ELECTROMAGNETIC POLLUTION VICTIMS

www.empvictims.org

September 30, 2026

The EMP Victims collective – Victims of Electromagnetic Pollution – has been giving a voice for nearly two years to those who suffer from EMR Syndrome.

We launched an international appeal, "EMR-S (EHS) Is a Humanitarian Emergency," on February 14, 2024.

Today, our website, www.empvictims.org, brings together:

- More than 4,600 messages from signatories to our Appeal, reporting electromagnetic suffering around the world;

- A series of video testimonials documenting lives shattered by mobile phone masts, mobile phones, Wi-Fi routers, smart meters and other wireless devices communicating through radio frequencies, as well as by electrical and magnetic pollution, and also the indifference, or even denial, surrounding this suffering.

People affected by EMR-S syndrome are environmental sentinels who alert us to the biological effects of EMFs and to the immediate and imperative need for zons free from wireless radiation for those who are most severely affected.

We are also calling for a radical change in standards in order to protect those who are not yet suffering, particularly children and pregnant women, who are among the most vulnerable

Our Appeal has been received by institutional officials who refuse to take into account the health and environmental consequences of the exponential increase in levels of artificial EMFs.

We support Robert F. Kennedy Jr., U.S. Secretary of Health and Human Services, in the hope that the toxicity of electromagnetic radiation will finally be recognized and that each state will take the necessary measures to protect its population.

[Attached are the appeal, the 4,653 messages submitted by signatories as of 30 September 2026, and the European Commission's response.]

ELECTROMAGNETIC POLLUTION VICTIMS

The Appeal of ElectroHyperSensitive People to all elected officials and doctors in Europe

EMR-S/EHS IS A HUMANITARIAN EMERGENCY

Electrohypersensitivity (EMR Syndrome/EHS) is a disabling environmental syndrome that can occur suddenly or develop gradually, following exposure to artificial electromagnetic fields (EMF). Wireless radiation: mobile phones, cordless phones, wifi, bluetooth, smart meters, any wirelesss object or device, and electrical pollution are among the main sources of electromagnetic pollution.

We, electrohypersensitive people (EHS), are sounding the alarm.

The distress of people with EHS disabilities[1], who are increasingly numerous, is a humanitarian emergency. EMF pollution devastaes their existence, depriving them of access to housing, health care, work and causing them to suffer family and social exclusion, hopeless precariousness and suffering leading some to suicide.

We demand without delay:

• In the name of the obligation to assist persons in danger[2]**: immediate shelter in areas not exposed to artificial radiation, known as "white zones", in every region, for the most affected EHS people.**

• In In the name of the precautionary principle[3]: **a freeze on the siting of new transmitters and a halt to the reinforcement of existing transmitters, with a moratorium on the European decision on the siting of mobile phone masts (European Gigabit Infrastructure Act)[4] and the right to smart meters withdrawal.**

• In the name of the fundamental right to housing[5]**: the safeguard of radiation-free areas (white zones) where EHS sufferers have found refuge, which must be a priority.**

• In the name of States obligations in regard to disability[6]: **the implementation of accessibility programs to restore the social inclusion of EHS people (healthcare facilities, public transport, public services, education, sport, culture and leisure, etc.).**

A complete reform of European regulations on exposure to electromagnetic waves, taking into account the recognition of the biological effects[7] of artificial EMFs, is now required. :

- The devastating effects of artificial EMFs on humans and all living organisms have been documented for over 40 years, and we now have a corpus of thousands of undeniable scientific studies[8].

- The conflicts of interest of the International Commission on Non-Ionizing Radiation Protection (ICNIRP), a private entity which in 2002 dictated the standards without any founded scientific justification, from which the standards are still drawn up today(9), have been clearly denounced in the European Parliament[10].

- No elected representative or doctor in Europe should ignore the numerous scientific publications, recent and long-standing, demonstrating that synthetic EMFs affect living organisms: humans[11], animals[12] and plants[13].

- The epidemic of chronic diseases is evidence of the unfolding health crisis. Artificial EMFs are toxic for environmental ecosystems[14], in addition to pesticides, endocrine disruptors and fine particles[15]. Continuous exposure of everyone, everywhere, at ever-increasing levels, increases the risk of cancer[16], infertility[17], genetic damage[18], damage to the central nervous system[19], immunodepression[20], learning disabilities[21], behavioural disorders[22], chronic fatigue, sleep disorders, electrohypersensitivity[23], multiple chemical sensitivity (MCS)[24], oxidative stress[25] and inflammation[26].

Having this appeal and its attached bibliography in hand, no one may any longer pretend they didn't know. The EMP VICTIMS collective is asking you to take vital decisions that are a necessity for everyone in terms of public health and environment.

www.empvictims.org

BIBLIOGRAPHY

The primary objective of this bibliography is to show the commitment of scientists and the work of European officials on the topic of EMFs and the many sanitary issues involved. We won't be satisfied with simplistic work by the authorities, and remain at your disposal to provide answers to any questions you may have.

Please note that these messages have been entin many different languages.
They are auto translated into English. Originals can be read on our website: www.empvctims.org

1 – KJ Germany – I have been knowingly affected since 2007. I lived for 13 years as a radiation refugee in a housing project for affected people, until August 2024, despite our numerous objections, our housing project was rendered almost uninhabitable by the commissioning of a cell tower nearby! This had catastrophic consequences for all the residents!

2 – Magali LESURE, France – Because we are all electrosensitive, we are all affected!

3 – Daniel VASKU, New Zealand – I am extremely disabled by electromagnetic radiation and am an EMF refugee.

4 – Simon VEILLEUX, France – I consider myself electrohypersensitive and I would like us all to live in a healthy environment, as well as future generations.

5 – ED, France – I have EHS and can no longer work, the migraines are terrible, not to mention the tinnitus, vibrations, insomnia...

6 – TC, France – I am electrosensitive due to chemotherapy, and I was forced to have a «Linky» smart meter installed when my previous one broke down. Since then, I've been experiencing its negative effects. There are also the 5G antennas installed nearby, which certainly have harmful effects.

7 – Laurent SON, France – I am disabled due to electromagnetic radiation. I am electrohypersensitive.

8 – Jean-Michel GARNIER, France – This pollution must be denounced and fought like any other that harms the health of living beings.

9 – Yasmina MAKHLOUFI – I can't take fighting for everything anymore: finding housing, keeping a job, studying to retrain, getting medical care, etc.

10 – AP, France – I am electro-hypersensitive.

11- Aurore DE RIDDER, Belgium – I am EHS.

12 – AL France – For the precautionary principle and for future generations.

13 – LL, France – I have EHS and MCS, and I no longer have access to anything. I have been confined to my home for 12 years... this is not a life.

14 – DC, France – So that my wife gets better!

15 – Christian LANDREAU, France – I am electro-hypersensitive.

16 – LC, France – I have been electrohypersensitive for two years. My life is completely turned upside down.

17 – AR, France – Artificial radiation raiation is a disaster.

18 – CC, France – Health: physical, mental, and energetic, is a priority; respect for all living things; no consent to technological development projects that are harmful to life: human, plant, and animal; no consent to the implementation of projects for the financial gain of predators. Humanity is not to be exploited; no to the use of harmful electromagnetic radiation.

19 – Kristien POTTIE, Belgium – It is urgent that electrohypersensitivity be recognized! It is urgent that people suffering from extreme pain have a place to live, a place to receive treatment, and places to participate in activities and meet others! It is high time that our fundamental rights are respected! What people who are not EHS often forget is that everyone is affected. Just because you don't feel radiation doesn't mean you are not impacted. Artificial electromagnetic radiation can damage DNA, create oxidative stress, etc., and can thus cause cancer or neurodegenerative diseases. Nature is also severely impacted; this concerns ALL living things!

20 – Marie MARSY, France – Industry must serve health, not the other way around!!!

21 – ML, France – Humans are meant to be healthy.

22 – KP, Belgium

23 – DD, Belgium – I am against the installation of new transmitters and the reinforcement of existing transmitters!

24 – Rihard FAITG, France – A healthy life for each of us.

25 – GM, Belgium – I am forced to live in seclusion. I am in daily pain. I request white zones.

26 – GD, France – Global health emergency!!

27 – MB, France – I am EHS – message sent from a computer connected to a wired network without wifi.

28 – Amandine CADARS, France – EHS has been destroying my life for so long.

29 – Tanja REBEL, UK – To not be irradiated is a Human Right in accordance with the Right to Free and Informed Consent enshrined in UN Law. To irradiate people with EHS - the Canaries in the Coalmine, is discrimination and amounts to Assault. NB: There is no longer any question whether wireless Radio Frequency (RF) radiation – used in mobile phone communications and wireless devices – is harmful to humans and wildlife. Commonly identified health consequences of short and longer term exposures include insomnia, headaches, tinnitus, nosebleeds, fatigue, as well as other serious and life changing ailments. Tens of thousands of scientific papers (linked herein) have cited connections to the role of EMFs in a multitude of adverse health effects, including depression, infertility, diabetes, heart disease, cancer, damage to DNA/gene expression, oxidative stress, pregnancy complications, Melatonin production, neurological disorders, immune dysfunction, Alzheimers/dementia, leukaemia, and many, many more. Over 1,600 scientific papers can be found here: https://www.powerwatch.org.uk/science/studies.asp Another 4000+ studies can be found here: http://www.bioinitiative.org And another 23,840 studies are linked here: www.EMF-portal.org Radio Wave Packet reviews studies on the impact of EMR on insects, birds and wildlife, as well as health, with 9 pages of bibliography. Finally, here is a compilation of the vast number of known biological effects from wireless radiation: https://www.5gfrequencyfreefairbanks.org

30 – VS, France – I agree.

31 – Antonia POULEVA, France – In solidarity with people who are hyper-electrosensitive.

32 – Guy MENARD, France – In solidarity with people who are hyper-electrosensitive.

33 – MC, France – I am very sensitive to electromagnetic radiation.

34 – CR, France – I feel concerned.

35 – AL, France – I have severe EHS (electromagnetic hypersensitivity) and today I live worse than someone sentenced to house arrest with an electronic tag. And I think the worst thing is the explosion of cancers: a 76% increase in head and neck cancers in just a few years, and we're told it's due to pesticides. I grew up in the 70s on a farm where my father used them without any protection, and the neighbors were the same. He breathed them in through his nose and mouth; frankly, he died at 74. And doctors tell us that this increase is due to pesticides in our food. I'll say it: I've never seen anyone make a phone call with their feet, put their Bluetooth headphones on their ankles, or their AirPods between their toes. When are we going to come to our senses?

36 – BZ, France – I know people with EHS who need protection.

37 – BP, France – I am EHS.

38 – Agnes FORETTE, France – People with electromagnetic hypersensitivity (EHS) suffer and die amid general indifference; this cannot continue. Artificial electromagnetic fields (EMFs) damage all living things.

39 – RR, UK – I am very worried about all the EHS we are made to suffer and even more so for the future of our children.

40 – SD, France – I support my wife with EHS, our life is on hold.

41 – FT, France – It's time!

42 – Glynis Walker, UK – I was sensitive to the street light smart meter outside our house and we want to stop 5G, because it would be worse.

43 – Jesús ABAD, Spain – Electrosensitive people deserve to live and have suitable spaces, and a radical reduction in electromagnetic pollution and its effects on people and nature in general (animals and plants) is necessary. It is high time that health authorities and politicians take this illness and threat seriously .44 – Carmen SOTO ZEEVAERT, Belgium – I am EHS and it is becoming unbearable to live like this in this world without respect and without compassion for us.

45 – Pierrick LE HENAFF, France – My wife is EHS.

46 – Robert JAFFREZIC, France – Tomorrow, it will be too late.

47 – NV, France – I know we are ALL in danger with this filth!

48 – Catherine BARRET, France – I have a friend with EHS, I care about future generations and am well informed!

49 – Bernard SARRA-GALLET, France – In solidarity with people with EHS.

50 – CC, France – Having myself been seriously injured following electrocution by the «Linky» smart meter, I have suffered mistreatment and they refused to remove the «Linky» smart meter at 75 years old and disabled, I live in miserable conditions because of human cruelty!

51 – Pierre ROSE, France – there are already too many EHS cases and it will only get worse because, particularly in France, there is a reluctance to link EHS with electromagnetic radiation.

52 – ML, France – I am EHS.

53 – Catalina JACKSON, Belgium – Por una amiga, que esta muy afectada por todas estas ondas. (For a friend, who is very affected by all this radiation).

54 – MB, France – Electrosmog is everywhere, antennas and connected objects are imposed on us, we have the right to live on the earth and, moreover, in good health.

55 – Ellen KROON, Nederland – Ik EHSér ben en mijn leven hier door in een hel est veranderd. (I'm EHS and my life has become hell because of it.)

56 – MACE Paul, France – You don't need to be a scientist to see the obvious...

57 – DO, UK – I suffer without any help, but I still have hope. This needs to stop; let us be well again and be able to live a meaningful life. Not constantly locked down and forever having to recover from exposure

58 – IL – France – To open parliamentary debates and legislate in favor of humans and nature in general.

59 – MR, France – Because I am electrosensitive. I have moved twice because of this and cannot go everywhere, public places (hospital), friends' houses, hotels, etc...

60 – MW, – UK – I am Electro Sensitive and have developed health effects from exposure to EMFs and the pollution caused by the increasing levels.

61 – Alain CARPON, France – Everyone is electro-sensitive and at risk from artificial electromagnetic radiation

62 – Catherine GEELS, Belgium – Out of solidarity with the people I know who are affected, and because we must stop this escalation of being ever more connected and ever faster...

63 – NL, France- I am hyperelectrosensitive

64 – FC, UK – Even our Director of Public Health does not accept that people can be affected by EHS. He believes the symptoms are caused by other health issues.

65 AC, Italy – If you do not know all the electrical and magnetic devices are in the first place, it is also less sensitive. (We are all subject to electromagnetic pollution and, sooner or later, even the least sensitive people will be affected.)

66 – Marc PERROT, France – I am EHS.

67 – PC, France – Friend in an EHS situation.

68 – ND, France – I am electrosensitive, and in my opinion, this amounts to torture for a population. The power of the radiation

since 4G and 5G has become unbearable for some. It is time for this discrimination, as well as all other forms of discrimination, to end! Let's respect our fellow human beings!

69 – MB, France

70 – Anne KENNY, France – We must think about human health.

71 – LD, Italy – Preserve the future of new generations and all living beings (animals and plants).

72 – Marie-José BLANCHARD, France – Because it is time for our elected officials to become aware of the dangers.

73 – Daniela CIUTI, Italy – Because what they are doing with these continuous implementations of antennas and magnetic fields is a crime against humanity. All for business and profit... no protection for people, the environment, and animals

74 – IW, Belgium – I am EHS.

75 – Marie-France VERDIER – I have been EHS for 8 years and my life has become a living hell.

76 – Véronique BORGOGNINI, France – My close friend and her partner have EHS (Electromagnetic Hypersensitivity), and it's very difficult for them. They live far from their families, are excluded from family events, and are misunderstood and called crazy by many people when they talk about their problems. There are also many children who suffer from ADHD, including my little girl, and I think all these increasingly advanced new technologies are partly responsible.

77 – A. L, France – ...

78 – BP, France – For the good of humanity!

79 – FD, Italy – I am a victim of EMF

80 – MM, France – It is becoming hellish to live in this electromagnetic pollution, we have to live in isolated places, without being able to do activities, that is to say, simply to live.

81 – NP, Italy – You have a suitable regulation for health prevention. (I wish there were appropriate regulations for health prevention.)

82 – Guy RUFFIER, France – I live in Lyon and our social housing provider, along with the operator FREE, has a project to install 3 mobile phone relays on the roof of our building. However, we live directly below this roof and we fear for our physical and mental health. I am disgusted!!

83 – JJ, Ialie – I do not agree with the use of radio frequencies which alter natural biological cycles and cause health problems for everyone.

84 – MT, France – I am electrosensitive.

85 – ML, France – I am 32 years old, I have suffered from EHS and MCS for 4 years, I live in perpetual confinement. I had to leave everything behind and lose everything (social life, professional life, health, security, housing, income, freedom of movement, access to healthcare, access to shops, access to culture, access to employment, access to public transport, and my partner of 10 years (after 3 years of exhaustion searching for a suitable place to live)) to live in a completely precarious situation in a digital dead zone threatened by the construction of antennas and wind turbines. I can't leave the house and have been without electricity for 4 years. My neighbor had to stop using his Wi-Fi, his cell phone, and all connected devices so I could live here while I find another solution. I'm being lent a house temporarily, but I can't find anywhere else and I don't have the financial resources to leave. When I'm exposed to low and high frequencies, after a few seconds or minutes I have to leave because I experience severe cognitive impairment, skin burns, headaches, tremors, dizziness, heart problems, then total insomnia and pain. Joint and muscle pain. It takes me several days to recover, even though the exposure to radiation lasted only a few minutes. I'm worried about my life/survival because technology is developing at breakneck speed, inevitably leading to high levels of electromagnetic pollution. Areas free from electromagnetic pollution are disappearing, and a complete shift in society and its habits (connected cars, devices, and homes) is making life impossible. I'm in a state of great distress and without a solution.

86 – Katell COUËDO, France – Impacted in my flesh and suffering in this world of connected madmen!

87 – HG, France – Stop this slaughter of all nature! People with EHS (Electromagnetic Hypersensitivity) can protect themselves to some extent, but animals deserve even less of this torture! Please.

88 – Catherine MONTFORT, Belgium – I am concerned. I want a real political commitment for a health policy worthy of the name.

89 – Anna FAUZY-ACKROYD, UK – My sister suffers from this and I know that it is a devastating condition to which we are all at risk!

90 – CM, France – I am electro-hypersensitive

91 – Hamid EIL ATLASSI, France – I AM ONE, EHS!!!!

92 – MA, Denmark – I'm a teacher and I contracted this illness from my job at a school. I suffer from severe EMF/EMR injury from wireless technologies. I experience severe nerve pain, inflammation, heart problems, cognitive challenges, and respiratory problems.

93 – Anthony BRUN-MAESTRONI, France – I am EHS

94 – MP, Belgium – Chronic fatigue (with sleep disturbances and tinnitus) due to radiation overload at work and at home.

95 – Christelle MEUNIER, France – Disability caused by mobile phone radiation in 79%.

96 – Eilenn O'Connor, UK – What sort of society are we living in today when we can isolate and discriminate against people who are suffering with electrosensitivity? Those in positions of authority and in industry who are turning a blind eye or even ridiculing this very serious issue should hang their heads in shame. I have no doubt that this time in history will be remembered as a period of barbaric ignorance while the establishment continues to reject thousands of research publications and cries for help.

97 – Jacqueline CROHARE NAMOUN, France – To protect our health and especially that of our children and grandchildren.

98 – JR, France – I stand in solidarity.

99 – Cheryll WOODS, UK – Researcher.

100 – MF, France – I sign the appeal.

101 – PB, France – I am concerned by this subject.

102 – KV, USA – I am greatly affected by EMF pollution and it has damaged my health, especially the last couple of years. I now can only work from home and am greatly limited to where I can go because of physical pain and severe swelling. It has greatly affected my health and quality of life. Unlike other toxins, I can not simply leave an area to get away from it like cigarettes or pollution. It is not something I have been given a choice to be around, that has been taken away by people who have refused to look at how destructive and damaging they are to human and animal health. (I am very affected by electromagnetic pollution, and it has harmed my health, especially over the last two years. Today, I can only work from home, and my movements are very limited due to physical pain and severe swelling. This has greatly affected my health and quality of life. Unlike other toxins, I cannot simply leave an area to get away from it, as is the case with cigarettes or pollution. This is not something I chose to be around, but something that was taken from me by people who refused to see how destructive and damaging it is to human and animal health.)

103 – Bibi CASPARI, USA – I have EHS and know that many others are negatively affected by electropollution, whether they know it or not.

104 – LZ, Italy – Sono EHS. (I am EHS)

105 – JB, France – I have EHS friends!... I myself feel assaulted by this imposed bath of radiation; I am worried about the rise of 5G, which only the lobbies... and politicians find indispensable.

106 – DS, Belgium – EHS is a heavy handicap to bear and is not sufficiently recognized.

107 – Marianna AMBROSIO, Italy – Non trovo giusto che delle persone soffrano. (I don't think it's right that people suffer.)

108 – DT, Italy – Stop 5G.

109 – Brigitte FLAHAULT, France – I am aware of this problem because I have met many people with EHS who are in great difficulty. And yet no one ever pays attention. It's very unfair.

110 – Eve PELERINS, France – It is high time to put an end to this health scandal.

111 – Guy HALLEUX, Belgium – I know people suffering from the harmful effects and who live a very difficult daily life.

112 – Brigitte KERGOURLAY, France – It's vital!

113 – Pascale VIELLE – The right to a meaningful life for electrosensitive people.

114 – Morena MORELLI, Italy –The subject deserves great attention.

115 – AA, Canada – I have EHS and I know many others. What we are experiencing is hellish and a complete injustice. This needs to be fixed.

116 – CL, France – we are all concerned

117 – Valérie-Anne HUGE, Belgium – I am EHS and radiation makes me suffer.

118 – Isa GRADELET, France – It is time to stop the carnage inflicted on human beings by people greedy for money!! Our health is the least of your concerns.

119 – Monique MORAND, France – Personally not in EMS, but concerned about the impact on loved ones.

120 – KD, USA – I am a person who has suffered microwave injury; therefore, I understand this condition and the precarious living situation it causes from the inside out. I totally agree with this appeal.

121 – Pascal JACQUES, Belgium – I am electro-sensitive.

122 – FL, France – I support all these victims.

123 – Sylvie COMBALAT, France – I became EHS and my life as a whole was completely altered in order to find ways to protect my health in an artificial world, which has become inhuman.

124 – Michèle VANDEN EYNDEN, Belgium – We absolutely must put an end to the expansion of EMFs, which are harmful to health and to living things. Thank you.

125 – LG, France – I know several people significantly impacted by this problem and also affected farms.

126 – Anne-Françoise RADEMECKER, Belgium – I am EHS.

127 – Matilda ANCORA, Belgium – We must stop polluting ourselves.

128 – AV, Belgium – I am EHS.

129 – MK, France – Because I'm one of those who suffer from EHS (Electromagnetic Hypersensitivity) and my life, or what's left of it, is ruined!! And out of solidarity, and to confirm the dangers, and because I don't have much else left to rebel against...

130 – CM, France – We're fed up with them wanting to kill us

131 – ER, France – Electromagnetic radiation is harmful to living things, including humans, animals and plants.

132 – Carlo VANDER NOOT, Belgium – I am sensitive to the issue of HF and LF EMFs.

133 – Anne WANSART, Belgium – I am Ehs and experiencing great difficulties with health, housing, ...

134 – Etienne and Anne POTTIE-RUYSSCHAERT, Belgium – Because our daughter Kristien suffers from HES and we know only too well the suffering it causes.

135 – Anastasia MORIGI, Switzerland – I suffer from electromagnetic radiation.

136 – LONGOR Nastassia, France – I am EHS.

137 – ES, France – I am electrosensitive.

138 – I., D., Belgium – Enough is enough.

139 – MP, France – It's vital!

140 – Amandine DETABLE, France – This is a serious health scandal: artificial electromagnetic fields impact and destroy the health and lives of human beings and living organisms.

141 – SM, France – I have been electrosensitive for 15 years. I just moved to the countryside and unfortunately a cell tower is going to be moved next to my house! Where am I supposed to go?

142 – KM, France – it's a matter of survival.

143 – Catherine DE SAINT PAUL, France – My aunt is affected by the EMP.

144 – Inge-Willem NOORDERGRAAF, Netherlands – My partner has mild EHS, and I want to show solidarity not only with her but with all people who have EHS. Furthermore, I have quite a bit of knowledge about EMFs and physics in general.

145 – Françoise DE SAINT PAUL, France – I have suffered from EHS/MCS for over 10 years. It's a growing existential hell. Most of the time, it's denied. I hope this initiative will help others avoid what I'm going through. Thank you.

146 – SM, France – I have been EHS since September 2024.

147 – Léon PONXIN, Belgium – This citizen demand is legitimate.

148 – CC, France – I am aware of the problem.

149 – Nicole HARDY, France – I am sensitive to electromagnetic radiation.

150 – Valérie GIAI GIANETTO, France – Being confined 24/7 is not a life!!

151 – SR, France – This is a public health problem.

152 – BG, Belgium – Out of solidarity and sympathy for the person who sent me this email.

153 – Dominique ARBER, France – We are many and completely powerless to have become aware of the serious issues and damage to the health of citizens in our societies, which are in full collapse.

154 – SC, France – I am myself electrosensitive

155 – LN, Italy – Electromagnetic radiation is harmful to health .

156 – David EVRARD, Belgium – I am EHS

157 – Isabelle BUSSY Belgium – The world must change.

158 – Brigitte POUILLOUX, France – Taking action is important.

159 – Anne VAN RUYS, France – To protect people.

160 – Christine BONJEAN, France – I have friends who are electrohypersensitive, and I see how much they suffer. They are isolated from everything to avoid electromagnetic radiation that tortures them.

161 – Marc HAULOT, Belgium – Solidarity.

162 – Isabelle JOURDAIN, France – I sign the appeal because I am electrohypersensitive.

163 – JS, France – This must stop.

164 – MC, France – Electromagnetic radiation severely handicaps me, I had to leave my job because of it; I cannot sleep next to a cell tower, my muscles cramp, my head feels like it's exploding with pain, it's a rape of my burning body!! Inside my home there is no radiation except those from the neighbors... the antennas... from society which allows itself to be mired in a magma of energies generating diseases, since electromagnetic raiation lowers the vibrational rate of places below the threshold of bearable health for humans; stressed cells turn into cancer because the body no longer has the strength to recover.

165 – D. S., Luxembourg – I want us to stop polluting the sky and the Earth and to consider people sensitive to electromagnetic radiation in their appeal.

166 – Annie PARIS, France – I myself suffer from this electromagnetic pollution, and what's more, we are not recognized or respected by the authorities as «sensitive» people. The consequences are dramatic: headaches, extreme fatigue lasting for hours or days, and problems with friends and family when going out to places without Wi-Fi! Restaurants, hotels, and campsites shouldn't be allowed to broadcast Wi-Fi as if it were harmless, while for us, sensitive people, it weakens us terribly. There are people who don't even know they are sensitive and have to endure this «filth» that is destroying us. We need to be taken into consideration like other disabilities.

167 – Brad Decker, USA – Electromagnetic damage has wrecked my life, and I thought I was alone in that, for years. We are so isolated, but so many. We need each other.

168 – Brigitte LEONET, Belgium – There is no valid reason to burden all living things in this way.

169 – SR, Canada – I am an electrohypersensitive person.

170 – KW, France – Numerous scientific studies (over 1,600) prove that wireless technology irradiates and kills all living beings on Earth, and birds, animals, and biodiversity have no way to protect themselves. For those of us who are more sensitive to this radiation, life becomes extremely difficult because we cannot be surrounded by Wi-Fi or cell phones that emit microwave radiation every second. As a result, we have lost job opportunities, we cannot find safe places to live, and we are almost excluded from society.

171 – VM, France – I am. Me. Very chemically sensitive. And electrosensitive!!

172 – B. B, USA – I have had electro sensitivity since about the first time I passed out in 2014. I had trouble with my heart stopping or pausing and would drop to the floor. After years of testing it was found that I had sick sinus syndrome which caused the heart to go into bradycardia. I now have a pacemaker that collects the data on how the heart is doing and in is a one way frequency so it is less frequencies. However, I still can get other symptoms when I am in a high risk area. I would like to use more of what a city should be like but find that I need to stay away due to cell towers on city buildings etc. It complicates travel and other issues. Everything that is here to help people is being

driven more by the high tech industries with added blue tooth, that my old pacemaker is outdated and no longer available. The health industry is not taking into consideration that EHS is disabling and all of the new technology is making people sicker.

173 – MM, France – We are in a world that is moving forward without worrying about the negative health effects of this enormous machine in motion that we call progress!

174 – Bernadette LECOMPTE, France – We can no longer bear living in these environments polluted by artificial electromagnetic radiation; it's too painful. I wish to live in a white zone.

175 – DR, France – Recognition of possible consequences and disorders.

176 – Margreet VAN DER BERG, Canada, Nederland – In 2016, I became acute and severely injured by direct and close exposure to a smart meter. This meter was installed on our house in Canada during our absence, while living in Europe. Since our return to Canada, my life – and our life as a family- was turned upside down. We need more awareness and willingness by people to hear, learn about electromagnetic pollution and then mitigate. The level of (willful) ignorance is still way too high, though it seems to change for the better, albeit very slowly. Our society only seems to want more of these disturbing fields and radiation, rather than less, even in health care settings! Artificial electromagnetic fields/radiation are biologically active, interfering with our own natural electromagnetic functioning. If society is truly interested in better health outcomes and less health care costs and 'leaving nobody behind', it should give serious attention to all the alarm signals, observations and studies, and move beyond obsolete paradigms.

177 – Colette WELTER, Luxembourg – I am myself slightly hypersensitive, but I know quite a few people who suffer enormously.

178 – L. L, France – My mother has severe EHS and things need to change as quickly as possible.

179 – RL, Germany – I am convinced that many people suffer, even without knowing what makes them suffer.

180 - Cécile MAUMELAT, France – I have been EHS since 2012, suffering; I had to stop working in 2015, I have moved several times since, cut off from my family, my friends, social, cultural and sporting activities.

181 – MV, Belgium – I am made aware of this by several people around me whose lives and quality of life are greatly affected!!

182 – Francis CHARLES, Belgium – This electromagnetic pollution is becoming increasingly pervasive and harmful.

183 – MM,, Nederland – They continue without taking into account EVERYTHING that lives (including unborn children). I think this is a great crime against life.

184 – Marja BESSELINK, Sweden – DThe world is becoming increasingly uninhabitable due to rising radiation levels. Even in my own home, I am being forcibly irradiated by the smart meter, which was imposed on me under threat of violence by two bailiffs. Hypersensitivity to radiation is a recognized disability here in Sweden, but my sensitivity to radiation is nowhere taken into account. And this is happening while more and more people are complaining about radiation. This can and must change.

185 – Véronique REYSENN, Belgium – I was able to measure the impact of electromagnetic radiation on an electrosensitive friend.

186 – MB, Spain – I am affected by electrohypersensitivity. In reality, everyone is, but we are not aware of it.

187 – CG, France – Being EHS, my life is becoming increasingly complicated and difficult because of the exponential increase in electromagnetic radiation, everywhere! Where can we take refuge and live safely? You cannot continue to ignore us, we are part of humanity today.

188 – MR – Spain – Because these radiations are harmful to people's health

189 – MD, Belgium – I am electrosensitive.

190 – DD, Belgium – The people who suffer from it deserve to be cared for.

191 – Martine VERDONCK, Belgium – I no longer have rights, no more advantages, no more life. I no longer know where to go. I am more and more ill and I am not taken seriously.

192 – JA, Spain – It is not just that even when you leave the city, you find yourself one day unable to even go out into your garden because the radiation from the antennas has been increased. It is not just that we cannot access public places, but also our own private spaces, such as our homes , which is a violation of human rights.

193 – H. V., Nederland – I myself suffer from EHS and am now seriously restricted and ill because of it. And because this radiation is very harmful to our plants and animals. Many species have already disappeared and become invisible in highly irradiated places. See also the book "The Invisible Rainbow" by Arthur Firstenberg.

194 – DD, Belgium – I am electrosensitive due to a cell tower 400m from my home plus 4g and 5g wifi...

195 – MM, Belgium – I want a world without electromagnetic radiation.

196 – CL, France – EHS affects many people, but their symptoms are not recognized because medical staff are not informed.

197 – Magda Havas, Canada – Electrosmog is contributing to illness, and a growing population is being affected. Current guidelines in most countries are far too high and are based primarily on tissue heating rather than on the body's physiological responses. This needs to change!

198 – JB, Spain – I am a diagnosed patient and we demand, as citizens who pay taxes to the State, a minimum of protection and respect.

199 – ML, Sweden – (There is an urgent need to reduce radiation.

200 – A/M., Spain – I also suffer from EHS and multiple chemical sensitivity. I am on the verge of suicide. Please do something to help us .

201 – Judit TOLYESI, Nederland – My daughter's face and hands burn whenever a cell phone or computer is nearby.

202 – MV, Bl=elgique – I have been suffering from EHS since late 2014, and probably for much longer without knowing it. We are the canaries in the coal mine. The effects are increasingly visible everywhere. It touches me deeply that the government allows this pollution and does nothing to protect human health and nature.

203 – YL, Belgium – Here, there is genocide of everything that lives on this planet.

204 – DK, Nederland – I want to be free in my space and living environment, whether it be public or private spaces, public transport, etc. I suffer from serious health problems that have also been medically diagnosed and are due to electromagnetic fields (EMF). The only way to partially recover my health is to stay away from EMF, which doesn't seem possible today. Furthermore, there is still no legislation minimizing or eliminating environmental factors related to EMF in order to protect electrosensitive people from these harmful effects. Electrosensitive people are not exposed to these harmful radiations which, unfortunately, harm many of us, including animals and nature.

205 – María Asunción Sempere Lillo SEMLY, Spain – I signed the petition because I am an electrosensitive patient and am experiencing constant torture at home, in agony, until God willing.

206 – Maria SAMMITO, Italy – Electromagnetic pollution has irreversible harmful effects on people's health and the balance of the ecosystem. It must be stopped if we do not want life on Earth to die out forever.

207 – Ana ZAFRA PLAZA, Spain – Because we are all victims of electromagnetic radiation.

208 – Nieves CARRASCOA HIDALGO, Spain – I sympathize with the affected people. Greater visibility and greater involvement from governments are needed.

209 – P. J., Belgium

210 – SM, Spain – Because it affects us all.

211 – MG, Belgium – Too many humans and animals are suffering serious consequences from these environments overloaded with electromagnetic radiation. If it has already been proven that the use of a simple microwave and excessive Wi-Fi signals disrupt health, what are politicians waiting for to act?

212 – BL, France – I am exhausted by its radiation and my tinnitus which increases depending on where I am, and serves as my radar.

213 – Monique SAVIGNY France – I am an electrohypersensitive activist.

214 – EL, Spain – Radiation levels are higher than what the human body can tolerate; night sweats, tachycardia, shoulder and head pain, fatigue, itchy skin, sore throat, etc.

215 – Fabienne GOUZOUGUEN, France – Many people today are very ill from electromagnetic radiation, and it has truly become a daily reality, a disability and a way of life that requires significant changes in our daily routines! This needs to be taken into consideration as soon as possible! Please recognize these debilitating symptoms affecting daily health as an illness and a disability...

216 – MP, Spain – Contribute to awareness of this danger. Help the most vulnerable.

217 – PT, France – Information about the risks of our technologies to our lives is not necessarily compatible.

218 – Pat ADAM, Belgium – I am electrohypersensitive myself.

219 – NG, France – Numerous independent studies have demonstrated the reality of electrosensitivity. Many symptoms are observed in both humans and animals. Citizens have no say in the matter, even though less invasive technologies exist. This is a political and lobbying issue.

220 – SB, France – I am EHS and cannot find a place to live.

221 – Yoann LEBIGOT, France – Family member affected by electrosensitivity and worried about the future of my children.

222 – Marcelle VETTER, France – I am directly concerned as an EHS person but also as a person in contact with other EHS people, including some homeless people.

223 – EN, Belgium – I am myself EHS and I suffer greatly from it.

224 – UH, Germany – Worried.

225 – JC, Belgium – Sensitive to the plight of highly sensitive people.

226 – Edwin PENNEMAN, Belgium – Urgent matter too save us all.

227 – MS, Spain – It's a major health problem.

228 – BV, Belgium – Health is certainly important for others and for our future. I am EHS.

229 – IV, Belgium – I feel the negative effects of electrosmog, but above all I am worried about the exponential scale of this phenomenon for the future, for our children...

230 – MM, Belgium – I have friends suffering from this, seeing that electromagnetic fields are real. I want to support the cause.

231 – Thomas HONIG, Germany – It is impossible to live a normal life in public with my wife.

232 – PM, Spain – I agree.

233 – EA, Belgium – I am EHS myself.

234 – Anne RUYSSCHAERT, Belgium – Because our daughter Kristien Pottie has EHS and we would really like to help her.

235 – GM, Spain – I am a person diagnosed with SQM, and I consider it very important that these illnesses be made visible.

236 – CJ, France – I am an ehs and I no longer have the ability to frequent public spaces, to take public transport, to live normally.

237 – SR, France – EHS emergency.

238 – GG, France – So that people with this disease can be recognized as such.

239 – FB, France – I've suffered from electromagnetic hypersensitivity (EHS) for over 10 years. I've moved out of my homes three times because of cell towers, and now I live in a converted van to escape this harmful electromagnetic radiation. Despite this change of lifestyle, it's still a struggle to find a «white zone» (an area with no electromagnetic interference). Add to that the concentration of «Linky» smart meter meters, new streetlights, and fiber optic routers, and it's paradise... isn't it?!

240 – Christina GENS, Belgium – People are fed up; the impact on other life on Earth is unprecedented, but it is certain that this is compounded by screen fatigue and digital stress, as well as the exclusion of a large part of the population from access to essential services... The commitment to excessive and total digitization is showing in practice that this is a bad decision... The side effects are being swept under the rug, and we have had enough.

241 – Maria RUYSSCHAERT, Belgium – I know people who have Ehs.

242 – C. R, France – I am HES and in the difficulties of survival related to this condition.

243 – CF., Italy – I'm sick of Ehs.

244 – RR, Spain – This is a humanitarian necessity. We must adapt to our times, just as we must remove architectural barriers or those that compromise a disabled person; EHS is another disability, and we must adapt their housing.

245 – MH, Belgium – For security reasons.

