Dear President Trump:

Again last night Thurs June 5, 2025, I was assaulted by a directed energy weapon nonstop until arising this morning 9/6/2025 at 8am. The device I believe to be the culprit is the Active Denial System, (patented and manufactured by Raytheon allegedly for crowd control) from a nearby AT&T 5G cell tower at 91 W. Shaw which is approximately three city blocks from my apartment bedroom. The moment I got into bed my heart rate increased as did my body temperature. My brain was in the usual fight or flight mode. Forced to take multiple sleep supplements and prescribed sleep medication finally upon dozing off I was jolted awake due to head, neck, shoulder and arm pain in both arms with both hands numb. The high body temperature forced me out of bed multiple times due to perspiration, head and body discomfort.

Please President Trump stop this use of directed energy weapons intended to harm, injure, torture and kill so many of us targeted individual whistleblowers.

JeanAnn Hurst
