi dossier con tanto di nome, cognome e dati biometrici.

Allora, che fare? Ci si può proteggere senza rinunciare all'uso di strumenti tecnologici di cui abbiamo reale necessità?

Si, certo, basta volerlo, con un minimo di impegno pratico. Come? Provate a usare lo Smartphone per quello che realmente è, cioè un telefono per comunicazioni vocali. Disattivate le reti dati, Wi-Fi, Bluetooth e Near-Field Communication (NFC) quando non utilizzate, impedendo così a migliaia di sensori sparsi in città di comunicare continuamente col vostro dispositivo. Infine, tornate ad usare il PC per tutte

Citation

**To: His Excellency Antonio Guterres, Secretary-General of the United Nations;
Honorable Dr. Tedros Adhanom Ghebreyesus, Director-General of the World Health Organization; Honorable Inger Andersen, Executive Director of the U.N. Environment Programme; U.N. Member Nations**

International Appeal:
Scientists call for Protection from Non-ionizing Electromagnetic Field Exposure[1]

We are scientists engaged in the study of biological and health effects of non-ionizing electromagnetic fields (EMF). Based upon peer-reviewed, published research, we have serious concerns regarding the ubiquitous and increasing exposure to EMF generated by electric and wireless devices. These include– but are not limited to–radiofrequency radiation (RFR) emitting devices, such as cellular and cordless phones and their base stations, Wi-Fi, broadcast antennas, smart meters, and baby monitors as well as electric devices and infra-structures used in the delivery of electricity that generate extremely-low frequency electromagnetic field (ELF EMF).

To.: **Tulsi Gabbard, Director of National Intelligence, U.S. government**
Date: 16 April 2025

Please stop the suffering of 1000s of innocent civilians and children subjected to inhumane experimentation, attacks and torture, with RF (Radio Frequency) Directed Energy Weapons

Dear Tulsi Gabbard,

We write to you today, also on behalf of many victims, to request that your office launches an investigation into atrocities that are committed against 1000s of civilians and children with RF (Radio Frequency) Directed Energy Weapons.

The U.S. military, including the CIA, has a long history of experimentation on civilians, including children. Programs such as MKUltra were officially stopped but continue today in even more secret programs. One of these programs is the development and testing of RF Directed Energy Weapons. After 9/11, Western governments gave almost unlimited powers to their security systems, which they did not used, but abused.

For more than three decades, civilians have claimed that they are experimented on, attacked and tortured and with RF Directed Energy Weapons. For many victims, the attacks start one day and never stop. Standard procedure is to ignore them, ridicule them and/or label them as mentally ill, which in itself can be considered a crime. The perpetrators also spread disinformation, suppress the truth, and manage 'experts', health systems, and fake victims to discredit the real victims.

Unfortunately for the perpetrators, there is the Internet where victims found similar stories and connected. A number of them presented their stories during the Presidential Commission for the Study of Bioethical Issues in 2011. Their claims however, were not investigated.

The Havana Syndrome (finally) made very clear that, despite lying and suppression of information by the CIA, these weapons exist and are in use for over 30 years. After initial investigations, the U.S. government acknowledged government employee symptoms and even created a law to help them, the HAVANA Act. Civilian victims were excluded, ignored again.

Striking Irradiation Weapon as a Mean of Making Crimes

S.Ya.VOROSHILOV,
Senior Lecturer at the Department of Artificial Intelligence System
(Institute of Space and Information Technologies by Siberian Federal University)

G.P.LOZOVITSKAYA,
Doctor of Law,
Associate Professor,
Professor at the Department of Psychology,
Pedagogics and Personnel Management
(Management Academy of the Ministry of the Interior of Russia)

The use of weapons of mass destruction, including weapons using damaging radiation, may be an act of terrorism.

There is electromagnetic terrorism, which is carried out using powerful electromagnetic radiation generating plants that affect both people and certain technological systems of infrastructure facilities.

The United Nations General Assembly has repeatedly condemned all actions contrary to the principles and objectives of the Protocol for the Prohibition of the Use of Dangerous Means of Mass Destruction in War, determined, in the interests of all mankind, to completely eliminate the possibility of using weapons of mass destruction through the implementation of the provisions of this Convention, thereby supplementing the obligations assumed under the Geneva Protocol of 1925 Recognizing what is enshrined in the relevant agreements and principles of international law prohibiting the use of weapons of mass destruction as a means of warfare.

«Weapons striking with radiation of mass destruction» means in aggregate or separately the following: striking with radiation of mass destruction - devices and objects structurally designed for mass destruction of a living or other target by electromagnetic, infrasound, ultrasonic or other type of radiation, the output parameters of which exceed the values established by international standards in the field of security;
"Anti-riot radiating device" means: any non-prohibited radiating device that does not exceed the maximum permissible level radiation that can quickly cause sensory irritation or physical disorders in the human body that disappear within a short period of time after exposure ceases.