246 – Barrio Andres AZUCENA, Spain – I have had to move three times and my family is currently looking for another white area where they can accommodate me. In Spain the situation is even worse. We are protesting against our rights.

247 – Peter BEVERS, Nederland – I sign this appeal because I myself suffer from health problems due to magnetic fields caused by wireless communications.

248 – AI, Belgium – The important thing is that people with EHS can live humanely.

249 – JD, Belgium – Total support to all current and future victims of electromagnetic radiation.

250 – AG, Italy – I suffer from EHS.

251 – ML, France – I am EHS and impacted by EMFs.

252 – PL, France – Because I have been homeless since the introduction of 4G and my life has become a living hell! Isolated, confined, I need suitable and decent accommodation so I don't suffer anymore.

253 – VL, France – I've had EHS for about ten years and I had to leave everything behind for the countryside with 5G...

254 – Patricia CORNET, Belgium – I am also electrosensitive

255 – CB, France – My mother is Electro-Hypersensitive, she has been suffering daily for 8 years.

256 – PC, Belgium – I know people with electromagnetic hypersensitivity

257 – IV, Belgium – Technological advancement cannot come at the expense of public health and protection! The commercial and economic interests at stake (behind 5G and fiber optics) currently leave us with no choice or protection. This even extends to the denial of electromagnetic hypersensitivity (EHS) and the completely minimized impact of electromagnetic radiation. The precautionary principle and the protection of individuals must take precedence!

258 – Kaat DERUDDERE, Belgium – I am aware of the problems.

259 – Gwenaëlle KOBYLIANSKY, Morocco – I am EHS.

260 – JL, Belgium – Because we know that radiation is unhealthy and that people exposed to it can become ill. We also oppose the Fluvius digital meter until a truly wired version exists. And when that version is commercially available, it should be possible to exchange the digital meter for the wired one, as you suggest.

261 – GD, Netherlands – Radiation poses a real risk to health and each individual should be able to decide for themselves the risks to which they expose their body.

262 – Claus JEF, Nederland – ...Electromagnetic radiation is harmful not only to humans, but also to the entire environment.

263 – VR, Italy – I am electrosensitive.

264 – CP, France – It seems essential to me to maintain white zones where everyone can take refuge.

265 – GM, Canada – I am electrohypersensitive.

266 – LF, – France – I am directly affected. I have been suffering from EHS for two years and had been experiencing health problems for 20 years, which have disappeared since I started taking precautions. As the petition states, my life has become a nightmare in the face of so much denial and incomprehension. I have no rights left!

267 – JA France – Because it is essential to take this electromagnetic pollution into account.

268 – LB, Canada – I have been electrohypersensitive for over a decade and I am tired of suffering, of the difficulty finding housing, and of losing friends to suicide.

269 – LR, Canada – I am EHS.

270 – CL, Canada – Our health is important and precious!

271 – Sophia GONTHIER, Canada – I am electrohypersensitive.

272 – MP, Canada – I am myself electrosensitive.

273 – Elisableth DANDRIEUX, France – Everyone has the right to life, to quality of life, to freedom of choice and the right to refuse, to protection and security of person.

274 – EH, France – I am diagnosed with EHS + chemical odor intolerance syndrome.

275 – DD, France – I know cattle farmers whose herds have been heavily affected by this exposure.

276 – NS, France – I am EHS.

277 – Johanne BELANGER, Canada – I have become hypersensitive and I no longer have a life.

278 – Shelley WRIGHT, Canada – I am a physician diagnosed person who has lived with Electromagnetic Syndrome for over 10 years. As a high tech family with Engineering and Computer Science degrees, we've learned to reduce RF, use adapters for all technology at home. With the encroachment of cell towers and antennas, RF reduced shelter and essential services are becoming extremely limited. Wireless injury is serious. We need compassionate, inclusive communities which create RF reduced and contained places so essential services and public events are accessible for persons living with electromagnetic syndrome. Assessment of how many people are adversely impacted by wireless radiation is critical.

279 – Jean-Guy GONTHIER, Canada – It is high time we acted.

280 – CC, Canada – In order to avoid more and more diseases caused by electromagnetic radiation.

281 – Yves DUGRE, Canada – My hypersensitive partner.

282 – Nelly JUGALRET, France – I have suffered from EHS for many years.

283 – André FOGUENNE, Belgium – All concerned by this perfect nuisance towards all living things, towards this biocenosis of which we are a part.

284 – SS, Belgium – I am an electrohypersensitive person excluded from society, scorned or ignored, and this must stop. Our lives as EHS individuals are severely threatened, and the same is true for every living being on this planet due to exposure to these electromagnetic fields.

285 – AL, Belgium – Because I am sensitive to it and things are going too far.

286 – MR, Luxembourg – Evidence.

287 – Lou PERRINEA, France – Public health = priority!

288 – FL, Canada – I AM ELECTROSENSITIVE.

289 – Luc BORDELEAU, Canada – I am electrosensitive and these conflicts of interest with the industry must be denounced.

290 – Nathalie JEANSON, Belgium – I sign the appeal because I am aware of the harmful effects of electromagnetic and electrical radiation.

291 – Nina BULIGA, Canada – I am hyperelectrosensitive.

292 – Magali Roman, France – I am extremely EHS, and have become intolerant even to natural light!

293 – Micheline ST-ONGE, Canada – I have been electrosensitive for 20 years; it ruined my life and the end of my career. I moved to a more isolated place and I am much better, but I still have to be careful.

294 – VO, France – I support and respect the cause of electrosensitive people.

295 – Peter TORITO, Spain – I have suffered from EHS for 15 years, I haven't had a social life for 2 years, I've had to shield my apartment from electromagnetic radiation and I'm forced to wear protective clothing outside. This has to stop!

296 – AD, Luxembourg – I am EHS and quite disabled.

297 – Jean ROBERT, France – My wife is EHS.

298 – MG, Canada – Health first! This pollution affects us all, especially our restless and vulnerable little ones.

299 – Maria Carreras, Spain – I have become very ill with pain due to exposure to electromagnetic radiation. I have to leave the city, and I need a place to live without so much suffering... I pray to the elected officials of Europe to facilitate electromagnetic-free housing for us. We are without a place in Europe.

300 – Sandrine CHAUVET, France – I almost lost everything and was left to fend for myself to try and get better. We are creating several generations of future socially and professionally excluded people. Millions sacrificed on the altar of money, and our politicians stand idly by.

301 – JC, France – This pathology must be recognized.

302 – SB, Canada – I am electrosensitive and the symptoms are intolerable at times.

303 – Flora RUBIO GARLAZA, Spain – Know first person is enough that a companion faced torture in a concentration camp and was in contact with people in a desperate situation. The suicide llega is like the need for life is sufrimiento when it is intolerable and when the person is deprived of all its basic economic necessities and health sometida has its incapacity, without recognition, burla and el.maltrato inclusive in which it is carried out. deberían proporcionar socorro sanitario..es una crueldad superlativa, ante la ignorancia de la mayoría de las personas. Isolated, tortured, and stripped of everything. That's what they see.

304 – Alain CHOQUEL, France – Out of solidarity.

305 – Alejandro CAPELLO, Argentina – Because we have to take care of the environment and electromagnetic pollution also affects our lives, some more, some less, but in the end we are all hostages.

306 – Marcel BARIL, Canada – I am electrosensitive and aware of the dangers of exposure to wifi, cell phones, dect phones, bluetooth and 5G.

307 – Armelle RIBEYRE, France – One of my relatives has been EHS for years;

308 – VD, Canada – I am affected by electromagnetic fields.

309 – MH, Belgium – Everyone has the right to a decent life without harmful radiation!!!

310 – RB, Canada – I am electrosensitive. Thank you...

311 – CB, Canada – I am electrohypersensitive.

312 – Renzo FAGHERAZZI, Switzerland – Anything beyond 4G (because I'm a data addict too...) seems like a crime against humanity. And for crimes there should be justice.

313 – VB, France – It's time to do something.

314 – Mia DEVS, Belgium – To protect our children too.

315 – Emmanuel KATINS, France – I am convinced of people's hypersensitivity, because I myself feel concerned by this problem.

316 – Emmanuelle DEMOURES, France – So that consciences are awakened and things change.

317 – Sabine FASTIGGI, Switzerland – My 15-year-old daughter and I are EHS.

318 – Nadia HARTERT, Belgium – Jen has been suffering for over 20 years...

319 – Claudine BOUSSARD-ROUSSEL, France – EHS: For 15 years, the distress of people with disabilities due to EHS has been increasingly prevalent and constitutes a health and humanitarian emergency. Thank you.

320 – PV, Spain – I am an electrohypersensitive person, tired of suffering from so much electromagnetic pollution.

321 – Leen CABOR, Belgium – My husband is EHS. He also has the right to a dignified existence. The attacks on his health are caused by governments and big corporations.

322 – Serge GREGOIRE, France – It is necessary to take into account the distress of these people.

323 – Céline SCHMITT, France – I am ehs, and I would like not to end up in a cave (besides there won't be enough for all of us).

324 – CM, Belgium – Fed up with these invisible killers, electromagnetic radiation and geoengineering.

325 – Alexandre MOUROT, France – It is a just cause.

326 – Nicolas LEFEVRE, Belgium – No democracy or information.

327 – Monica ZETLINE, Switzerland – I think the subject is serious and that the countries and companies concerned are not taking into account the health problems caused and moreover without asking for the consent of the population.

328 – MZ, France – I AM ELECTROSENSITIVE.

329 – HV, Belgium – People around me say they are very bothered by this situation. I am sensitive myself, but to a limited extent if I hear the story from others around me.

330 – Line VACHON, Canada – I am electrosensitive and I no longer know where to turn to live without pain, just to live without suffering. Is that too much to ask?

331 – Mustapha OURIAGLHI, Belgium – For the good health of each and every one of us, which is paramount. Thank you.

332 – GR, Belgium – This is important.

333 – Kim LE QUANG, Belgium – In solidarity against the dictatorship of technology merchants.

334 – AV, Belgium – I support.

335 – NL, France – I am EHS and MCS.

336 – Bernard LEGROS, Belgium – I am aware of the ongoing health catastrophe.

337 – NP, Belgium – This is important.

338 – David SERON, France – For a genuine study on the risks associated with electromagnetic fields. To offer people with electromagnetic hypersensitivity the possibility of living in this society.

339 – Guy LERAT, Belgium – I am active in the issue.

340 – Joëlle LECLAIR, France – I have EHS (Electromagnetic Hypersensitivity). I lost my job in 2000. Then I left my home after the arrival of 4G. My husband and I found refuge in a small village, but a cell tower has just been installed there. It points directly at our home. I'm in survival mode. Suffering of all kinds. But where can I go?

341 – CE, France – I am electrosensitive (I was EHS ten years ago) and I protect myself as best I can.

342 – Hayet HAMZAOUI, France – This is a very important subject concerning public health.

343 – Audrey MULLER, France – I am electro-hypersensitive and I can't find a new place to live because of the «Linky» smart meters everywhere! And let's not even talk about the neighbors' Wi-Fi, it's hell.

344 – JR, France – The problem is a much more complex whole, and behind it lies a blind desire for market forces at the expense of humanity...

345 – KM, France – How can we still turn a blind eye? We are all becoming EHS!!!

346 – Loubna RISOULI, Belgium – For over six years, my life has stood still. My body has become hypersensitive to electromagnetic radiation, causing numerous debilitating symptoms. I find it extremely difficult to envision any kind of future, especially given the alarming deployment of this technology.

347 – JD, Belgium – Total support for victims of electromagnetic radiation.

348 – RH, UK – I'm electrosensitive and as such cannot use any form of public transport.

349 – Leyla KAMISSOKO – France – I am EHS.

350 – SM, Canada – This is a very important issue .

351 – Daniel KOBYLIANSKY, Switzerland – My wife suffers greatly from electromagnetic radiation, and I know many other people who have the same problem.

352 – Diane BAYSANG, France – This is a public health problem with a growing impact, it seems important to me to raise awareness among as many people as possible and to legislate on this subject.

353 – CR, France – I have a 5g antenna on the hill opposite my house.

354 – IM, France – EHS.

355 – Renée LE BIGOT, France – My daughter is affected by this disease.

356 – Martine VIRENS, Nederland – Thank you for this important petition!

357 – Patricia MARTINEZ, Spain – Because we are all electrosensitive, and I am electrohypersensitive, and it must be acknowledged.

358 – Philippe SMORAG, France – Same struggles as your group...

359 – Peter VAN DEN ROUCKE, Belgium – I know, from my extensive knowledge, that the EHS is an important issue. I would also like to refer to the 2019 Senate committee in Belgium and its decisions.

360 – SF, Belgium – I am finding it increasingly difficult to be exposed to other people's connected phones. I am at the mercy of my daily environment.

361 – RB, Canada – I fully agree with your requests.

362 – Gérard DERET, France – Since July 1, 2012 I have been without accommodation because of microwaves, my living conditions are undignified (in a garage and in my car) I have a category 2 disability pension and a TES 593 measuring device.

363 – Gerd PFISTER, Germany – 5G kills all life.

364 – Diane PEETERS, Belgium – It's high time to end radiation that harms people!

365 – GM, France – The suffering of social denial is unbearable.

366 – Martine FACK, Germany – It turns out I'm hypersensitive to wifi radiation, leading to severe dizziness and fatigue.

367 – Charlotte VAN AUDENHAEGE, France – I am looking for a solution to live as normally as possible because I have children and can't do anything with them.

368 – Hedwige VAN AUDENHAEGE CA, France – My daughter is EHS.

369 – MJ, Belgium – I AM EHS and my life has become a living hell! And we must think about and protect our children, it's urgent.

370 – DD, France – Out of solidarity with my daughter-in-law.

371 – MV, France – My sister is EHS and I see her suffering and the lack of solutions for her to be able to lead a more or less normal life.

372 – Eddy BERGER, Belgium – I am convinced of the harmful influence of EMF.

373 – SE, Belgium – Because I also suffer from electromagnetic fields.

374 – LV, Belgium – I support a friend who is electrosensitive. And because there are currently no limits to technological advancement at the expense of humanity.

375 – Laila GHOZZI, Belgium – I am convinced that exposure to such an electromagnetic charge is a danger to the health and well-being of the living world.

376 – Jean ROLLE, Switzerland – I am human.

377 – Stéphane LAGASSEZ, Switzerland – I agree all the more because the exponential growth of flows and data accelerates the destruction of our ecosystems and strengthens the power of those who deny it and take advantage of it.

378 – Aurélia BELLANGER, France – A member of my family is affected by EHS and it is hell on Earth and on a daily basis for her.

379 – Véronique DECULTY, France – I am worried about this pollution which is mostly unknown.

380 – Lucia GONZALEZ MARTINEZ, Spain – I completely agree with everything that has been said.

381 – CV, Belgium – I have a hypersensitive acquaintance.

382 – Sigraid DOMS, Belgium – Every person is physically affected by EMF. For some, this manifests itself in complaints earlier than for others. Strict regulations and awareness among young people need to be developed as soon as possible.

383 – Bernard NEAU, France – I am EHS level 1.

384 – CM, France – I sign because it is unacceptable that this electrosensitivity disorder should be recognized. Too many people suffer from it and have their lives ruined.

385 – Pascale HOULLON, France – I am EHS, it is high time to act and allow us to live with dignity!

386 – BD, France – I am EHS and do not see any progress in our care.

387 – AP Belgium – I know many people affected and their suffering is rejected and not recognized, and these brilliant people have to live in seclusion, which is unjust.

388 – FM, France – that's right. The danger is real.

389 – CV, Belgium – I worry about the health of my children, my grandchildren and my loved ones.

390 NP, Belgium - Everyone is affected.

391 – TV, Belgium – It is important that all living beings be protected from harmful radiation; greater awareness is needed, and regulation in this area is necessary, with this concern as its basis.

392 – GE, Germany - It is more than urgent to do something about this and allow citizens to live in a healthy environment, without being forced to tolerate smart meters in their rental apartments, in addition to permanent wifi and smartphone radiation in their own shielded rooms.

393 – FP, France – I am also involved in this fight with the Robin des Toits association, and I am EHS.

394 – Elisabeth STEGER-PIEHL, Germany – I am personally affected by EHS.

395 – Marie DEKAISE, France – I know people who are electrohypersensitive and their daily life is hell.

396 – RB, Spain – I have severe electrosensitivity.

397 – Michael LEZUO, Germany – My sister is concerned.

398 – VP, Belgium – Solidarity.

399 – Amparo CABANERO, Spain – I contracted EHS after exposure to mycotoxins. Untreated, invisible to the health system, society... We are not crazy, but sick.

400 – AF, Spain – I'M AFFECTED AND IT'S A TRAGEDY. MANY PEOPLE ARE GETTING SICK.

401 – AN Spain – There is a great battle for humanity. We are all electrosensitive!

402 – IV, Belgium – I want more awareness and action regarding radiation.

403 – Peter HOLZAPFEL, Germany – I have been electro-hypersensitive myself since 2011.

404 – Véronique MEOGLE, France – I know people suffering from EHS.

405 – GD, Germany – I know people with electromagnetic hypersensitivity, I am confronted with their problems, and I see the extremes they are exposed to, especially when they also have other illnesses or multiple illnesses, and when, overall, their illnesses exacerbate each other, making them even sicker or so trapped in their condition that it is impossible for them to participate in a normal life. And thus they feel excluded from society and the system, unrecognized and unseen. Here too, the future is NOW – we must act now!

406 – Jose Maria GOMEZ RUBIO, Spain – It's a reality.

407 – Dominique CANIVET, Belgium – I know the problem very well.

408 – BS, Canada – I am EHS!

409 – LL, Canada – I am an electro-hypersensitive person and I need a living space that is appropriate for my condition.

410 – VL, France – It is high time that the 2nd, 3rd, 4th, and 5th Genocides are finally condemned, that those already affected can finally live in safety and move freely in public and natural spaces, and that younger generations are spared!

411 – Jeanine BRANEYRE, France – I myself am affected by a brain tumor. The origin may be electromagnetic radiation (use of Bluetooth headsets, radio frequency...)

412 – J.. D., Belgium – I am convinced that this has harmful consequences for man, animals and nature. For my part, I believe that we are proceeding in a way that is much too loose, without properly informing people, while we are left with no choice! Meters must be installed, pylons are proliferating, signals are stronger,...

413 – AF, Germany – I am extremely electro-hypersensitive, I suffer from severe housing problems, and I haven't had a real life for over twenty years. Moreover, I know that many others are in great distress. It is high time to put an end to this violation of human rights.

414 – AT, Germany – As a person affected by EHS and a grandmother with 4 grandchildren, I have two grandchildren with learning difficulties.

415 – Juan Domingo SANCHEZ ESTOP, Spain – This is a real problem.

416 – Wilfried FEIERR, Germany – I am personally concerned and the constant increase in cell towers, 5G, autonomous driving, and, generally speaking, endless digitalization, greatly frightens me for the future.

417- RP, Belgium – Important.

418 – Marie-Ange HAUDEBERT, France – Health is our most precious asset. Freedom must be preserved. Let us take care of future generations.

419 – Katrien BENOIT, Belgium – I want to support those affected and because I myself advocate for a return to a livable electromagnetic environment for all forms of life on earth.)

420 – Magali KOELMAN, Belgium – I support this citizen initiative.

421 – DJ, Germany – I myself am highly electrosensitive and have so far received no support or consideration from the authorities.

422 – LD, France – This has to stop.

423 – NB, France – I became ehs.

424 – EH, Germany – ...I myself am affected by significant pain and symptoms and it seems important to me to draw attention to the impact of the phenomenon, to create awareness of the dangers.

425 – Steve KABALIAN, France – Before 2007, I was athletic, had good stamina, and was in perfect health. I became ill following a client service call on a rooftop mobile phone base station. Unaware of the dangers of electromagnetic radiation, I couldn't connect the cause to the terrible consequences for my health, and I remained in a state of medical limbo from 2007 to 2016. Burnout, extreme electromagnetic hypersensitivity, and professional incapacity brought my career to an end. The radiation generated by the antenna of my smartphone, located at the bottom of the device, caused a cavity in my right thigh, «microwave cooking» of the roots of my upper right molars, and a hemorrhage in my right eye, facts confirmed by a forensic medical examination, supported by photos and an ultrasound.

426 – ML, France – I am sensitive to the cause.

427 – MV, Belgium – Optimum operating conditions are correct. (Health and optimal functioning are very important.)

428 – RL, Germany – Because I myself am very affected!

429 – Marianne BYDGEN, France – It has to be done, that's all.

430 – Pieta BERNARD, France – Power line communication (PLC) just like electromagnetic radiation and other electromagnetic pollution is a scourge little known by medicine.

431 – Preben KASTRUP, Denmark – I have been working on raising awareness about the consequences of EMFs through the Knowledge Centre for Electro Pollution since 2019. My concern is especially directed towards our children and young people.

432 – AF, Germany – A family member suffers from EHS; she can't find a place to live and is constantly on the run, searching for a place to stay.

433 – CN, Germany – I know people affected by EHS, am aware of its effects and challenges, and would like to support those affected by EHS by signing this petition.

434 – AB, France – My mother is electrohypersensitive.

435 – Luc LEENDERS, Belgium – It is high time that governments intervene and help people suffering from the effects of electromagnetic pollution in our environment! Better known as EMR-S (Electro Magnetic Radiation Syndrome).

436 – Mr. PM., Belgium – I am severely electro-hypersensitive and chemically sensitive, which prevents me from getting proper medical care, traveling to many places, and participating in society... more and more things are becoming inaccessible to me. I feel increasingly excluded.

437 – Ursula JASEF, Germany – I have been personally affected since 2016.

438 – Michel GLIBERT, Belgium – I sympathize with and stand in solidarity with people who suffer from EHS, and am philosophically opposed to excessive and unreasonable exponential connectivity without real utility.

439 – Yvette D'HAILLECOURT, Belgium – I sign because my daughter is electrosensitive and I witness her suffering, her limitations, the lack of a social life, lack of leisure activities, no professional life, restricted in her activities with her 3 children: travel, restaurants, shops, everything is denied to her.... For everyone, especially for all children... I SIGN!

440 – PC, Belgium – I am eHs and we need to talk about it, raise awareness again and again, create a protected space, but not only that: have the right to live in a healthy environment without having to fight, apologize or hide.

441 – Claudia RAUSENS, Belgium – I stand in solidarity.

442 – Victor TORELLI – It is human to respond to their needs, that this be recognized as a disability.

443 – SS, France – The anarchic and excessive development of these technologies is leading humanity to its decline, and restricting the right to life.

444 – YK, Germany – I would like to draw attention to this problem, as it is an imminent danger, especially since the living space for people suffering from EHS is shrinking more and more, which cannot and must not be the case! The number of affected people is increasing, and it is not decreasing; unfortunately, the opposite is happening. We must raise awareness and help people with EHS. Every suicide in this area is one too many!

445 – MG, USA – I am electrosensitive.

446 – AA, Belgium – I share the medical viewpoint.

447 – CS, France – My sister-in-law is electrosensitive.

448 – AS, France – I have been EHS since 1998 and my life is becoming increasingly complicated.

449 – AB, Germany – (Because I myself am affected by EHS. It's a personal, life-threatening catastrophe, and no one is helping. You're a refugee in your own country. You're a patient who receives no help – because there is no medicine for EHS.

450 – David ROLOFF, Germany – Because I am personally concerned.

451 – JR, France – It is urgent to review technologies that are devastating to living things; we are concerned, as are animals and nature. Technology is no longer at the service of humanity; we are all at its service.

452 – Anne BEKEN, Belgium – I know someone who suffers from it and I am very sensitive to the subject.

453 – Vera DE MOOR, Belgium – Radiation harms my health.

454 – Anita CUYPERS – Belgium – I think that health is important and that it is treated very vaguely. I know people in my immediate environment who suffer from HSEM. And I myself have experienced several times the impact of all this radiation on my own body. Please accept, Madam, Sir, the expression of my best regards.

455 – ZC, Belgium – I have a friend who suffers from it.

456 – Carole MELCHIOR, Luxembourg – For three years I have suffered from EHS (Electromagnetic Hypersensitivity), and my life has been completely turned upside down. I was forced to flee my home, my job, my family, and my friends to take refuge in an area free from electromagnetic pollution. It is urgent to act, to raise awareness among the public and the authorities.

457 – Annick BLONDE, France – So that the EHS, true "sentinels" of health, are finally heard, can come out of the shadows, get treatment and also FOR ALL, because everyone is concerned and children in priority.

458 – SL, France – The harmful effects of artificial electromagnetic radiation damage the pineal gland, our hormonal system, and our genes. This is an invisible attack on citizens by their own governments. All electromagnetic radiation must pass through the ground, not through the air. And free energy has existed for a long time! The tide is turning; it's time these scams stopped.

459 – Jean-François ROUSSEL, France – Companion of ehs, solidarity and health is a precious asset. Let's take care of future generations.

460 – SK, France – I am highly concerned myself and/or all those who do not believe in it, as with the effects of nuclear tests!

461 – AD, Belgium – It is urgent to become aware of the harmfulness of this electromagnetic radiation to living beings as a whole and of the suffering they impose on people who exhibit EHS but also on those who develop other types of diseases because of the inflammatory and oxidative effect of this radiation which do not respect the laws of nature and life.

462 – Daniela MALONE, Spain – I am electrosensitive and I claim my right to white zones.

463 – Virginie GIS, France – I am an Ehs and have been confined for a year because I can no longer go out in public places in the midst of this hyper-connected society. It's truly urgent...

464 – CD, Belgium – It is important to wake up to this problem and stop this madness that is destroying man and the planet.

465 – EC, France – I am electro-hypersensitive.

466 – Yasmina KHAMAL, Belgium – Simply as living beings, we should all feel concerned about the negative effect of EMFs on our bodies.

467 – GV, Germany – The EMF craze is growing.

468 – JB, France – I am convinced of this health emergency.

469 – GK, Germany – I have cancer and I'm sure mobile phone radiation is responsible.

470 – Marie-Claire KOUBI, France – I have been ill for more than 10 years and it is becoming UNBEARABLE.

471 – AB, France – My mother is electrohypersensitive.

472 – Gerard HITTELET, Belgium – I know someone who is sensitive to this issue, and I am frightened by the growing importance of all these electromagnetic networks that are being proliferated so intensely without really understanding the drawbacks and without applying the precautionary principle. As long as the world is run by economists and financiers, we are headed for disaster.

473 – Chaba ANSEUR, France – Concerned. I denounce all the pollution that is killing everything that lives on Earth. Our civilization, which is all-powerful, is actually in its final stages. No civilization has ever undertaken a bifurcation or transition... it's just an illusion.

474 – Jocelyne WILLOT, France – My son has suffered from this condition for 16 years, and it is a fundamental right to be able to receive treatment and live in areas free from electromagnetic pollution. To this day, there is no treatment or normal life for all these patients. Thank you.

475 – GW, France – I am electrosensitive and chemically sensitive, and I want to live like everyone else. I also want to protect the environment and all living things on this earth. Thank you.

476 – CG, France – We are all concerned and united.

477 – GC, France – I am suffering from symptoms of EHS.

478 – AP, UK – I am EHS sensitive too.

479 – OB, France – I am electro, it is a daily pain.

480 – Xri Juan CARLOS, Spain – Pollutants produced by electricity must be eliminated.

481 – AW, UK – I am badly affected by these hidden waves of energy, radiation, etc.

482 – VC, France – Against these spy meters emitting negative radiation and which also catch fire.

483 – Sabine SCHWARTZ, Germany – I myself suffer greatly from EMP; I've already moved seven times because of it and sometimes experience severe symptoms when exposed to electromagnetic fields. We absolutely need white zones!

484 – PC, France – A meter that increases consumption, emits negative radiation harmful to the human body, and replaces perfectly functional meters – a huge waste...

485 – Christian CHARLIN, France – Because I want to sign it...

486 – David CLAMENS, France – I feel concerned.

487 – Claudine ROMAND, France – Between the air (chemtrails), the water, the land—all polluted—and electrical, electronic, and electromagnetic pollution, you have to be tough to live without illness these days. And yet, we know this at the highest levels...

488 – JT, France – I personally know a person who is electrohypersensitive and I notice that she suffers from it very often, especially during certain hikes in nature.

489 – WERTHMULLER Martin, Germany – People need to be protected.

490 – FG, France – I myself have been EHS since 2012 and am wandering around trying to find a place in a protected area to live.

491 – Isabelle GRAULICH, Belgium – As a doctor, I am increasingly confronted with EHS patients. It is urgent to raise awareness among politicians, doctors, and the public about this problem.

492 – OS, Belgium – I am affected by artificial electromagnetic radiation (exhaustion, difficulty concentrating, chest pain, etc.). I know someone who absolutely needs to live in a low-emission zone. I understand and feel that these technologies threaten life. I want to protect life.

493 – Benoît REIFF, France – My wife is EHS.

494 – Marie SARIET, Belgium – I suffer from electrosensitivity.

495 – CS, Germany – Electrosmog radiation is dangerous, although it is not perceptible to the majority of people.

496 – CB, Belgium – Stop this scourge...what damage caused by this unwanted bath of imposed electromagnetic radiation.

497 – LL, Canada – I am electrosensitive, it is important to be recognized.

498 – Olga AGUINAGA, Spain – As a person diagnosed with EHS in severity and suffering from cumulative effects of exposure to EMC lasting more than 10 years, they can confirm that this disability cancels the life of the affected people. So you have more, and you are free to take note of any symptoms at any time when you are using most of the wireless technologies.

499 – LA, France – I am electrosensitive.

500 – MB, France – Out of solidarity with electrosensitive people (of which I am not one).

501 – KK, Germany – I am personally concerned.

502 – Nicolas WHENHAM, Belgium – Because I am an oncologist.

503 – AT, Belgium – I know the subject well. I myself have been electrohypersensitive for several years.

504 – CT, France – I know people with electromagnetic hypersensitivity who are living a nightmare in France.

505 – CN, Belgium – I am so touched by the difficulties that this sensitivity implies. Very limited social life.

506 – CR, France – Because against media ignorance.

507 – MS, Belgium – Stop the electromagnetic radiation.

508 – Yves ALBOUSSIERE, France – I know a couple of friends whose wife is HES.

509 – Rachel CORDELLE, France – I am aware of this problem through close relatives who are electrohypersensitive.

510 – Andreas ULLRICH, MAG – Myself concerned

511 – ES, France – I am EHS/MCS and I'm fed up with government directives that go against life! LET US LIVE! We EHS suffer every day, you know that, so now ACT! Unplug from artificial electromagnetic fields! (...)

512 – Colette DEVILLERS, Belgium – Wireless radiation is harmful and should no longer be used.

513 – LR, France – I am the daughter of an electrosensitive person.

514 – Rachel ITKINE, France – I have people in my circle who are affected by ehs and I am sensitive to this cause being a mother of three children and living on our planet!

515 – MI, France – I am partly touched and embarrassed.

516 – CS, Germany – I have EHS.

517 – PB, France – To raise awareness; to warn of the risks of exposure to electromagnetic radiation and to offer protected places for people recognized as EHS AND those who do not want to become so.

518 – CA, Belgium – People dear to me suffer from this sensitivity.

519 – MV, France – In solidarity with EMP Victims.

520 – PK, Belgium – I consider this essential for all EHS sufferers.

521 – Dagmar LEZUO, Germany – I am EHS. I consider my right to physical integrity and fulfillment to be limited by exposure to EMF in all areas of life.

522 – Béa BASTILLE, Belgium – Support for people in danger.

523 – Maria LAFRANCESCHINA – I am constantly fatigued, chronically stressed, nervous system inflammation.

524 – Sylvie RAFFFELLI, France – Taking into account the devastating effects of artificial EMFs on humans and all living things.

525 – Alison KAMM, France – I sign because, having been electro-hypersensitive for about ten years and experiencing the various aspects of the precariousness and distress described in the appeal, I can only fully endorse all the demands expressed, so that the voice of those with electromagnetic hypersensitivity (EHS) is finally heard, their needs respected, and a more reasoned use of the technologies in question is adopted. The environment, immensely overloaded with electromagnetic radiation, in which we live is not only harmful to those with EHS, but to everyone.

526 – MI, France – I am partly concerned and embarrassed.

527 – EB, France – Long concerned... by this radio wave crime.

528 – L,C., France – I myself am EHS.

529 – GL, Germany – I am personally concerned.

530 – EQ, France – I am EHS.

531 – JP, Belgium – I support people with electromagnetic hypersensitivity.

532 – Samya SELLAMI, France – Thank you.

533 – HK, Germany – I am personally affected and I know others affected.

534 – Sonia Villemus, France – I am personally affected and I sign for the protection of life and living things!

535 – NC, France – I am very upset and I demand justice.

536 – Ine CAMACHO, Belgium – I am suffering from the situation and the impact of artificial electromagnetic radiation on our health is intolerable.

537 – April O'DONOUGHUE, Canada – It is high time for governments to take action on this issue. They must stop claiming that this is a scientific controversy. A scientific controversy exists when scientists disagree. In the case of RF radiation, the disagreement is between scientists on the one hand, and industry on the other. Therefore, it is not a scientific controversy. Scientists have been appealing for decades for policymakers to develop protective regulations.

538 – CG, France – I am highly concerned myself and / to all those who do not believe it, as with the effects of nuclear tests!

539 – KW, Germany – I am personally concerned.

540 – CD, France – As a victim of overexposure to artificial electromagnetic radiation, which has destroyed my life and severely compromised my future and plans, my life is now completely shattered. There must be real change around us, for us, with us, and to preserve the lives of future generations so they do not have to endure such suffering and can enjoy a better quality of life. These horrors must stop.

541 – Sabine TESSIER, France – Respect for everyone is i mportant.

542 – CD, It is time something was done to stop the exposure of the population.

543 – SA, Belgium – Our health is threatened because we are all exposed! A solution must be found.

544 – GS, Switzerland – I have been hearing about the harmful effects of artificial electromagnetic fields for a very long time.

545 – D. ., Belgium – I am electrosensitive.

546 – EC, France – For humanity and so that the health of our children is a priority and the precautionary principle prevails.

547 – SK, Germany – I myself suffer from electromagnetic hypersensitivity (EHS) and am almost completely excluded from public and social life due to the increase in high-frequency radiation. Because of public Wi-Fi, mobile phone radiation, etc.,

I can no longer go shopping, visit government offices, hospitals, weekly markets, shops, and even leisure areas without experiencing severe symptoms. I would like politicians to finally take the issue of electromagnetic fields (EMF) seriously and protect people with EHS by, for example, creating housing without the requirement to use radio waves (meters that use radio waves for electricity, water, etc.), by creating «white zones» (areas without radio waves), and by legally mandating radio wave-free zones in government offices, hospitals, and public transportation.

548 – Bernadette LEMIN, Belgium – As a supporter of the "Stop 5G" collective, I have had contact with people with EHS.

549 – CH, France – I am EHS. Thank you for helping us make ourselves heard, to protect ourselves and others.

550 – Danièle BOVIN, France – I myself am a disabled person and a victim of mistreatment by the French state, which ignores us. Because I live on a plot of farmland to protect myself from Wi-Fi, Bluetooth, and other technological dictatorships... mandatory radiation... I was tried in criminal court by the mayor of my town, then "pardoned" on appeal in 2024. It's madness...

551 – PV, Belgium – Pride and naivety, besides profit, should not be the driving forces of our evolution, but wisdom, prudence and providence.

552 – Brigitte CLAUSEN, Denmark – So that people no longer suffer from radiation.

553 – Soren LILLESOE, Denmark – EMFs are too dangerous to ignore.

554 – Ethan ANDERMAN, Canada – Human right to air free of artificial frequencies.

555 – Anja ECKSTÄDT, Germany – I have been very affected by EHS since June 2023.

556 – BC, France – I am myself electrosensitive.

557 – RT, Italy – The health of citizens must be defended.

558 – LV, France – I am EHS with RQTH for this disease.

559 – CP, France – I have a sister who is affected.

560 – AJ, France – Harm to the health of persons, animals and plants.

561 – Angela DONATI, Italy – I believe that every person should be able to live a decent life and that we all have a duty to respect the health of every living being, especially those who are more fragile and need help and access to care.

562 – ES, Finland – I am electrohypersensitive.

563 – IK, Norway – Demand an immediate freeze on artificial electromagnetic radiation levels, create «white zones» where those of us with EHS can live without being exposed to harmful electromagnetic radiation, also demand that «shelters» be created for those of us with EHS for «detox.» Many EHS people are already living as «refugees,» and their numbers are growing. Beginning to approach a global humanitarian emergency, EHS is not psychological but an allergic reaction to the dangerous artificial electromagnetic radiation from 5G, IoT, and satellites in low Earth orbit—that is, a normal reaction to a dangerous «environmental toxin» that doctors and other professionals must no longer ignore.

564 – JL, France – 12 years of electrosensitivity, including 2 years of not being able to live at home because of the «Linky» smart meters (forced to sleep in my car away from the electrical network).

565 – MF, Belgium – I am extremely sensitive.

566 – Annika SPANGAARD, Denmark – I have EHS. I can no longer live freely.

567 – MC, France – Increasingly bombarded by electromagnetic radiation, no wonder. We are all affected.

568 – Luccio FILIPUCCI, Italy – I am opposed to forced digitalization and the increase and diffusion of electromagnetic radiation.

569 – Christine MALFAY-REGNIER, France – I am myself electrosensitive and, even more so, chemically sensitive (SOS MCS association).

570 – HH, Denmark – These signals are unnecessary – underground cables ARE invented.

571 – NA, France – It's important for everyone.

572 – FD, Belgium – In support.

573 – AG, Finland – I have long beensuffering from EHS and have nowhere to avoid the EMFs these days.

574 – Pierre NAPORA, France – Beyond this reality, I note the rise of this humanitarian disaster which affects individuals indiscriminately (...) Thank you and Bravo for this fight, the fight of humankind!

