

Bashford Rd

Delbarton Ct.

RF over 10 is dangerous
Signal varies, but seems to average 12-14.
It passes through our house and we can feel the effects. Our home router is high if we are close to it, so keep your router at least 10 ft. from your family.

5' from home wireless router

The FCC limit for public exposure from cellular telephones is an SAR level of 1.6 watts per kilogram (1.6 W/kg).

What are the symptoms of radio frequency sickness? The symptoms most commonly experienced include dermatological symptoms (redness, tingling, and burning sensations) as well as neurasthenic and vegetative symptoms (fatigue, tiredness, concentration difficulties, dizziness, nausea, heart palpitation, and digestive disturbances).

Key sources of RF fields include mobile phones, cordless phones, local wireless networks and radio transmission towers. They are also used by medical scanners, radar systems and microwave ovens.

If your children are experiencing these symptoms, buy a $30 meter on-line and check the RF levels in your home and their school.