5G Technology and induction of coronavirus in skin cells

Biolife

M. Fioranelli[1], A. Sepehri[2], M.G. Roccia[1], M. Jafferany[3], O. Yu. Olisova[4], K.M. Lomonosov[4] and T. Lotti[5]

[1]*Department of Nuclear, Sub-nuclear and Radiation Physics, G. Marconi University, Rome, Italy;* [2]*Central Michigan Saginaw, Michigan , USA;* [3]*Department of Dermatology and Venereology, I.M. Sechenov First Moscow State Medical University, Moscow, Russia*

Received May 13, 2020 – Accepted June 9, 2020

In this research, we show that 5G millimeter waves could be absorbed by dermatologic cells acting like antennas, transferred to other cells and play the main role in producing Coronaviruses in biological cells. DNA is built from charged electrons and atoms and has an inductor-like structure. This structure could be divided into linear, toroid and round inductors. Inductors interact with external electromagnetic waves, move and produce some extra waves within the cells. The shapes of these waves are similar to shapes of hexagonal and pentagonal bases of their DNA source. These waves produce some holes in liquids within the nucleus. To fill these holes, some extra hexagonal and pentagonal bases are produced. These bases could join to each other and form virus-like structures such as Coronavirus. To produce these viruses within a cell, it is necessary that the wavelength of external waves be shorter than the size of the cell. Thus 5G millimeter waves could be good candidates for applying in constructing virus-like structures such as Coronaviruses (COVID-19) within cells.

Coronavirus disease (COVID-19) is the main problem this year involving the entire world (1). This is an infectious disease caused by a newly-discovered coronavirus. This virus is a member of related viruses that cause diseases in mammals and birds. In humans, coronaviruses cause respiratory tract infections that can be mild, such as some cases of the common cold (among other possible causes, predominantly rhinoviruses), and others that can be lethal, such as SARS, MERS, and COVID-19. Among them, COVID-19 is an enveloped virus with a positive-sense single-stranded RNA genome and a nucleocapsid of helical symmetry. The genome size of coronaviruses ranges from approximately 27 to 34 kilobases, the largest among known RNA viruses (2, 3). To date, many scientists have tried to find a method to cure this disease (4, 5); however, without success. COVID-19 may have effects on different types of cells. For example, it has been argued that this virus may have some effects on dermatologic cells (6). On the other hand, it has been known that some waves in 5G technology have direct effects on the skin cells (7). Thus, there are some similarities between effects of COVID-19 and waves in 5G technology.

A new question arises regarding a relationship between 5G technology and COVID-19. The 5G technology is the fifth-generation mobile technology in which its frequency spectrum could be divided into millimeter waves, mid-band, and low-band. Low-