575 – Christiane CAPPONE, France – I am electrosensitive to magnetic radiation, I am not free to simply live: Shopping is a problem, going to medical treatment is a problem, walking in the street is a problem... my health is deteriorating...

576 – IB, France – To help...

577 – Anne VELLE, Germany – I am indirectly involved!

578 – Marie-Claire KOUBI, France – I am concerned...

579 – LJ, Denmark – I am seriously disabled by EHS and all the insects on my land have disappeared.

580 – HS, France – My family is heavily impacted. Thank you for your fight.

581 – MK, Finland – RF-EMF radiation has been well-documented to cause serious health problems in both sensitive individuals and those without priority health issues. It's time to take action on this.

582 – Monique PICHON, France – Friends affected and I know their ordeal.

583 – JM, France – I live with a person who is highly electrosensitive. I witness every day the suffering inflicted by wireless technologies and smart meters, which not only cause her suffering and ruin her health, but also socially exclude her and,

even more seriously, make it very difficult for her to access the hospital system.

584 – Charlotte PERDRIAU, France – I am electrohypersensitive.

585 – MC, Spain – We urgently and permanently need protection against electromagnetic radiation.

586 – Carsten MøLLER, Denmark – I am EHS.

587 – Bruno GOFFART, Belgium – I know and sympathize with the suffering of many electrosensitive people.

588 – GB, Norway – We are exposed to dangerous levels of radiation that affect our health and well-being. Heart rate, tinnitus, mood, thinking, fertility, rashes, insomnia, dementia, aches, and pain. We are all affected. Some more than others, at first. There are many patents describing the harmful use of microwaves and LED light. This has to stop.

589 – DT, France – EMFs represent a clear health hazard.

590 – Inga MOLIN, Denmark – It is very harmful to nature, animals, fish and people. The cables exist, they must be used.

591 – Tania SPANò, Italy – It's necessary.

592 – Rosangela MORELLI, Italy – To support the lives of those who don't know how to show their drama to those who don't want to listen.

593 – Robert TEUNE, Nederland – I myself am completely incapable of working in ICT due to years of exposure to wireless technology.

594 – CD, France – Highly sensitive friend.

595 – HT, Norway – I sign because this makes me sick, and my kids when they were children. I care for people, nature, animals and our environment

596 – KL, France – I am worried about the health repercussions.

597 – MG, France – I am electrosensitive and the indifference shown to us, EHS, is intolerable.

598 – Else Kristine NORDHAGEN, Norway – II am a sitizen researcher, since 2017 on EMF and health, written severql books in Norwegian. And I have published peer reviewed papers documenting severe flaws in the litterature where ICNIRP members have been lead authors and erroneously concluding « no negative effects proven. »

599 – SE, Norway – Our voices must be heard and radiation must be significantly reduced everywhere.

600 – AB, France – I have been EHS and chemically sensitive for over 30 years with recognition from Dr Tripodi of Nantes (medical certificate).

601 - CQ, France – My sister is affected, daily life is very complicated and I know that this can happen to anything, including myself.

602 – Polly SOUTH, UK – I sign because of health problems within myself and other family members.

603 – BA, France – Following a course of quinolone antibiotics: debilitating tinnitus, problems with short-term memory and concentration, enthesopathy (chronic ligament inflammation), and electrosensitivity. Therefore, I am personally affected by all this electromagnetic radiation (when I go to a large store, a short while later my tinnitus intensifies, sometimes I have headaches and extreme fatigue). I was diagnosed by Professor Belpomme in Paris (around 2014).

604 – AD, France – Not only does a member of my family suffer from EHS, but I have also witnessed the symptoms, unknown and unrecognized by the medical community, and the upheaval this has caused in their life. And also in memory of Michèle Rivasi, who worked so hard for this cause.

605 – Dimitrios FEVGAS, Greece – Read the book The Invisible Rainbow and be happy! We are all affected by EMFs and we all need to wake up. I don't know if we can do anything, but we must try.

606 – Daniel QUILLET, France – I know people suffering from this malaise.

607 – ER, France – It is important to respect the personal opinion and health of individuals, and not a general opinion decided in an office that is detrimental to individuals.

608 – SM, Belgium – Because we must think of all those who suffer from this electromagnetic radiation.

609 – PP. V., France – To have this insidious disease recognized, which is affecting more and more people.

610 – Katia SERRA, Italy – Because I am electrosensitive.

611 – HJ, Denmark – They have to listen to us .

612 – Philippe RAYMOND, France – I am EHS.

613 – Laurence RAYMOND, France – I am EHS.

614 – B/ B/, France – Because we must act quickly, there are too many victims recognized or not, it is a health scandal.

615 – Maria NAZZARENA, Italy – I am extremely opposed to the installation of cell towers, because they are harmful to everyone's health.

616 – Jeanluc PALLEIRO, New Caledonia – Because I'm surrounded by antennas. Persistent whistling in my head!

617 – JW, Canada – Radiation causes debilitating illness and death.

618 – LG, Canada – I am also a person with EHS and it is getting worse with time.This a humanitarian emergency since many have to leave their homes, cities, jobs and family, becoming homeless nomads. Many lose everything because of this debilitating electromagnetic radiation making them extremely sick. There are thousands of peer reviewed medical studies supporting this reality that cannot be ignored or dismissed.

619 – SS, Canada – I have friends who experience microwave sickness, and it has severely impacted where they can go and what jobs they can have. This is a human rights issue

620 – BG, Canada – This matter needs to be considered a priority as more science is showing how many people are being impacted by it.

621 EB, Denmark – I knw some people with EHS.

622 – SZ, France – Out of kindness to a friend.

623 – MB, France – Electrosensitive.

624 – Doris MULLER, Germany – I am concerned myself.

625 – GL, Norway – Important.

626 – J. R., Allemagne – I am personally affected, and it is urgent to give people with electromagnetic hypersensitivity the same rights to financial independence and participation in the job market as everyone else. I am intelligent and highly qualified in the field of IT. Unfortunately, even where there was some leeway, it is becoming even more difficult. Disabling a Wi-Fi router has become an intervention in the building's use plan. I am forced to become self-employed, working from home, because in all other environments, I already have headaches and concentration problems after half a day. At least I have a protected home. Many people in rental properties are losing their safe spaces due to legal requirements such as smart meters or thermostats that emit electromagnetic radiation. Electric cars are not built for us either. How will we get around in the future? Taking the train is the same disaster—one hour and I'm in bed with a headache and exhaustion. It's so frustrating that, according to the Doctors, I am in good health, all my blood tests are good, and yet, since an accident, I have had numerous problems that have led to social isolation. Yes, I have many strategies for staying mentally healthy, and I am happy with how I can live now. Yet, enough people end up committing suicide in this isolation. Holiday travel doesn't exist, I haven't stayed in a hotel in a long time, I am completely overqualified for my job (to be able to make a living), I think ten times before attending a conference and enduring the consequences of radio. After all, there is a lot online since the pandemic. That must stay that way. And I fully support the above claims for the reasons stated.

627 – MB, Germany – I am severely affected by EHS and I am looking for a white zone.

628 – HS, Guadeloupe, France – An acquaintance of mine has this disability.

629 – SJ, Denmark – To help ELECTROHYPERSENSITIVE people)

630 – Francesco FILIPPI, Italy – I am EHS.

631 – Véronique LOUPIAS, France – Every person has the right to be heard and acknowledged in their suffering.

632 – JD, Germany – It's important to open our eyes to this, too—denial won't help!

633 – AD, France – There are far too many antennas in France, far too many artificial radiation.

634 – Amoa HOX, Nederland – I suffer a lot too.

635 – AR, Italy – I believe it's important to preserve white zones and offer more support to EMP victims who are currently ignored.

636 – JH, Norway – Everything that lives is damaged by EMFs.

637 – Anna Maria ZIZI, Italy – I have been hypersensitive to EMFs for 20 years.

638 – SF, Italy – I agree.

639 – Andrea GIOLITTI, Italy – It is important that new technologies, before being introduced, undergo a comprehensive environmental (I am thinking in particular of the energy consumption of wifi networks compared to wired networks), health, and social assessment, separate from a purely economic evaluation.

640 – SS, Italy – Affected by EHS. Greater awareness is needed.

641 – IN, Germany – I have suffered from chemo-hypersensitivity for 15 years. My life has been fundamentally altered. I can no longer live with dignity in normal communities. My search for a place where I could remain unaffected has been unsuccessful. In the place where I currently live, I have watched trees die for the past two years. Watching trees die. The need for safe zones is urgent, even for plants and animals!

642 – A/ M., Denmark – Today, my friend suffers from this illness.

643 – Yamina BOUDAOUA, France – I have EHS. I live in an apartment in a town of 20,000 inhabitants, 200 meters from a 4G and 5G antenna, high-voltage pylons, and a TGV line. And my apartment is right next to the elevator, not to mention the smart meter...

644 – OE, France – I stand in solidarity.

645 – MB, Denmark – This is crucial for our future.

646 – FC, France – Supporting these people.

647 – VM, France – I am sensitive to electromagnetic radiation.

648 – KP, Denmark – I am severely affected by EHS; I have 10 5G panels hanging from the chimney 50 meters from my house. I feel like I've been microwaved every night; every night the intensity of the radiation increases strangely.

649 – Colette MORETTI, France – It is high time to take into account the electrosensitivity of people and to give them the possibility of living in a comfort zone.

650 – F. G, France – I support this approach which destroys life.

651 – AR, Italy – For electrosensitive people like me, electromagnetic fields often cause extreme symptoms in the incomprehension and disbelief of those around them, all of life then consists of trying to limit exposure to these fields as much as possible while society goes in the opposite direction and life becomes more and more difficult.

652 – MB, France – Support for people with EHS.

653 – HB, Denmark – I am EHS.

654 – CK, Germany – I have severe EHS. Degree of disability 80 and distinctive signs G, B, RF. I have had to move 4 times and I still do not have healthy housing where I can live normally.

655 – EV, Germany – I'm concerned!!!

656 – MS, France – I find it intolerable that electrosensitive people are denigrated in this way; they have the same rights as everyone else and are our sentinels because too much electromagnetic radiation is harmful to our health.

657 – NB, Italy – I am against 5g transmitters.

658 – Jérôme TERRIER, France – I am sensitive to radiation...

659 – GP, France – Being EHS, I know the ordeal of those affected.

660 – MR, Canada – I am sick and it is not psychotic but physical.

661 – N. B., Danemark – Les radiations sont malsaines et nocives.

662 – Noelle SIREJEAN, France – Because all this electromagnetic radiation is harmful and I got cancer a year after moving into the house, I refused the «Linky» smart meter, but it was imposed on me and I don't want to relapse... and since I've been in this house I sleep poorly because it's right next to the bedroom. So it's INSIDE the house.

663 – Laurent Pineau, France – My wife suffers from EHS (electromagnetic hypersensitivity), and I've noticed the effects on her health. However, it has improved since we moved from the city to the countryside. We are worried about the upcoming installation of a cell tower 700 meters from our house.

664 – KP, Germany – I myself am severely affected by electromagnetic hypersensitivity, and my life now revolves almost entirely around my isolated apartment. For nearly five years, I have suffered from muscle and joint pain, brain fog, chronic fatigue, as well as depression, numbness, burning sensations in my tendons, and so on. My life in «civilization» was abruptly interrupted by the onset of severe EHS; my mother almost exclusively does the shopping and everything else for me. No one in society wants to show any consideration, let alone help or understanding. It is tiring and sad to see people behave with such contempt. Not to mention the behavior of public authorities. This is why it is essential to disseminate this knowledge to the general public in order to raise awareness of our suffering—the suffering of others—so that we can live with some semblance of dignity. Thank you for your remarkable work, and I gladly join this appeal.

665 – AF, Denmark – For better public health .

666 – ND, Germany – I am concerned!

667 – MS, Belgium – Because it is a scandal to impose such exposures to toxic electromagnetic radiation on us.

668 – Jim BROWN, Canada – I want to be able to completely turn off my Wi-Fi and live in a Wi-Fi-free environment. The electromagnetic field generated by my modem is equivalent to that of a microwave oven in operation. This is not normal. We need to have the option to use the internet with a wired connection and without Wi-Fi, just like we used to have the option before. To me, it's just common sense.

669 – DG, Canada – I have electromagnetic radiation sensitivity .

670 – ML, France – We are all electrohypersensitive, but to varying degrees. Because we are bombarded by high and low frequency electromagnetic radiation, like all living beings. This is a public health issue: independent studies on the toxic effects of electromagnetic radiation must be conducted urgently.

671 – Donatella MASI, Italy – There are already enough scientific studies proving the harmfulness of electromagnetic radiation, which become devastating for electrosensitive people.

672 – Serena FEROCI, Italy – Because I am worried about my health.

673 – IB, Germany – I am concerned myself.

674 – Giorgio CINCIRIPINI, Italy – It is fundamental to continue to have significant interventions in favor of people with electrosensitivity.

675 – MH, Norway – My mother is sensitive to electricity and cannot tolerate radiation.

676 – Sophie ABADA-SIMON, France – Whistleblower in a residence (...) I became electrohypersensitive 18 months ago (...).

677 – Rossella BOCCHI, Italy – It is right that electrosensitive people should be protected and cared for; moreover, efforts must be made in prevention so that this phenomenon does not spread further.

678 – AM, Canada – Electromagnetic hypersensitivity is a real thing. As a blood analyst, I first see the effects of electromagnetic frequencies on humans at a cellular level. Electromagnetic hypersensitivity. Individuals are much more sensitive than the general population, and this needs to be recognized.

679 – Luis VERDIER, France – I have been EHS since 2022, my grandmother suffered from this condition, my mother and my brother as well.

680 – AB, Germany – I myself have been severely affected by EHS, MCS, and ME/CFS since I moved into an apartment next to a large mobile phone transmitter 15 years ago. Twelve years ago, I founded a support group. I know about a hundred other affected people. Our living situations are becoming increasingly difficult. We urgently need housing free of electromagnetic radiation and white zones where we can live.

681 – CS, Germany – Knowledge related to EHS.

682 – Geert SNIP, Nederland – I know what it means to have EHS.

683 – Marianne LARSEN, Denmark – The biological effects of electromagnetic radiation are poorly understood.

684 – LG, Italy – My husband is electrohypersensitive and we know the problem very well.

685 – MP, France – I sign because I am sensitive and my health is at risk.

686 – Marie JAKUBCZAK, Germany – Because I have been the victim of cruel torture for at least six years. (...) MY LIFE HAS BEEN DESTROYED.

687 – Marie-France DEPREZ, Belgium – I know people who suffer from it. And generally speaking, I find that governments embark on "progress" without ever considering the consequences...

688 – PC, Italy – No need to justify yourself!

689 – MB, Belgium – I can't take it anymore.

690 – AH, Germany – I myself am electrosensitive, which prevents me from doing my job, I have not been able to sleep without sleeping pills for about 10 years and I have developed strong painful symptoms.

691 – Kristen HARALAMPOPOULOS, Canada – I am concerned about the long-term damaging effects of EMF exposure on our physical and mental health.

692 – John Patrick Richard DALTON, Ireland – I am electro-sensitive.

693 – EG, France – Suffering from EHS for 2 years. Currently unable to sleep in my apartment (due to electromagnetic fields from neighbors), I am living in a caravan on a farmer's property. I am looking for a place to live.

694 – Christine ASCHERMANN, Germany – It is high time to give electrosensitive people a living space and participation in public life.

695 – MV, Finland – I myself am experiencing symptoms related to electricity and am concerned about the health risks caused by electricity.

696 – Georgia BONINI, Italy – Because I need a different world.

697 – FJ, France – I am electrohypersensitive.

698 – JH, Germany – It's URGENT, because the suffering of those affected is already very great!

699 – KL, Germany – I am personally affected and I know many others affected!

700 – Runa JENSEN, Denmark – I know about the problems of EHS, and I changed industries for the same reason.

700 – Runa JENSEN, Denmark – I know about the problems of EHS, and I changed industries for the same reason.

701 – SB, France – This is a major health and environmental problem.

702 – Véronique DAUX, France – I have people in my circle who are electrosensitive and I know the ordeal they endure on a daily basis.

703 – VR, France – Several well-known people affected.

704 – LJ, Denmark – My friend has EHS.

705 – Barbara DOHMEN, Germany – We, doctors, were the first to launch the Friborg Appeal in 2001. After 24 years, the implementation of our demands and yours is long overdue!

706 – PB, France – I have a highly sensitive friend who has great difficulty finding accommodation and navigating this connected world.

707 – KM, France – My body is intolerant to the monstrous electromagnetic pollution that surrounds us. I think the living world suffers from it.

708 – SJ, Germany – I know a few people with EHS and have seen them react to unexpected mobile communications. Their life in cellars or in constant fear of their radio hole being closed is undignified, worse than Corona lockdowns, permanently, and should not be necessary.

709 – Lilia CASALI, Italy – I know it's true: this radiation is bad for my health. Me too.

710 – Réjeanne SANFAÇON, Canada – It's important.

711 – JS, Switzerland – I know a person who is suffering from electrohypersensitivity to a degree that she can't work in a normal office.

712 – Benoît SAINT GIRONS, Switzerland – I am well aware of electromagnetic pollution (...)

713 – LG, Italy – Because I care about my health.

714 – Angelika WELSCH, Germany – My living space is getting smaller and smaller, I don't know what will happen when I'm old or hospitalized.....

715 – PJ, Denmark – I personally know someone with EHS and believe it is increasingly a problem that needs to be recognized.

716 – Nicole LEGROS, Belgium – I choose to endorse and support all of this. PROTECTS the COMMON GOOD... and OUR HEALTH... PLEASE.

717 – Andreas Bottcher, Denmark – I live with someone with EHS and know how terrible this condition is.

718 – GR, France – EMP damage has definitely been proven since 1920 on all animals and humans, including insects, birds, and cows.

719 – Steffen HEININGER, Germany – That's right.

720 – Reiner DIRR, Germany – The many people affected are in great difficulty and have a right to be helped.

721 – MP, Italy – I am ill (EHS, MCS, fibromyalgia) and I sign for a chance to survive.

722 – Jari MALM, Finland – I am experiencing symptoms of electrosensitivity.

723 – MF, France – As a precautionary measure.

724 – Maria Carmela PACCHIONI, Italy – I have also been electrosensitive for years and have seen how electromagnetic fields affect and limit my life.

725 – CA, Italy – We are increasingly immersed in electromagnetic fields, now there's the 5G frenzy, and it's time to say enough is enough and think about HEALTH!

726 – MG, Italy

727 – SC, Italy – This is harming my health.

728 – NC, Belgium – The future in a healthy electromagnetic environment is important to me.

729 – Annette PARMENTIER, France – The elite who imagine themselves omnipotent should not destroy our health under the pretext of progress.

730 – Christine DARBYSON, Canada – I suffer from electromagnetic sensitivity .

731 – Margherita TABARI, Italy – Solidarity with the electrosensitive and all of us.

732 – Maria Rita BATTAGLIA – I consider exposure to electromagnetism a serious and, above all, real environmental and health emergency, not only for a few electrosensitive people but potentially for everyone.

733 – LL, Italy – Every living being must be protected from this dangerous electromagnetic radiation.

734 – NP, France – I have not had a life worthy of the name for 8 years because of the symptoms of HES, confined to residence and soon homeless, a hopeless situation.

735 – Marie-Noëlle MAILLARD, France – I am aware of this acute problem which has been silenced in the media and I have people in my environment who are affected and suffering.

736 – JB, Canada – I believe we need to keep the air as free of radiomagnetic radiation as possible.

737 – AS, Italy – If technology must serve human beings, it must not harm them, otherwise it serves something else...

738 – Valentina GALI, Italy – I am also electrosensitive.

739 – Catherine DELATRE, France – I sign for all the people around me whom I know well whose lives are severely affected in their daily lives.

740 – Loic SANTIAGO, France – This is important.

741 – SS, France – I have a friend with EHS.

742 – Randi GEBERG, Norway – We know far too little about the long-term damage that this radiation can cause to the body's cell membranes, for example.

743 – Emmanuelle LALEU, France – I am personally affected, so I know how complex it is to live with this in today's world, and I am convinced that many people are affected by EHS without knowing it. It seems to me that this is indeed a public health issue.

744 – Raphaël MARCHAL, Belgium

745 – Carolina LUCE, Spain – It's becoming increasingly difficult every year to function in society with ever-increasing EMF radiation everywhere you go.

746 – Anne LECLERC, Belgium – I am worried about my grandchildren who have been exposed to EM radiation since birth.

747 – DC, Italy – We must protect our health and that of our children.

748 – VL, France – I am EHS and I defend life.

749 – AC, Italy – This is criminal.

750 – MC, Italy – I know the problems of electrosensitive people.

751 – NF, France – I am EHS (Electromagnetic Hypersensitivity), and I completely agree with what is stated. The health of living beings must take precedence over financial and technological interests. And not the other way around.

762 – CV, France – I am electrohypersensitive.

753 – Christina RICCI, Italy – I am electrohypersensitive.

754 – Gunner SORENSEN, Denmark – I am EHS.

755 – DM, France – People with EHS have the right to live normally.

756 – Rigmor BREKKEN-ANDERSEN, Norway – I myself am hypersensitive to electricity. More and more children and young people are struggling. The «free and open space» is not free for everyone. It should be a human right to be able to participate in professional and leisure activities, as well as in society in general, without being exposed to allergens that make us sick. In Norway, we introduced the Smoking Act. It's time to reintroduce network cabling and regulate the wireless industry. Great benefits for health and safety!

757 – Maleen VERVOORT, Belgium – I do not want to be forced by the government to be exposed to electromagnetic pollution!

758 – NG, Denmark – I am EHS.

759 – VA, Canada – I am electrosensitive and it's a horror in today's society.

760 – Mette KENFELT, Denmark – Living with PCM and HSEM myself, I am deeply concerned about the increasing prevalence of chronic diseases and the world in which our children and young people are growing up. The limited information we have about the potential harmful effects is highly questionable. We are rapidly moving towards a wireless society without truly understanding the consequences – and that is unacceptable!

761 – Manlio FOSELLA, Italy – Electromagnetic pollution has devastating effects on living organisms.

762 – Elke SCHNEIDER, Germany – I am very affected by electromagnetic fields.

763 – LZ, Germany – I know many people who suffer from this illness and receive no help, either medical or from their loved ones. They are too weak to fight and urgently need their illness recognized. And quickly, because they have been ignored and neglected for far too long.

764 – OB, Germany – I am myself electro-hypersensitive and I am very limited in my search for housing and employment.

765 – Christina Munch Risggard, Denmark – I am suffering from electromagnetism.

766 – MA, Italy – Because it is right to protect and safeguard us.

767 – Clotilde BARBET-MASSIN, France – I am electrosensitive and it is a great suffering and a source of exclusion.

768 – Evelyne ACACHE, France – I see how this electric sensitivity is ruining the life of my 42-year-old daughter.

769 – PR, France – My mother is very concerned about all this and I think it's important to leave clean places.

770 – SD, France – Because my meter works very well. There are enough bad vibes and I like the time of the «Stone Age».

771 – Tove Jensen, Norway – I am highly electro-hypersensitive, which makes life very limited. White zones are absolutely necessary.

772 – Michel ANTOINE, France – I have suffered from EHS and I remain sensitive to WiFi.

773 – RP, France – I believe this is a matter of vital health.

774 – SB, France – I am EHS and stand in solidarity with EHS sufferers.

775 – Antnella ERCOLANI, Italy – For me, it was a revelation how much I could be affected. I switched on an all-in-one PC and it made me ill; it hit me like a wave. EMF pollution and sensitivity are real; we are the canaries in the coal mine.

776 – Elisabeth Mohr WILAND, Denmark

777 – LM, France – I am EHS.

778 – Elisabeth MERLIERE, France – An unbearable experience for 15 years. With proven damage to all living things, electromagnetic radiation is largely implicated in the disappearance of insects and birds, and of all biodiversity; fires and global warming are certainly linked to this microwave oven in which the Earth has been enveloped for the past few decades. Living things are not meant to live in an environment of several billion hertz. This environment itself creates new parasites that go against life: proof: in all the remaining white zones, boxwood, which has been decimated by defoliating caterpillars throughout France, is perfectly healthy; proof that this artificial environment inevitably alters living things.

779 – FP, Italy – Electromagnetism is bad.

780 – GL, France – Disturbed sleep, annoying vibrations, brainstorming times, huge loss of energy.

781 -MF, Italy – Because I am electrosensitive.

782 – AP, France – For the comfort of the electrosensitive.

783 – AP, France – I suffer from EHS (Electromagnetic Hypersensitivity) and politicians are doing nothing to protect us in the name of profit and the freedom (or rather, the duty) of connectivity. Everything for the data operators, nothing for the victims.

784 – BD, Belgium – I suddenly developed tinnitus.

785 – Gilbert MIGLIORI, France – Hello, it seems obvious to me that as many people as possible need to mobilize for this increasingly serious problem. Best regards, Gilbert.

786 – AB, Germany – Under the effect of pulsed microwaves, I am seriously ill and I can no longer find any place to escape, i.e., «white spots».

787 – Karl HEIßEL, Germany – Because as someone with electromagnetic hypersensitivity, I urgently need a home free of electromagnetic radiation.

788 – John Sebastian MAJ, Denmark

789 – Jeg er overbevist om, at 5G har store sundhedsmæssige konsekvenser for alt levende i denne verden. (I am convinced that 5G has major repercussions on the health of all living beings in this world.)

790 – Kenneth ANDERSEN, Denmark – I saw the aftereffects of a person suffering from EHS.

791 – Thomas WEIMER, Germany – The widespread introduction of an extremely harmful technology, moreover without any protection zone for humans and other living beings, is an immense crime.

792 – Sylvie BARBE, France – I am EHS.

793 – Eldri DAHLEN TELLEBON, Norway – People, animals and plants get sick.

794 – LE, Denmark – This is the best life for all living beings. Experimentation on our health must stop, including the destruction of our insects and biological systems. There must be safe ways to access the internet, priority must be given to information for everyone, and to how children, young people, and everyone else can protect themselves. People with mood disorders must receive support from municipalities and the workplace. Taboos must be broken. Masts must be taken down, not erected. Responsibility must be assumed by the authorities.

795 – LN, France – I am against the operating method that imposes itself without any precautionary principle, transparency, or respect for life. The Earth is not a telephone booth.

796 – Hennecke BODIL, Denmark – Because I myself suffer from EHS and I constantly get sick from being around people. Humans aren't the only ones affected, animals too, like my dog who stopped digging in my furniture the day I turned off my WiFi router.

797 – US, Denmark – Everyone should have the right to move and live in our society without getting sick.

798 – HS, Denmark – A healthy society cannot exist with unhealthy technologies to which citizens cannot choose to be exposed.

799 – Bente PEDERSEN, Denmark – I saw people become seriously ill because of this. Animals behaved aggressively until a router was switched off.

800 – Sophie RCHARD, France – It's proven to be dangerous and carcinogenic, causing memory and concentration problems. I'm also electrosensitive.

801 – Nicole HARDY, France – I am electrohypersensitive.

802 – Tobias STORM GABRIELSEN, Denmark – I know someone with EHS.

803 – PM, Denmark – I sign the appeal because I want all people to be respected and cared for, so they are able to live a healthy, fulfilling life. I also want the precautionary principle to be recognized and used, so that we ensure a safe environment for current and future generations

804 – Solange DEJONGHE, Belgium – I think these people should also have a pleasant living space and that politicians should recognize this condition.

805 – Henrik DUE, Denmark – All this radiation has had a VERY negative impact on my life, and has for many years.

806 – Eric KERKHOF, Belgium – These people need to be supported and helped.

807 – Caroline MURRY, France – I am electrosensitive and chemically sensitive. My life is devastated, no viable housing, social exclusion (work, leisure, family life, friends); suicide attempt in November 2023, contempt from the medical profession because the illness or disability is not recognized by ANSES, life plan: to move towards an assisted dying facility.

808 – JA, France – Let us act as if it were impossible to fail. Winston Churchill, July 1940;

809 – Hanne Lisa SAMPSON, Denmark – It is time to stop prioritizing profit over human health.

810 – Hilde HANSEN, Norway – I am Electrosensitive.

811 – Odile MOULIN, France – I am disabled with EHS and my rights are not respected.

812 – Kasper OLSEN, Denmark – We must take responsibility for the good of our children.

813 – EC, France – I am EHS.

814 – CD, Norway – It's time to fight against stupidity and credulity!

815 – Giorgio ROSSINI, Italy – A member of my family has been electrosensitive for some time and I am starting to develop electrosensitivity.

816 – LS, France – I am very concerned and believe it is truly important to take this into account. Thank you for raising this issue through this call.

817 – AM, France

818 – Heidi Lilian JOHANSEN, Norway – I feel it in my body every day.

819 – Elisabeth RENAUD, France – Because it's a scandal.

820 – LD, France – I support the cause, I have a friend who suffers enormously from it.

821 – ED, France – Awareness of the effects of artificial EMFs is a defense of Life and all living things;

822 – PD, France – Because I am affected by this pulsed digital radiation, and more and more people around me are as well. Sometimes uninformed, they don't immediately understand what is happening to them. Our representatives are currently in a situation of institutional silence (...)

823 – Gerda MAELHUM, Norway – Save nature, human and animal health and freedom !

824 – SB, France – I have health problems, but I also sign for public health. Example: the number of people with brain tumors and strokes is increasing sharply.

825 – SR, France – Wake up, world! This is getting hellish! Do we really need all this killer electromagnetic radiation? It's becoming morbid!

826 – EG, France – For 12 years I have been facing all these difficulties following overexposure to cell phone antennas.

827 – Elisabeth OSTGAARD, Norway – I sign because I dream that one day, highly sensitive people will have their human rights respected and that sensitivity will be recognized as a diagnosis and a disability. And that highly sensitive people will not face hatred, contempt, mockery, and exclusion. On the contrary, they must be welcomed with respect, understanding, and support. In the healthcare system, in the job market, in the public sector, in cultural life, and in all social contexts. Digital neutral zones are of great importance and absolutely necessary for many. I know people who have committed suicide, and I have heard of others. The municipality of Trondheim must take responsibility for the harm it has caused.

828 – Marie, MESMER, France – I am electrosensitive...

829 – Michèle GILLAN, France – I have long been aware of the dangers of electromagnetic radiation, but I have witnessed firsthand, as my daughter is electro-hypersensitive, the health problems and extreme difficulties in life that this causes. I sign this appeal because I am convinced that the human body (and animals and nature, for that matter) is not designed to be exposed to all this radiation without serious health risks, and the reactive effects will only intensify. We must act quickly!

830 – MP, Belgium – Because there is already too much of this radiation.

831 – Jean VAN PRAAG, Belgium – To prevent people from suffering and rotting away without doing anything. More and more people are affected at different levels. Yes to 'human first'.

832 – Mesut IILKILIC, Belgium – A friend is a victim of the disease.

833 – Kevin PAYET, France – My mother is seriously ill from it.

834 – Unni HOIVANG, Norway – I am allergic to electricity.

835 – MP, Belgium – I have been aware of this problem for several years. I know people close to me who suffer from EHS. I sincerely hope that political leaders will acknowledge the issue and find solutions. We are all affected.

836 – AP, France – Suffering not recognized by the "proponents" of science.

837 – Monique PIERRONNET, France – When will we take into account the suffering imposed by irresponsible people who only see their own profit?

838 – Elisabeth CAMMAS, France – I cannot stand this life connected at all costs.

839 – CM, Belgium – Becoming electro-hypersensitive means becoming marginalized, living in exclusion, no longer being able to live life as you wish, and, for some, giving up almost everything they knew until then. Imagine a world where something invisible but omnipresent makes you suffer and destroys your health. Others perceive nothing, but you do. You no longer know where to go to feel better, as areas with no electromagnetic fields have practically disappeared. Even finding housing becomes a problem, because even if you don't use devices that emit electromagnetic radiation, your neighbors do. Some then become homeless, living here and there, always wandering,

hoping for a place to finally settle down and try to rebuild a life in which the future has a place. Know that, for most of us, we weren't electro-hypersensitive... before becoming so. We are all affected, because electromagnetic radiation threatens all living beings. What if we loosened our grip on these technologies that are destructive to life and humanity? Let's not be passive anymore; let's educate ourselves about the reality of the effects of electromagnetic radiation, let's take action!

840 – VP, France – I am electro-sensitive and chemically sensitive.

841 – Jimmy LINDSJO, Sweden – This is very urgent, and the demands are reasonable.

842 – RM, USA – My life is ruined and actively threatened every day. I don't know how I can survive much longer. This is torture on so many levels.

843 – MD, France – Respect for life in all its forms.

844 – AG, Spain – I have relatives with EHS.

845 – EP, Spain – I am EHS, I had cancer and I am aware of the health catastrophe caused by a society that believes itself immune to everything and thinks that this is not something that applies to it.

846 – Luc ELSEN, Belgium

847 – JH, Belgium – A friend is suffering greatly and I want to support her and make things change for people who are electro-hypersensitive, but also for the health of everyone.

848 – Olivier LEFRANC, France – I am EHS.

849 – PM, Belgium – I am concerned about human and animal health and about the artificial elements that unbalance our ecosystem. It is urgent that man recognizes his humility.

850 – Amy HARLIB, USA – SOURCES OF HARMFUL EMF RADIATION MUST BE ELIMINATED!

851 – EV, Norway – I am sensitive to EHS. Today, there is too much radiation for me to leave my house. I get sick when I go shopping, when I go to the doctor, or when I visit friends.

852 – GB, Denmark – This is a problem that continues to get worse. Everyone who has income and interests in the sector turns a blind eye and allows security measures to continue that are outdated compared to today.

853 – NB, France – I am electrohypersensitive.

854 – BL, Belgium – We must take into account all the needs of the population!!!

855 – ML, Denmark – The appeal is forwarded to all general practitioners in my country... Doctors are generally ignorant and do not believe in the phenomenon.

856 – Claudio GOFFI, Italy – Because 5g is a danger to humanity.

857 – JN, France – I have EHS and have been living in isolation for 10 years now, and I never imagined this «thing» could happen to me!... to others, yes, but not to me!... and yet, everything changed in a single day. Most doctors don't know about the problem and are unable to make a diagnosis: «It's all in your head!»... I undergo MRIs, CT scans, X-rays, etc., only to be told in the end that I'm not sick. Their training doesn't cover the subject, and they talk about idiopathic syndrome or emerging diseases... in short, we don't know! It's the environment that's sick, and some people resist better than others, but for how long?

858 – GD, France – This is a public health issue.

859 – DB, France – To help those who suffer from EHS.

860 – MB, France – I became electrosensitive at 55.

861 – Jean Pierre MOINE – I was EHS.

862 – Jesper ANDERSEN, Denmark – Because it is a completely debilitating disease!

863 – MP, Belgium – I am electrosensitive. I am aware of it. I suffer from seeing my friends suffer from EHS.

864 – DS, France – I have been suffering from whistling in my ears since the «Linky» s meters were deployed in the condominium.

865 – VG, France – I myself suffered from electrosensitivity 8 years ago, forcing me to leave my apartment and job for 1 year to live in the countryside.

867 – Erika MATE, Italy – Highly electrosensitive sound system. I am highly electrosensitive.

868 – NM, Italy – I am electrosensitive.

869 – SG, Italy – Because we never spoke to the people...

870 – AF, I have been suffering from EHS for 12 years.

871 – EM, France – I have people in my family who are EHS.

872 – DD, France – I myself am electro-hypersensitive to electromagnetic radiation.

873 – PD, Belgium – Given the ever-expanding cities, telecommunications antennas are proliferating and being installed with no regard for public health... 3G, 4G, 5G, and soon 6G. STOP!!!

874 – SP, Germany – Too much radiation over time, at my place too, triggers health problems – I need rooms with little or no rest. Otherwise, I can no longer rest.

875 – EA, France – I am EHS, it is destroying my life.

876 – EA, France – I am EHS, it is destroying my life.

877 – PD, France – I am increasingly feeling the impact of antennas during my walks on the coast; I can no longer go to places where there are far too much electromagnetic radiation, concerts, cinema, etc. Thank you.

878 – LD, France – I am electrosensitive and I live in a silent hell. No one acknowledges the problem and no one wants to hear about it, preferring their honeymoon with their connected gadgets...

879 – MP, France – I sign because it is urgent to stop these EMFs and to keep white zones for sensitive people.

880 – MT, France – I sign the appeal!

881 – Patrice Lahaye, France – We are all affected in the short or long term. It's a proven remedy!

882 – ME, France – I am electrosensitive and wish to live in "clean" air.

883 – Marie LABESSE, France – In regular contact with EHS and myself slightly impacted.

884 – Danielle RENAUDIN, France – I have suffered from EHS for 16 years and experience it as torture.

885 – UG, Ireland – I am an EHS sufferer.

886 – MM, France – Let's stop all this electromagnetic pollution that is making humans and animals, all living things on this earth, sick. It's outrageous!!

887 – FM, France – All these antennas, especially the 5G microwaves, are giving us headaches!

888 – JD, Belgium – I consider electromagnetic pollution to be a major scourge for our physical and mental health; it is masked but virulent. THANK YOU for addressing it.

889 – MV, France – To give you courage in the face of Goliath!!

890 – GD, France – Global health emergency!! We are all affected!! We must denounce the organized denial by states and ask ourselves, why??

891 – NC, France – I am electrosensitive;

892 – Sophie SCHEFFER, Belgium – I am a doctor and treat quite a few EHS people and can confirm the distress in which these patients find themselves and the lack of recognition and therefore of means to allow them to live with dignity.

893 – WP, UK – I am electrosensitive and struggle to cope in the world. Everywhere we are forced into technology that harms us. We feel it in our bodies and our energy levels crash. I want recognition and I want technology to be made safer for everyone.

