Dear President Trump:

I witnessed the 5G AT&T Cell Tower at 91 W. Shaw in Clovis approximately three blocks south of my apartment bedroom window being worked on yesterday Wed June 4, 2025, as I entered the left turn lane on Shaw and Minnewawa. The male was lifting one of the four boxes known to many as the Raytheon patented and manufactured Active Denial System2 used to hit targeted individuals locking target's brains into fight or flight causing extreme body temperature, insomnia and anxiety. For 12 years I have been victimized by this and other 5G cell towers in the Clovis area. For the record last night's assault was not as severely painful as the night before where I did not sleep a single hour. However even after multiple sleep aids and prescribed sleep medication the needed relaxation and restful sleep was minimal. After decades of the Hell why hasn't anything been done to stop the corrupt telecommunication conglomerates? Just like DARPA and its HAARP Assassination, the Military Industrial Complex and the Military Contractors also responsible for the 21st Century Genocidal Holocaust. Us 21st Jews particularly us Whistleblowers will never know a life free of torture. Four decades I have lived this nightmare that has included being forced to watch my mentally ill son's life be totally destroyed. Angry doesn't come close to describing what us Whistleblowers are feeling