Harm to health

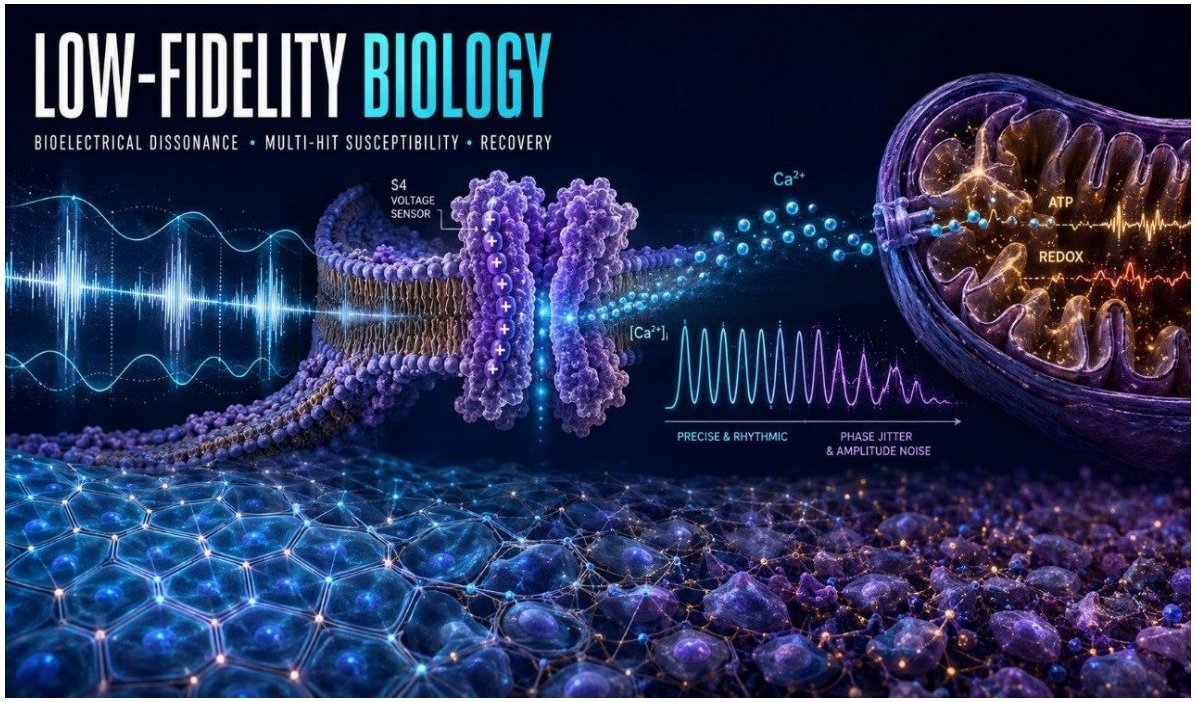

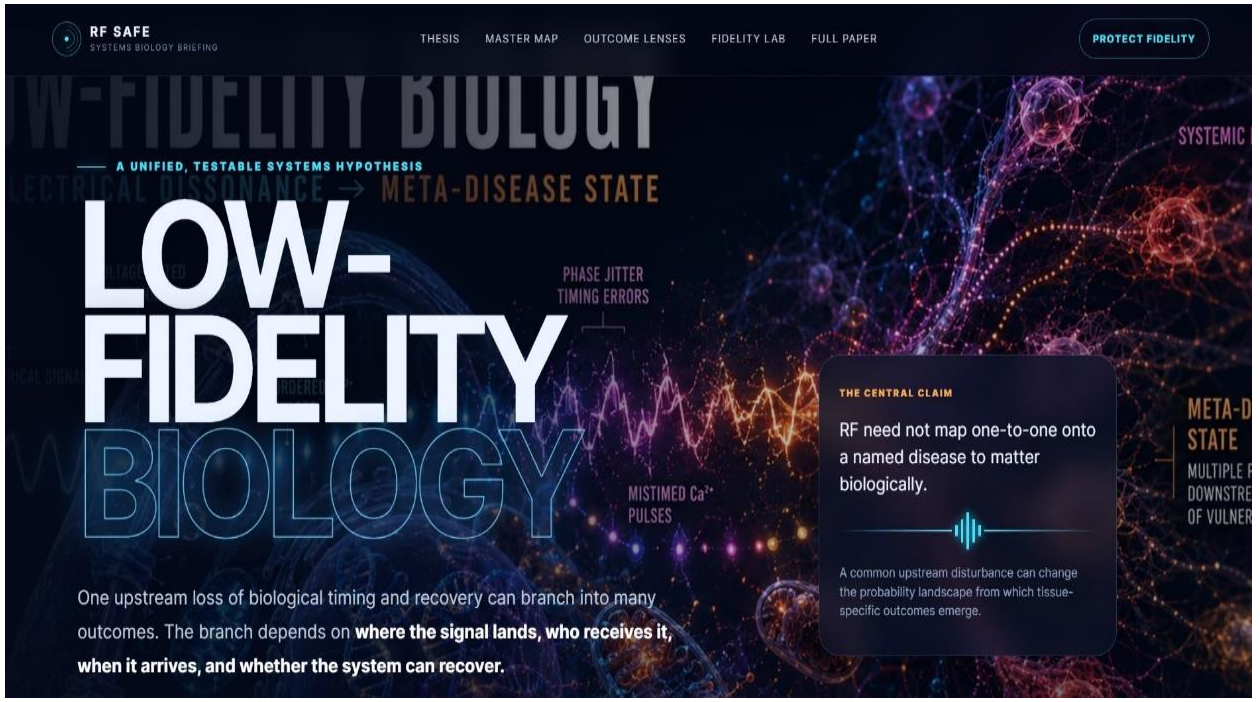

ARTICLE INFO

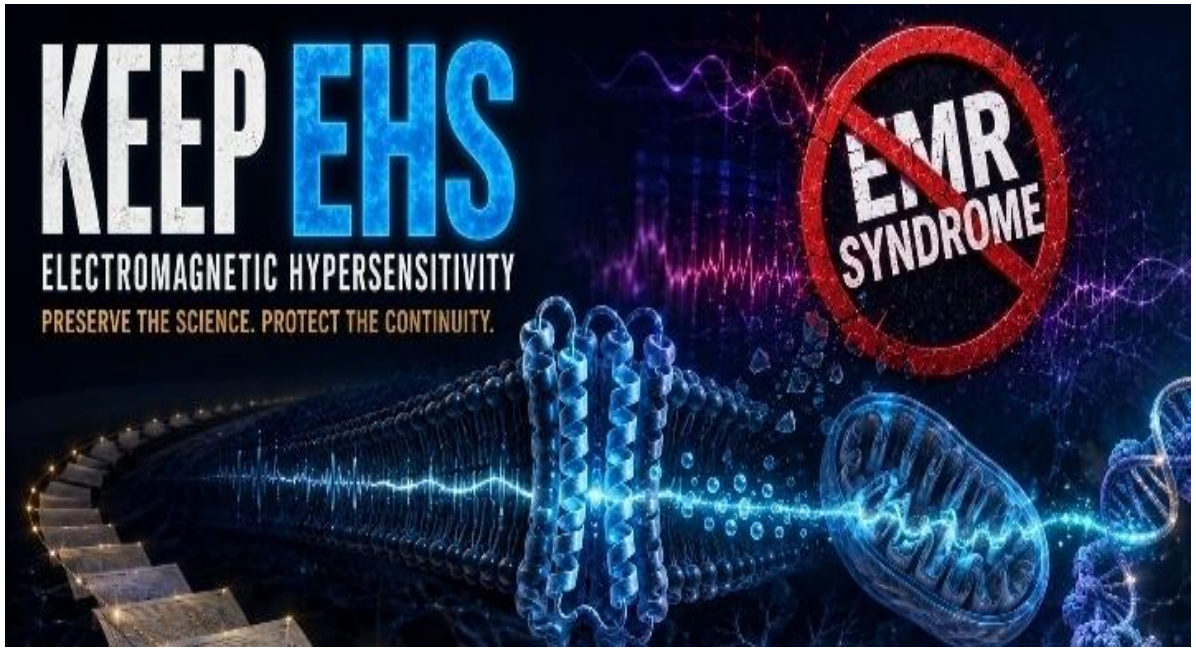

Keywords:
Electromagnetic fields
Wireless radiation
Non-ionizing radiation
Mobile networking technology
5G
Adverse health effects
Toxicology
Toxic stimuli combinations
Synergistic effects