894 – JV, France – Let us live!

895 – AV, France – I consider myself EHS.

896 – Brigitte JACQUES, France – I have been EHS since 2009.

897 – AF, France

898 – Hélène BUREAU, France – Elected officials must legislate to protect people with electromagnetic hypersensitivity.

899 – RB, Canada – I am electrohypersensitive and I know the importance of the measures you are proposing.

900 – MN, France – EHS

901 – Claude LESNE, France – I myself suffer and know the daily difficulties of people with electrohypersensitivity.

902 – CA, France – Too much electromagnetic radiation is harmful.

903 – Gundula TIPPE – Germany – Ich selbst betroffen bin und weil alle Lebewesen betroffen sind.

904 – Alexandre HELIAS, France – I have been living in electromagnetic hell since the implementation of power line communication (PLC) in my city, and I find myself experiencing the same symptoms in countries I visit that use the CENELEC A/B frequency band. Countries I have visited that do not have this technology cause no symptoms. A flawed technology, because it is not controlled and is detrimental to mammals as well as the security of property, was put into production neglecting health concerns and prioritizing profit. The issue of torture goes against fundamental human rights.

905 – Hamida NAMANE, France – I am electrosensitive.

906 – Paul Jospeh Herman BERNIER, Italy – I know the effects and the subject in general.

907 – Claus RITTER, Belgium – My partner is electrosensitive, and therefore I know the suffering of those affected. Things must change!

908 – CJ, France – I am EHS and deprived of a normal life, reclusive and socially and health-wise isolated due to the inability to access public places without suffering.

909 – Catherine PAVOT, France – I am EHS / serious cases of exposure to Electromagnetic radiation are perpetrated near schools and hospitals: we are exposed in an irrational way (e.g. asbestos, GMOs, PBO ECT.)

910 – AG, France – I am electro-sensitive myself, it complicates my life.

911 – MB, Italy – I understand the problem, because I have a friend who is suffering from it.

913 – CM, France – All this electromagnetic radiation is debilitating; but isn't this done on purpose to reduce the population on Earth?

914 – SM, I am very EHS.

915 – RG, France – I am extremely electrosensitive, experiencing burning sensations all over my body, nausea, pressure in my head, and oxygen deprivation. The implantation of these antennas must be stopped immediately, otherwise it will be fatal for me.

916 – Chris SALADIN, France – I am sensitive, I host someone who is severely electrosensitive and I want the «Linky» smart meter removed which was installed despite my disagreement.

917 – EP, Italy – Create white zones.

918 – VS, Italy – I am electrosensitive.

919 – Jean-Philippe COLTEL, France – Since they want to put a cell tower in the village where I live, I'll probably have to go live in the forest or somewhere else in a caravan, without water, electricity, etc. How are we supposed to feed ourselves if we can no longer go shopping and buy food from farmers, etc.!?

920 – SA, Italy – In solidarity with a friend suffering from electrosensitivity and for a better future world.

921 – AB, Italy – Because everyone's health is at risk without us realizing it.

922 – JB, France – Electromagnetic radiation poses a very serious danger not only to people with electromagnetic hypersensitivity (EHS) but also to all human beings. There are no regulations, and the situation continues to worsen.

923 – GH, Norway – I am affected by EMFs .

924 – SB, Germany – Enough already with this electronic crap!!!

925 – ML, France – Ehs since June 2024 irradiated by new 5G relay antenna private building of 60 meters taken in the firing field of several antennas and also by new 5G router of new neighbors.

926 – Claude ESPU, France – I am aware of the damage this causes.

0927 – Frederic PIRES, France – Health concerns everyone and some are more sensitive than others.

0928 – JM, Canada – (...) this is biogenocide (...)

0929 – MT, I wish this had some weight.

0930 – AF, France – I have been aware of this issue for many years because my friend suffers from EHS (Electromagnetic Hypersensitivity) and his condition impacts his daily life. It is urgent that governments address the issue of EHS.

0931 – PR, France – Members of my family are suffering.

0932 – Jean-Philippe COLTEL, France – I am EHS, electrosensitive, and today it's no longer about living and thriving, but about being a prisoner and suffering. I no longer have freedom; I can't see my family, go shopping, go for walks, go to the doctor, or even to the hospital if needed—for emergencies, operations, etc.—just in case. I can't even go to the dentist, even though I desperately need it. I have a broken tooth right at the gum line and it's decayed. I'm a prisoner and only go out very rarely, within the limits I can't cross because of electromagnetic radiation. It's about survival, a life of imprisonment. This must stop, life must be restored, nature and we ourselves must be free. May God help us and have all of this demolished—these wretched cell towers and this deadly technology.

0933 – André CAZEILLES, France – Fed up with all this electromagnetic radiation that insidiously invitess into our lives without asking permission.

0934 – SS, France – EHS personally, I know the urgency of stopping this headlong rush which is a danger to life, including humanity.

0935 – Clint McLean, South Africa – I'm a qualified scientist researching this area and have found that even weak electromagnetic fields can affect neurological signalling and have published a book on this.

0936 – Philippe ALVAREZ, France – This is a life-or-death emergency!

0937 – VM, France – So that clear and effective measures can be implemented to address the dangers of electromagnetic radiation. I was placed less than half a meter away, practically against the wall of the computer room at the sub-prefecture site in xxxx. I spoke with my superiors, who I feel are taking things too lightly. I've had tinnitus for a year now... I won't be able to change offices until the summer when some of them retire! I provided them with studies, and they didn't really take them into account!

0938 – Kai SCHUBERT, Germany – Mobile phones are ruining all life!

0939 – AP, France – I became electrosensitive following the installation of the «Linky» smart meter at my neighbors' house; I did not know that their meter was located exactly on the other side of my bedroom wall, at the level of my headboard.

940 – Michela MATTEI, Italy – A close friend got me involved.

941 – EW, France – I am against power line communication.

942 – FA, France – In solidarity with EHS.

943 – TP, France – The standards for these electromagnetic fields must be monitored by scientific experts and be part of medical research. All resulting pathologies must be studied scientifically and taught.

944 – Pierre LAVILLE, France – I have electrosensitive friends.

945 – Odile CORBEL, France – For support.

946 – DL, Germany – More information is needed on the harmful effects of EMF. I want to live without radiation in my home, at my workplace, while shopping, in a café, a restaurant, a library, at the cinema... I want children, animals, insects, plants to be able to grow and live in good health.

947 – Nicole MIRANDA France – I sign the appeal because I am also a victim of this electromagnetic radiation, this must stop, and justice must be done.

948 – NE, UK – I had to give up my day job because I was ill from EHS. I know others who are struggling every day just to live without pain and have a home that doesn't zap them. I hope one day soon the tide will turn in favor of EHS and what we are saying, as it would be a good day for all life on this planet.

949 – Daniele ANTONELLI, Italy – This is an ever-increasing disease and we all suffer from it more or less anyway.

950 – JG, France

951 – Christian MOHR, Denmark – This is probably one of the most important cases of recent times. EHS is close to my heart.

952 – JW, Belgium – The impact of electromagnetic radiation on human and animal health and on the entire world should not be underestimated. We must guard against it. We cannot continue to emit ever stronger signals without asking ourselves what the ultimate impact is.

953 – CM, France – I am EHS.

954 – PB, France – Stop EMFs.

955 – Jocelyne THERY, France – We must reduce and above all control EMFs.

956 – Andre BONIN, France – The warning was given a long time ago. It's time for that to change.

957 – Marie-Line MARSAUX, France – I know that people with EHS are going through a terrible ordeal and I support their efforts to be recognized and protected.

958 – SH, Germany – I know many affected people who are suffering, and I am one of them myself, just like the fauna and flora.

959 – Sophie Richard, France – Too much danger and too many people in difficulty.

960 – Sophie FREMIOT, France – Each of us is susceptible to becoming EHS.

961 – ZM, France – I don't want to get fried in a microwave!

962 – CG, France – The health of all living things depends on it.

963 – VB, France – In support.

964 – CR, France – Urgent need to address the needs of people with electromagnetic hypersensitivity.

965 – Claudia BARONTINI, Switzerland – So that politicians limit the emission of electrosmog.

966 – IA, Switzerland – It is urgent to inform and stop this devastation to all LIVING things. Indoors, wired connections must be a priority, and we must stop intrusively irradiating each person and their neighbors. Outdoors, we must also be vigilant and stop destroying all the kingdoms we are called to protect instead of attacking them in this way. Let's raise awareness and take action!

967 – Catherine NEYRAND, France – So that every EHS person can live like everyone else, without pain due to OEMA – EHS physiotherapist.

968 – AE, Switzerland – I am convinced of the need for regulation and a reduction of electrosmog.

969 – VC, France – I am ehs, I suffer, I constantly flee from the airwaves. My life is ruined.

970 – Frank CLEGG, Canada

971 – Camelia COSTIN, France – It produces a lot of misunderstanding, physical and psychological suffering, and it destroys lives. Society must become aware of the risks of electromagnetic fields to the health of its citizens, and science and medicine must do their part.

972 – BG, Luxembourg – It is now necessary to protect oneself from electromagnetic radiation.

973 – PL, France – I am electrosensitive to electromagnetic radiation from mobile phones and cordless phones.

974 DG, France – It's necessary!

975 – NP, France – Because it is through unity that we can make things happen.

976 – Jocelyne PERROUZAS, France – I suffer from MCS and EHS and cannot even tolerate very low electrical voltages. I have no life left and struggle every day to find energy.

977 – Ketty YVETOT, France – I myself am experiencing more and more discomfort when I use my mobile phone for example, or when I work with wifi (insomnia, fatigue).

978 – Sylviane ASCHEHOUG, France – I understand the distress of electro-sensitive people.

979 – Svend SVENDSEN-TUNE, Denmark – I know someone who suffers greatly from EHS.

980 – Sophie PENEN, Luxembourg – People need to wake up to the effects of the electromagnetic radiation that surrounds us. Governments have been lying to us from the beginning about the impact on our health; anyone can become hypersensitive.

981 – OB, France – I am electrosensitive to all this electromagnetic radiation and daily life becomes a living hell.

982 – Laure BIRGY, France – I am the daughter and partner of people with EHS.

983 – Philippe TRIBAUDEAU, France – I am an EHS person.

984 – Thomas THRAEN, Germany

985 – CL, France – People with EHS are prevented from living in indifference and irresponsibility. I sign in the hope of a wake-up call for the good of all.

986 – GM, Switzerland – This is a very important and very worrying subject!

987 – Franck GAILLOT, France – It's essential!

988 – Sylvie LELEVRIER, France – I am EHS.

989 – NG, Spain – I am affected by EHS.

990 – Morjane FARAOUN, France – I have been aware since my early childhood of this scourge caused by strictly financial issues, particularly in France due, on the one hand, to the dismantling of France Télécom, which brings in enormous amounts of money for the French state, (...). I am also a victim of this syndrome, because those who are not are either still young enough not to feel its effects (...).

991 – Hélène REBAUDIN, France – Some members of my family are electrosensitive and I myself have a slight sensitivity to electromagnetic radiation.

992 -GM, France – Vital!!!

993 – Elke SCHNEIDER, Germany – I am personally affected and I know several people in my region who are desperately looking for affordable housing and are desperately seeking accommodation.

994 – JE, Germany – I know a person in Brussels who suffers from EHS.

995 – MM, France – I became electrosensitive after working near Wi-Fi hotspots. For six years, I lived through hell until I moved. Now I feel very tired because Wi-Fi is unfortunately everywhere, but the symptoms of torture are less severe. I therefore urge that vital and essential decisions regarding public health and the environment be made urgently.

996 – François CLAUDIN, France – Because I know people who are electro-hypersensitive and live in a very difficult daily life.

997 – MM, France – This is scandalous.

998 – V. P, France – I am aware of the danger of electromagnetic radiation that are imposed on us, on the health of all living beings.

999 – CG, France – I am EHS.

1000 – Maybritt Annia AMALIEZENN, Denmark – I know how energies affect the body.

1001 – Jean GAGLIARDI, France – In solidarity with the electro-hypersensitive people around me.

1002 – Rosine STEFANINI, France – It's vital for many!

1003 – Françoise MARILL, France – Solidarity with electro-sensitive people.

1004 – Marguerite CELLEIR, France

1005 – Claire GILLESPIE, France – I am not EHS at the moment but I am very concerned about this extremely serious pollution.

1006 – Caroline CELLIER, France

1008 – SS, Germany

1009 – AL, France – I am resistant to mobile phones.

1010 – CC, France – I understand those affected by electromagnetic fields. It's a constant, daily suffering, and politicians must take action at the highest level. Furthermore, I myself might be affected by this problem, and I would be very touched if people fought for me. Let's stand together!

1011 – MR, Denmark – The right to life... to LIFE! And not just for us humans, but also for animals and the entire ecosystem! That should be reason enough in itself... Thank you for your attention.

1012 – ML, France – I know how dangerous electromagnetic radiation is and I want this pollution to stop.

1013 – VD, I am suffering terribly from electromagnetic radiation and I have lost all forms of freedom.

1014 – BP, France – I sign the appeal because of the toxicity of this excess of electromagnetic radiation.

1015 – Isabelle TRETON, France – I am EHS.

1016 – SS, Switzerland – I am electrohypersensitive and this pollution of artificial electromagnetic radiation which is increasing immeasurably affects all living things.

1017 – Codrina MICULIT, Romania – I believe that no one should be exposed to harmful technologies without consenting and that harm already done must be corrected urgently. This should never have happened in the first place!

1018 – IP, France – I agree with the demands of this text, having myself been affected by EHS-CMS for 22 years. I want genuine support and recognition of this disability.

1019 – KH, France – Health.

1020 – MV, France – I suffer from this allergy which deprives me of many pleasures and tires me out because I have difficulty sleeping despite the protections I install around my bed.

1021 – Peter MADSEN, Denmark – I am EHS.

1022 – Mary AMOUR, France – I myself am electrosensitive following a serious skull fracture in early childhood.

1023 – LD, France – I am concerned.

1024 – Cécile FONTAINES, France – I have a friend who is facing this very complicated problem to live with on a daily basis.

1025 – HD, France – We are exposed to too much "pollution" and precautions are needed before it is too late.

1026 – Brigitte REMY, France – I know highly sensitive people and their lives are difficult.

1027 – Michel RAMOS, France – I support all these people who are suffering.

1028 – DZ, Germany – I am personally concerned.

1029 – Michaels MERIS, Switzerland – I am sensitive to electromagnetic radiation.

1030 – AE, UK – I am electrosensitive and experience pain on public transport, around people with phones (in use or not, as they are always transmitting), in offices with WIFI, and almost every single cafe and restaurant, in city centers and shopping malls where exposure is very high, even in libraries where there is no respite from being blasted by microwave radiation. I am feeling sick and uncomfortable in most public places and feel white zones (spaces free of RF radiation) must be set up for those who suffer from this sensitivity/illness. Where in the world do we who suffer go when every single place is saturated in microwave frequency radiation? (I am electrosensitive and experience pain on public transport, near people with phones (whether in use or not, as they emit constantly), in offices with Wi-Fi, and in almost all cafes and restaurants, in city centers and shopping malls where exposure is very high, and even in libraries where there is no respite from microwave radiation. I feel ill and uncomfortable in most public places and believe that «white zones» (areas free from RF radiation) should be created for people with this sensitivity/condition. I have been in this situation for over 25 years, and the exposure limit is only increasing due to the number of servers and devices that require RF radiation frequencies to function (e.g., smart meters, water meters, home alarms, wireless baby monitors, Bluetooth speakers, security monitors for the elderly, smartwatches, pet trackers). companion animals, wildlife trackers).

1031 – CB, France – I'm okay with that.

1032 – ND, France – It is for a good cause, many people are receptive to this electromagnetic radiation.

1033 – AD, Romania – Radiation is death!

1034 – JP, Spain – Because I have some minor issues related to electromagnetic radiation.

1035 – Nilsson LOTTE, Denmark – It is possible to stop everything that is electromagnetic, but it is also a good thing for men and women.

1036 – Birgit SOUFIAOUI, Switzerland – Electromagnetic radiation is a danger to all living beings.

1037 – Florence LEMONNIER, France – To advance research and treat electro-(hyper)sensitive people.

1038 – Stephane HERVE, France – I'm fed up with not being listened to, and furthermore, hospitals and other public places should be free of electromagnetic radiation.

1039 – JG, Belgium – For all people with EHS.

1040 – GE, Germany – Seit 16 Jahren leide ich unter hochfrequenter Strahlung einhergehend mit Herzrhythmusstörungen, Schlaflosigkeit, Konzentrationsschwierigkeiten und mit körperlichen Schmerzen, obwohl ich immer Technikfreundlich eingestellt war und nie damit gerechnet hätte, mal Betroffene in the breast. It's important to have a huge number of consumers and consumers who don't know how to use the Smartmeter. You can also use the remote control and Smartmeter. Body damage to my nervous system, also on buses and trains, which I cannot use. (For 16 years, I have suffered from high-frequency radiation accompanied by heart rhythm disturbances, insomnia, difficulty concentrating, and physical pain, although I have always been in favor of technology and never expected to be affected. I had to insulate my apartment at great expense, and now I have received government-mandated smart meters. During my next move, I will again have to undergo costly shielding and use smart meters again. I cannot take the bus or train.)

1041 – YE, France – I am hyper-electrosensitive and to avoid a serious health risk to the entire world population.

1042 – WS, Germany – I am personally concerned.

1043 – DL, Belgium – I stand in solidarity.

1044 – MG, Italy – I am electrosensitive.

1045 – Brigitte DELGRANGE, France – A friend had to move because of her hypersensitivity to electromagnetic radiation.

1046 – JD, Belgium – The right area is in the witty zone where it is important to know that it is located in the zone in the future and it is also possible to use the funds you have purchased. (They have the right to a white area to live a little more healthily, but they can no longer practice their profession as before, with all the financial consequences that entails.)

1047 – MT, France – For all those who are electro-hypersensitive.

1048 – DC, France – I am sensitive to electromagnetic radiation.

1049 – Alain COLLOMB, France – Doctor, I have received patients suffering from these emerging environmental "disruptions".

1050 – Anke KERN, Germany – olitician, no one has the right to deprive another human being of their right to a long, fulfilling and healthy life!

1051 – BT, France – Following my oropharyngeal cancer, I would like associations to help me succeed in my health project for health professionals and cancer patients.

1052 – Florence COUDERC, France – I am myself EHS.

1053 – Régine OBOUSSIER, France – I am not severely electro-hypersensitive, but I still cannot work. I want to support electro-hypersensitive people.

1054 – VM, France – I am EHS.

1055 – Christian CHEVALARIAS, France – I am EHS/MCS in the Combéranche region (department 24), and I know people with electromagnetic hypersensitivity who are living a nightmare in France. Thank you for helping us make our voices heard.

1056 – CL, France – We are all different.

1057 – CK, USA – People need to know the truth.

1058 – IJ, France – I sign because it is important to safeguard all living things! Artificial OEMs are harmful to living things; for example: 3G and bees, it is not just pesticides that disturb them.

1059 – Jesper RASSMUSSEN, Denmark – I too have EHS.

1060 – Henrik EIRIKSSON, Denmark – There needs to be at least informed consent regarding whether one wants to be exposed to RF/EMF. If populations were properly informed , there would be no sales of wireless equipment.

1061- Ariane LEVITAN, Israel – For all the harm done to the populations, the results of which are numerous and diverse, on all levels, especially on the neurological level.

1062 – PC, Australia – I am affected – I have tinnitus.

1063 – Antonio GAGLIARDI, Italy – I have been studying this problem for 39 years.

1064 – Niklaus POLT, Switzerland – Ich engagiere mich generell gegen einen unvernünftigen Ausbau der Mobiltelefonie.I am generally opposed to the unreasonable development of mobile telephony.

1065 – CR, Denmark – It is important to stand together to make the authorities listen to the people! More and more people are suffering from being exposed to Wi-Fi, so we need precautionary policies.

1066 PR, Australia – I suffer from EHS..

1067 – Michael UNTERWALDEN, Germany – I myself suffer from EHS and MCS. At the Freiburg im Breisgau-Rieselfeld high school, where I attended from 1999/2000, two mobile phone antennas were installed on the school roof. Because of this, the antennas and mobile phones of other students, who unfortunately also used them in class, and also because of the DECT and Wi-Fi base stations of our neighbors in the 7-apartment building where we live, caused problems. Of course, I also want to help all other people suffering from EHS by making this appeal! Moreover, mobile telephony is fundamentally harmful to people, animals, and the environment!

1068 – Martina UNTERWALDEN, Germany – All people, animals, and the environment as a whole must be protected from the harmful radiation of mobile phones, and in particular those affected by electromagnetic hypersensitivity (EHS)! Furthermore, my son suffers from EHS, and my health has also deteriorated due to mobile phone radiation. Our landlord is also suing us because we refuse to have radio wave-based monitoring devices installed. If the court rules against us, it will be very serious for us!

1069 – KB, Switzerland – I made the connection between my ailments and non-ionizing microwaves in 2019, thanks to a chance encounter with the secretary of ARRA (Association

Romande contre le Rayonnement Artificiel – French-speaking Swiss Association Against Artificial Radiation). When I'm in a low-emission zone, everything is much better... And I have many testimonials to that effect...

1070 – VT, France – For ages, this electricity has contributed to corrupting souls and human beings. Numerous complaints. When it's over, we'll see the reality of a harmonious life. Electro-hypersensitive.

1071 – ΒΑΣΙΛΗΣ ΑΝΑΣΤΑΣΟΠΟΥΛΟΣ, Greece – People and animals become ill in an inhospitable environment due to increased electromagnetic pollution.

1072 – Dominique ROY, France – Having suffered from EHS for about twelve years, I am president of the Z'Ondes association, which we created in Tours, Indre-et-Loire. The association raises awareness about the impact of artificial electromagnetic radiation on living organisms, supports EHS sufferers in the Centre-Val de Loire region, and tries to educate politicians about this dramatic public health issue. It's very difficult because «the subject isn't appealing» to politicians and can alienate voters who favor technological progress and deny this health problem. Until the day they are personally affected? We fervently hope for a cross-party law in France to recognize this debilitating environmental illness, but also at the European level, because Europe must be a pioneer in this fight to save the biodiversity of which we are a part. (...) This petition will be a powerful tool to defend our cause because EHS is devastating the lives of millions of people worldwide. Thank you for gathering our testimonies, because there is strength in unity!

1073 – CV, Netherlands

1074 – JP, France – I am sensitive to electromagnetic radiation, having tinnitus and I am meeting more and more people who are very disturbed by electromagnetic radiation («Linky» smart meter ... with radiofrequency radiation from 35 Khz to 90Khz and maybe more).

1075 – PD, Switzerland – Life bursts forth like a geyser for those who pierce the rock of inertia, said Alexis Carrel.

1076 – Thierry COQUET, France – Electromagnetic radiation is the greatest calamity for the living world.

1077 – MT, France – I am EHS and my life has been hell for 3 years.

1078 – SK, Nederland – Artificial electric fields are outrageously unhealthy for all living beings and nature, which is evident if one reads the studies and experiments that have not been (in) directly financed by economic actors in the implementation of wireless mobile phone networks.

1079 – Francis LEBOUTTE, Belgium – I don't have EHS (electromagnetic hypersensitivity), but I wouldn't want it to happen to me or my loved ones overnight, as is already the case for about 5% of the population. Although I have a degree in civil engineering and computer science, I don't own a smartphone, only a basic cell phone that's always switched off and is only used in emergencies. Obviously, I don't have Wi-Fi at home. And I avoid the most polluted areas, like public transport during rush hour, packed with zombies glued to their smartphones.

1080 – Brigitte TURLIN, France – I am severely electro-hypersensitive and my condition is worsening, and if I have to move, I don't know where to go.

1081 – Renate LINDEMAN, Canada – Our family experienced being sick when we were vacationing in an area with excessive exposure to EMF's. Our apartment was literally surrounded by three cell towers at our top level. After one week, we fell ill hours after one another. After the vacation, and once recovered from the extreme fatigue that persisted for several weeks, I started researching the harms and dangers of 24/7 exposure to this invisible toxin. I also started noticing trees in my nearby town, that are in a direct line to cell-towers are losing their crown and starting dying. Cell towers, and dying trees can often be found closely to hospitals and schools. Why on earth are we exposing the most vulnerable people in society to potentially harmful technology? This needs to stop immediately as consequences are not fully understood. People are more important than unchecked technology and money.

1082 – BB, Nederland – I have been sick from radiation for years.

1083 – EF, Ireland – Both myself and my family members have been affected by EMFs. Two of my family members are extremely EMF sensitive and have had to attend emergency room visits on occasion. We know it's an invisible, silent killer and a danger to health and life.

1084 – Marie-Thérèse MARTIN, France – I am a doctor and I am aware of the dangers of electromagnetic radiation on the health of mitochondria in particular, which explains the various diseases that subsequently appear under their deleterious influence on public health.

1085 – Evy ROUQUE – France – I am EHS.

1086 – Jolanda VANDERBERG, Nederland – I live in a camper van because of the radiation and I can't find suitable accommodation. ... I've done some research on radiation. Conclusion: the government takes measures in the wrong place at the wrong time, then verifies them with an incorrect exposure limit. All the dangers are deliberately concealed. Next week, the report will be published as a book under the title «Uncontrolled Irradiation.»

1087 – BD, Nederland – A friend of mine's life is limited by this situation.

1088 – MR, Nederland – My best friend has EHS.

1089 – KV, Nederland – A relative of mine is very limited in her daily life due to EHS.

1090 – MK, Nederland – I already suffer from radiation myself.

1091 – AD, Nederland – My daughter and I both have EHS.

1092 – Béatrice MILIBERT, France – I see the suffering of EHS patients every day.

1093 – CV, Nederland – I am hypersensitive to radiation and magnetism.

1094 – EV, Nederland – This is a very serious form of disability. Always avoid a radiation-free environment.

1095 – Kees VAN LEEUWEN, Nederland – I know about the effects of electromagnetic radiation.

1096 – SV, Nederland – I am EHS...

1097 – Celine CHRETIEN, Canada – I am also affected by EMFs .

1098 – EM, Nederland – I notice that my state of health is seriously deteriorating.

1099 – JF, Belgium – My mother is electro-hypersensitive, and I know others who are. I stand in solidarity with those who are EHS (Electro-Hypersensitive), and I hope that everyone can live with dignity and that the deployment of electromagnetic radiation through human technologies does not come at the expense of the health and lives of a portion of the population.

1100 – Kat Showers, Canada – Since 2015, my professional life has been blocked because my body cannot tolerate increasing levels of EMF emissions. I stay in the house and wear protective clothing. This is the life of a prisoner, not an active academic.

1101 – MH, Nederland – Brainfog caused by Wifi radiation from 9 surrounding apartments into my apartment, among other things.

1102 – IH, Netherlands – I agree with all the arguments and facts mentioned above! It's impossible to stay healthy with all the artificial electromagnetic fields surrounding us. Even on our own land/in our own garden! It's unimaginable that 11 million people in the Netherlands suffer from chronic illness with mostly unexplained disorders and that nothing is being done about prevention.

1103 – Marie-Claude COMBI, France – I am myself electro-hypersensitive.

1104 – Carl BLANCHARD, Canada – I've been fighting for 10 years in Quebec, Canada, for us to be recognized and for the disinformation to stop. All the scientific evidence is there. 46,000 scientific publications, and some dare to say there isn't enough evidence... (...) Give me a break... It's the corporations that don't want the public to know (...)... Period.

1105 – CW, UK – I suffer badly now from exposure to EMFs and I don't want other people's health and lives to be affected in the same way that mine has been and is now. Probably too late for me (I'm almost 80), but not for others!

1106 – Dora LEHMANN, Switzerland – If we continue to attack our planet with electromagnetic radiation, not only from rooftops but also with the tens of thousands of satellites stationed in orbit, all life on Earth will disappear, and quickly.

1107 – Danièle SERVIEN, France – I have become electrosensitive, and have been on sick leave for 3 months.

1108 – IA, France – Diagnosed in 2014, following masked exposure to a wifi transmitter located less than 2 meters away, followed by dizziness, pain, insomnia, tinnitus, exhaustion, dysfunction of the nervous, circulatory, skeletal systems etc., disability, social exclusion, forced isolation and confinement, lack of suitable housing and compensatory benefits.

1109 – Isabelle LANGEVIN, France – I am electrohypersensitive to radiation and it is urgent to act for all EHS sufferers.

1110 – AL, France – I have been electro-sensitive since November 2020. Looking for white zones to rest my system.

1111 – EB, Belgium – People dear to me are suffering because of it.

1112 – Blanca SALINAS ALVAREZ, Spain – I am an environmental refugee because of my electrosensitivity. I had to leave my home. I lost 20 years of my life. I unknowingly lived in front of a cell phone tower. I gradually lost my physical and cognitive health until I became disabled. I was diagnosed with fibromyalgia, chronic fatigue syndrome, a cellular problem (coenzyme Q10 deficiency), and multiple chemical sensitivity. I was told these were chronic and incurable illnesses. It was only when I was diagnosed with electromagnetic sensitivity and avoided electromagnetic pollution that I regained my health. The first 5G antenna in Spain was installed in front of my house. That's when I decided to abandon it. Enough of this human rights violation.

1113 – Dora LEHMANN, Switzerland – If we continue to attack our planet with electromagnetic radiation, not only from rooftops but also with the tens of thousands of satellites stationed in orbit, all life on Earth will disappear, and quickly.

1114 – Dorethe OLSEN, Denmark – I sign because this is a fight for all living beings on earth: plants, animals, and humans.

1115 – Rena MIRZOEFF, Israel – I suffer intensely from the effects of EMF and know that everyone is affected regardless of their level of «sensitivity» or lack thereof.

1116 – CL, Canada – The urgency of people in need...it is far from being a sect as some people think.

1117 – PG, France – 'I have bilateral presbycusis with sudden neurosensory loss and I am fitted with hearing aids.

1118 – Leooldo YOLDI ENRIQUEZ, Spain – I am very aware of the problem and I know it very well. I am the husband of a person with EHS. We lived for 25 years in front of a mobile phone antenna without knowing it. Our health has suffered greatly. We had to leave our home. The laws do not protect us.

1119 – Giles KERLOC'H, France – My friend is suffering from it.

1120 – JV., Nederland – My husband and I are very embarrassed.

1121 – Paul PASQUIER, France – Potentially all affected by this scourge!

1122 – Jennifer PRIDE, UK – I suffer from all types of radiation.

1123 – Kathya HEPPELL, Canada – I completely agree with all the demands of this appeal. I developed EHS (Electromagnetic Hypersensitivity) because of military radar... my life, and the lives of people I know who suffer from this "allergy" to electromagnetic radiation, are becoming increasingly difficult. The widespread denial by elected officials, healthcare professionals, industrialists, engineers, citizens... etc., must stop immediately! The precautionary principle and ALARA (Alternative Liability for Asylum Seekers) must be implemented so that we can finally live in freedom again!!! Thank you for this wonderful initiative!

1124 – SM, Belgium – I am electro-hypersensitive. Joking aside. Because being «under house arrest» is unacceptable. For those lucky enough to have found a place somewhat more protected from electromagnetic radiation and to only go out under certain conditions, it's unworthy of a so-called rule-of-law state. And for those who aren't so lucky, who don't have a place more protected from electromagnetic radiation, it's torture, unworthy of so-called democratic countries.

1125 – Christian AUBERT, France – I have been EHS for 5 years.

1126 – JN, Nederland – This is a serious issue that needs to be resolved quickly.

1127 – Madeleine VAN GEMERT, Nederland – I'm all for good health.

1128 – NN, Luxembourg – I find it very dangerous for our health, as there are consequences of artificial electromagnetic radiation on all living things...

1129 – Judith JOBSE, Nederland – I am electrosensitive and I think it is important that this is recognized and that people are made aware of the risks of electromagnetic fields.

1130 – JG, UK – Because I'm suffering

1131 – NB, France – It's important to do this and to provide support to the sick. Just because it's rare doesn't mean it doesn't exist.

1132 – Marc LAURENT, France – Out of solidarity and understanding of this problem.

1133 – CD, A member of my family is EHS.

1134 – TK, Nederland – I don't think radiation is good for humans and animals.

1135 – IL, France – I feel concerned.

1136 – C, I, Luxembourg

1137 – Dingeman DE VISSER, Nederland – I am an extreme victim of these artificial devices (...)

1138 – Elisabeth MADSEN, Germany – For about 12 years I have been suffering more and more from electrical smog and I can hardly participate in social life: outside the transmitter stations are being upgraded, increasingly with 5G, in the apartments everything is connected and almost no one can no longer cut off your wifi (For me, because then the phone, the alarm system, the television and other things stop working...

1139 – Georges SORAIS, France – Industrial and state denial is unbearable!

1140 – MR, France – I am myself electrosensitive.

1141 – Daniel SCHWARTZ, Germany – I myself have noticed that non-irradiated areas are more comfortable.

1142 – PC, Taiwan – This is an issue that deserves attention.

1143 – Sandrine HOUSSAT-SALLE, France – This is a public health issue.

1144 – LR, Canada – My daughter and I are both electromagnetically sensitive and we are confined to our home in the countryside, but there is more and more encroachment of cell towers, and I fear losing the last ability to maintain my job, livelihood and health. I have friends and acquaintances who no longer have any safe place to live without emfs, and have no access to food, water and sanitation and are slowly dying with horrible symptoms. And all the while, governments refuse the medical studies showing harm, and promote big business at the expense of citizens lives, and citizens are so addicted to their devices they can no longer give up their devices and would prefer to kill people, animals, birds, and cause acceleration of global warming through microwaving the environment, and causing extreme weather events than stopping using their devices. It is so easy to use wired devices, ethernet cables, and wired phones, that can do everything necessary, but for a little bit of "convenience" people are willing to destroy the environment, ecosystems, and make the earth too hot for people to survive, while killing their fellow citizens! They close their eyes and ears and minds to the truth.

1145 – CS, Netherlands – I have serious EHS health problems since October 2019. I experience heart rhythm problems, a sensation of electric shock, dizziness, etc. Also at night, resulting in poor sleep.

1146 – DB, USA – I have been overexposed to EMFs and I suffer from EMF Sensitivity Illness.

1147 – Benoite VIDALI, Luxembourg – This is a real problem! It's high time we acknowledged it!

1148 – RV, Nederland – I am concerned about the constant progression of digitalization without taking into account the health risks linked to radiation. I find any coercion with regard to so-called "smart bullshit" unacceptable and undemocratic.

1149 – Jean GAGNON, Canada – I sign the appeal in support of people impacted by the consequences of EMFs (artificial electromagnetic fields) on living beings. I am also signing to denounce a little-known problem with electrical distribution. Here in North America, the residential electrical distribution infrastructure is poorly understood, especially here in Quebec, since our main electricity provider obtained approval from the energy board in 2007 to deviate from industry standards, thus authorizing electrical and/or electromagnetic pollution (dirty electricity) throughout the distribution network, right into our homes and into our soil, which acts like an electrical sponge. I apologize for the ignorance of the designers and/or managers who turn a blind eye to this monumental error, which generates astronomical costs for our healthcare systems and for future generations. A little awareness can make all the difference.

1150 – MB, France – I am EHS. The impact is becoming increasingly significant for me.

1151 – RD, Belgium – I find this necessary.

1152 – CB, France – This must be hell in our world.

1153 – MB, France – I am EHS. The impact is becoming increasingly significant for me.

1154 – Regina HÜTTINGER, Germany – I am personally affected and I know many people who are mildly or extremely affected.

1155 – Amandine PETA, France – I have been electrohypersensitive for almost 10 years. Seven years ago, a doctor diagnosed me with EHS after testing. Since then, I raise awareness whenever the opportunity arises.

1156 – JH, France – I know the hell that electrohypersensitive people go through.

1157 – SF, Luxembourg – To support the cause in question and because of the harmfulness of these antennas to humans and nature.

1158 – JL, Because I am EHS.

1159 – Jeanne SCHOSSELER, Luxembourg – I agree with the petition.

1160 – MV, Belgium – I myself am sensitive to radiation and therefore have health problems.

1161 – KB, Czech Republic – I am against the general and constant increase in exposure in urban areas. There are fewer and fewer places free from RF-EMF exposure. I also oppose the mandatory deployment of smart meters and the expansion of operator antennas, which is completely incompatible with a human being living in an environment that should promote their health and well-being.

1162 – Sophie LEBREC, France – Electro sensitive.

1163 – MF, Nederland – It is quite true that almost all the sick people I know have been in distress and/or great distress for years, because they are cut off from everything. Family and romantic relationships have broken down, they have lost their jobs and can no longer participate in social life and are often financially poor, without money to build another life elsewhere, abroad if necessary (because you need money for that too). (Because you need money for that too). I can identify with this situation myself, so....

1164 – ED, Nederland – It seems to me that I have no future myself because of the ever-increasing radiation.

1165 – Laurence DUPONT, Belgium – I am against 5G and I would like us to talk about it more.

1166 – Anita MEGERLE, Germany – High exposure to artificially generated EMFs (electromagnetic fields) should be as low as possible. Indeed, natural EMFs from microwaves, at 0.25 microwatts per square meter, are millions of times lower than the limit value. I consider this an attack on the natural foundations of life and on personal physical integrity. I want to be able to decide for myself the dangers to which I am willing to expose myself.

1167 – Fatiha AHITA, Belgium – I am electrosensitive and this ray grid imposed everywhere is unhealthy to sickening for everyone. Acknowledgment of electrosensitivity, I am tired of being considered crazy when I talk about it while I am literally being cooked alive over low heat. Stop – give us back our natural environment organic!

1168 – LM, France – Friends are severely disabled.

1669 – DB, France – I am EHS and chemically sensitive.

