Create a unique look for the space available

Tips for Multiple Pierci

1. **Talk with your customer to understand th vision:**
   - Do they want multiple piercings on one ear or both?
   - What sorts of earrings do they plan to wear?
2. **Remember that every ear is unique.** Exami customer's ears carefully to determine whethe they have enough soft tissue on the lobe to fit piercings they want.
3. **Space the new piercings properly.** There sh be at least ¼" between piercing holes, but spa unique for everyone. The hole location and spa will be determined by the size of the ears and t preferred earring style.
4. **Take your time and review the locations do carefully before the piercing.** This is an impo step, so don't rush! After dotting, give your cust the mirror to make sure the dots right. If not, sir clean them off and dot again!