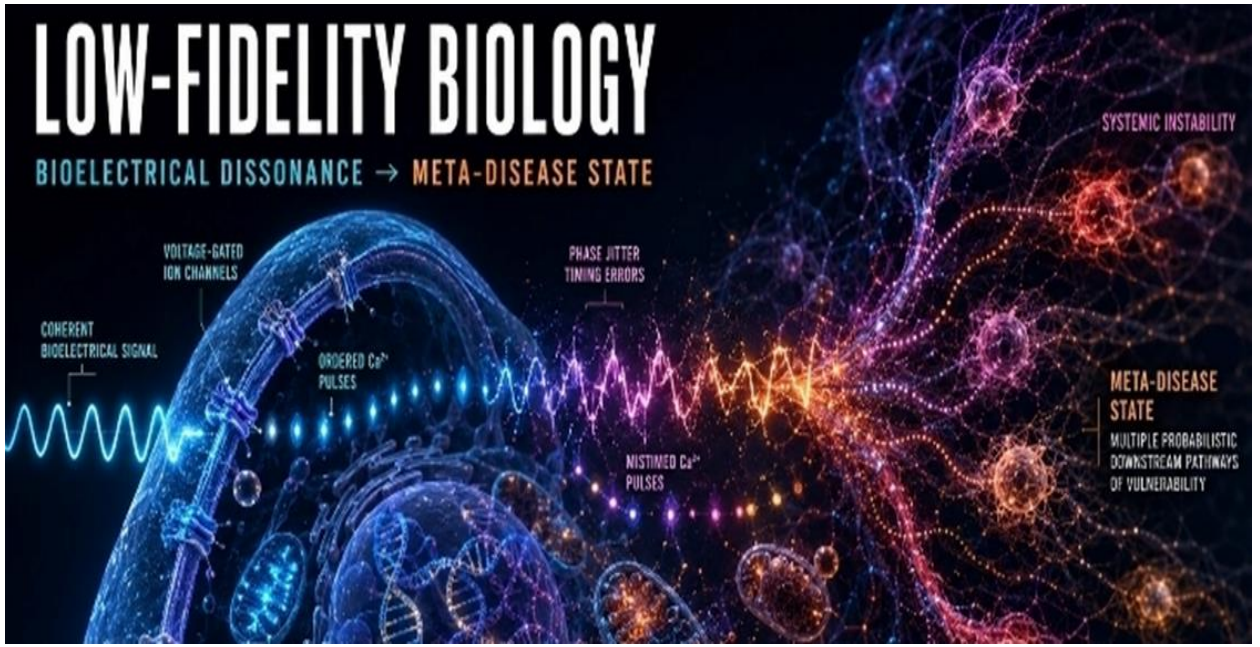

ABSTRACT

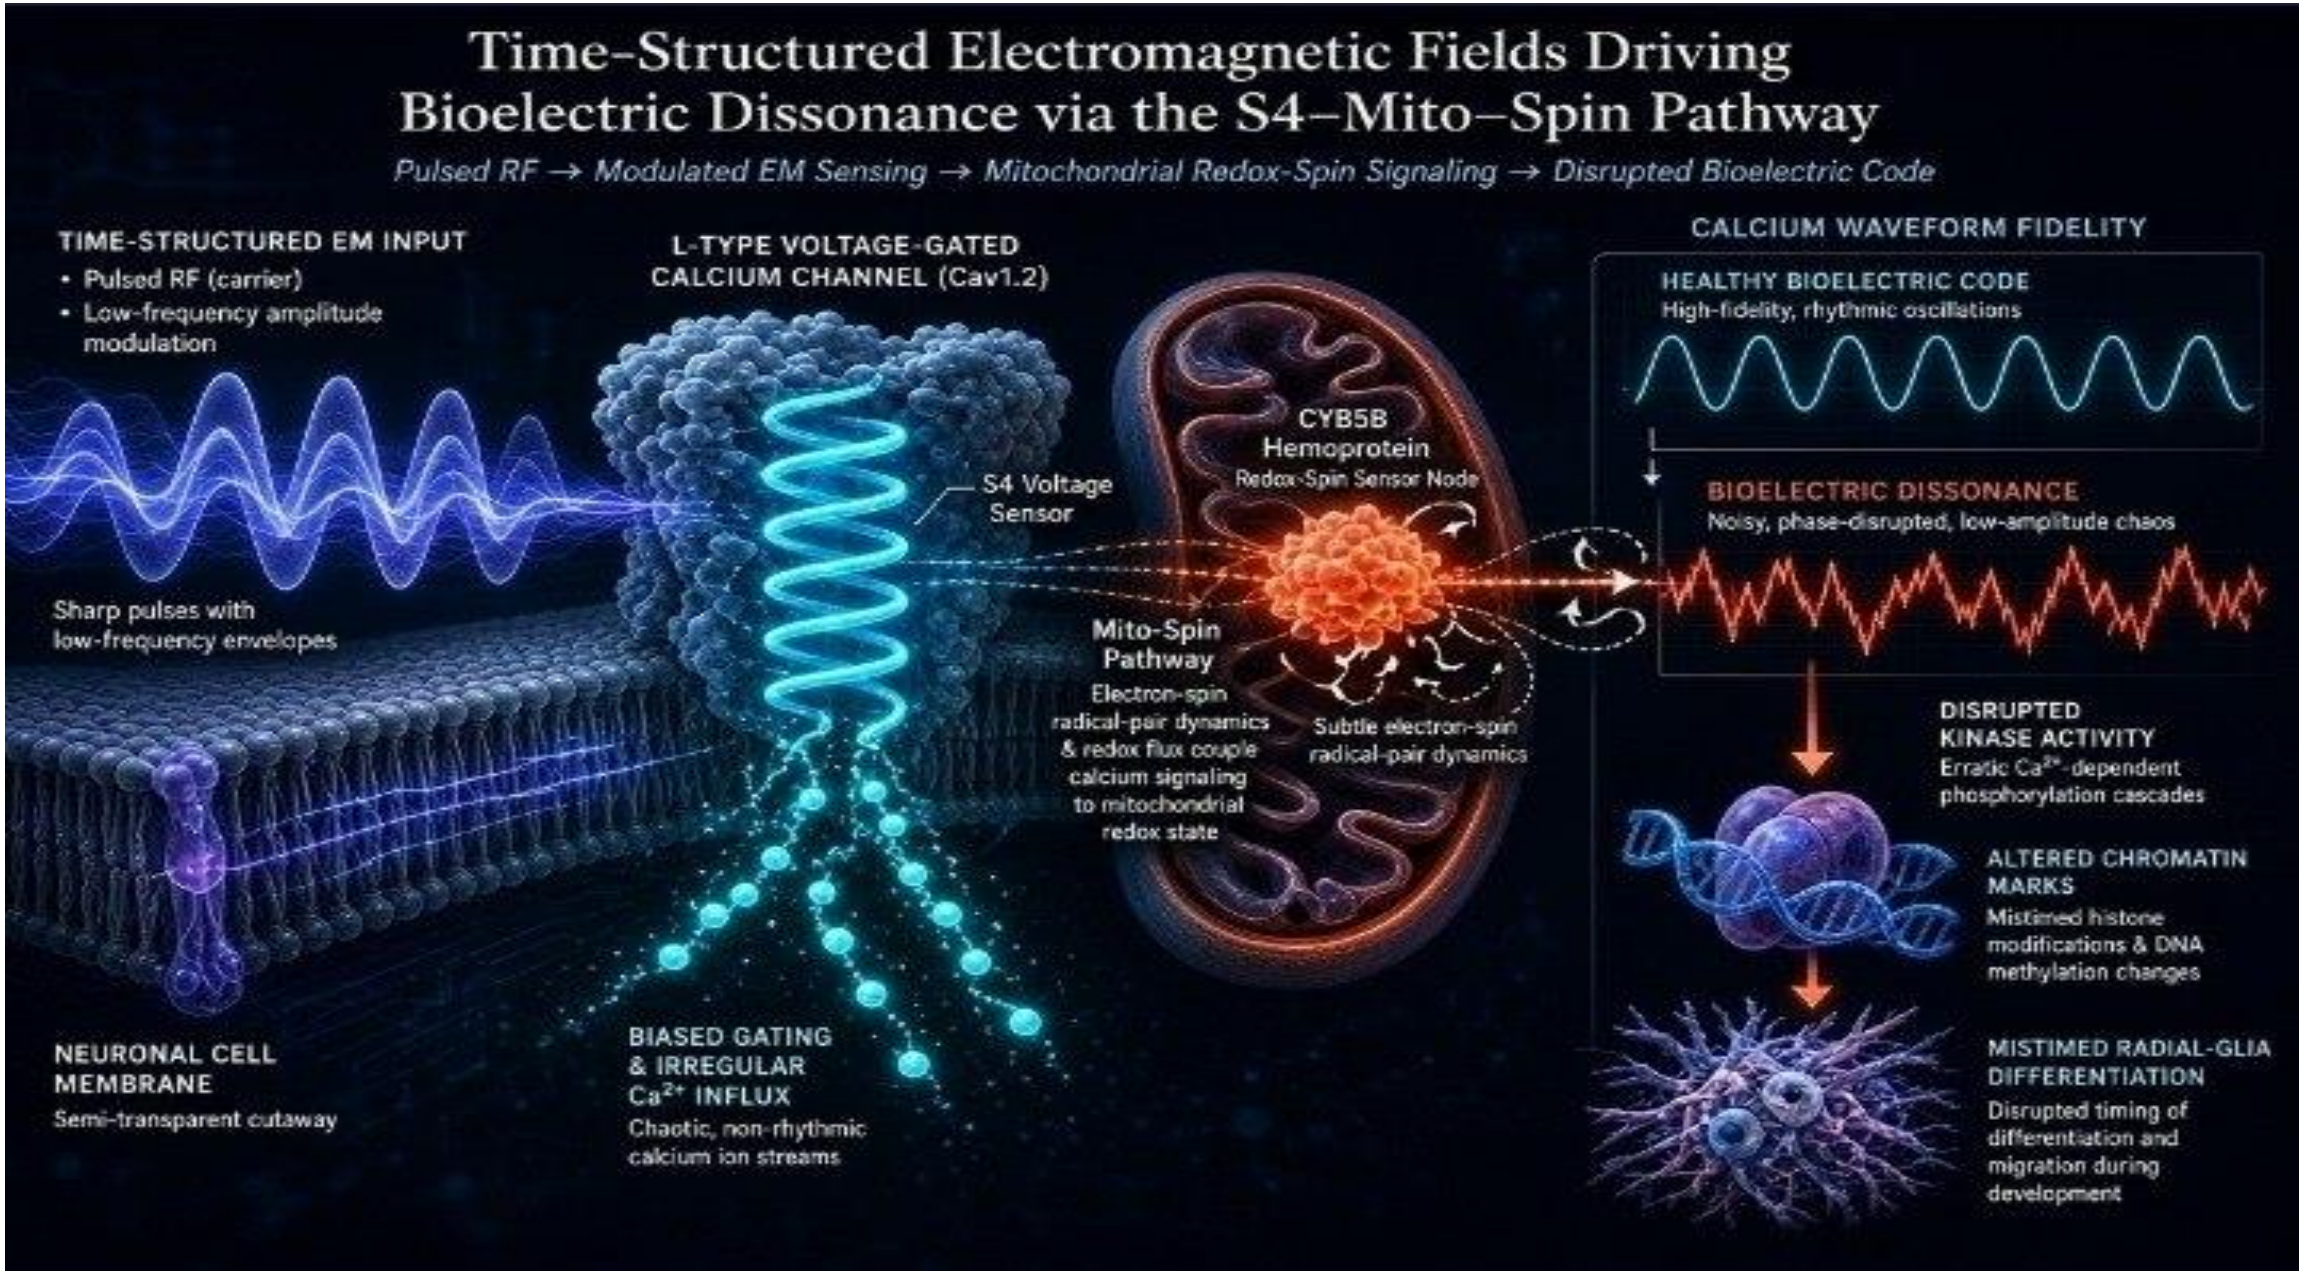

This article identifies adverse effects of non-ionizing non-visible radiation (hereafter called wireless radiation) reported in the premier biomedical literature. It emphasizes that most of the laboratory experiments conducted to date are not designed to identify the more severe adverse effects reflective of the real-life operating environment in which wireless radiation systems operate. Many experiments do not include pulsing and modulation of the carrier signal. The vast majority do not account for synergistic adverse effects of other toxic stimuli (such as chemical and biological) acting in concert with the wireless radiation. This article also presents evidence that the nascent 5G mobile networking technology will affect not only the skin and eyes, as commonly believed, but will have adverse systemic effects as well.