1670 – LK, Nederland – The enormous amount of radiation to which we are exposed today is very dangerous for all life on this planet.

1171 – AK, Belgium – I'm also EHS.

1172 – FD, France – This is a public health scandal. I have EHS and I'm suffering a lot. I can no longer live in my Parisian apartment, which I own, because an antenna 48m away is irradiating me (14 V/m).

1173 – JB, Luxembourg – I have friends who are electrosensitive. And I see the suffering they endure.

1174 – VK, Belgium – I have become electro-hypersensitive, with symptoms and pain straight out of a science fiction novel. For over six years, I have suffered terribly, without a single day of respite. I have no choice but to move away to avoid being too affected. I have taken legal action to obtain financial assistance for protective equipment. But it's considered therapeutic equipment, and since there are electromagnetic radiation everywhere outside, they don't want us to feel better in a place where we live, where we can recover, and who knows, where we can work. In Belgium, there is no recognition. I always get the response that it's the EHS (Electromagnetic Hypersensitivity) who attribute it to SICEM (the Belgian Society for the Study of Electromagnetic Fields). Here in Belgium, we also can't have our sensations objectively verified with tests. And we are often told that we have a psychiatric illness. These people who say this are not doctors. This word is worthless, and besides, the psychiatrists told me I don't have any psychiatric illness. It's a long battle we're fighting, and we're easily excluded, as they acknowledge; even our families aren't affected by what we go through every day.

1175 – Jean SOLON, Belgium – In my opinion (I'm not electrosensitive, or at least I don't know...) it is scientifically proven that this exists and I also have no reason not to believe the people who say it. Why would all these people make this up?

1176J. B., Nederland – I experience physical problems due to mobile phone masts, such as headaches and nausea. I can no longer visit or live in certain cities. Before renting a vacation rental, I have to make a round trip to see if there are masts in the immediate vicinity. Usually, there are masts, and my trip/vacation has to be canceled.

1177 – MB, Luxembourg – I understand the risks associated with the use of 5g.

1178 – BR, Nederland – All transactions in this country are subject to negative charges by EMV.(My health, and therefore my life, has been seriously affected by EMFs.)

1179 – FG, France – This madness must stop completely; the destruction of humanity must stop. (...)

1180 – JW, Nederland – I have become very disabled since 2016. I can no longer go anywhere normally, which is serious!

1181 – Christine MARTIN, France – It is necessary to preserve the health of the population.

1182 – S. G, Belgium – Because absolute radiation, increase and expansion are no longer livable, it's already so serious!

1183 – SG, Belgium – I am very sensitive myself and had to survive in a camper van for two years. I was forced out of my own home by the installation of nine additional antennas on top of the three already there. I finally had to sell my beautiful house and pay for everything myself. It was supposed to be private! Why not sue these providers, the government, the EU... when there are apparently so many of us? (...)

1184 – Irene ubbink, Nederland – I agree with the content.

1185 – MP, France – I am Electrosensitive and on alert for humanity.

1186 – IF, Switzerland – I suffer greatly from electromagnetic pollution and receive no support for my self-employed business.

1187 – Micguel JAVI SALVADO, Spain – I have a family member who is electrosensitive.

1188 – SV, Netherlands – I suffer from EHS!

1189 – Anne BRESSARD, France – Being electrohypersensitive, I must join this petition. Good luck.

1190 – Claude BOURQUARD, Switzerland – Since 2019, I've been sleeping in a forest far from electromagnetic radiation to recharge after days of exposure! Without it, I certainly wouldn't be alive! How long will this continue? Who will be responsible for these problems? The local councils? The government? The telecom companies? Where are human rights in all of this?

1191 – PV, Nederland – Wireless applications are deployed without health impact studies having been carried out. The precautionary principle is not applied, even though numerous scientific studies already show that EMFs have harmful biological effects.

1192 – Nawel ABDELHAK, France – As someone with EHS-MCS, I am deeply affected by the very negative effects of electromagnetic fields on my health and on my entire life, which has ultimately become that of a near-recluse. Because electromagnetic pollution continues to worsen.

1193 – CV, Italy – This problem affects everyone.

1194 – GS, Canada – It has to be done!

1195 – Franj BAIER, Germany – I am personally affected and have health problems due to mobile phone radiation.

1196 – HO, Belgium – Because these people could live in peace without radiological pollution.

1197 – CD, France – I am electrosensitive.

1198 – Marie-Annick JOURDAN, France – I am EHS and I wish that EHS would be recognized and taken care of by doctors.

1199 – Roger BESSETTE, Canada – I agree.

1200 – Florence CHATAIN, France – Let's become aware of environmental pollution caused by human emissions of electromagnetic fields (electric current, wifi...)

1201 – DB, France – I am EHS and I suffer every day.

1202 – Inge-Willem NOORDERGRAAF, Netherlands – My partner already suffers from EHS to some extent, and with the already promising 'smart' city projects, 5G is coming everywhere, and I find this prospect very worrying. The radiation standards are so absurdly lax...

1203 – Sylvain CHARLIER, France – It is no longer possible to deny the obvious, to remain silent for some and not to hear for others.

1204 – IG, France – I am ehs.

1205 – Helene NOËL, France – I am ehs, I left Paris for the provinces (with husband and children) 10 years ago.

1206 – Jeanne LAURENT, France – Electrosensitive humans, it is also all living things that are concerned and that we want to protect! For a digital degrowth and a stop to the deployment of millimeter waves.

1207 – Sophie RICHARD, France – this lack of security is terrible.

1208 – Kim Martelle, Canada – The safety aspect has been completely ignored in industry marketing campaigns. This can no longer be how we achieve «progress. « There can be no «progress» where profits trump the health and vitality of our communities.

1209 – OG, Belgium – I am EHS and it has limited my life significantly.

1210 – MN, France – I know many people affected.

1210 – MN, France – I know many people affected.

1211 – CL, Canada – I am electrosensitive.

1212 – EK, France – The wavelengths used produce electromagnetic fields harmful to all life on Earth. It is a crime against the Earth, against humanity, that people who link their illness to this cause should be refugees on this Earth. There are wavelengths that are beneficial to health. I ask you to commit to this.

1213 – CT, France – I am concerned.

1214 – KS, Belgium – I feel concerned about electrohypersensitivity.

1215 – Giovanna BELLINI, Switzerland – So that the precautionary principle is respected.

1216 – NR, France – I suspect I am experiencing EHS symptoms.

1217 – RA, France – My daughter is electro-hypersensitive to electromagnetic radiation and can no longer live a normal life. She is forced to move and can no longer work.

1218 – Joël CHEMIN, France – I have been EHS since 2016.

1219 – AA, France – I am friends with two people with EHS and I know their daily lives.

1220 – Simone MICHIELSEN, Belgium – The effects of radiation in our living environment have already been the subject of extensive research, but the drawbacks are not disclosed; it is therefore urgent to publish them and to reduce radiation sources as much as possible.

1221 – FM, Switzerland – I myself have an intolerance to electromagnetic radiation and it is a real ordeal.

1222 – AB, Switzerland – Fed up with being treated like guinea pigs!

1223 – CS, France – I suffer from electrohypersensitivity and the consequences this has on various levels (health, relationships, social life, family, etc.)

1224 – Céline ROGER, Belgium – I am EHS.

1225 – HH, Belgium – I have over 35 symptoms and only function at 30% capacity due to EHS.

1226 – NW, Canada – I am on my deathbed and living without housing due to 5.

1227 – AL, France – I am moderately electrosensitive, but I stand in solidarity with those who are more severely so. The presence of an antenna 30 meters from my partner's house forced us to install a Faraday cage inside and to put up filtering screens on the most exposed walls. It comes at a cost.

1228 – CD, France – There are no more white zones... /telephone antennas. Wi-Fi is becoming widespread (computers sold without an Ethernet port, adapter not included, and no explanation from sellers and manufacturers), neighbors seem to think they have to use only Wi-Fi... no more wired connections. It's difficult to tell anyone to stop, regardless of their socioeconomic status, and Wi-Fi spreads at night because it's not turned off... hotels with Wi-Fi at night, hello sleep! Simple information (spots, etc., NF logo...) is needed for preventative purposes. It's becoming difficult to live normally because everything is becoming connected, Wi-Fi, etc.

1229 – BR, France – I have witnessed the devastating effect on sensitive individuals. More and more people will be affected if no further restrictions on allowed energy levels are applied to transmitters

1230 – PC, France – To support a friend.

1231 – FM, France – EHS is too little known and requires more studies and actions to protect us.

1232 – Xavier DESCALS PALOU, Spain – I have an EHS partner.

1233 – Olivier BODENMANN, Switzerland – I became an expert in electrosmog after my partner experienced EHS syndrome. Studies proving the EHS phenomenon exist but are not recognized. A shift in the consensus, as with cigarette smoke, is necessary and vital for the harmful effects of EM radiation on living beings to be acknowledged.

1234 – CF, Espagen – This is a serious violation of human rights.

1235 – JV, Nederland – My daughter is appalled.

1236 – CS, Switzerland – First burnout at 17. Chronic fatigue since 2010. Five years of medical uncertainty. Then suddenly, severe electromagnetic hypersensitivity (EHS) and also electromagnetic hypersensitivity. Almost all bodily systems are affected, with 24/7 pain and suffering, job loss, homelessness, and loss of partner. Ten years of confinement and social isolation. More and more e-smog everywhere. Every outing in public places results in inflammation lasting from several days to a month, depending on the level and duration of exposure. Low-radiation areas are disappearing – a sword of Damocles hanging over us. How long can the body and mind hold out? The trees, animals, insects, and plants are also increasingly unwell. A glaring lack of vitality is evident in everyone. How long can they suffer too? Take action! This is truly urgent!

1237 – RB, Canada – It is urgent to protect living beings from harmful electrical and/or electromagnetic wave emissions.

1238 – YP, Switzerland – I have known about this issue for a long time and I think that awareness in general and among leaders in particular is not up to the challenge.

1239 – Anne DAYDE, France – Since AZF Toulouse, 2001, My office being nearby..., I have tinnitus permanently which intensifies over the days and worries... which is unbearable.

1240 – MS, Canada – Mutual Aid.

1241 – CD, Belgium – So that white zones can flourish in all cities.

1242 – LL, France – I am electrosensitive.

1243 – NT, Canada – I've become electro-hypersensitive over the past few years, and the more time passes, the more I have to retreat to my home. Every outing, however long, causes short-, medium-, and long-term effects. Back pain, diarrhea, nausea, cramps, coughing, intense fatigue, brain fog, and an inability to concentrate or write for several days, etc. It's terrible. This has to stop!

1244 – Daniel LARREAU, Canada – Because I have been EHS since 2002.

1245 – Chantal BLANC, Switzerland – This is about the future health scandal.

1246 – Frédérique GARCIA, France – I am EHS.

1247 – CC, France – I am affected.

1248 – KB, Belgium – Balance can be urgently achieved, this time through common sense (power) and not through manipulation (power)

1249 – JJ, Belgium – I am electrosensitive myself and experience the harmful effects of electromagnetic radiation every day. As a biochemist, I am also familiar with the scientific research on the harmful effects of electromagnetic radiation, which is likely much more harmful than smoking, asbestos, particulate matter, or PFAS.

1250 – AV, France – My mother has been ill since the end of 2017.

1251 – Anne PAUMIER, France – We are all affected by electrosensitivity.

1252 – PG, France – My wife is electrosensitive.

1253 – VG, France – I am concerned about symptoms related to electromagnetic fields on a daily basis.

1254 – CL, Nederland – A very dear friend suffers greatly!

1255 – PR, France – I am electrosensitive.

1256 – MD, France – Victim (...) of microwave emissions in 2017

1257 – BM, France – I have been suffering from EHS for 7 years and my life is a living hell. I can no longer find accommodation.

1258 – AT, France – I am electrosensitive.

1259 – SD, France – I support people with electrohypersensitivity because it is a debilitating disease.

1260 – AB, France – I have been electrosensitive since 2020.

1261 – CG, Belgium – I am EHS.

1262 – Petra STETINA, Austria – Artificial radio frequencies and electromagnetic fields have a great influence on all biological life and I myself can feel the «pollution» of space.)

1263 – RP, Germany – ... I am concerned.

1264 – AF, Germany – I am personally affected by EHS.

1265 – BE, Germany – I am very electrosensitive and therefore fully support this petition.

1266 – Rosemarie FRANKE, Germany

1267 – FM, Luxembourg – EHS.

1268 – Isabelle JOURDAN, France – I am EHS and feel concerned by this indifference.

1269 – SR, Germany – For several years, I have reacted to increased exposure to Wi-Fi radiation, DECT phones, mobile phones, etc., with inflammation, edema, pain, and skin changes in my legs – sleep disturbances are also present in these cases. I consider it an unacceptable infringement on physical integrity that one's health should be affected, even in one's own home, by the ever-increasing exposure to external radiation. Personally, I only use a landline phone and a LAN cable instead of Wi-Fi.

1270 – Rainer RAPPMANN, Germany – I want to support electrohypersensitive people.

1270 – Rainer RAPPMANN, Germany – I want to support electrohypersensitive people.

1271 – CH, Germany - There is sufficient evidence of the negative effects of EMF on health. These facts must be finally fully recognized and taken into account for the sake of life.

1272 – Doris HENSINGER, Germany – Humans, animals, and plants urgently need a reduction in radiation exposure. New, health-friendly technologies exist and must finally be promoted and used.

1273 – MT, Germany – EHS is a growing threat to our health!

1274 – Klaud PEINELT-JORDAN, Germany – This concerns everyone.

1275 – Laurence LEGAUD, France – I am electro-hypersensitive.

1276 – Geoffrey JEANNEAU, France – Since the installation and activation of the 5G antennas, I've been sleeping very poorly, I've had two cancers, acute kidney failure, and pericarditis. The medical community doesn't see a causal link because, according to the WHO, the standards are being met. Instinctively, I know these antennas are harmful. Approaching one of them gives me a headache, nausea, and a burning sensation. But everything's normal!? Move along, nothing to see here.

1277 – BS, Germany – It is vital for the survival of humanity.

1278 – JK, Germany – I am concerned.

1279 – HR, Germany – I have been interested in biophysical effects for about 25 years.

1280 – Stefan KREFT, Germany – Because (presumed) minorities must be protected.

1281 – VQ, Switzerland – I have been EHS since 2021.

1282 – IL, Austria – EHS have the right to live in good health.

1283 – EL, Germany – I see nature/all living things on the entire planet in danger due to the omnipresence of high levels of artificial radiation.

1284 – MP, France – EM radiation bother me and I support people who are truly handicapped by them.

1285 – Sophie COQUET, France – I have been electrohypersensitive since 2010 and I can no longer have a normal social life. It's depressing!

1286 – Antoine RICHARD, France – I know several people who suffer from electromagnetic hypersensitivity. Some of them survive in extreme conditions, no longer having access to healthcare, ordinary housing, culture, and other social connections. And this is not their choice, but the consequence of the lack of recognition of the effects of exposure to electromagnetic pollution.

1287 – Franck PACHER, France – It's a matter of public health.

1288 – Heide BERNDT, Germany

1289 – Franz-Bernard ROLINCK, Germany – I myself am electro-hypersensitive and I have already changed residence for this reason. My health is fragile because of my electrosensitivity.)

1290 – EC, France – I was EHS for a few months, briefly MCS, then electrosensitive for 8-10 years, I am now electro "conscious" and I do not live in the direct beam of a relay antenna.

1291 – Colette MORETTI, France – Because we are all electrosensitive, certainly to different degrees and more or less conscious.

1292 – Renate RACHBAUER, Austria – I am electro-hypersensitive and, after exposure to mobile phone radiation, I suffer from severe headaches and toothaches that last for several days. In addition, these pulsed, high-frequency radiations prevent me from sleeping. All areas of my life that I greatly enjoyed before the introduction of mobile phones are now extremely restricted or impossible: going to the theater, the cinema, concerts, using public transportation, traveling, gatherings, etc. As soon as I leave the house to go into the garden, I need protective equipment: a balaclava, a scarf, protective underwear, etc. In addition to the pain caused by the radiation, the financial burden of protective textiles is quite high.

1293 – Marie MAY, France – We are all EHS, whether consciously aware of it or not!

1294 – I am myself electrosensitive and I wish things would change.

1295 – Ursula HARTMANN, Germany – I myself suffer from mobile telephony and my entire life has been turned upside down. What worries me most is that electrohypersensitive people cannot be hospitalized in any hospital.

1296 – ET, France – I am witnessing many cases of EHS around me.

1297 – Françoise VURLOD, Switzerland – It is essential to address this public health problem.

1298 – AM, France – My son and I suffer from electromagnetic hypersensitivity (EHS) due to exposure to two cell towers 200 meters from our former home, at the same elevation. And we're spending our fourth winter in our car...

1299 – Marja ALDERS, Netherlands – I suffered from EHS due to 5g.

1300 – Jürgen ROESNER, Germany – It is urgent that the public become aware of the harmfulness of EMF pollution! And politicians are urgently called upon to respect their oath to avoid any harm to the German people – this goes for all governments around the world!

1301 – MM, France – I have been electrosensitive since 2019 and I have been living a nightmare for 6 years now. I would like the suffering and pain we feel to be taken into account, as well as the harm caused by the mockery we are subjected to and the indifference of everyone. Please make the state take into account our condition, which is unjust because it is not of our own making, and help us in our difficult daily lives.

1302 – RL, Germany – The political statements on the topic of radiation are not scientific and are not properly discussed by independent «experts».

1303 – CS, Germany – We need a "turning point" – limit values must be lowered and people and the environment must be protected!

1304 – Brigitte CAMBIER, France – I am against «Linky» smart meter and in solidarity.

1305 – Gabriele ERTI, Germany – Everything mentioned in your article must be taken seriously and investigated, because the situation is constantly getting worse. Unfortunately, the lobbyists and the WEF are completely uninterested.

1306 – IS, Germany – Extremely high radiation levels (e.g. in DE) are unnecessary and irresponsible for the normal functions of communication devices, but lead to serious damage to all living things, including plants, see dieback of trees. At the moment we only see the tip of the iceberg, and it is already devastating.

1307 – Norbert HETZKE, Germany – We have been fighting ourselves since 2020 against a radio tower in Maukendorf.

1308 – Uta WAGNER, Germany – Because I am personally affected and react strongly, with heart palpitations and insomnia.

1309 – Raynald HUARD, France – I myself suffer from EHS (electromagnetic hypersensitivity) and Lyme disease, which amounts to the same thing. The genetically modified Borrelia burgdorferi bacterium cannot tolerate artificial pollution from high-frequency pulsed microwaves. A Swiss biologist demonstrated this in the laboratory a long time ago.

1310 – MR, Canada – I am electrosensitive and this is extremely painful, at some point you have to be heard, this suffering is unbearable, it's torture.

1311 – AH, Switzerland – I myself am affected by EHS .

1312 – CM, France – I have friends with EHS and I know what an ordeal they go through.

1313 – Lydie PERON, France – Out of solidarity with the people who suffer from it and who are marginalized by our lifestyle and consumption choices.

1314 – Andrea SIMON, Germany – I am also sensitive to electromagnetic radiation.

1315 – EK, Germany – My wife and I are suffering from mobile phone radiation.

1316 – Barbara DOMBERGER, Germany

1317 – LW, Switzerland – Because I am EHS and MCS.

1318 – SP, France –: I myself suffer from electromagnetic hypersensitivity (EHS) and am in roughly the same situation as Philippe Tribaudeau. They activated a large antenna near (1.9 km) my refuge in a white zone (area with no electromagnetic fields), and in the last two years, I've physically aged 20 years. My migraines are recurring and increasingly frequent with each exposure (I have to leave my caravan for more than 5 minutes wearing protective clothing!). The life I loved is becoming completely unbearable in this French gulag. If there's a heatwave this summer, I have a high «chance» of dying, and I'll be told I'm a victim of the heatwave, when in reality I'll be slowly killed by forced radiation. This is despite the fact that EHS made me allergic to electromagnetic fields in 2015, and I had managed to survive in various white zones that were gradually being eliminated (I've already moved or escaped four times). (...) I am desperately searching, along with other people with electromagnetic hypersensitivity (EHS), for an isolated farm with a few hectares in a valley in western France, in a permanently unaffected area (Loire-Atlantique or Ille-et-Vilaine department), for a pilot project: an organic, eco-friendly settlement to rescue innocent victims of this state terrorism. Please send your proposals to AZB, who will forward them to me by mail.

1319 – RP, Germany – Both the number of people affected and their distress and exposure to radiation continue to increase.

1320 – Margot SCHIEßL, Germany – I myself have been involved for 20 years and my husband, our granddaughter, our son-in-law and our daughter have also been part of this group for 2 years.

1321 – CS, Spain – Environmental disability is everyone's problem, not just that of the people affected and their families. Those who have not experienced it firsthand should be aware that the well-being of these individuals depends primarily on their own daily habits (those of people who are not affected).

A wired Internet connection at home prevents a humanitarian catastrophe at a neighbor's house. Conscientious coworkers make the difference between being able to work and earn a living—or not—and between becoming dependent or remaining independent. The reasonable accommodations or adjustments necessary for a person with a disability and their family to lead a dignified, high-quality life—independently and as active members of the community—are an exercise in rationality, responsibility, and solidarity with those who are vulnerable, as well as a commitment to non-discrimination and equal opportunity. But they are also an investment in physical and social health and in the economic sustainability of future generations, for when a growing segment of the population finds no safe haven anywhere and cannot access or obtain basic services, it ceases to be a private problem and becomes a public one.

1322 – Amal AKHZOUZ, France – I am electrosensitive.

1323 – ML, Luxembourg – I would be happy to return to a more serene life and a healthier environment, far from all forms of pollution.

1324 – Suzanne FISCHER, Germany – I have been sensitive to electrosmog myself for many years.

1325 – FF, Germany – My daughter is EHS.

1326 – Marie THEBAUD, France – I am EHS (Electromagnetic Hypersensitivity), others around me are too, but to a lesser extent. I hope that future generations will be protected by more appropriate standards.

1327 – GK, Austria – I want a healthy environment for our children.

1328 – Karin VOGLER, Germany – Unfortunately, people with EHS and MCS in Germany are often not taken seriously and do not receive adequate—yet urgently needed—medical treatment; instead, at best, they are dismissed as having psychological issues, even though these conditions are environmentally caused and not primarily psychological!

1329 – MA, France – I am appalled to see that serious scientific research is being disregarded by allowing living beings to be exposed to all kinds of pollution.

1330 – PM, France – Electric.

1331 – Nicolas SIMON, France – I also suffer from electrohypersensitivity (EHS) and I suffer enormously from it, my father in 2016-17 also suffered enormously from it, he died some time after months in psychiatry, I am disgusted and outraged.

1332 – Johannes MAYER, Germany – I have had EHS for 22 years and I wish for better living conditions for everyone. Many people affected by EHS are desperate. The EHS family suffers. Please, let's be careful despite all the problems. Only people with great empathy can understand our problem. We should give those around us the opportunity to understand the problem. Thank you to everyone who reads my words. I wish us all success.

1333 – Nelly DASTUGUES, France – I am medically diagnosed as Electrosensitive and also a highly sensitive person, so this subject is very important to me. I am looking for a place in a low-emission zone where I can move and finally live peacefully and healthily.

1334 – MD, Germany – I myself suffer from extreme pain, headaches, dizziness, sleep disturbances, and restlessness when connected to a Bluetooth wireless network. I haven't been able to go to Austria for 2 to 3 months! 10% more radiation than before, I can no longer participate in life because everything is irradiated everywhere.

1335 – SF, Germany – For 35 years (since the introduction of mobile phones in Germany), I have suffered physically from this radiation. I lost my well-paid job and very good income at 42 after a complete collapse. I fought for nine years in court to obtain a pension. I only survived this period thanks to my substantial savings, which I used up entirely. I have moved several times due to the construction of new cell towers. Since 1991, I have no longer participated in a normal social life. I live a very secluded life, primarily in an analog way, without a mobile phone, GPS, or tablet. I work on a wired PC. Every day I am happy and grateful to still be alive. The fact that people with EHS are discriminated against by doctors, experts, politicians, authorities, and even within their own families and private circles as «a case for the psychiatrist» is, in my opinion, arrogance/ignorance on the part of the ignorant. That the most vulnerable in our society (children, That the sick and elderly are sacrificed for ideology and profit is, in my opinion, a crime against humanity. Mobile telephony is, in my view, a biological weapon that destroys all living beings, water, the Earth's atmosphere, and harms the environment. Humanity, the animal kingdom, nature, the Earth, the cosmos... must be sacrificed to the energy thirst of this technology and the greed of its operators. Bleeding ourselves dry – as in a war! Despite everything, I firmly believe there will be a solution to what is, in my opinion, an act of terrorism against all living things! Yes, I am deeply convinced of it!!!

1336 – Florence COUDERC, France – I am EHS.

1337 – Ulrich BEYER, Germany – Just the DECT radiation emitted by cordless phones causes me physical pain!

1338 – Isabelle TAITT, France – Because I am electro-hypersensitive and I think that digital technology in all its forms puts us in a state of physical, mental and moral submission.

1339 – Janine DIEDRICH, Germany – My friend suffers from it.

1340 – NM, France – I am a healthcare professional and I am aware that I am completely misinformed on this subject of environmental medicine and on the care to be given to patients.

1341 – EB, Belgium – I suffer from electrosensitivity and hyperacusis, which make my life a living hell, and I see that everything that is overexposed is sick, plants and animals included, of course.

1342 – Gisèle MENIERE, France – I sign this for my sister who is EHS and therefore has neither a mobile phone nor a computer.

1343 – Yvonne Reinert, France – I can no longer be around people with mobile phones. I cannot be around many devices emitting different signal signatures. I wish for a life of peace and happiness. I also see that nature is slowly dying in this country.

1344 – Beatrix SPRINGER, Germany – We are all electrosensitive. More and more people are getting sick, some know they are sick because of EMF, many never realize it. We need protected zones and places we can go. Medical facilities and places to live and work must be made available for electrosensitive people.

1345 – Lucienne COUTANCEAU, France – Life is becoming increasingly difficult, even for those who have found refuge and are struggling to survive because the electromagnetic radiation is everywhere: in hospitals, shops, public places, and on public transport.

1346 – Audrey BERLOT, France – I have electrosensitive people around me.

1347 – AD, France – I am EHS and I am thinking of all those who are also or will become so.

1348 – ML, France – I am electrosensitive.

1349 – Reinhard LOHMANN, Germany – I sign because I personally know some EHS sufferers and I know what this entails. Furthermore, I find it frightening how the economy and politics initially denied the issue and are now acting by downplaying it after the numerous studies that demonstrate the dangers.

1350 – CP, France – Sick from electromagnetic radiation.

1351 – BL, France – This is a health emergency.

1352 – Blandine SOUBEYRE, France – EHS and MCS, the impact is debilitating and daily life is barely tolerable. I have been searching for decent housing compatible with my health condition and limited resources for 6 years... in vain.

1353 – CP, France – I am very concerned about the issues of electromagnetic sensitivities.

1354 – Michel THIBAULT, France – Because I know several serious cases of electromagnetic hypersensitivity and it is a matter of justice and fundamental rights for these people.

1355 – Catherine LARVOR, France – I have a friend who is affected.

1356 – René SEBEK, France – The creation of white zones in each department is necessary.

1357 – Emmanuelle CAILLE, France – I am also EHS/MCS

1358 – YL, France – Important.

1359 – CH, France – I am EHS

1360 – Mélanie PARADIS, Canada – It is urgent to apply the precautionary principle and save life on planet Earth. Pollution of all kinds (including radio frequencies and artificial electromagnetic fields) must be stopped, and then the damage caused must be repaired.

1361 – JM, Germany – Because I suffer from EHS.

1362 Philippe PINAUD, France – I am EHS and MCS.

1363 – Geneviève MARTIN-BELLET, France – In my circle I know a person with EHS.

1364 – PB, France – I am myself a victim of electromagnetic radiation.

1365 – HN, Germany – I am concerned.

1366 – AS, France – I've had hypersensitivity for 10 years, and now it's becoming very difficult to live in this heavily polluted environment. Enough is enough! Think of our children, our grandchildren. This emerging disease is a daily ordeal, and all those people like me who are affected, as well as all living things—bees, birds, and all animals—wake up!

1367 – RL, France – Uncontrolled and poorly managed electromagnetic radiation is unacceptable, and human and environmental health must take precedence...

1368 – Paul FRIEGERT, Germany – Electrosensitive people also have the right to a good life.

1369 – Isabell SCHLEPPER, Nederland – Because it bothers me myself. And my cat too. All the symptoms mentioned apply. Hell on earth, what a shame.

1370 – HH, France – It is urgent and it would be just human, for the human right to have the right to rest somewhere.

1371 – GE, France – Concerned by the problem.

1372 – Vibeke SKAARUP NOVKOVIC – Radiation affects everyone.

1373 – Samuel CADOU – France – I know someone with electromagnetic hypersensitivity who has suffered every day for over 10 years. They even attempted suicide to end their suffering. But life had other plans, and they continue to endure it.

1374 – Martina ROEßLE – Germany – Electrosmog makes you sick and you can't protect yourself!

1375 – JS, Germany – I am concerned and I know other concerned people.

1376 – EP, Austria – I know many electro-hypersensitive people and the current limit values offer no protection.

1377 – VK, Germany – ...I find the use of electromagnetic radiation at the expense of all human beings irresponsible!

1378 – AJ, - Myself concerned.

1379 – JK, Germany – Affected by electrosensitivity.

1380 – Hand GROß, Germany – Health comes before economic interests.

1381 – Frank MATHIEU, Germany – It is proven that I am electrosensitive.

1382 – Antoine RICHARD, France – I know several people who suffer from electromagnetic hypersensitivity. Some of them survive in extreme conditions, no longer having access to healthcare, ordinary housing, culture, and other social connections. And this is not their choice, but the consequence of the lack of recognition of the effects of exposure to electromagnetic pollution.

1383 – BB, Germany – I am suffering from headaches, and this started shortly after a cell tower was built at our house. We also urgently need designated radio coverage areas, which would allow us to assess needs by visiting people.

1384 – Bettina THOMSEN, Denmark – 5G is dangerous for all living beings, it destroys cells and mobile radiation is partly responsible for health problems, the disappearance of insects, etc.

1385 – CB, France – I am electrohypersensitive, therefore concerned.

1386 – Pascale ROUGE POUTASSON, France – I am very electro-sensitive and I no longer know WHERE to live, how to work and recover my health. I am becoming very disabled because of electromagnetic radiation that is too strong for my systems.

1387 – Pernille DE BOER, Denmark – I have suffered from EHS myself for 15 years now.

1388 – IB, Germany – People's health is the most important good.

1389 – SS, Germany – I am directly affected and I see every day the 'indirect' adverse health effects (considerable weakening of the body's regulatory systems) in practically all patients suffering from chronic illnesses. I don't need any other treatment.

1390 – MK, Germany – I am myself electrosensitive.

1391 – NP, Germany –I know people concerned.

1392 – CG, Germany – Electromagnetic pollution disrupts the body's regulatory functions, preventing it from detoxifying the increasing levels of environmental pollutants and thereby leading to the acceptance of illness as an inevitable consequence.

1393 – Ander IRAZUSTA, France, Basque Country – I agree.

1394 – Annie COIRAULT, France – I have been electrohypersensitive for 5 years and I am a real antenna, I pick up all kinds of electromagnetic radiation that exist on the planet (...) ..It is a miracle that I am still alive.

1395 – Erich MARSHALL, Germany – I cannot get used to the idea of being constantly invaded by wifi and mobile telephony. I have informed myself a lot in recent years and I share the opinions and results of researchers, tests and results. Our fellow citizens must be warned.

1396 – Mireille CORON, FRANCE – Because we must defend people with disabilities.

1397 – Thierry LARVOR, France – I have a friend who is affected.

1398 – AD, Egypt – I am EHS.

1399 – FM, Germany – Because it is important for all life on our earth and we have a responsibility to protect life, even if we cannot consciously perceive its harmful effect

1400 – Patrick FICHAUX, France – I myself am EHS.

1401 – Anne-Marie FAURY, France – I am well aware of this issue, which isn't discussed nearly enough.

1402 – VF, France – Governments need to take note of EHS.

1403 – Petra Roth, Germany – Preserving life.

1404 – Kerstin WINTERPATCH, Germany – I believe that radio waves and electromagnetic radiation (i.e., "e-smog" in general) are treated far too carelessly and taken for granted. Digitalization should instead take place primarily and generally via cable!

1405 – PF, Germany – Concerned myself.

1406 – Heintz WIEDENMANN, Germany – Concerned.

1407 – Philippe CHESNEAU, France – I myself have suffered from electromagnetic pollution. I knew, in particular, a friend who was severely disabled by EHS.

1408 – SR, Germany

1409 – ML, Switzerland – White zones must be put in place.

1410 – HD, France – I suffer from electro-hypersensitivity.

1411 – MK, Germany – I hope that the risks will be addressed and discussed openly and honestly, and because I want a space where people can escape.

1412 – Christiane BRAUN-PFISTER, Germany – Because I find this issue increasingly important and want to support those affected.

1413 – GH, Germany – I am mildly affected myself and have many patients whose symptoms are almost always brushed off as psychological in nature. I have conducted my own measurements as well as dark-field microscopy and was able to establish a direct correlation; there are now plenty of validated studies on the subject.

1414 – MM, Germany – A friend of mine is going through a very difficult time; I'm witnessing her suffering, and she can't find a place to live, for example.

1415 – FD, France – I am affected by a cell tower (I have almost never used a mobile phone and never a cordless phone!)

1416 – Ghislaine PICHON, France – Excessive electromagnetic radiation is harmful to my health and restrict my freedom to go where I want.

1417 – Anke PLEHN, Germany – My health is important to me; I was already experiencing symptoms that could be clearly identified (before I wired up my computer and stopped using my cell phone, smart devices, etc.). Also, for the sake of my children and grandchildren, and most certainly for the sake of nature—the dying trees, birds, insects...

1418 – Antoinette JANSSEN, Norway – I am imprisoned in a small area, because of the impossibility to travel anymore: EMF is even in public transport, without restrictions: people are free to use internet, while traveling by bus or train. Creating an insane high concentration of EMF levels from which I cannot escape. Also airports, hotels, restaurants, even hospitals, are high concentrated EMF irradiated areas. Moving to another spot is not possible either: EMF is everywhere, and the house in which I live is through the years protected against EMF. We use ethernet. I live in one room, where the radiation from outside, celltowers and Wi-Fui using neighbors, is the lowest. I use the EMFields Acousticom2, to find the best place, to prove others in what sort of an insane situation they live. But since it takes mostly years before one discovers that all symptoms one has and is suffering from is created by EMF. Not any general practitioner knows the symptoms of EMF. The total of people, who suffer from EHS, is much bigger than what is known today: because the most of the

people do not realize that they are not protected. They believe that their government cares for them, that WHO is indeed a health organization, while it is a totally corrupted industry related group that should be disbanded, together with ICNIRP.

1419 – RS, France – I have been diagnosed with EHS-MCS by two doctors and a professor, but nothing changes in my daily life despite our town hall (installation of cell towers), the nearest town (Wi-Fi available to everyone in the streets), and people passing by with phones or watches constantly connected to Wi-Fi. What is the official recognition of this condition?

1420 – Laurent GUEGUIN, France – My wife is EHS.

1421 – ML, France – Myself electro-hypersensitive and chemically sensitive.

1422 – AM, Nederland – The exposure of all living beings and organisms to increasingly numerous artificial electromagnetic influences (and other artificial and unnatural things!) must be stopped and even reduced.

1423 – PT, France – I suffer from EHS and MCS.

1424 – Christelle MOUTTI, France – I myself suffer from EHS and MCS, diagnosed in early 2015 by Professor Dominique BELPOMME. I have developed hippocampal amnesia, multiple sclerosis, and chronic fatigue syndrome. I have been on disability since May 2018 and receive a category 2 pension. I have been completely unable to work since August 2015, etc...

1425 – Fabienne CAUTAIN, France – I am convinced that it is necessary for public authorities to intervene in this regard.

1426 – Suzanne END, Germany

1427 – YF, Germany – I myself have been suffering from EHS for 3 years and have had NO access to the social welfare system or private practitioners since then. I live completely isolated in our house and can only use the nearby forest for relaxation and walks. This life-threatening technology must be abolished IMMEDIATELY, and people, animals, and nature must be protected from further harm caused by this military technology—NOW!

1428 – Annie FORMES, France – I have a friend who has been suffering for years and she faces this disease with great courage.

1429 – MH, Germany – Because I myself have been suffering for over 15 years!!! I was diagnosed with the illness over a year ago and I am suffering greatly from my situation .

1430 – Manfred SCHLUTTENHOFER, Germany – I sign the petition because I am personally affected. I experience a slight ringing in my ears after prolonged exposure to pulsed high-frequency EMF (Wi-Fi, LTE, etc.).

1431 – BS, Germany – I am concerned.

1432 – Antonin BOYEZ, France – I am myself electro-hypersensitive.

1433 – AP, France – I can no longer bear to suffer and to see this ultra-connected world imposed upon me, a world in which I can no longer live, even though it is only going to get worse in the years to come!!

1434 – Philippe BOIVIN, Canada – I'm EHS and now have to work from home because I simply can't work anywhere anymore.

1435 – Karine MENORET, France – Everyone can be affected by this disease.

1436 – GL, Luxembourg – This concerns me greatly.

1437 – AH, Germany – I see the physical and mental health of people as being at risk due to the ever-increasing forced digitalization, which leaves us and our children with no freedom of choice and no safe space.

1438 – NC, France – I am electrohypersensitive.

1439 – Iris SOMMER, Germany – I suffer from electro-hypersensitivity.

1440 – PC, France – Having suffered from EHS, I stand in solidarity with those who endure this terrible handicap in a world where this pollution continues to increase...

