Dear President Trump:

I believe my life is in extreme danger as are my pets and my mentally ill son. From the moment I got into bed last night Tues June 3, 2025 I could feel the microwave beam hitting my bed and immediately I began suffering extreme body temperature, perspiration, extremely dry swollen nasal passages, dry mouth and directed energy assault to my head and body along with mind control technology similar to the Raytheon Active Denial System present in cell towers particularly 5G. I wasn't allowed to sleep one hour. At 2:20 am the microwave assault was so severe I could not breathe out of my nose or mouth and was forced out of bed. It's been my experience in years past whenever I speak out online (Facebook) against CA Governor Newsom and the ongoing corruption and destruction of California I suffer an increase of life-threatening debilitation attacks as do my pets. Both of my cats and my little dog had episodes of choking and projectile vomiting. Please stop the directed energy weapons and mind-control technology attacks. Without question my mentally ill son is also being targeted. With so much brain injury over his entire lifetime the assaults being carried out against him have forced him into an in-patient mental health facility. I beg of you to please stop the torture here in California.