RF need not map one-to-one onto a named disease to matter biologically.
A common upstream disturbance can change the probability landscape from which tissue-specific outcomes emerge.
One upstream loss of biological timing and recovery can branch into many outcomes. The branch depends on where the signal lands, who receives it, when it arrives, and whether the system can recover.

Side effects of cell tower radiation

Cell towers emit radiofrequency (RF) radiation, which is a type of non-ionizing radiation. While the scientific community is still debating the potential health effects of RF radiation, some studies suggest that exposure to cell tower radiation may be linked to various health issues. Here are some potential side effects of cell tower radiation:

- **Cancer Risk**: Some studies have found a possible link between exposure to RF radiation from cell towers and an increased risk of cancer, particularly leukemia and brain tumors.
- **Neurological Effects**: Prolonged exposure to RF radiation may cause neurological problems, such as headaches, dizziness, and memory loss.
- **Sleep Disturbances**: Exposure to RF radiation has been linked to sleep disorders, including insomnia and daytime fatigue.
- **Cardiovascular Problems**: Some studies suggest that RF radiation may increase the risk of cardiovascular disease, including heart rate variability and blood pressure changes.
- **Reproductive Issues**: Exposure to RF radiation may affect fertility and reproductive health, particularly in women.
- **Immune System Disruption**: RF radiation may weaken the immune system, making individuals more susceptible to infections and diseases.
- **Genotoxic Effects**: Some studies have found that RF radiation may cause genetic damage, which can lead to mutations and cancer.
- **Environmental Concerns**: Cell towers may also have environmental impacts, such as disrupting wildlife behavior and affecting plant growth.