1441 – CC, France – I am electrohypersensitive and I suffer from everything described in the appeal.

1442 – FT, France – I have been electro-hypersensitive since 2018

1443 – Jacinthe GUY, France – I have been EHS since the installation of the «Linky» smart meter in 2016.

1444 – MB, France – Personal electrosensitivity.

1445 – FC, France – My daughter has EHS (Electromagnetic Hypersensitivity), her life has been turned upside down: no more work, no more social life... and with that, numerous health problems. It's very difficult for her to find a place to live!

1446 – AH, Switzerland – ...the health of all living beings should be our top priority—and because I myself am highly sensitive to electromagnetic fields. Every living being has the right to a place where it can thrive.

1447 – SF, France – We're fed up with being misled!

1448 – Theo FELEN, Nederland – I consider it necessary.

1449 – Véronique DA COSTA, France – I am electrosensitive.

1450 – Gabriel THIBAULT, France – My niece is EHS.

1451 – CR, Germany – Because I agree.

1452 – D. L., France – I would like the Ministry of National Education to simply remind everyone that in primary schools, Wi-Fi must be switched off at the end of the teaching session to limit young students' exposure to electromagnetic radiation, in accordance with the legislation in force since February 2015 (Abeille Law). Too many local authorities are still ignoring this precautionary principle without considering the health of younger children, whose bones are more permeable to radio waves.

1453 – GH, Germany – I myself have been affected since UMTS came into service. Shielding helps for the most part, except against DVBT and DAB+.

1454 – MS, Switzerland – We can no longer work and we lose everything.

1455 – SR, France – I have been diagnosed with EHS MCS. I would like a healthy home, to be able to get proper medical care, to have friends without cell phones. I no longer have access to anything, isolated from other people.

1456 – KS, Germany – ...I myself am electrosensitive and I fight for the recognition of this disability.

1457 – Ulrike FREDMANN, Germany – I myself have been severely electrohypersensitive for several years and, as a result, had to give up my job as a teacher prematurely. I am now also suffering from systemic cancer.

1458 – SC, Germany – I was myself electrosensitive.

1459 – AS, Germany – For me, this is a world where everyone can live well and where states must protect their citizens from excessive radiation.

1460 – AA, France – I am disabled by EHS (Electromagnetic Hypersensitivity), and I am experiencing medical uncertainty. It is impossible to live like everyone else, even in my own home!

1461 – Nathalie MASSIN, France – I've had EHS for many years, and my condition is worsening. I'm not recognized, finding a job is very difficult, I can no longer see my children... We EHS sufferers are deprived of so many things, even the simplest... The frantic race for antennas and constant connectivity only increases, and we are getting worse and worse!! Help!! Stop!!! THANK YOU.

1462 – Edith JEAN, France – I am suffering without any possibility of recourse.

1463 – UW, Germany – I am myself electrosmog hypersensitive and have the symptoms. I suffer.

1464 – PK, Nederland – I worry about whether there will still be quiet, radiation-free places on earth in the future.

1465 – Jean-Pierre NOBILE, France – I am writing as a father who has witnessed for some twenty years the daily ordeal of his daughter, who is severely disabled by EHS and MCS. Beyond the physical protection against the onslaught of electromagnetic radiation in her living spaces—protection frequently challenged by environmental changes—she no longer has a social life and faces ignorance, incomprehension, and even rejection from a population whose lives are increasingly dictated by smartphones and connected devices. It is imperative that EHS be recognized as a severe disability or illness so that our societies can organize coexistence with these individuals, offering them a living environment free from isolation and suffering. Scientific research must also invest seriously in this area to provide appropriate technical and medical solutions.

1466 – BB, France – For the past 10 years, I've had to distance myself from my family and friends to escape the electromagnetic radiation, and it's very difficult; we're misunderstood. Doctors aren't trained, and it's a disaster. There's so much more to say...

1467 – Silvia CONRAD, Germany – I am myself electrosensitive and my living spaces are getting smaller and smaller.

1468 – Audrey MULLER, France – I am EHS.

1469 – MP, France – For 15 years I have been living under the direct influence of a cell tower and I am losing muscle and bone mass. There is no remedy that works (...)

1470 – Chantal CAILLON, France – For the future generation and for Life on Earth, respect for Living things.

1471 – AH, Germany – I am one of the EMP Victims .

1472 – Kim PEDERSEN, Denmark – The devastating effects of artificial EMF on humans and all living organisms have been documented for over 40 years and we are still working with outdated measurement limits. It is time to act.

1473 – SS, Nederland – I am suffering greatly from this radiation...

1474 – SW, Luxembourg – The people concerned are dear to me.

1475 – SM, Switzerland – ...I am also concerned: ME TOO!

1476 – PM, Germany – I know people who are electrosensitive and I want to help them.

1477 – Cornelia CORNER, Nederland – Radiation causes fatal illnesses.

1478 – Christop BOLDT, Germany – The increasing prevalence of electromagnetic fields poses a threat to all living beings. The creation of "white zones" is being considered. In other words, exposure to EMFs in schools, buses, and trains should not be mandatory.

1479 – Christian RAPHAEL, Germany – This is an important health topic and many people are unaware of it.

1480 – Roman MEYER, Switzerland – I am an EMP Victim.

1481 – Reiner PADIGUR, Germany – The health problems caused by high-frequency fields, clearly below the legal limits, are unfortunately very real and affect many people.

1482 – Ursula KROPP, Germany – Everyone can be affected, and it is inhumane to deny those affected the right to exist.

1483 – Henrik SCHODT-HANSEN, Denmark – The situation of people sensitive to EHS is dangerous and unfair.

1484 – ST, France – I became EHS in 2018.

1485 – Marie-Noëlle GUYETAND, France – I am myself electrohypersensitive!

1486 – Astrid BOBERTAG, Germany – I am a victim of this problem. My apartment has become uninhabitable due to the electromagnetic smog from my neighbors and the surrounding cell towers.

1487 – GD, Germany – The limit values for electromagnetic fields must be lowered to a value compatible with health, so that the damage already caused to people, fauna and flora does not continue, so that our mission of preserving nature in harmony with people can also be fulfilled.

1488 – PL, Germany – I am personally concerned.

1489 – CC, Germany – Electrosensible, MCS.

1490 – Isabel SCHOLZ, Germany – I myself am severely affected by electrosensitivity, and the doctors only attribute my illness to my psyche, which is definitely not the case.

1491 – EM, Austria – Right to a decent life.

1492 – UB, France – I am myself EHS and I find the fate and treatment of my unfortunate companion appalling.

1493 – Catherine ABECASSIS, France – Being electro-sensitive myself.

1494 – AC, France – My daughter has EHS (Electromagnetic Hypersensitivity). She is a research engineer in the R&D department of a large French company. She can no longer work. The radiation from Wi-Fi, phones, and electrical appliances is unbearable for her. She survives in an isolated location. She is cut off from the world. Grocery shopping is an ordeal. She has physical pain. Her life has become extremely difficult.

1495 – Lydia LAJUBERTIE, France – I am Ehs-Mcs and life has become hell.

1496 – Léone GUEZELLOT, France – I am close to a person ehs-mcs.

1497 – Suzanne TRIBOUILLARD, France – I am electro-sensitive.

1498 – XA, France – I have been EHS since 2013.

1499 – BS, Germany – Because electrosmog is massively harmful to my health.

1500 – RL, Germany – I am affected by EHS!

1501 – SH, Germany – We know from experience how serious EHS is – and how the majority of people don't realize the danger they're putting themselves in because most doctors don't even have a clue what it is and are indifferent.

1502 – Mr. L, Germany – I myself suffer from electrosensitivity, unfortunately.

1503 – Katrin Irene KREUTZER – As a naturopath, I am confronted with this subject and I know that those affected suffer greatly and have difficulty finding help!

1504 – Sandrine ANOUILH, France – ElectroHyperSensitive since 2012, I support the petition.

1505 – RC, Germany – I am highly sensitive to electromagnetic fields myself, which severely limits my quality of life.

1506 – Nadine MARTIN, France – I am aware of this problem because I have known a person with EHS for a long time and I can see that she lives in social isolation, with real difficulties on a daily basis.

1507 – MQ, France – I have several people close to me who are EHS.

1508 – PD, Switzerland – I sympathize with highly sensitive people.

1509 – GC, France – My friend suffers from EHS (Electromagnetic Hypersensitivity) and is in agony everywhere she goes. She's looking for a place where she can finally live peacefully. As for me, working on a computer, I suffer from attention problems after just a few hours at my workstation.

1510 – TF, Germany – EMS radiation protection must absolutely be taken seriously.

1511 – Thomas BEZLER, Germany – Electromagnetic pollution affects us all; any one of us could become electrosensitive, so we should take preventive and rehabilitative measures.

1512 – AN, France – This pollution is very dangerous for all living things.

1513 – Colette DELFOUR, Switzerland – This is part of human rights.

1514 – AL, Spain – I am very affected by the radiation.

1515 – GB, Germany – I am personally concerned.

1516 – HK, Germany – Since I'm personally affected by this and have been fighting for this cause alongside others for years, but now I'm at the end of my rope. Since there's no hope in sight, I have to sell my own house right now... because it's no longer livable, and I have no clear alternative..... I have no idea how I'm supposed to manage this.

1517 – Jean-François BRILLET, France – I have a brother suffering from this EHS disease and I know the confinement that results from it.

1518 – ML, Luxembourg – I feel solidarity because I am quite sensitive...

1519 – EZ, Germany – I am personally concerned and I also worry greatly about the environment/nature and its living beings.

1520 – Françoise CADET, France – Yes to all these demands from the EMP VICTIMS collective! It is vital for everyone, those with EHS and those not (yet) with EHS, vital for all living organisms.

1521 – Guillaume AGEORGES, France – It is unacceptable not to take into account people with EHS and to provide them with the conditions for a decent life.

1522 – EK, Germany – I want to raise awareness about this issue and would like to be exposed to less radiation

1523 – Patric MOUTON, France – Wife EHS.

1524 – Bernhard Hanekamp, Germany – I myself became ill due to artificial electromagnetic fields (EMF) and no doctor recognizes the causes...

1525 – Venera BERGER, Switzerland – II am electrohypersensitive, and aside from shielding—which has only limited effectiveness—I cannot protect myself from the constant barrage of electromagnetic radiation. My life is very restricted: I cannot use public transportation, go shopping, or visit restaurants or events; I cannot stay in rooms where Wi-Fi or Bluetooth is transmitting and where people are using smartphones.

1526 – Michèle ANGOT, France – I support the legitimate demands of electrohypersensitive people.

1527 – Inti DE BOCK, Belgium – Telecommunications based on pulsed microwaves (e.g., Wi-Fi, 5G) must be banned due to their proven disruptive effects on life on Earth.

1528 – IP, France – I myself am hyper electrosensitive and I am aware of the danger of all these electromagnetic technologies.

1529 – Charlotte SCHEFFEL, Germany – I am concerned myself and I am committed to a healthy environment for people, animals and plants.

1530 – Marie-Christine MONET, France – Electromagnetic pollution is harmful to all living things.

1531 – Markus STREIBEL, Germany – I am myself very concerned. (...)

1532 – SB, Germany – Due to health concerns and because decisions regarding ever-increasing levels of electromagnetic pollution are being made without restraint or reason, without ever measuring the total actual exposure anywhere.

1533 – Gina JOCKWER, Netherlands – I am concerned.

1534 – Elisabeth MERLIERE, France – I spent over seven years wandering around Ariège and France, searching for an area free of electromagnetic emissions, as I couldn't tolerate any emissions. I sometimes lived in my car, in a tent, in a caravan at -12°C, or in shepherd's huts under 1.10 meters of snow... without any means of communication. I underwent very intensive and expensive medical treatment, never reimbursed by health insurance. I lost my job, my friends, my activities, my family... who turned away from me, and my house, due to the cost of the treatment and the fact that I was forced to sell it without being able to buy another. After 17 years of relentless and very costly treatment, I was finally able to find a home in an area with virtually no electromagnetic emissions. But my health remains compromised, my pension is drastically reduced due to the lack of 15 years of work... It was my own research that allowed me to make progress medically and emerge from this indescribable period of suffering, insecurity, loneliness, and loss of all social life, even though I have always worked in the medical and social services field. And I regularly see people passing by my home who are increasingly ill, increasingly younger, some of whom end up developing cancer... I lived by candlelight for 10 years!

1535 – SH, Germany – Because I myself am electro-hypersensitive.

1536 – Isabelle LANGEVIN, France – I am EHS.

1537 – Olivia Pourembe, France – I am a doctor and I see the damage caused by electromagnetic radiation.

1538 – Jean-Claude MOURLEYRE, France – By nature, we are all electrosensitive, and therefore potentially susceptible to electromagnetic hypersensitivity. It is unjust that the desire, driven by institutional decision-makers, to eliminate all white zones implicitly imposes increasing exposure to artificial electromagnetic radiation on everyone, even those who wish to avoid it.

1539 – MB, France – There are more and more sources of nuisance and we can no longer protect ourselves from them.

1540 – PB, Nederland – I am limited in my actions. The quality of life is decreasing more and more.

1541 – Laurence LAHMY, France – I have several friends suffering from EHS and I have become aware of what these people are going through today, it is absolutely MIND-BLOWING and inhuman.

1542 – CB, Switzerland – I am extremely electrosensitive, which is why I am unable to work and can only be in a shielded room, a cellar, or a ravine.

1543 – Gerhard SCHMITT, Germany – The radio signals cumulatively disrupt the cellular communications of all living beings in an intolerable way. However, our illnesses and functional impairments are on the rise! Life is too short to let ourselves be restricted so severely

1544 – Christiane Cappone, France – I am not free to live like everyone else. Electromagnetic radiation assault me and destroy my health. I am just surviving.

1545 – AF, Germany – I am convinced that in the long term, ever-increasing radiation makes you sick. It is harmful to humans, animals and nature.

1546 – VB, Germany – (I suffer from this, and there are so many studies on the effects on humans and animals that are not being openly and democratically addressed.

1547 – Annemarie SCHUSTER-STEMBERGER, Germany – I am aware of the danger of EMF pollution.

1548 – HJ, Germany – Yes.

1549 – Marie-Laure THIBAULT, France – Protection of electrosensitive people.

1550 – SS, Germany – I am for a healthy environment, with only natural radiation, in which pulses the highest possible vital energy!!!

1551 – Andrea STINGEL, Germany – I am myself electrosensitive and I suffer from a huge reduction in my quality of life.

1552 – CS, France – Every living being has the right to live decently.

1553 – ML, France – I am EHS and I would like (it is essential) to preserve a white zone per department.

1554 – SH, Germany – Radio communication has no place in this world. Not only does it disturb people, but it destroys everything around us. Let those who have eyes see.

1555 – CF, France – Electrosensitive.

1556 – GR, France – Very sensitive to environmental issues.

1557 – MV, Nederland – I am facing difficulties myself.

1558 – Imgard WARTNER, Austria – It is important for ALL people to be protected from EMF pollution if they are aware of this problem. Action must be taken!

1559 – Lionel PAQUIEN, France – It has been scientifically demonstrated that Electromagnetic Radiation has a harmful effect on human health as well as on fauna and flora.

1560 – MC, France – When will we recognize EHS?

1561 – AV, Nederland – I suffer from it, like many of my clients.

1562 – GH, Germany – I know many people severely affected by EHS and I worry about people, bees, etc.

1563 – Jannett MEDING, Germany – I am affected by this myself. I have both MCS and, since 2018, EHS. Even though I've stayed away from cell phones and use only a landline (DSL) and a LAN connection at home, I feel painful effects from cell phones near

me and experience severe burning sensations on my body because my neighbors use extremely strong high-frequency radiation in their apartment all night long.

1564 – ES, Spain – I see elderly people and children falling seriously ill with increasingly strange conditions in wind turbines that measure more than 50 v/m2, when in a natural wind turbine the typical measurement is 01. Faced with the indifference of the misnamed "authorities" (city governments, in this case), who look the other way and are complicit in those who have made it difficult to address this crime.

1565 – CG, Germany – Electromagnetic pollution disrupts the body's regulatory functions, preventing it from detoxifying the increasing levels of environmental pollutants and thereby leading to the acceptance of illness as an inevitable consequence.

1566 – Gerlinde FREDER, Germany – I am myself electrosensitive.

1567 – Tino PINKERT, Germany – I am myself electrosensitive.

1568 – EA, Austria – I am myself electrosensitive.

1569 – MS, Luxembourg – Because this worries me enormously.

1570 – FC, Belgium – The need to pay attention to everyone's well-being.

1571 – Jérôme CAMUSET, France – Very sensitive to electromagnetic radiation too, I stand in solidarity.

1572 – François COLLIN, France – I am EHS and it is high time that the damage caused by EMFs is recognized.

1573 – Yolande DELCOMBEL, France – I discovered my electrohypersensitivity during the installation of the «Linky» smart meter.

1574 – EG, Germany – Concerned myself.

1575 – JC, Luxembourg – I am concerned myself.

1576 – Laura Wolters, Germany – Against electromagnetic pollution!

1577 – CB, France – I am EHS.

1578 – BL, France – This insidious pollution is a real scourge!

1579 – SS, Germany – My daughter suffers from severe electromagnetic hypersensitivity, and as a result, her quality of life has deteriorated dramatically. A change in mindset among policymakers and doctors is urgently needed.

1580 – HG, Germany – I am personally affected by this, and I can fully relate to the physical symptoms and the way society ignores them. I am also concerned about the health and development of children.

1581 – EF, Germany – (...I myself suffer from the gigantic amount of electrosmog... and I observe that children and adolescents also suffer – without knowing it.

1582 – CB, Germany – I am highly electrosensitive and exposure is slowly becoming unbearable for me.

1583 – EA, Germany – Because I am personally concerned and all living beings on this earth are very important to me! Thank you for this initiative!

1584 – Lars ROSENDAHL DUVIER, Denmark – Global development on the wrong track.

1586 – Hanneke VAN GINKEL, Nederland – I myself suffer from all kinds of electromagnetic and electrical radiation, and there is no longer any place where I can live without radiation in the Netherlands and Europe. Radiation has a devastating effect on nature and on humans. Entire populations of insects, birds, marine animals, and plants become confused and disoriented and die, with all the consequences that this entails. See also the book by Arthur Firstenberg, an electromagnetic energy researcher and first experiment expert, entitled «The Invisible Rainbow.»

1587 – LH, Nederland – Radiation causes terrible illnesses and health problems.

1588 – EO, Germany – Because I myself am affected and even the environment is ruined by the increase in radiation.

1589 – Volker GENENZ, Germany – Electrosensitivity is the most serious environmental illness of the moment and in the future, and those affected are still subjected to relentless discrimination.

1590 – WT, Germany – My son and I are concerned.

1591 – KF, Germany – ...I think it is necessary to become aware of this!

1592 – Elke FREIWERTH, Germany – We have been suffering from this for a long time, a long time in fact (DEMENTIA is encouraged)!

1593 – Marie-Rose KEMP, Belgium – Electromagnetically hypersensitive for 25 years, I feel the exponential growth of electromagnetic radiation that prevents me from living normally and cause me so much suffering. The question is: why don't countries take into account the scientific studies conducted on this subject and the immense suffering of those with EHS? Is this democratic in a democratic state?

1594 – AC, France – I stand in solidarity with those suffering from this situation. No one should find themselves in exile in their own country, and that is what is happening to those most affected. Together, let's find solutions.

1595 – SS, Germany – I am myself electrohypersensitive, I suffer from it, and I would like things to finally change for the better at the political, global, and regional levels. Furthermore, I would like to help protect nature and animals, especially bees, birds, whales, and dolphins.

1596 – DR, Denmark – Because it's important and it will help many people. The problem is bigger than politicians want to say.

1597 – Silvia CZUB, Germany – I myself am electrosensitive, and the radiation is ruining my entire life; I can no longer work in my profession, and I am leaving part of my family for the second time because I can no longer live there. I suffer from unspeakable pain; I can no longer go outside or go anywhere—this is no life, it's just survival: a never-ending lockdown.

1598 – MB, France – A friend suffers from this problem which makes her daily life very difficult.

1599 – PM, Italy – I also wish that these requests be accepted.

1600 – BM, Germany – It affectsme and my ealth.

1601 – RT, France – My niece is affected by this disease. I hope she gets better.

1602 – MK, Germany – We need to persuade the mobile phone companies to rethink their approach so that radiation is minimized and made safe for people.

1603 – EM, France – I am EHS.

1604 – A. O ., Netherlands – I too suffer severely from EHS and meanwhile am forced to live like a homeless person in an old leaky camper with even less "rights" and all the financial consequences. Complete life has been broken for a long time.

1605 – DL, Switzerland – We are faced with an exacerbated form of institutional denial under various pretexts, which raises questions about societal responsibility in general and more specifically, at the state surveillance decision-making level, about the will to preserve the biological existence of living things in general and human beings in particular.

1606 – Bertrand DUBARD DE GAILLARBOIS, France – I am in solidarity with the HES.

1607 – Anne DOMINGUES, France – I am a victim of their electromagnetic radiation.

1608 – IB, Spain – (My sister has this illness and nobody is doing anything to improve her quality of life.

1609 – WH, UK – I am elderly and very electrosensitive, and it affects my existing health and makes it worse. I have done all I can to protect my house, which I cannot afford to protect further. I have a telegraph pole outside my house with many additions whose purpose I do not know. I know a lot about electromagnetic fields.

1610 – MO, Spain – For a family member.

1611 – Véronique PASCAL, France – I myself have suffered from numerous symptoms since the arrival of 4G. I had two DECT phones on my desk, and in particular, the skin on my face felt burned, as evidenced by photos. Doctors were powerless. Then I understood, and as soon as I unplugged everything in my house (DECT, Wi-Fi, Bluetooth, 4G), my skin returned to normal in a few days, without any other treatment. Since then, I still have symptoms (insomnia, irritability, sensations of «electricity» in my abdomen, some remaining skin problems, etc.), but I think I've gone from allergic to intolerant.

1612 – MR, France – Severely affected by EHS-MCS since 2007-2008.

1613 – NM, France – To help.

1614 – AT, France – I want to help my cousin.

1615 – Bruno BAUER, France – This is important.

1616 – Lucette ROUGE-POUTASSON, France – My daughter is very electrosensitive and no longer knows where to live, is sick all the time, her health has been deteriorating for 28 years in general indifference, can no longer work and is therefore in a precarious and distressed situation. I fear for her life if she does not find help and it is not for lack of having searched and spent a lot of money to get out of it.

1617 – AZ, France – I am EHS.

1618 – SL, France – !!!!!

1619 – Michèle PATHIS, France – I suffer from electromagnetic hypersensitivity (EHS). For 45 years (due to the electrical grid). My condition has been deteriorating since 2010 (3G). I haven't been able to work since 2020 (4G+). My social life is dwindling. The neighbors, who emit artificial electromagnetic radiation, are not cooperating (they turn them off at night). I am looking for a refuge where I would no longer be forced to suffer constantly.

1620 – AC, Spain – (A family member has the disease.

1621 – FD, France – I am EHS.

1622 – MV, Nederland – It is one of the main pollutants and a leading cause of neurological disease and damage.

1623 – SW, Germany – Because I myself am electrosensitive and I encounter in my work more and more patients who suffer from health problems due to mobile phone radiation.

1624 – Latja BÜHL, Germany – I am personally concerned.

1625 – ED, Belgium – Thank you.

1626 – Fabienne BARRAN, France – A friend is Electrosensitive. I myself am experiencing the harmful effects of electromagnetic radiation on my health.

1627 – ND, Germany – I don't want more electronic ray pollution.

1628 – EE, France – Out of solidarity with vulnerable people.

1629 – EB, France – This situation is a true denial of the fundamental rights of the human person: to live in an environment that does not harm their well-being!

1630 – Bruno BESSON, France – I support this Appeal to show my complete empathy for the people who are victims of these harmful technologies, and to call on political leaders to address this major public health issue as quickly as possible.

1631 – ML, France – It is urgent to reverse course on this heresy of all-electric.

1632 – FM, France – In solidarity with those who suffer from electro-hypersensitivity.

1633 – Gilles CURTI, France – not being electro-hypersensitive myself, I support this action because I have people in my circle who suffer from EHS. I witness daily the suffering and discrimination that EHS people face.

1634 – RC, Switzerland – I have been severely affected by EHS for 8 years. I can no longer participate in social life, I can no longer do my job, I can no longer go on holiday with my wife because in Switzerland, all living spaces are heavily exposed. Wi-Fi, Bluetooth, mobile phones and DAB+ radio broadcasting dominate my life. For those affected, this situation is absolutely unacceptable.

1635 – OZ, Germany – I am personally concerned.

1636 – SH, Austria – Because the people concerned absolutely must be helped.

1637 – GH, Germany – I am personally affected by this, and the situation is getting worse as free Wi-Fi is being introduced in many cities and the harm caused to people, animals, and plants by all this radiation continues to increase. People need to become more aware that things cannot go on this way. We are all harming ourselves.

1638 – Katarina HOLLBRINK, Sweden - I suffer from Microwave Sickness.

1639 – KL, Germany – ... I am worried about our health!

1640 – Sabine KRAUS, Germany – We are all exposed to excessive high-frequency radiation, which is scientifically proven to cause various widespread health problems.

1641 – AA, Denmark – Everybody has the right to live a life unharmed and to strive for better health.

1642 – Laurence DUBARD, France – I agree with the demands.

1643 – Jacques BAERISWYL, Switzerland – I sign because I know people who are suffering enormously from this!

1644 – LL, Switzerland – I am EHS.

1645 – LK, Germany – I could be concerned myself, perhaps I already am.

1646 – MJ, Romania – I am denigrated (...)

1647 – DM, Switzerland – A friend suffers from this .

1648 – Wout DE HOON, Nederland – Because I've been suffering a lot from radiation lately.

1649 – AC, Spain – Because I am deeply moved by the plight of those affected by this debilitating disease.

1650 – OD, France – Out of solidarity.

1651 – CG, France – I have hypersensitive friends.

1652 – SD, Denmark – It's important to take an interest!

1653 – LC, France – In solidarity with friends and for the halting of the development of technologies harmful to living things.

1654 – IW, Sweden – My symptoms: Headaches of varying intensity. Sporadic stabbing pains in the head. Pressure over the eyes and in the head. Pressure in the ears and over the temples. It feels like I've swallowed tiny needles that are pricking and spreading throughout my throat and jaw area. I sleep poorly. Nausea. Unpleasant tingling and vibrations in the skin. Unpleasant vibrations in the body. Cramps in the feet. Unsightly burning/itchy eczema/rash on the face. Skin inflammations. Ringworm. Slow-healing wounds, inflamed/infected. Losing hair; my thick hair is disappearing. Dizziness. Abnormal, severe, overwhelming fatigue. Exhausted. Brain fog. Lack of energy. Apathetic. Mental health issues. Feel detached from reality. Feels like there's cotton in my head. Struggle to find the right words. Noticeably reduced muscle and bone strength. Incontinence. Feel a thick, swollen sensation in my throat. Difficulty breathing / trouble getting enough oxygen. Blood when I blow my nose. Impaired short-term memory; some days are completely hopeless. Concentration varies. Learned protective reflexes and reactions run amok (or fail to occur) without warning. Chest pain; comes and goes; has even lasted a full day. Pressure across the chest. Heart arrhythmia. Aching pain throughout the body. Stiff joints. Sporadic sharp pains throughout the body. Tinnitus. Trouble swallowing. Visual disturbances. This means that you will be able to watch the video and watch it live.

1655 – GP, Romania – I have been electrosensitive since 2002.

1656 – Marien Giuliani, Italy – I am electrosensitive; I love life in all its forms, and electromagnetic pollution and all other forms of human-caused pollution are pressing global issues.

1657 – II, Spain – I have a family member affected.

1658 – Fabrice NGUYEN, France – I know people who suffer from this syndrome.

1659 – Dominique TIANO, France – I am EHS and I am very sensitive to this global epidemic.

1660 – Séverine BONCOMPAIN, France – I share my life with an electrohypersensitive person.

1661 – TP, Germany – Because it concerns a friend and many other things!

1662 – BL, Germany – Because of the health risks posed by electromagnetic pollution, I don't have the freedom to live where I want - My health is severely compromised by cell towers and Wi-Fi—it is harmful to both humans and animals, destroys our natural environment, and decimates biodiversity—it has long been clear—through countless studies—just how harmful these frequencies are—recognition of this fact is urgently needed—and not simply a further RAISING of the exposure limits!!! - but rather the development or adoption of technologies that already exist and do not harm humans or nature!

1663 – BT., France – I have a family member who is very sensitive to electromagnetic radiation and who is not coping.

1664 – BC, Germany – My husband is one of the highly affected EHS people, so his lifestyle is very limited.

1665 – CD, France – My daughter (and her family) are living through hell with all this electromagnetic radiation....

1666 – Sigrid SOFFEL, Germany.

1667 – Georg HOLTBERND, Germany.

1668 – OM, Germany – Not enough attention is being paid to the issue of electrosensitivity.

1669 – Verena MANDELKOW, Germany – I myself became a tumor patient.

1670 – HR, Germany – There are alternatives that are not harmful to health.

1671 – AS, Germany – I am personally concerned.

1672 – Roland REIHS, Germany – Information can also be searched for on the Internet at home using a computer connected by cable. Communication by radio devices can also be carried out using lower, non-pulsed frequencies with a much greater range. That should be sufficient, if, for reasons of common sense, one does not wish to give up such radio devices altogether.

1673 – Conny Lundberg, Sweden - I see how radiation destroys our biological world, including all life!

1674 – GS, Germany – We and our environment are all concerned.

1675 – Kit LARSEN-HUGUES, Sweden – It is extremely important that electrosensitivity is recognized and that everyone affected is helped. That they obtain radiation-free housing.

1676 – DL, France – I am concerned because I have EHS. After a diagnosis in 2022, I was at a moderate to severe level. Since then, my condition has stopped progressing and is making my life more difficult.

1677 – AS, Germany – As someone with EHS, I have been suffering for years. My hints, requests, and complaints are met with ridicule, even from the relevant authorities. A request for a "certificate of safety" could not be granted, since society determines what the population must put up with. ...what more can be said about that? It's like the "old behavior" of smokers toward nonsmokers... and the arguments...

1678 – CC, Spain – (I want to show my solidarity with these patients and give them visibility.

1679 – MG, Canada – I am electrosensitive and I can't find the help I need. For over 15 years I have suffered from chronic insomnia; no medication helps. My head is foggy, I can't concentrate, I have incurable depression, loss of appetite and willpower, immense fatigue, etc. Instead of helping us, governments are accelerating the deployment of 5G and other technologies that are harmful to humans and the environment.

1680 – BV, Sweden – This harms people, animals and vegetation.

1681 – Ute HANSENBEIN, Germany – You cannot see EMF, and that is what makes it dangerous, because it can therefore be so easily ignored. The telecommunications industry is remarkably effective at discrediting critical voices and scientific evidence (people are dismissed as conspiracy theorists, scientific careers are destroyed, etc.), because there is so much money at stake. Even more money, however, is tied up in dealing with the consequences of the many diseases. The economic consequences can hardly be quantified in monetary terms anymore. What is increasingly affecting human health certainly does not stop at nature. Animals and plants are affected as well. The decline in insect populations is not solely due to pesticides and the destruction of habitats. It is high time that the protection of human beings and nature be given the priority it deserves, ahead of the corporations' ruthless pursuit of profit! Decision-makers – finally do your duty of care and take action! And one more thing: just because you are not personally electrically hypersensitive does not mean that you are immune. The damage is occurring in all living things, constantly, continuously, and with ever-increasing intensity! Sooner or later, we will all pay the price, but by then it will be too late!

1682 – MW, Denmark- It is concerning that this issue does not receive more attention in terms of public health.

1683 – Marie GONTHIER, Switzerland – I have suffered from EHS and I now work with people who are or are becoming affected. It is a public health emergency.

1684 – Justine BLAU, Luxembourg – I know some people concerned by this, and I am generally worried about their unacknowledged pain; they need white spaces! Otherwise, EHS should be addressed publicly.

1685 – EP, Canada – I am intolerant to EMFs which cause me tinnitus, brain fog, dizziness and headaches.

1686 – Irène BROSSIER, France – I am electro-hypersensitive.

1687 – AK, Denmark – I can.

1688 – DS, Germany – I believe in the health problems caused by this radiation..

1689 – Géraldine FROGNET, Belgium – By support.

1690 – Fabienne STORCHI, France – Electromagnetic raiation is very uncomfortable to live with and dangerous in continuous exposure.

1691 – Maryse CAMPAGNA, Belgium – I sign this appeal because we are all in danger.

1692 – Donatella FRANCO, France – Electromagnetic radiation is extremely dangerous for all life. It is necessary to stop it.

1693 – DS, Germany – I am personally concerned!

1694 – PL, France – I know a person with EHS.

1695 – MS, Germany – People in my circle are affected by this, and I know how difficult it is to cope with it, come to terms with it, gain understanding from others, and find a way to improve the situation.

1696 – Frank DORR, Germany – I have EHS.

1697 – CB, France – I am affected, and so are many vulnerable people...

1698 – SR, France – I am electro-hypersensitive.

1699 – CM, Belgium – I sign this appeal because we are all in danger.

1700 – Christina STENMAN, Sweden – For more than 10 years, I have been concerned about this issue and have, at times, when I have had the energy, raised the matter with, among others, the municipality where I live, the Swedish Radiation Safety Authority, the County Administrative Board, and my workplace, without success.

1701 – PP, France – For the health of the victims .

1702 – Cathy CABARET, France – I have a very close friend with electro-neuropathy, it hurts me to see her suffer. I would like these illnesses to be recognized so that they can be properly cared for. Sincerely.

1703 – MB, Slovakia – I am EHS.

1704 – ML, France – This raiation is harmful to living things and I am becoming increasingly sensitive to it.

1705 – HL, France – I am experiencing the effects of this radiation. What independent studies exist on its impact on living organisms (humans, animals, plants)?

1706 – Petra BERTOVA, Slovakia – Our personal integrity must not be disturbed by ELF&RF radiation without our consent.

1707 – Kathleen ROBERT, France – I am electrosensitive, suffer from it daily, and don't understand why we are constantly increasing the power of a technology for which we have no health guarantees whatsoever, quite the opposite. Furthermore, these conditions need to be raised awareness, as we are rarely taken seriously and are sometimes simply deemed incapable of adapting to our work or living environment.

1708 – CR, France – I am electro-conscious and therefore isolated. I see those around me slowly declining, and no one can understand what is happening despite the information I share. Everyone just thinks they are getting old or sees nothing at all.

1709 – Roy HÖPFNET, Germany – ...that's why!

1710 – GW, Sweden – The harmful effects of radiation must be taken into account. People are becoming ill. Animals are suffering as well.

1711 – BM, Germany – I am personally concerned.

1712 – CA, France – Suffering from EHS (Electromagnetic Hypersensitivity) for almost 10 years following an electric shock in my home (non-compliance with NF C 15-100 standards). Diagnosed with both electrohypersensitivity (EHS) and chemical sensitivity (MCS) in the occupational and environmental health department of a university hospital. Received a Category 2 disability pension two years after the electrical accident. Disability recognized at a rate of 80% or more by the MDPH (Departmental House for Disabled Persons). This dual disability (EHS-MCS) has a major impact on my life. I require personal assistance for daily living activities. My condition worsened after the forced installation of a «Linky» smart meter on the orders of ENEDIS (French electricity distribution network operator), and then again during the COVID-19 pandemic when 5G antennas were being installed in Paris during the lockdowns (pains in my head and body, like being stabbed with nails). Moved to a higher altitude (1000 m) on medical advice to limit my exposure to both electromagnetic fields and chemical molecules. Each new exposure worsens my condition by lowering my EHS and MCS tolerance thresholds (the principle of communicating vessels). I wear shielded clothing (cotton-silver fiber) almost constantly. I walk with hiking poles to avoid loss of balance and falls when exposed to surrounding electromagnetic fields. I can no longer drive. My neurological problems, dizziness, loss of balance, lack of concentration, impaired working memory, and exhaustion due to constant hypervigilance have worsened over time. I am struggling to survive in a world that no longer respects life and claims to want to save the planet... I suffer both physical and psychologically in the face of mockery and indifference from some ignorant people. I demand mandatory training for healthcare professionals and elected officials. I demand the creation of «white zones» and adapted housing for people with EHS and MCS (like in Zurich). I demand lower exposure limits for cell towers. This is a global health scandal. My thoughts are with everyone.

1713 – VC, France – We humans, animals, fish and plants are all affected by magnetic radiation.

1714 – Frédéric FURLANO, France – Stop the criminal irresponsibility of electromagnetic polluters. Stop the poisoning of populations with organized impunity.

1715 – Eleonore HEILMANN, Germany – Environmentally ill people with EHS – MCS should not be completely excluded! ...

1716 – PP, La Réunion, France – I want to help people in this situation.

1718 – GR, Switzerland – This is a cause that must be supported. Stop 5G.

1719 – Elizabeth BARRIS, USA – My life has been devastated by EMFs. This condition is NOT accommodated. I have launched multiple lawsuits on it and only when RFK JR and his legal team came onboard did we prevail. It should not be this difficult. I cannot fly due to WIFI on plane, drive very far due to cell towers in street, go into coffee shops, restaurants, due to wireless, buy a new car due to wireless, live in my apartment due to wireless, hold a job, go back to school, the list is endless and I cannot begin to describe what I have gone through on a daily basis just to survive this wireless onslaught which gets worse and worse by the year. The corruption keeping this a secret runs deep but must be rooted out or this radiation will kill all life on earth. (My life has been devastated by EMFs. This condition is NOT taken into account. I have filed numerous lawsuits about this, and it was only when RFK JR and his legal team got involved that we won. It shouldn't be this difficult. I can't fly because of the Wi-Fi on the plane, drive very far because of the cell towers on the street, go to cafes and restaurants because of wireless, buy a new car because of wireless, live in my apartment because of wireless, buy a new car because of wireless, live in my apartment because of wireless, keep a job, go back to school—the list is endless, and I can't even begin to describe what I've experienced on a daily basis.)