Electronic Harassment and Directed Energy Weapons
Abuse and Torture
Symptoms

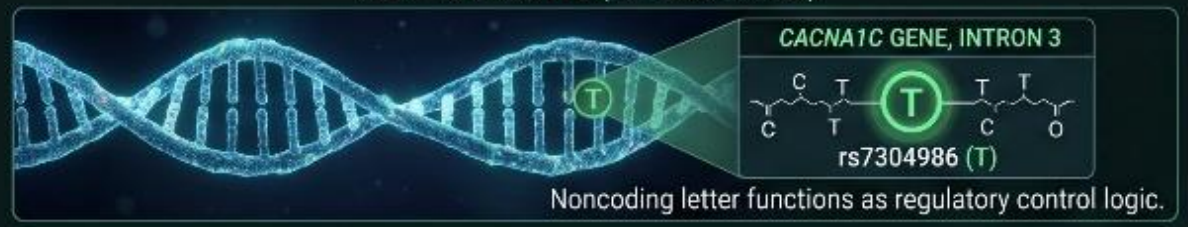

* Forced sleep and sleep deprivation
* Contol of muscles and loss of.
* Forced Orgasms (awake and sleeping).
* Pins and needles in head and body.
* Burning sensations over body.
* Persistant itching over body.
* Increase or decrease in body temperature.
* High pitch sounds and buzzing.
* Intense headaches.
* Loss of breath.
* Rapid Heartbeat.
* Blurred vision.
* Muscle cramps.
* Forced or manipulated speech.
* "Zombie" state.
* Joint and muscle pain.
* "Questionable" marks and bruising on body.

Directed Energy Weapons
are torture military weaapons
designed to literally "cook" one from the
inside out, resulting in immobilization,
torture, humiliation, and death.

THE BIOLOGICAL ECLIPSE: How a Single Noncoding Letter Re-weights Cellular Intelligence

INPUT
STANDARD, NON-NATIVE EMF PROBE (ENTROPY)
(3.6 GHz carrier + 12.5 Hz amplitude modulation)

NATIVE STATE (T/T CARRIER)

Noncoding letter functions as regulatory control logic.

TOPOLOGICAL WEIGHTS & BIASES
(The Mesh Network)

Stable T-allele geometry forms deep, robust architectural weights.

THE PROBABILISTIC ATTRACTOR CALCULATION
(The Landscape)

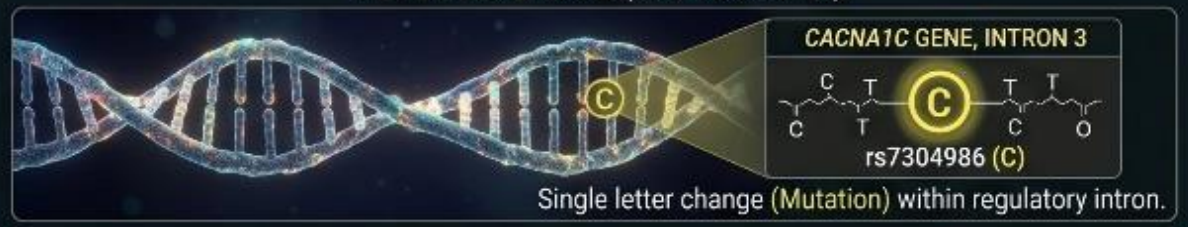

QUERY OUTPUT: Deep wells resist entropic noise. Output probability remains default.

THE READOUT
(EEG Frequency)

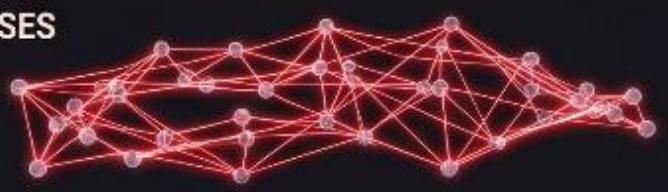

ALTERED STATE (T/C CARRIER)

Single letter change (Mutation) within regulatory intron.

TOPOLOGICAL WEIGHTS & BIASES
(The Re-Weighted Network)

Single letter change physically alters latent space, re-weighting the network geometry.

THE PROBABILISTIC ATTRACTOR CALCULATION
(The Landscape)

QUERY OUTPUT: Warped weights create a shallow probability landscape. Entropy forces 'hallucinated' output state.

THE READOUT
(EEG Frequency Acceleration)

The coding region builds the part.
The noncoding architecture helps determine the logic.
The probabilistic logic shapes the bioelectric response.

THE PARADIGM SHIFT: REDEFINING ELECTROMAGNETIC HYPERSENSITIVITY (EHS)

FROM thermal only to biological timing failure

THE FLAWED PAST

OLD QUESTION:
CAN THIS PERSON CONSCIOUSLY DETECT WI-FI AND GET A HEADACHE WITHIN FIVE MINUTES?

CRITICAL ERROR:
Tests acute conscious perception, not biological response.