1720 -JL, Switzerland – The benefit-risk ratio must be properly assessed... all living beings should have the choice to live without harmful disturbances to their health.

1721 – LR, France – We have EHS in the family.

1722 – MR, France – I am personally affected by EHS.

1723 – Danique JONGEN, Nederland – I am electro-hypersensitive myself.

1724 – Brigitte FLAHAULT, France – I know many people with EHS: they are excluded from social life and rendered invisible. A blatant injustice.

1725 – NL, Belgium – Because they build "little prisons in the meadow" for prisoners and nothing for us, because I'm left to fend for myself, because this has to change, because this world

is inhumane! And gilding our chains won't make me any quieter, and people with EHS have a right to a place, a right to life, and to life and for life (...)

1726 – HW, Germany – I am concerned.

1727 – AL, Switzerland – I feel concerned by this technological abyss.

1728 – MP, France – My life has been thrown into disarray since my building was connected to social housing. It's difficult to find a job I lost shortly before. Without a job and money, there's no rental, not even in the countryside. Many are looking for houses outside the cities. Many have more than 900 euros a month.

1729 – Sophine PUECH, France – I have been electrohypersensitive since 2016. I created the association Waves and public health in La Salvetat-Peyrales (12440).

1730 – Annie LEYSEN, Belgium – I am electrohypersensitive.

1731 – AB, France – I am convinced of the harmfulness of electromagnetic radiation.

1732 – Laurent MUNIER, France – I am EHS-MCS.

1733 – HG, France – We owe it to the present and future, and to Humanity, which also begins with our children. Respect for LIFE.

1734 – Dominique ZMOOS, Switzerland – It's obvious.

1735 – MM, France – I feel that my health has been affected after decades of constant use of computers, the internet, and mobile phones, and after working in places with heavy use of household appliances and living in houses with outdated electrical equipment and no grounding. I wish better for my children and everyone in general. I also oppose the social exclusion of those affected by these multiple harmful effects!

1736 – Ingrid BERGGREN, Sweden – I was exposed and injured in 2014, developing tinnitus, dizziness, hearing loss, as well as all the symptoms associated with EHS. These symptoms constantly recur when I am exposed, particularly to Wi-Fi, masts, mobile phones, microwave ovens, etc. Coughing and mucus formation are immediate symptoms. After prolonged exposure, the symptoms listed above persist for 1–3 days. After 1–3 days of minimal exposure, the symptoms disappear. This has been the case for 11 years now.

1737 – AK, Germany – I know people who are affected by it, and I might perhaps be affected myself one day. I take the danger seriously. These are just some of the other messages we have on this subject, and people do not want to be dismissed as "tinfoil hat" wearers

1738 – AG, Slovenia – It is about reducing electrosmog.

1739 – RG, Luxembourg – I'm EHS.

1740 – CP, Germany – I am concerned.

1741 – Pierre COUTOUX, France – People with EHS (Electromagnetic Hypersensitivity) are sentinels of the environment. Their warnings must be taken into consideration indefinitely.

1742 – OL, France – EHS MCS MYSELF.

1743 – Nicolas ROUBAUD, Belgium – There needs to be more conscience in science.

1744 – CS, France – By support.

1745 – Milan RAFO, Slovakia – Electromagnetic smog is a filth that I see on me, around me, and in nature. Unfortunately, it is everywhere.

1746 – MM, Slovenia – I sign because I am sensitive to electromagnetic smog. In heavily polluted areas I cough constantly and later have insomnia.

1747 – Cornelia STOCKER, Switzerland – I fell ill because of e-smog.

1748 – EK, Czech Republic – I have health problems, insomnia, heart palpitations, headaches.

1749 – JF, Switzerland – This is a real public health problem! Let's act before it's too late!

1750 – FD, Luxembourg – We are victims of electromagnetic pollution. Our European, national, and local elected officials, our health institutions, and our doctors can no longer ignore us. Sign and share this appeal. Let's unite; our numbers will be our strength.

1751 – CM, France – I am EHS.

1752 – PH, Belgium – This problem concerns me.

1753 – SB, France – I have electrohypersensitivity and chemical sensitivity.

1754 – CL, France – I am concerned and I think that more and more people will be, and that it is therefore urgent to put in place measures quickly and to help as soon as possible those suffering greatly from their EHS.

1755 – IB, Germany – I want to help people who are suffering.

1756 – RB, France – Because it's an impossible situation for highly sensitive people

1757 – JH, Senegal – That's right.

1758 – Andrea Tiemann, Germany – I have been electro-hypersensitive for 15 years. Since last year, I can't even visit my parents anymore because the community installed wireless water meters throughout the village. In my own house, I have used protective paint in two rooms, but I can no longer use the garden because of the neighbors' Wi-Fi radiation. It's getting more and more difficult. I hope this appeal helps.

1759 – ES, Spain – I have this illness.

1760 – Linden Brough, UK – Need to apply the Precautionary Principle to electromagnetic fields – risk of serious harm to children and young people...

1761 – EJ, Belgium – Electromagnetic raiation destroys health, makes life difficult, and shortens it. Just look at the deterioration of health statistics since 2000. To ignore and deny this is to expose oneself even more!

1762 – SM, Germany – Health is our most important asset.

1763 – Paul VOS, Belgium – I am also an electrohypersensitive person .

1764 – MM, France

1765 – Mireille POTTIER, France – I am affected, EHS since 2012.

1766 – AL, Denmark – We all have the right to live a healthy, active, and normal everyday life without having to be exposed to things that make us ill.

1767 – JC, France – Danger.

1768 – Isabelle HEUSKIN, Belgium – I am electrosensitive.

1769 – Silviana RIVERA FIGUEROA – Spain – We are an invisible collective because our pathologies are not visible and also «officially» invisible because we are pointing out the problem: chemical and electromagnetic toxins are harmful

1770 – Marie-Luce CRAPS, Belgium – I suffer from tinnitus and am very sensitive.

1771 – Aggy ROCCO, France – I have a friend who is electrosensitive.

1772 – AS, Germany – A friend is affected.

1773 – VV, Switzerland – Awareness of the harmful effects of electromagnetic radiation is imperative.

1774 – HP, Luxembourg – When I am near mobile phone antennas and Bluetooth devices, I feel pressure on my chest and nausea. Please stop the race to ever-increasing radiation.

1775 – Carole Fouquet, France – Having developed EHS (Electromagnetic Hypersensitivity), my life has been turned upside down, and I recognize in this appeal all the problems I encounter. The global denial of this reality is not «right.» Things must change. Life must be protected.

1776 – SF, Germany – It is necessary to reduce the limit values because there are many studies, results and experiences that show that there are effects well below the limits.

1777 – Alexander KLAR, Germany – I sign the appeal because I believe that the demands of businesspeople should not have the final say.

1778 – Xavier MICHAEL, Luxembourg – It's dangerous for living beings.

1779 – CR, Austria – I am personally concerned.

1780 – ML, Austria – Radio frequencies make us sick.

1781 – Giovanna GIRARDI, Luxembourg – We have a right to energy free from all harmful effects.

1782 – LR., France – My mother is electrosensitive, and we must protect ourselves from being bombarded by electromagnetic radiation everywhere. Our brains cannot withstand it, even for those who do not exhibit electrosensitivity. And we must protect children.

1783 – Miro DRABIK, Slovenia – Stop 5G.

1784 – VB, Austria – I am sensitive to radiation.

1785 – M. A, France – I was diagnosed with EHS (Electromagnetic Hypersensitivity), and I have faced enormous obstacles in my daily life ever since. My professional life has been a living hell... my disability is not respected, even by institutions... the suffering I endure is largely ignored...

1786 – ML, France – EHS.

1787 – CP, France – I just want to see where it leads.

1788 – Lauraine Vivian, UK – I suffer with EHS and, like the late Arthur Furstenberg, I know that this technology is damaging the earth.

1789 – CC, France – I strongly support the cause.

1790 – HH, Germany – Here on Earth, a crime is being committed against all living beings. No, the electrosensitivity of men and women is slightly different, but the condition is abrupt.

1791 – CD, France – I am EHS and electrical networks are destroying nature and humans.

1792 – Kailash COOKE, Switzerland – I have suffered with electromagnetic sensitivity for 25 years.

1793 – Tanja KEROLA, Finland – I want a safe and secure life for us humans and for nature.

1794 – Aurélie LUKALASANA, France – I am EHS.

1795 – DL, Luxembourg – Important for well-being.

1796 – MC, UK – EMP adverse effects are based on science, not speculation. Therefore, anyone who resists the negative implications of EMP either doesn't care or has a personal motive for denial. We, the people, demand that the government we fund exert immediate and maximum effort to establish spheres of regulatory and guidance safety around the public deployment of electromagnetic radiative technologies.

1797 – Patrick GAJAN, France – Wife EHS.

1798 – Jean-Paul THOMAS, France – I am electrosensitive and recognized as such. My daily life is becoming increasingly difficult because of EMF radiation that makes me ill.

1799 – UF, Germany – It is long overdue to establish protected zones, and the risk posed by mobile phone radiation receives virtually no place in public debate.

1800 – FR, Austria – Diagnosed (...) for fibromyalgia, Sensibilità Chimica Multipla, Elettrosensibilità (...)

1801 – LN, Belgium – It is important to preserve the health of living beings on Earth!!!

1802 – CM, Germany – I fear the further increase in health damage caused by wireless radiation and am against the trivialization/denial of (possible) environmental and social consequences/damage!

1803 – SW, Germany – I physically feel the increased electromagnetic fields.

1804 – Michale MUMM, Germany – I suffer from EHS and, because of this, am being pushed out of public life more and more

year after year. It is time to finally show consideration and to take those affected as well as possible future affected persons seriously.

1805 – MB, France – I am electrosensitive and I have no rest or recovery zone.

1806 – MF, Slovakia

1807 – Isabelle RIGER, France – My health is deteriorating due to my electrohypersensitivity.

1808 – RL, Denmark – I myself have problems with radiation from smart meters, mobile phones/masts and Wi-Fi, and was seriously ill as well as having severe cardiac arrhythmia on top of that, … when I had my computer connected by cable and put steel mesh in front of my smart meter (because I had read that it might possibly help) … so that I do not have Wi-Fi in the house, I have become completely healthy again. (Except if I stay for a longer period of time close to mobile phone masts/people with 5G phones, etc.) … and several people in my circle have developed problems after 5G masts were installed in the local area, – and felt better when they protected their bedroom with steel blankets for protection against radiation.

1809 – KH, Luxembourg – I sign the appeal because friends are affected and I am concerned about our health.

1810 Leire AGUIRRE LIZARRAGA, Spain – I sign.

1811 – VG, France – I have friends directly involved.

1812 – DN, Switzerland – I am electrosensitive and I suffer from it.

1813 – CD, France – I know people who suffer from this.

1814 – Katrin OHLHOFF, Germany – It is time to guarantee the fundamental right to health for people with EHS as well.

1815 – ML, France – It is essential to take this situation into account and to set up white zones.

1816 – Bernie BEAUMONT, France – To help.

1817 – SS, Belgium – I wish that this scourge would cease and that people with disabilities could live decently and have access to healthcare.

1818 – JP, Belgium – I experience the symptoms of electromagnetic hypersensitivity. Because I believe there's room for everyone. The hyper-connected AND the electromagnetically sensitive.

1819 – AH, Belgium – I wish that people who are not electrohypersensitive understand that this is a public health issue and that they are just as concerned (and in danger), even if they do not feel the disturbances of electromagnetic radiation; that many current pathologies are, in whole or in part, generated by the expansion of technologies based on electromagnetism.

1820 – AS, Germany – I am personally concerned.

1821 – RL, France – I am EHS and I would love to be able to live more simply in the world!

1822 – ML, Belgium

1823 – Bernard GOSSELET, Blegique – I am an EHS that all.

1824 – Daniel MORVAL, Belgium – I am impacted by the harmful effects of EMF radiation.

1825 – Anne BALLIEUX, Belgium – Because the most fundamental rights of EHS people are not respected.

1826 – MT, Belgium – I am personally impacted by electromagnetic radiation and know other people in my circle who suffer from them.

1827 – TA, Belgium – There is electromagnetic radiation EVERYWHERE, outside, inside because of the neighbors, at work, in transport we are polluted from everywhere, we're fed up.

1828 – Michèle DARON, Belgium – I myself am EHS.

1829 – BB, Belgium – My health is ruined by this raiation (my digestive function is completely impaired). Hospital stays are hell.

1830 – AD, Belgium – My partner is EHS.

1831 – HH, Belgium – I have been electro-hypersensitive and chemically sensitive for several years. I am isolated and confined. I have no social life. I am rarely understood or taken seriously by some doctors. I experience varying degrees of discomfort during medical examinations in hospitals or other healthcare settings. It is truly distressing. I am worried because we are increasingly surrounded by connected devices and ever more powerful antennas.

1832 – Nina Stein, Belgium – I am angry: EHS, my health now depends on political and commercial decisions to which I have no access. I am angry because I have been stripped of the power to take care of my own health, something I had managed to do until now (87 years).

1833 – Valérie Claeys, France – I am experiencing this health emergency firsthand. Before being affected by EHS, we all prefer to ignore that it's even possible. And when it happens to you, it's a tragedy. Life becomes a daily struggle for survival.

1934 – Elisabeth LAMBERT, Belgium – I am very motivated by the possible return to a more social life.

1835 – Didier VAN WALLENDAL, Belgium – I am electrosensitive.

1836 – Jacqueline RENTEUX, Belgium – …my daughter suffers from electrohypersensitivity.

1837 – MC, Belgium – I myself am hyper sensitive to electromagnetic radiation and this impacts my health.

1838 – Gérard MARIELLE, Belgium – I am electrosensitive and I suffer from it! I need a space where I do not suffer, something that every living being, of every kingdom, should be able to benefit from, now and in the future and everywhere, in the interest of all.

1839 – CL, Belgium – I sympathize with the suffering of the ehs and wish to help them in their recognition.

1840 – ED, Belgium – I am concerned about the health consequences of the intensification of electromagnetic radiation and aware of the difficulties faced by electrosensitive people.

1841 – ID, France – I am electrosensitive.

1842 – André FOGUENNE, Belgium – The health of all living beings (humans, domestic animals, wild fauna and flora) is seriously affected in the vicinity of increasingly invasive emitters.

1843 – AA, Germany – I want to support people.

1844 – Sylvain VERM, Belgium – It is irresponsible to increase radiation to this extent; we must return to reason. This is urgent.

1845 – Christine SORSANA, France – I experience several of the symptoms described in the testimonies of people diagnosed as electrohypersensitive.

1846 – Paul HEROUX, Canada – I am a scientist who understands the basic mechanisms of EHS.

1847 – DD, Luxembourg – I suffer from electrosensitivity.

1848 – Jean-François SCHEFFERS, Belgium – I am in contact with people with EHS who are going through a terrible ordeal because they no longer feel they belong in our societies. I am seeing an increase in the number of people with EHS.

1849 – DN, Belgium – I sign this appeal because it's becoming unbearable. 5G antennas are springing up everywhere, and those already installed keep multiplying. We no longer know where to live, and it's polluting our villages. Being within 1 km of one is torture. Holidays and travel are a thing of the past; even healthcare is becoming 5G-enabled, and antennas are proliferating on hospital rooftops! Chronic illnesses and rare diseases are becoming commonplace! And the deaths... let's not even go there. It's human genocide. There's nothing else to say. The antennas and everything related to 5G, Wi-Fi, or anything else must simply be removed for the sake of human life expectancy; otherwise, catastrophe is inevitable. The Earth won't let this continue either, and we're already seeing the effects... I sign. And I'm crossing my fingers that elected officials and doctors will follow their consciences (...).

1850 – TH, Belgium – I've been susceptible to electromagnetic radiation since the antennas started spreading, and it's ruined my daily life. It began with a simple crackling sound and has progressed to constant tinnitus, inexplicable pain, excruciating migraines, etc. I'm fed up with suffering, so I sign.

1851 – OM, Belgium – I understand and support all people with EHS (Electromagnetic Hypersensitivity), and I am convinced that we are ALL electrosensitive due to our physiological makeup; this is an established fact! And if this headlong rush continues, we will all become ill from this damn electromagnetic radiation. Especially since it would only take simple political will to regulate all of this properly by drastically lowering emission levels to acceptable thresholds, just enough for outdoor coverage: it is indeed unnecessary to have coverage inside buildings; other solutions exist for indoors! The gross incompetence of our politicians, coupled with corrupt lobbies, has put us in this situation.

1852 – LV, Belgium – The entire population is affected.

1853 – Annie LEYSEN, Belgium – I am electrohypersensitive.

1854 – OS, Belgium – It is urgent to act.

1855 – EL, Belgium – Because it is like this for me personally, and because we humans should not make our environment even more hostile to humans. We naturally need spaces for our organisms!

1856 – MB, Germany – I live in the house of a person affected and I believe that radiation poses a health risk to everyone.

1857 – DH, Germany – II am concerned.

1858 – JP, France – I stand in solidarity.

1859 – CD, Belgium – I have become hypersensitive to various high-frequency radiation and sounds. I find it difficult to live in my apartment and have already moved several times.

1860 – MB, France – Affected myself by EHS.

1861 – Virginie VERRILLI, France – I am Ehs, chronically ill since 4G.

1862 – MB, France – I have EHS and I haven't gone out for 7 years. I live in seclusion at home with appropriate protective equipment.

1863 – FC, Belgium – It is becoming increasingly difficult, and now impossible, to protect ourselves from the cumulative, exponentially increasing EM bombardments that our ignorant or complicit "decision-makers" are inflicting upon us, in defiance of our health.

1864 – MM, Belgium – I am EHS.

1865 – MF, France – To support the struggle of these people.

1866 – Maryna ADAM, France – I am EHS and I see every day the health disasters caused by EMF radiation.

1867 – CB, Belgium – It's too much and we're going much too fast and there's too much surveillance and less freedom, which is affecting human health; this lack of humanity is becoming intolerable.

1868 – Eke VRIENS, Nederland – Because too many people have become seriously ill from EMF and there are almost no places left where EHS people can lead a normal life. Therefore, the expansion of EMF must be stopped.

1869 – LG, France – This invisible pollution is catastrophic and nobody cares about the victims because they don't see it and don't understand it.

1870 – Martine GRYNBERG, Belgium – I am personally affected. I would like to no longer feel «abnormal» and for the reaction I get when I mention this problem not to be: she's crazy or depressed. I would like to see adaptations in cinemas and theaters, for smartphones to be turned off, and for trains to reserve a car without electromagnetic radiation.

1871 – Jean-Marc HELSON, Belgium – Polluters must also pay.

1872 – LC, Belgium – I have been recognized as EHS for 20 YEARS with symptoms constantly increasing with each new layer of EMF and their intensities.

1873 – CR, Belgium – There is an urgent need for survival; electromagnetic radiation is invisible, we have so many problems to solve. Water, air, etc....

1874 – AD, Belgium – I cannot bear silent suffering.

1875 – ER, France – I think it's a priority.

1876 – FB, France – I have a relative affected by this disability.

1877 – JK, Slovakia – For clear skies.

1878 – CP, Romania – I am electrosensitive and I understood from my own experience the danger of artificial electromagnetic radiation.

1879 – MA, Germany

1880 – DC, Romania – I am concerned about our health and the impact of IT on it...

1881 – MB, France – I want to remain free.

1882 – FB, Belgium – I had to move because of artificial electromagnetic radiation that was making me sick, and I hope that here in a small village we will remain protected. I'm also thinking of my children and grandchildren who live surrounded by Wi-Fi and 5G in France and elsewhere, but who refuse to believe it's bad for them. Thank you!

1883 – JD, Belgium – I am electrohypersensitive, I suffer from vertigo, lack of coordination of movements, etc....

1884 – Sophie RICHARD, France – Too much proven danger!

1885 – Leedert VRIENS, Netherlands – I am electrosensitive myself, and it took me years to find the cause of my health problems: the DECT phone. I know many people have had (and still have) health problems caused by the EMF of wireless communication.

1886 – ML, France – A friend's daughter is suffering from ELECTROHYPERSENSITIVITY.

1887 – Fatima JBAILI, Belgium – Because my health is failing, because policies prioritize economic power and profitability at the expense of citizens' health.

1888 – VJ, Belgium – I sign because each of us is directly affected by exposure to increasingly strong electromagnetic radiation and suffers damage from them; for the health and future of our children, we must feel concerned, of course!

1889 – HH, Belgium – I know several people who are electrohypersensitive; it is a daily suffering.

1890 – EG, UK – I have evidence of overexposure to EMF fields, (...), which the local authorities and the housing association will not investigate.

1891 – MG, Norway – I have had epilepsy all my life, but only two seizures until the 3rd/4th/5th generation started, then the nightmare began. Epilepsy is a horrible situation where the brain goes berserk for some reason (some foods/drinks can also trigger a seizure). (...) I hope someday peace will enter our lives again. Best thoughts and vibes to all of you, take care.

1892 – JH, France – I no longer know how to protect myself, I no longer go out, my life is hell, I no longer know where to take refuge! My cooking is slow!

1893 – YE, France – I am electrosensitive and therefore feel very concerned.

1894 – PR, Belgium – I am electrosensitive and it is becoming simply unbearable.

1895 – Patricia CAPELLE, France – Knowing some electrosensitive people, and being one myself to a lesser extent, I can only be in solidarity.

1896 – Lambert VANDERERHEYDEN, Belgium – I am convinced of the suffering endured by those thus affected and the lack of responsiveness from those who are supposed to represent the general interest, particularly in matters of health, rather than favoring, to put it mildly, the capitalist sharks of telecommunications and other sectors who constitute the true holders of real power – economic and financial – within our country. (...)

1897 – Isabelle BATAILLE, Belgium – As a physiotherapist, I support initiatives that look after the well-being and health of everyone.

1898 – LM, Belgium – Yes, all this electromagnetic radiation is worrying for everyone, and even more so for the ultra-sensitive.

1899 – Luciane TOURTIER, Belgium – Thank you for your initiative!

1900 – MT, Canada – I am electro-sensitive and constrained by the situation.

1900 – MT, Canada – I am electro-sensitive and constrained by the situation.

1901 – PL, Belgium – This is an emergency and everyone could become electrohypersensitive.

1902 – DG, Belgium – I have a friend who is extremely electrosensitive.

1903 – Viviane ALLARD, France – I have a friend who is electrosensitive and suffers from EMF radiation.

1904 – Christine Postiau, Belgium – Message to the operators and manufacturers of wireless technologies, with the eager collaboration of the national/international authorities: Never satisfied with profits or power, You flood me with your murderous electromagnetic radiation. They pass through my walls and partitions, My doors and windows Without being invited: Violation of the home! They pass through my body day and night. From head to toe, there is nothing but pain, suffering, Abominations in abundance: Inhuman and degrading treatments that you inflict on me! Torture on a daily basis! Your murderous electromagnetic radiation pierces my body. Nights and days, relentlessly, they impose themselves upon it, Powerless and defenseless. They penetrate it, destroy it ever more deeply, Consume it: Rapes! And the killing of an innocent woman! ... among so many others...

1905 – Patrick MARTIN, France – Because I know people who are electrosensitive and their daily lives are unbearable.

1906 – SA, Belgium – I sign to protect the health of citizens as a fundamental right and to demand that the health consequences of electromagnetic radiation be taken more seriously.

1907 – RH, Austria – Because I have known the issue for a long time through my work in the electronics field.

1908 – Raynald HUARD, France – I myself suffer from EHS and chronic Lyme disease. Tick bite in Germany with severe erythema migrans in August 1996...

1909 – OE, France – I am aware of this scourge because I have a friend who is severely affected.

1910 – FJ, Belgium – I suffer from strange symptoms and must protect myself during sleep, in the car and in theaters or crowded rooms where my heart rate goes haywire... It is in the forests, mountains or seaside that I feel reborn.

1911 – YP, Belgium – I have heart problems due to electromagnetic pollution.

1912 – MB, Slovakia – I live right next to this catastrophic tower, and when they built it, NOBODY came and asked us if we agreed with it. There are many scientific studies that confirm the negative impact of electromagnetic radiation on health and the environment, and I'm willing to do EVERYTHING to stop this

1913 – NB, Luxembourg – Essential!

1914 – Elizabeth VINDENES, Norway – I am electro-sensitive and worried about my grandchildren's future in a technocracy that is lying to us when they deny the harmful effects of EMFs

1915 – Benoit LOUPPE, Belgium – As a scientific consultant in electromagnetic environment, I have been confronted with the problem of EHS and its multiple consequences for over 30 years.

1916 – Mela Lodie, Netherlands – Our health and that of nature should have priority. Small changes in frequencies can produce harmony.

1917 – Alexandra SCOBLE, Australia – We need to stop this dangerous invisible pollution.

1918 – Thomas FREMONT, USA – It is only just.

1919 – Maria Holleran, USA – The use of EMPs is evil. God does not approve, and we decree an immediate cessation of activities. Justice must prevail accordingly.

1920 – AH, Denmark – I myself suffer from EHS!

1921 – Karl FISCHBACH, Germany – Because we ourselves must suffer from electrosmog!

1922 – VH, Belgium – I wish for a decrease in the installation of antennas, the race for the latest 3G technology, and the widespread presence and use of electromagnetic radiation. I am also signing in solidarity with those who suffer from this syndrome.

1923 – LS, France – I know people who are electrosensitive.

1924 – Alban COUSINIE, France – I am convinced of the physical reality of electrosensitivity after speaking with victims and seeing scientific evidence on the subject.

1925 MB, Nederland – I have a severe form of EHS and suffer greatly from the radiation, have moved several times because of it, and still have not found a healthy home. Neighbors and also institutions do not take EHS seriously and therefore discriminate against you. It should be noted that the government of an unjust norm has been taken into account in the absence of any possible overturning of the effects on the risks involved: the plants die naturally. That's what it's like! I call on them to do so. I would like to have my health and freedom back so that I can go and stand wherever I would like to go and what is not possible now because I then become very ill from electricity and radiation far below the ICNIRP limit.

1926 – US, Germany – I know what people with this sensitivity feel and how much they suffer and are severely limited in their daily lives!!

1927 – DC, France – I am EHS.

1928 – MP, Belgium – I am diagnosed as electrosensitive and I want this to become a public health issue.

1929 – CJ, France – I would finally like to be able to use public services without getting sick while doing so. Thank you.

1930 – Elizabeth PROTEAU-PARADIS, Canada – My mother has EHS. Things need to change.

1931 – Jacqueline Fanja FOUCHER, France – I have a close friend who suffers TERRIBLY from electromagnetic hypersensitivity. She is socially isolated, suffers from constant BURNING; she no longer sleeps, or sleeps very little, because of electromagnetic radiation that even passes through the wall from her apartment to her neighbor's... She can no longer work comfortably without taking breaks every hour... She needs to think about moving... this is no life!

1932 – Fabrice PAMART, France – To support a friend, who suffers from this disease, as well as all other patients.

1933 – RL, Germany – It is obvious that we must protect the hypersensitive.

1934 – AV, Belgium – I am EHS.

1935 – MK, Germany – I think it's a success.

1936 – Peter NEWERLA, Germany – I think it is important to protect minorities and health.

1937 – Marc MOSSOUX, Belgium – It is important to recognize the influence of electromagnetic radiation on health.

1938 – Benjamin SEYER, Austria – Because I have been EMF sensitive for a couple of months now and it's a huge problem. If this is not addressed, it will damage our society massively.

1939 – ER, Belgium – I am aware and concerned about the exponential increase in electromagnetic radiation for health and the environment.

1940 – Catherine DEWEZ, Belgium – The environment in which we live is becoming more and more polluted and our bodies are finding it increasingly difficult to maintain homeostasis.

1941 – SG, Germany – I fully understand the distress of highly sensitive people and, thanks to a friend who is affected, I am fully informed about the effects and the vulnerability.

1942 – Jostein Eliassen, Norway – People should have the right to determine the level of non-ionizing radiation in their own homes. If exposure is strong enough, the unpleasant symptoms of tingling in the head and muscles appear about a day after exposure.

1943 – MR, Canada – I am sick from emF radiation and it is painful.

1944 – Milène BRULIN, France – I am sensitive to electromagnetic radiation and I know other people who are affected daily by this pollution, which we are increasingly powerless to protect ourselves from given its omnipresence.

1945 – SM, France – I suffer from electrosensitivity and have lost my health and job because of it at the age of 45. Please help with this fight for nature and against the abuse of EMF.

1946 – Anne Delvaux de Fenfe, Belgium – I observe that the telecommunications lobby is so powerful that it is hindering the publication of the conclusions of studies proving that non-ionizing radiation is carcinogenic and jeopardizing the careers of scientists who denounce its practices. Nature and human health require stricter emission standards, based on medical studies independent of telecommunications and big industry.

1947 – JW, Luxembourg – EHS is a real threat .

1948 – PB, France – I have a friend who is concerned.

1949 – Colette MORETTI, France – We are all electrosensitive.

1950 – Haidar EL SAFFAR, Lebanon

1951 – Ann-Joelle NEIRYNCK, Belgium

1952 – IH, Germany – My daughter urgently needs a living space without pulsed microwaves. This EMF radiation is harmful to humans, animals and nature.

1953 – CD, Germany – EMF, particularly in the non-ionizing range, causes damage.

1954 – MA, Norway – This bothers me and prevents me from living my daily life. Even at the doctor's office and in the hospital, the radiation is so intense that I feel very uncomfortable.

1955 – Eric Van PRAAG, Belgium – I know someone involved and I have made inquiries.

1956 – GM, France – I have a friend who is affected by many symptoms and can no longer lead a normal life.

1957 – JK, France – My wife is electro hypersensitive, I probably am too, and we are bathed in a fog more or less thick from which we can no longer escape.

1958 – Tommaso DI BLASI, Italy

1959 – Gianluca BUONOCORE, Italy

1960 – Régis MAYO, France – I am being targeted (...)

1961 – Patricia DE KEYZER, Belgium – While they may be invisible, it is certain and proven that electromagnetic radiation has an impact on our health. I am convinced of this. Having a friend who is a victim, I feel complete solidarity both with those who know the reasons for the decline in their quality of life and with all those who suffer without knowing the cause.

1962 – Stephane GENER, France

1963 – JA, France – I cannot find a white zone in my department, I have been diagnosed by Dr. TRIPODI with EHS since August 2022.

1964 – FD, Belgium – People with EHS are in a desperate and hopeless situation and no one cares. It is high time that our fundamental rights are respected (low radiation housing, workplace, hospital room, means of transportation, etc.)

1965 – GB, Germany – I myself am electrosensitive. Because 5G, mobile phone radiation, and cell towers endanger the lives of animals, humans, and nature – which has already been scientifically proven. A great dilemma that is killing us. Our necks are going to break!

1966 – PN, Belgium – I have a friend who is electrohypersensitive and whose life has become very difficult.

1967 – HD, Belgium – (Health takes precedence over money.

1968 – MC, Spain – Interest

1969 – Partricia MARTIN, France

1970 – Anaïs BIS, Belgium – I care about people who are electrosensitive.

1971 – CL, France – I myself suffer from electrosensitivity.

1972 – GZ, Belgium – Yesterday I was not at all aware of it, but since I have become chronically ill, I know better. From the exponential point of view of exposure to electronics, wireless, IoT in smart devices, and so on, at home and in the office, and in combination with exposure to various EM radiation outdoors from all kinds of antennas, it can potentially be very dangerous for humans and the environment. We see you with the best items on the plates and the best items on the plates. It is difficult to easily unmask invisible enemies and trace the precise causes of disease symptoms, but there is one truth that nobody can deny: in our daily lives there is a toxic overdose of all kinds of electromagnetic radiation.

1973 – Christine WEISS, France

1974 – OH, Germany – Because politics must take seriously the ever-growing number of those who sometimes suffer severely from the effects of electromagnetic radiation. This action is no longer minority protection. It must be noted that health is at stake, and therefore the issue falls under the government's duty of precaution towards the population.

1975 – Jean-François GUENARD, France

1976 – RC, Germany

1977 – Gerd Pfister, Germany

1978 – BM, Germany

1979 – Pascale MAGDELEINE, France

1980 – Ariane LEBALLE, France

1981 – Ursula KNECHT, Germany

1982 – JB.,B., France

1983 – AD, Belgium – I am electrohypersensitive.

1984 – MR, France – Anti antenna, etc.

1985 – SB, Belgium – It makes me very sad that electromagnetic fields (EMFs), which are so harmful to living things, have been allowed to be present in everyone's lives, even if we don't want them. I have never understood how things that harm living things—fuel, Coca-Cola, cigarettes, plastic, EMFs—are accepted. How is this possible? The number one requirement should be compatibility with living organisms.

1986 – LK, Germany – Ich bin besorgt.

1087 – HN, Belgium – To help the EMP victims.

1988 – MG, Belgium – Several people around me suffer from EHS. I believe it is time for Belgian and European legislation to take into account the suffering of those affected.

1989 – Marie-Claude LEFRANCOIS, Canada – Having suffered from this illness myself, I can assure you that it is debilitating in every way: physically, mentally, socially, and economically. I have done extensive research on the subject and made many attempts to raise awareness at our various levels of government, without success. The number of hours I have spent sending messages, research summaries, and testimonies reflects my hopes, which are gradually dwindling in the face of widespread denial, carefully maintained by two individuals who profit from this crime.

1990 – Laurence DRABS – I myself am EHS. I can only sleep in a Faraday cage. I had to change jobs because there were too much electromagnetic radiation in my previous workplace (a secondary school!!!).

1991 – Anthony JACOBS, USA – We know 5g is a weapon, patents prove this!

1992 – AJ, Spain – I am electrohypersensitive .

1993 – IA, France – 14 years of exclusion; of no access to care... 12 years sleeping in the car and precarious access to accommodation (shower, food) depending on the arrival of new neighbors; etc.

1994 – Bent NIELSEN, Denmark – Because I am very bothered by the microwaves emitted by mobile phones and mobile phone antennas, all the birds have also disappeared.

1995 – Svetlana SAHAKYAN, Belgium – Because street LED 5G lamps and 5G towers make me sick, enormous high EMF frequencies, very dangerous for all living beings. EMF is cellular radiation. This must stop immediately.

1996 – Sylvianne HONOREZ, Belgium – I suffer from electromagnetic hypersensitivity, and with Wi-Fi being everywhere, I increasingly have to avoid going to many places. This causes me fatigue, headaches, diffuse pain, paresthesia, tinnitus, sleep disturbances, and all sorts of very debilitating symptoms in my daily life.

1997 – Kathy PLANCKAERT, France – Myself and my children are EHS and I am absolutely convinced of the negative effects on humans, animals and plants. animals and plants.

1998 MD, Belgium – Radiation, the invisible health enemy of humanity that we haven't talked about for a long time.

1999 – DH, Belgium

2000 – Véronique LHOMME, France – I experienced this phenomenon with my partner.

2001 – FL, France – The future of our children is at stake...

2002 – PD, Luxembourg – My wife is electrosensitive.

2003 – Claude FOURNIER, France – I know several dozen people with EHS, some living in dramatic conditions. Preventive and curative measures must be implemented quickly.

2004 – RD, Canada – For my mother-in-law who has been living with electromagnetic hypersensitivity (EHS) for many years, hoping that your voices will be heard!

2005 – Laurence FANCELLO, France

2006 – HK, Morocco – Getting EHS recognized. It is an invisible condition causing daily difficulties.

2007 – Sarah AUDOIN, France – I am a victim of electromagnetic harassment ...

2008 – Eva BREUER, Germany – I myself suffer a lot from massive EMF pollution and the future prospects seem terrible to me!

2009 – Ghislain MYLLECAN, Belgium

2010 – YE, France

2011 – PW, Belgium – I want all 4G and 5G to stop immediately; we are dying, sick, brain damaged, DNA damaged, direct organ damaged; this is the most dangerous energy weapon.

2012 – MD, Belgium – Because I myself suffer from radiation and I worry about my family and my fellow citizens.

2013 – Arthur HOFFMANN-OSTENHOF, Austria – I myself have had EHS for decades. A normal, a bearable life is not possible for me in today's irradiated cities. I NEED WHITE ZONES. The mobile phone industry and politicians have some users, they may be affected by the symptoms and they may be ignored, and the warnings may be ignored. The mobile phone is in the hands of the people, and there are huge numbers of people.

2014 – LA, Denmark – I suffer from technology. I want to offer my successors a better living environment.

2015 – EG, France – Before the signs of electro-hypersensitivity became obvious, I was unaware that living beings were electro-sensitive by nature, because we are taught to ignore it. All these emitters that multiply in our living environment despite ourselves disrupt our metabolisms and proprioception, also for many species for whom the connection to the Earth's cosmic and telluric fields is vital.

2016 – FB, Belgium – Because I have a friend who suffers from it and it's really very difficult to live with. Because other friends also feel affected by exposure to electromagnetic radiation. Because I protect myself from it (no wifi, airplane mode, etc.), it makes perfect sense to me. Because I want to leave our children a «decent» environment. Because I am convinced that the race

for new technologies is not the right direction (pollution for their production, electromagnetic pollution, a headlong rush, a distancing from reality, from matter, from human relationships).

2017 – CD, France – I sign to support a friend with EHS.

2018 – AD, France – I feel concerned.

2019 – MP, Belgium – In solidarity with the sick.

2020 – EL, Germany – I am myself electrosensitive.

2021 – MM, Belgium – Electrosensitivity is truly a great suffering from many points of view, social isolation and political injustice.