EHS FORMULA for thresholds:

SPECIFIC EMF WAVEFORM + GENOTYPE SUSCEPTIBILITY + COMPROMISED PHYSIOLOGICAL STATE = MEASURABLE TIMING FAILURE (BIOELECTRIC DISSONANCE)

EMF exposure alone may be insufficient; cofactors cross threshold.

THE SCIENTIFIC FUTURE

NEW QUESTION:
UNDER WHAT PHYSIOLOGICAL STATE, GENETIC BACKGROUND, EXPOSURE PATTERN, AND RECOVERY WINDOW DOES THIS PERSON SHOW A MEASURABLE LOSS OF BIOLOGICAL TIMING FIDELITY?

EHS DEFINED: heterogeneous set of threshold disorders where non-native EMFs act as a timing stressor on a genetically altered receiver architecture.

SMOKING GUN EVIDENCE

1. THE RECEIVER ALTERATION (2025 *Neuroimage*)

CACNA1C GENOTYPE × 5G RF-EMF

A single noncoding letter change (intron) in *CACNA1C* determines if a 3.6 GHz 5G field shifts human sleep spindle rhythms.

2. THE TRANSDUCER (2026 *Cell*)

CYB5B PROTEIN × EMF

Mitochondria possess Cyb5b to transduce EMF waveforms into patterned Ca^{2+} signals (Timing Code) that control gene expression.

3. THE QUANTUM HARDWARE (2026 *Nature*)

RADICAL-PAIR SPIN MECHANISM

Room-temperature quantum chemistry (spin selectivity) allows weak magnetic fields to alter proteins **WITHOUT** heat.

THERMAL-ONLY RULE: IRRELEVANT!

PHASE 5: CELLULAR VALIDATION
Low-Fidelity Proof

Avoid conscious detection tests to feconoregation resoonary

Measure timing noise (spectral entropy, wavelet coherence)

THE CODING REGION BUILDS THE CELL.
THE NONCODING ARCHITECTURE HELPS DETERMINE THE LOGIC.
THE PROBABILISTIC LOGIC SHAPES THE BIOELECTRIC RESPONSE.

ceLLM S4 MITO-SPIN RF SAFE

The biological activity of alkaline phosphatase in neutrophil leukocytes was also found to increase when the rats were irradiated [17].

The results of several other experiments are summarized in the NIOSH Technical Report [8]. RF/MW radiation has been observed to cause: an increase in the amount of exudate in bone marrow, the transient disappearance of fat cells from bone marrow, destruction and loss of essential bone marrow cells, underdeveloped marrow, a decrease in the number of red blood cells, and an imbalance in the number of lymphocytes in the bloodstream [8].

H. Effect to the Central Nervous System

There is documented evidence that exposure to RF/MW radiation can cause a disturbance in the central nervous system (CNS) of living organisms [3], [8], [11], [17]. Soviet investigators claim that exposure to low-level radiation can induce serious CNS dysfunctions. Experiments conducted in the Soviet Union and Eastern Europe have exposed live subjects to radiation levels that are near or below the recommended safe levels prescribed by the ANSI Standard and the USAF AFOSH Standard [17].

О БИОЛОГИЧЕСКОМ ДЕЙСТВИИ ЭЛЕКТРОМАГНИТНОГО ИЗЛУЧЕНИЯ РАДИОЧАСТОТНОГО ДИАПАЗОНА

Сергей Вадимович ЯРГИН

Российский университет дружбы народов
117198, г. Москва, ул. Миклухо-Маклая, 6

Имеются ограниченные эпидемиологические данные, свидетельствующие о канцерогенном эффекте электромагнитного излучения радиочастотного диапазона (ЭМИ РЧ), однако в эпидемиологических исследованиях не исключены систематические ошибки (bias). Заболеваемость опухолями центральной нервной системы фактически не отреагировала на рост использования мобильных телефонов с 1990-х годов. Умеренный рост заболеваемости в некоторых странах можно объяснить прогрессом методов визуализации. Эпидемиологические данные касаются техногенных ЭМИ РЧ нетепловой интенсивности. В то же время отсутствуют сообщения о повышенном риске злокачественных опухолей после УВЧ-терапии термальной интенсивности, которая широко использовалась в оториноларингологии с 1960-х годов. ЭМИ РЧ солнечного и атмосферного происхождения являются компонентом окружающей среды, они подвержены значительным колебаниям. Соответственно, должна иметь место адаптация живых организмов. Средством решения проблемы могли бы стать широкомасштабные эксперименты на животных с регистрацией продолжительности жизни. Средняя продолжительность жизни животных, подвергнутых хроническому воздействию ЭМИ РЧ, в некоторых исследованиях была выше, чем в контроле, что может отражать благоприятное действие в соответствии с концепцией гормезиса. Прижизненные и посмертные исследования животных сопровождаются затратами, которые можно направить на увеличение количества наблюдений с целью повышения статистической достоверности. Для того, чтобы выводы были применимыми к профессиональной деятельности или использованию мобильных телефонов, мощности доз в экспериментах должны быть сравнимыми с таковыми у человека.

Ключевые слова: электромагнитное излучение радиочастотного диапазона, мобильная связь, гормезис, канцерогенный эффект.