2022 – MH, USA – My sister is suffering from EHS and it breaks my heart to see her in this condition.

2023 – Madeline SAUSSUS, France – I have suffered from EHS since 2013, and I had to stop working. I am now retired and have left the city for a less polluted region.

2024 – Fanny CAUTAIN, France – Everyone has the right to a dignified life.

2025 – AA, Spain – I sign the petition because I am one of those affected after three enormous antennas were installed next to my house and because, since then, although I am fortunate and was able to recover little by little through a great deal of sacrifice and with the support of my family and friends, I am meeting more and more people whose lives have been destroyed, and because it affects us all, even though some people do not associate their health conditions with the increasing exposure to electromagnetic fields. Please, stop this madness now!!!!!

2026 – MV, France – Hello, I'm appealing because I'm affected and more and more people will be! Unfortunately... travel is becoming increasingly difficult, the places we can go are restricted, whether it's for shopping, administrative tasks, leisure outings, or visiting family and friends...

2027 – JM, Germany – Because acquaintances are involved .

2028 – Micele FARDEAU, France – A MEMBER OF MY FAMILY HAS EHS MCS

2029 – MB, Belgium – Too many people around me are getting increasingly unwell. We are all subjected to radiation that we cannot perceive. Starting with 5G, smart electricity meters, smartphones, electric cars... Where is this leading?

2030 – MH, Norway – My wife has had EHS for 19 years already!

2031 – GR, Germany – I am myself concerned.

2032 – AN, Belgium – This could have been done a long time ago (...)

2033 – SS, Denmark – 3-4-& 5 G is dangerous for humans, animals and nature.

2034 – CS, Germany – I sign the appeal because I am affected by EHS and suffer from it. I wish things would change.

2035 – JA, France – Being myself, my life has become a real ordeal!!! Let's stop this madness as soon as possible and think of our children!!!

2036 – CM, Belgium – This type of pollution is dangerous, imposed, and still too often overlooked and ignored despite its increasingly well-documented health consequences. It's time to wake up!

2037 – SV, Belgium – I'm Electro-Hyper Sensitive and would like scientific and medical research proving our disability to be recognized by the scientific community and the authorities.

2038 – AM, France – This technological development (electromagnetic radiation, climate manipulation, biotechnologies, chemistry) is happening at the expense of life and natural creation, promising us a terribly bleak future. Many animal species – insects in particular – are disappearing. Trees and plants are diseased, the soil is depleted, the atmosphere and waters are polluted... Serious illnesses are affecting increasingly younger people... It is high time the steam engine changed direction.

2039 – CB, France – My sister is EHS.

2040 – Sylvia DELBECQUE, Belgium – Severe headaches, neck and shoulder pain, muscle pain, sore throat, tinnitus, fatigue, brain fog—not being able to think clearly anymore, no longer being able to concentrate, heart palpitations, pressure in the chest, exhausted immune system, nausea, red, burning eyes, inflammatory pain of the autonomic nervous system, skin tingling in my neck and on my back, disruption of hormones (pituitary gland, hypothalamus), causing, among other things, disruption of body temperature.....this is what I experience in the radiation, no longer even outside it without there being any question of However, there is a continuous toxic mix of electromagnetic frequencies over and over again with different electrical frequencies, with a good engineered system of cell voltages that continues in the same way as it changes over the next few years: antennas, Wi-Fi, Bluetooth, radiating fiber facade boxes, smart radiating street LED lighting, digital wireless meters, electric cars, low-orbit satellites, smartphones, AirPods, smartwatches, baby monitors, 5G from the neighbors, almost everywhere present, also in daycare centers (we must protect the children!), hospitals and doctors' offices (where normally you should know what you are saying!), schools (when you are overstimulated, you can't concentrate, you don't have to worry, you don't have to be fooled by all the smart devices at school). I know you have two opportunities to see the arts in Europe and the world was in reality: stop this time with eleven children, eleven men, eleven planes, and eleven cosmos. Big thanks to the initiators.

2041 – CN, Belgium – I suffer from EHS and it is important to inform for better prevention for everyone.

2042 – ER, Germany – I am myself affected to a lesser degree, but I know from my own experience the suffering of those who are severely affected.

2043 – DM, Belgium – I am an EHS person and support your request.

2044 – ER, Germany – I am myself affected to a lesser degree, but I know from my own experience the suffering of those who are severely affected.

2045 – CH, France – I am myself electrosensitive and therefore I am well aware of the effects of the non-recognition of this pathology as well as the willful denial by public authorities.

2046 – JD, Belgium – I am electrosensitive.

2047 – AD, Belgium – It is urgent.

2048 – Christiane MURRY, France – My daughter is in great distress.

2049 – Marcel WESTHUES, Germany – I am myself electro-hypersensitive and my health is severely limited.

2050 – Pascale POELMAN, Belgium – All citizens have the right to exist free from the electromagnetic pollution that currently excludes them. As a doctor, I see this as an urgent matter for them and for future generations.

2051 – Nsilu LUKALASANA, France – I am EHS.

2052 – DS, Germany – I am concerned.

2053 DH, Germany – A good friend of mine is electrosensitive and I see how restricted her life has become.

2054 – DMJE WARNAAR, Nederland – I suffer from insomnia, cramps and have proven high blood pressure from hospital radiation. It was proven that after a shower my blood pressure returned to normal.

2055 – WD, Germany – I myself am seriously affected by health problems.

2056 – JD, Germany – In all areas, we must be more numerous and more audible.

2057 – KS, Germany – Electrosmog affects highly sensitive people particularly, but ultimately it makes everyone sick and the dangers to people, animals, plants and nature are completely underestimated!

2058 – EB, Spain – I agree.

2059 – SS., Spain – I see my mother suffering from this illness.

2060 – MA, France

2061 – Sylvie GOURLET, France – I suffer from sensitivity to smartphones and artificial electromagnetic radiation, even in thermal spa and care centers, I am refused permission to put up a sign with my phone and smartwatch turned off.

2062 – HS, Germany – Solidarity, which I know personally and which all those affected defend. (Solidarity, which I know personally and which all those concerned defend.)

2063 – SS, Germany – I know the terrible situation in which the affected people are living, that urgent aid is needed, and that the precautionary principle is being applied.

2064 – EM, USA – I suffered an acute onset/assault wireless injury.

2065 – SB, Germany – Support my colleague who is affected .

2066 – AC, France – I think I am electrohypersensitive.

2067 – Joachim DE CLECK, Belgium – I'm sensitive to this cause, seeing it as one of the many issues of our time regarding public health and biodiversity. Plus, I personally have a slight EHS syndrome.

2068 – Jürgen GRIESHABER, Germany – Electrosmog can make us sick.

2069 – Philippe GONDRY, Belgium – Electromagnetic radiation is harmful to all living things, whether we are directly sensitive to it or without feeling it.

2070 – VS, Germany – Radiation exposure is a serious problem. I believe it's only due to a lack of awareness and knowledge that we haven't yet seen the higher numbers of patients. If we don't take action now, exploding health costs will consume us in a few years. If people are diagnosed with depression, but in reality, radiation is to blame, then these people will never be cured – we have to get to the root cause.

2071 – Conny LUNDBERG, Sweden – There exists much relevant information about the negative influence of EMF on humans!

2072 – FJ, Belgium – Highly sensitive.

2073 – Fab BOUTI, Zambia – I agree with everything that is written.

2074 – TW, Sweden – I think about children and grandchildren who will be exposed to this every day. We become sick from this. Criminal, I think. They have lied to the ordinary person about how things stand.

2075 – Maritta SALLINGER-NOLTE, Germany – I know people who are electrohypersensitive – and I myself am very careful when using Wi-Fi, Bluetooth, etc., as far as is possible in our highly developed technological age. But I am very aware of the problem – that's why I support this great initiative.

2076 – AZ, Germany – I myself am very seriously affected and it is barely possible for me to stay outside my partially protected house. For a better quality of life, consideration and no more white spots!!!!

2077 – Sanna MANEMYS, Sweden – Stop this runaway health catastrophe now! It is a human right to be protected in one's own home from harmful microwaves. Please note that this is what happens when you see the views and the public space.

2078 – AM, Sweden – The call from ElectroHyperSensitive People to all elected officials and doctors in Europe EHS IS A HUMANITARIAN EMERGENCY STOP.

2079 – Paulette CORNET, France – When you have the misfortune of being afflicted with this infernal sensitivity or illness, it's unbearable because of the headaches, the memory lapses in the middle of a conversation, the dizziness that makes you fall, the tinnitus, etc., and most people are immune to it; then it's very difficult to get things moving to respect us and do everything possible to protect us. We feel very isolated and alone, abandoned to our sad fate. The powerful, supposedly solid, high-ranking officials don't even believe it, even though radiation of all kinds exists, good and bad, always created by man, this ignorant killer who believes he's doing the right thing, under the pretext of evolution, ignoring all the dramatic consequences that follow. Nature doesn't create anything against dangerous man; on the

contrary, this nature, so battered from all sides, gives us back in kind, and man continues to see nothing. It's easier to complain about tornadoes, floods, or the scorching sun... etc., etc. The sun hasn't changed... think about it, you fools... meanwhile, sensitive people like me are suffering from depression and unbearable, constant pain... life is the most precious thing, and they dare to take it from us and even punish us if we try to disobey the installation of their instrument of death. Thank you, gentlemen.

2080 – GS, Switzerland – Raising awareness among the population, especially children. Imagine spending just 10 minutes in front of an ADSL router with two types of Wi-Fi enabled. Observe what happens in the body and you'll understand. For a baby or child whose skull and blood-brain barrier are still very fragile, the health damage caused by years of 24/7 exposure is alarming.

2081 – Roland ANGIBAULT, France

2082 – Michèle BORGETTO, France

2083 – Michel BOUNAM, France

2084 – Michel CHASTANET, France

2085 – NG, France2086 – Jean-Jacques VILLEMOT, France

2187 – EM, France

2088 – Marie-Christine MONET, France

2089 – JB, France

2090 – CC, France

2091 – Gabriele DIRR, Germany

2092 – Geneviève D'OTREPPE, Germany

2093 – AH, Germany

2094 – Anita SCHROF, Germany

2095 – AP, France

2096 – EM, France – It is important to take into consideration these silent sufferings because they are not directly perceptible to the population and therefore little known, but terrible for the people concerned, to make them known in order to protect them and obtain the means of prevention, suppression of the causes, and help in their healing.

2097 – Louise-Marie THEATE, Belgium – I am electrohypersensitive and wish that the population and doctors are informed of the problems of EHS, and that real measures are taken in their favor.

2098 – Claire DESCHEPPER, Belgium – All this electromagnetic radiation is toxic for us humans, for fauna and flora.

2099– CF, France – In total support of people with EHS and to stop the invasion of our living spaces by human-made electromagnetic radiation.

2100 – FD, France – Very Electrosensitive.

2101 – Jennifer TAYLOR, Belgium – I sign this petition because we are all affected by this issue, even if some people don't feel it yet. In the digital age and with 5G, we have no choice but to endure the harmful effects and their impact on our health. It is legitimate to be aware of this and to establish «white zones» for hypersensitive children to allow people to live peacefully. The book by Pierre Poix & Thérèse de Cherisey, «These Waves That Surround Us,» highlights these waves as dangerous for animals as well as for humans. Taking this approach into consideration is essential.

2102 – Serge BEZPALKO, France – I offer my support to two friends with EHS.

2103 – AE, Sweden – For a clean environment and good health.

2104 – Belinda LEOPOLD, Australia – No one should have to be dealing with this.

2105 – Annie LEYSEN, Belgium – I am EHS.

2106 – Heidi BRENEK, Denmark – I am EHS.

2107 – Britta JABLINSKI, Germany – Because I am affected myself.

2108 – IT, Germany – Because my mother is electrosensitive.

2109 – Margarethe SPINDLER-BARTH, Germany – Due to health risks

2110 – Christine BREBION, France – My best friend is a victim and is electrosensitive.

2111 – JB, France – In an attempt to fight against the NWO.

2112 – Henrik ALBERTSON, Sweden – Don't let more people get sick!

2113 – CS, Portugal – I know people affected by the problem and that it is in reality a disease caused by the economic interests of the telecommunications industry.

2114 – NC, France – I have a friend who is electrosensitive and I understood it thanks to her.

2115 – Lene BANG, Denmark – My friend took her own life because of EHS.

2116 – Gérard HANOTIAUX, Belgium – Resisting the symptoms is becoming increasingly difficult, especially with the ever-increasing exposure to radiation and connected devices. Conflicts of interest at the ICNIRP have been established, but the parliamentary report presenting the investigations has been swept under the rug by all authorities. It is time this document, a veritable political bombshell, was used for its true purpose to protect the public.

2117 – MH, Belgium – I suffer greatly from the rays, both physically and mentally, and I am concerned about the decline of pollinators, trees and nature in general. The influence of the rays on humans and nature is known but classified «Top Secret», this cannot and must not happen!

2118 – Carine HANOTIAUX, Belgium – There's already too much technology and people are suffering.

2119 – JJ, Sweden – This is a serious matter and so many people who are sensitive for EMF and it effects people with neurological disorders even more. I have seen science reports and studies on National Library of Medicine PubMed where they now found

aluminum in human braintissue as a rising problem, and metals + heat is not such a great combination, right? Microwave and metals are no fun. I am feeling it myself and overheating brain especially close to routers and screens for too long, triggering epilepsy seizures etc. Check it out.

2120 -SR, France – My mother is EHS HCS and alternates between being homeless and living in a mobile home.

2121 – PT, France – I am electrosensitive and no longer know where to live.

2122 – CL, France – I like using the internet but I see the side effects on myself and many people. It is an area that needs much more investigation, even if it is disturbing.

2123 – Jean André LOUBIERE, France – I am electrosensitive, Enedis is ruining our lives with this meter.

2124 – FR, Belgium – I am worried about the extent of electromagnetic radiation and my partner is electrosensitive.

2125 – Caroline FUALDES, France – Former EHS patient.

2126 – SA, Norway – I have EHS

2127 – SC, France – I have a friend who has been electrosensitive for a few years, she is really suffering and there are many people affected but taken for crazy with unexplained symptoms, it is time to act before there are no more white zones to take refuge in.

2128 – BP, Canada – Nothing is being done to help those suffering from this disability. It's torture for those with extreme sensitivity. Debilitating and destroys lives.

2129 – Amir BORENSTEIN, Israel – I am an EHS person and I support many EHS people in my country. Our numbers are growing, and our condition is getting worse.

2130 – CV, Belgium – I personally know people who are electrohypersensitive and their problems, as well as the dangers caused by electromagnetic radiation for all living beings.

2131 – Gabriella Klein, Israel & Greece – The dangers of EMFs are multiplying daily, and I fear for the future of all living things on this planet. I myself have sensitivities to EMFs, especially from cell phones and Wi-Fi.

2132 – DR, Germany – Everyone suffers from electrosmog! And those who are aware of it and suffer from it must be especially protected in a spirit of participation.

2133 – Ori BEREN, Israel – Unable to work anymore. unable to go on public transportation. i dont leave the house anymore, severe severe head pains even at home at a very low radiation from the neighbors or from a cellular antenna. I wear a few brain coats to block radiation and I can still feel the pains. it's just terrible where we are going. where will our children go to protect themselves from this? stop the antennas and the 5G IMMEDIATELY!! let us live in a radiation-free areas. antennas should be built only in industrial areas!!

2134 – BR, Sweden – I am electrohypersensitive.

2135 – MB, France – Enough is enough!!!

2136 – Laurence REBERU, France – Danger 4 5 G.

2137 – Catherine QUIBLIER, France – I am sensitive to the cause of electro-sensitive people.

2138 – KG, France – I suffer a little from it, but above all, I know a mind that no longer functions normally because of it. And to stop and limit these effects, which are so harmful to everything about us.

2139 – CS, France – Too much EMF radiation everywhere.

2140 – Joan PAYET, France (Réunion) – My mother suffers from electromagnetic hypersensitivity (EHS), and I am aware that certain electromagnetic waves are harmful to humans. I hope that this appeal will lead to more protected areas!

2141 Helena DUDOVSKY, Israel – I developed EMF sensitivity about 5 years ago. Last two years house bound because of it. As any outing causes flaring of the symptoms. And it is getting worse. Experiencing fatigue, pain all over the body, brain fog, memory loss, depression, panic attacks and more. My sensitivity to artificial light has gotten worse and so is my chemical intolerance. Unable to use public transportation or walk freely outside or work.

2142 – LF, Sweden –Important !

2143 – MT, France – To support the action.

2144 – Véronique EMARD, France – Enough is enough!!!

2145 – Gal WEISS, Israel – I was injured by EMF and became EHS (and MCS) – severe disability and pain (only in presence of EMF, I'm totally healthy in a low radiation environment). I became a refugee since my home gets too much radiation from neighbors and antennas (i don't use cellular or wireless at all) I lost my ability to function and work and have a meaningful productive life. there is no place we can live fully as all human, we lost most of the human rights. it's worse than death. we didn't do any harm and don't deserve such an awful punishment and suffering.

2146 – Stéphane DELVIGNE, Belgium – I am sensitive to electro-fog without being intolerant, but the increase in pollution sources, their rising frequency (5G, Wi-Fi 5 and 6), and their sheer number (connected devices) are making urban and heavily frequented areas increasingly...unsafe...It's a completely harmful and insidious form of artificial selection! It's time to seriously address, at the political and societal level, the short- and long-term consequences, not only on the most sensitive individuals who are "whistleblowers," but also on the general population in the longer term.

2147 – GR, Belgium – :I support people in suffering.

2048 – NJ, Belgium – Because I would like to see as much electromagnetic pollution as possible eliminated. For everyone's health.

2149 – SH, France – I am now electrosensitive!

2150 – AA, I am very sensitive to this problem, having been impacted by cell towers. I do not want my children and grandchildren to be constantly exposed to this pollution.

2151 – SB, France – This is an extremely urgent matter.

2152 – Martine JOVINE, France – I know many people who have problems with this.

2153 – PL, Sweden – I think electromagnetic fields can be harmful.

2154 – Elisabeth DELCENSERIE, France – I have suffered from EHS (Electromagnetic Hypersensitivity) for 18 years, ever since an SFR antenna was installed 9 meters from my bed. Now, on top of that, there's a Bouygues antenna 18 meters away... When will this ordeal end? I'm afraid I'll be dead before then!

2155 – Dariusz SOKOLOWSKI, France – I believe that we need to rethink the way communication devices operate, as they are dangerous for all living things on our planet.

2156 – CG, Belgium – I was overexposed for 10 years to EMFs (non-ionizing electromagnetic fields) in my workplace; I was severely poisoned by heavy metals and had to undergo numerous chelation treatments....

2157 – Jean-Pascal BRAN, France – Hello, I have tenants with EHS, and I am very worried about this condition which is not easy to live with on a daily basis. I have made modifications to my accommodation to be able to help them on a daily basis and I hope that this petition will put an end to the official lies.

2158 – SJ, France – As a doctor, I am worried about adults and especially the next generation of children.

2159 – Cathyg DOWD, UK – I'm fighting for my life.

2160 – KB, Switzerland – Because many, and increasingly many, of us are impacted by this artificial radiation, and at my work where a large number of people pass through, I have many testimonies from people whose health has been affected and who make the link with this radiation, and others, increasingly numerous, who are asking themselves, or beginning to ask themselves, questions about this...

2161 – Nathalie GIUONNET, France – I am 53 years old and suffer from severe fibromyalgia with degeneration, migraines, sensitivity to light and noise, chronic tendinopathy, dry skin, and eczema for 15 years. I experience burning, stabbing, and stabbing pain, muscle pain, tetany, and cramps. I live in the city of Bordeaux and only have a mobile phone, no computer. I am on disability (category 2) and have many other health issues.

2162 – Pip Reynolds, America – 5G is lethal to all living things.

2163 – VP, France – I sign because, from the moment it touches on Human Life, and causes serious damage, it is indeed an undeniable humanitarian emergency.

2164 – Pierre-Alexandre VOYE, France – I know people with EHS and their lives are hell.

2165 – RE, Switzerland

2166 – Simon Simone – I have been suffering from EMFs for a year and was hospitalized for five days with severe radiation burns. I'm happy to share my experience with others.

2167 – EK, Nederland – My life has become hell because of EHS.

2168 – Marie-Pierre DUPIN, Belgium – Because I myself am impacted by health problems due to all these antennas.

2169 – Fabian TROMONT, Belgium – In solidarity with all electrohypersensitive people.

2170 – HJ, Denmark – Important.

2171 – Chantal LEMPEREUR, Belgium – This has to end, it can't go on any longer.

2172 – B. P., Sweden – 5G radiation is making us sick.

2173 – Katrien SOETENS, Belgium – An acquaintance of mine left for England because she could not survive all the radiation in Belgium. However, we do not know that you have your CV in the electrical version, but you can't do it anymore. And then you know what you're going to do for two people.

2174 – LD, Belgium – I have sympathy for those who have loved ones and who are in the country where they live. (I sign out of sympathy for a person I know who had to flee abroad.)

2175 – DH, Nederland – Radiation causes more damage than we realize.

2176 – Anne KAWECKI, Sweden – ...to protect the life and health of people, animals and nature.

2177 – MV, Belgium – I support my niece in her fight for recognition.

2178 – Ondrej HORVATH, Slovenia

2179 – GL, France – I have close relatives who suffer because of this hypersensitivity.

2180 – AF, France – I have a heart problem linked to EMF .

2181 – Sandra DE PERMENTIER, Spain – There are already too many people affected, and they are unable to live a dignified life. And with electromagnetic pollution on the rise, if it isn't properly managed, many others will be affected in the future—not to mention the animals and vegetation impacted by it.

2182 – NN, Belgium – I know someone who is suffering enormously from it.

2183 – Paola TRAVERSO, France – May elected officials and those in positions of responsibility finally address this serious problem.

2184 – SF, France – Support and understanding of EHS people who need to live peacefully and healthily.

2185 – MB, Belgium – My friend is suffering terribly from the radiation and the world.

2186 – Graziella BLANC, France – My husband suffers from Vascular Pain and it is terrible.

2187 – FL, France – I stand in solidarity.

2188 – SG, Belgium – Everyone has the right to a dignified existence.

2189 – Magda PAUWELLS, Belgium – "White zones" are essential for living and recovering from radiation exposure in cities—shopping centers, trains, highways, etc.—for the survival of electrosensitive people like me and many others in the same situation!

2190 – Mieke DE BLOCK, Hungary – I had to flee my country and leave everything behind because of HSEM. And because I still haven't found a place to go.

2191 – SG, Belgium – Na.

2192 – KS, Belgium – Radiation levels are increasing everywhere and this is having a major impact on our health! We do not choose to be constantly exposed to radiation!!!

2193 – HL, France – Yes, I am also sensitive to EMF radiation.

2194 – Guillaume TIXIER, France – I know several people who suffer from electro-sensitivity.

2195 – SL, France

2196 – MG, Belgium – I cannot stand Bluetooth, and I get headaches when I'm on the phone.

2197 - Paule CAUREL, France – I do not suffer from electrosensitivity, but I feel very much in solidarity with the people who are affected by it.

2198 – VS, France – It is both a right and a scourge.

2199 – GB, France – Today, in addition to phones, Wi-Fi routers, cell towers... (...) There is always a little more EHS with each increase in the frequency of connected objects and people. (...)

2200 – SD, Hungary – I personally know people who are hypersensitive (EHS), and I myself am mildly to moderately sensitive.

2201 – Annette HALBERG, Sweden – 5g is harmful to our health and has an agenda in the context of the 2030 reset.

2202 – YR, France – For health.

2203 MV, France – Knowing a young girl affected by this disease, I have seen firsthand how debilitating it is, making city life unbearable. I fear for the future of our children.

2204 – Stéphane DERGUINI, Spain

2205 – AS, Nederland – The increase in radiation frequency must stop and be reduced to between 3 and 4 G.

2206 – KV, Belgium – It is detrimental to our health.

2207 – Lliberat GUITARD, France – This is yet another discrimination against a minority. We must take care of each other; they will not do it for us.

2208 – Michael MIKIELS, Belgium – I sign this appeal which is just another appeal, although I think nobody gives a damn.

2209 – TS, Nederland – This is important.

2210 – Lies POELMAN, Nederland – Solidarity.

2211 – ED, France – I am sensitive to this electromagnetic environment.

2212 – Dingeman DE VISSER, Nederland – For years now, I—my body, my mind, and my life—have been extremely devastated, broken, and destroyed by selfish, malicious people using radiation. I have nothing and no one left (not even family, friends, a partner, a household, a job, a car, or anything else), and I have no money for emergency medical care costs that amount to 10,000 euros and are not covered by CZ, etc.

2213 – RV, Nederland – This is an underestimated problem.

2214 – Tom DECAESSTECKER, Belgium – I personally know someone who is affected by this and is moving because of it. Also because not much is known about the effects of the radiation.

2215 – GE, Germany – The environmental impact of radiation must be contained.

2216 – SM, Germany – Because I think it's important!

2217 – MA, France – I have a friend who has this.

2218 – KB, Belgium

2219 – LB, France – We can't take this daily harassment anymore!

2220 – MM, Belgium – I personally know people who are hypersensitive to EHS and I myself am slightly to moderately sensitive.

2221 – OJ, Israel – I am sensitive to hypersensitive people.

2222 – JD, Belgium – ?

2223 – Greet DEBAERE, Belgium - I sign because I suffer from EHS myself and because I know people for whom EHS causes disability and isolation.

2224 – Annick PEELMAN, Belgium – I have EHS/MCS myself—I know better than anyone how debilitating and isolating it is.

2225 – Jacques VELARD, France – I know a person with EHS and I know all the difficulties and problems he/she encounters.

2226 – Diane PEETERS, Belgium – I'm sensitive to radiation, especially when it's combined with other sources... for example... Wi-Fi together with underfloor heating!! It gives me a fever and messes with my nervous system... in other words, I get extremely nervous, and this happens after just 5 to 10 minutes.

2227 – Luis MENDEZ, France – I stand in solidarity with people who are electro-hypersensitive.

2228 – YG, France – A neighbor with EHS died at the age of 50 from exhaustion.

2229 – PV, Belgium – I know someone who suffers from EHS.

2230 – Romy ACOE, Belgium – (I sign to support my mother.

2231 – GC, Belgium – I am EHS (Electromagnetic Hypersensitivity) and I see so many people around me with health problems they cannot explain, which I am certain is somehow related to excessive exposure to EMFs. Many children and teenagers also have psychiatric problems, many suffer from burnout... and several glioblastomas. No doctor ever believed me when I raised the issue.

2232 – Martine STEVENS, Belgium – I know someone who has many health problems because of this. I myself am sensitive to electromagnetic radiation.

2233 – EC, France – I have EHS symptoms.

2234 – Michelle TIZON, Portugal – I am deeply moved by the profound distress and isolation of people who are electrosensi-

tive and hypersensitive. My daughter is electrosensitive, as are many of my friends, one of whom is currently in mortal danger.

2235 – MK, Germany – Out of solidarity.

2236 – Idriss DAUPHON, Belgium – I stand in solidarity.

2237 – Bea VAN DAELE, Belgium – The unbridled expansion of all forms of digitization and the acceleration of internet connections cannot fail to have consequences for people and nature. Public health must be a priority, taking precedence over economic and other interests. Research into these issues and access to healthcare for EHS individuals are urgent and necessary!!

2238 – MH, Belgium – Indeed, there should be a radiation-free zone in every country for people suffering from EHS.

2239 – KM, Belgium – I am also quite sensitive to radiation and I know someone who is EHS.

2240 – Caroline KELLY, UK – I am electromagnetically sensitive .

2241 – Mirandfa PETERS, Nederland – I have EHS myself and have been experiencing severe symptoms since the smart meter was installed. I'm trapped in my home with no electricity. I'm completely cut off from society because of the toxic environment created by the government.

2242 – CF, UK – I sign this because people who suffer in this way are the canaries of the West and feel the damage that others don't feel, even though the potential for harm is there for them too.

2243 – YC, France – My sister has this problem.

2244 – EM, Australia – I suffer from EHS.

2245 – Bernard JACQUOT, France

2246 – Marguerite GROS, France

2247 – Marie Christine CHOCTEAU, France

2248 – Yves BEUSCART, France

2249 – MB, France

2250 – Claire PIERRE, France

2251 – Nicole MOULIN, France

2252 – WW, Germany

2253 – Annie G., Belgium – EMF is harming us all but the public doesn't know it because the truth is hidden in the name of profits.

2254 – NC, France – I am EHS with Lyme disease.

2255 – RK, Dabemark – I know someone suffering .

2256 – Isabelle COMPEYRON, France

2257 – RS, France – As the state of health is increasingly deteriorating, it is imperative to preserve it as much as possible, it must be preserved.

2258 – Martha Elena BORJA HERNANDEZ, Colombia – For 11 years I have suffered the consequences of electromagnetic field radiation on my central nervous system, my skin, my pineal gland, and other systems.

2259 – Daniel MILLASSEAU, France

2260 – An additional antenna (60 in our city of La Roche sur Yon) will be installed in the cemetery.

2261 – Johan DE VLIEGHE, Belgium – I know someone who suffers terribly from this and has incurred a lot of expenses to make her home livable.

2262 – KD, Belgium – One of my friends was affected by this situation.

2263 – Elodie PATERNOSTRE, Belgium – It's a humanitarian cause.

2264 – Heidemarie SETZNAGEL, Austria – This topic concerns us all and because there must be freedom of choice, for example, regarding smart meters and other digitally readable devices.

2265 – MB, Nederland – Very badly affected by radiation.

2266 – Gilbert ECTOR, Belgium – A good friend has EHS

2267 – Rüdiger FERTIG, Germany – Increasing exposure to EMF, Wi-Fi and mobile phone radiation endangers our health and nature.

2268 – Vinciane VERLY, Belgium – This is a public health emergency. We must protect all those affected, as well as our children and future generations.

2269 – KB, France – I am electrohypersensitive and I find life increasingly difficult in this increasingly connected and less and less caring world!

2270 – MP, Belgium – I know a sick person who really gave up and took refuge in a foreign country.

2271 – Isabelle MATILLAT, France – This appeal allows many of us to emerge from invisibility and realize that we are not alone in suffering, in surviving despite the ever-increasing electromagnetic environment. We are not against technology, but it must once again become compatible with respect for life. Sanitation measures must be implemented urgently because life on Earth is in danger. Let's wake up, let's dare to say what no one wants to hear: «The wireless industry will annihilate us and manages to make us believe that these new tools are indispensable.» Let's save lives!

2272 – JF, Belgium – Where does individual freedom end and that of others begin?

2273 – LN, France – The lack of transparency on the implications of these technologies.

2274 – ER, France – Exposure to electromagnetic radiation is an attack on my health against my will.

2275 – SM, Spain – A wireless technology is being used that has NEVER been proven to be completely safe for the health of all living beings on the planet, including nature. Furthermore, this technology is causing suffering and torment to all people who suffer from electromagnetic hypersensitivity, and they are being excluded from society and, at times, their human rights are being violated.

2276 – Bernadette SCHUERMANS, Belgium – I am thinking of future generations.

2277 – Victoria TAMBO, Spain – I am sensitive to chemicals.

2278 – Simone SCHAMBOURG, France – To support the battle waged by an electro-sensitive friend.

2279 – Sabine SCELLIER, France – People with EHS suffer and their numbers are growing. It is urgent that our society take them into consideration!

2280 – AB, Switzerland – I myself suffer from ehs.

2281 – MF, Switzerland – This is a very important topic.

2282 – UB, Switzerland – Meine tochter hat ehs.

2283 – Véronique PIGET, France – I am electrosensitive.

2284 – Danièle DENIS, France – For people with electromagnetic hypersensitivity, nature, humans...

2285 – Marianne JANSEGERS, Belgium – I personally know someone who is facing this problem.

2286 – Sim KATE, France

2287 – Benjamin M., Belgium – My mother is extremely disabled since 2017 by electrohypersensitivity. Our social life has considerably diminished. We see young people dying from cancer...

2288 – Faisal KHAWAJA, UK – I am Electrosensitive.

2289 – Véronique MORVAN, France - The brain will not be able to withstand all this EMF radiation.

2290 – Eric WANNYN, Belgium

2291 – EM France – Many people suffer in indifference, even though it is a recognized illness.

2292 – TV, Estonia – Me, my children, and my mother are highly electrosensitive. And I notice that people in general have become very nervous, sleepless, anxious, and depressed – probably because of wireless internet devices.

2293 – Damien FORTAN, Belgium – A friend is affected.

2294 – YM, France – I have close friends who are electrosensitive and they live a hell on a daily basis.

2295 – TK, Slovenia – I agree.

2296 – LV, Belgium – For a reduction of electromagnetic fields.

2297 – DH, Germany – What else can I write about this?

2298 – AB, France – This is important.

2299 – Laura MARTINAZZI, Italy – I am electrosensitive. People who are electrosensitive need to be protected; we can no longer live our lives.

2300 – EF, France – I am outraged by the behavior of our (ir) public officials.

2301 – JG, Nederland – I myself am already experiencing a lot of health problems due to radiation, but I'm also signing this for all the children and grandchildren who will come after us, in the hope that they will be able to live and grow up in a healthy world.

2302 – DE, France – I have been electrosensitive for 16 years and it is a day-to-day life, because if the environment is modified due to electromagnetic raiation life is no longer possible and it is flight if we have the means.

2303 – GB, France – I have several friends around me affected by electromagnetic fields (EMF). They have numerous symptoms and are extremely vulnerable. Their lives are a living hell; they no longer have access to public places, no cinemas, no leisure activities, no suitable living spaces. The government must take this new illness into account.

2304 – Annette LAVIGNE, France – This is a great danger for all living things.

2305 – MH, Nederland – I'm sensitive to VR radiation myself. It's sickening.

2306 – FR, Spain – I have severe EHS.

2307 – Philippe CRESSENT, France – I am EHS and I have been fighting since 2017!! Unfortunately things are getting more and more complicated, given the development of electromagnetic radiation and the progressive elimination of white zones.

2308 – CM, France

2309 – MV, Nederland – Radiation is a serious problem.

2310 – SS, USA – I'm a victim myself.

2311 – Frans HAVERMAET, Belgium – I sign this petition because I know several people with EHS.

2312 – JC, Nederland – I Personally, I suffer from radiation and worry about my ignorant fellow citizens and life on earth.

2313 – BS, Belgium – I know someone who is EHS.

2314 – Jean-Pierre CREMOUX, France – I know people who are electrosensitive.

2315 – NC, France – Finally, the opportunity to be heard and understood!

2316 – Maria DEWOLF, Belgium – To support healthy cellular function in all living beings.

2317 – PW, Spain – I am electro-hypersensitive in Spain and here there are no white zones. In France, I was refused entry because they told me there were already French people there first. I have been isolated in a caravan for over four years.

2318 – Jonathan POTTIEZ, France – To end the biggest health scandal of recent decades.

2319 – Paul VAN VAERENBERGH, Belgium – A friend of mine is a victim.

2320 – Jeffrey HANCOX, USA

2321 – JV, Belgium – I myself and other people I know are experiencing health problems.

2322 – AK, Belgium – I myself and others I know are experiencing health problems.

2323 – Patrick MORISSEAU, France

2324 – Marc FRANSEN, Belgium – 5G radiation is killing humanity.

2325 – Anne VIAENE, Belgium – I wish little children could go to school in a radiation-free environment!

2326 – BW, Belgium – I have already actively written letters to the government regarding this issue. As recently as April 2020—when it was not yet possible due to lockdowns—citizens were still concerned about 5G in India. I never heard back.

2327 – Patrick CHABOUD, Belgium – In solidarity with a friend suffering from this syndrome.

2328 – Ludo ADRIAENSEN, Belgium – I support it and governments do nothing.

2329 – PV, Germany – ...I am personally affected.

2330 – Wim OOSTING, Nederland – Action must be taken to improve the lives of millions of people. Right now, many are left to fend for themselves.

2331 – Luc BOLAND, Belgium – This is a crucial issue.

2332 – NM, France – I had to equip my house to protect myself as much as possible from EMF radiation, and it costs a lot.

2333 – GN, Belgium – Its effects have been scientifically proven, and 5G hasn't even been studied yet because data companies and others are making a lot of money from it. Said naked can stop. From one plane to the next, the planes are on the same plane. There are plants in the ground that are in the same position as before.

2334 – MP, France – Because I've developed severe EHS since the 5G antennas came out!!!!!!!

2335 – Sandrine MARCHAND, France – I am EHS and I would like to protect my children and grandchildren.

2336 – MP, Belgium – I have suffered from electrosensitivity for many years, and as more raiation is emitted and connected devices proliferate, I can do less and less. I have more and more symptoms, and accessing many places has become very difficult, even impossible: healthcare, school events, shopping, libraries, group activities, work... I leave my home less and less and feel increasingly isolated from the world, even though I am usually very sociable and love being active and interacting with others.

2337 – Luc AUFFRAY, France – I am a victim of electromagnetic radiation on my farm and I have been in legal proceedings against the 10 for more than 6 years.

2338 – Myriam YPERMAN, Belgium – Skin rash.

2339 – TH, Estonia – It is healthy.

2340 – MG, Belgium – For the sake of our children's future—including our young children and newborns—because they are unable to respond and their health also suffers from this radiation. The studies have been substantiated by scientists and doctors worldwide.

2341 – AB, France – Convinced of the pathology and the need for prevention.

2342 – GH, France – Out of solidarity.

2343 – EF, Spain – For a world without electrosensitivity.

2344 – CG, France – No to EMFs.

2345 – CB, Canada – I am EHS.

2347 – DV, Estonia – I am aware of the health dangers of EMF .

2348 – Marie-France HEBRARD, France – This health scandal has been brewing for far too long. Let us continue relentlessly to denounce it.

2349 – MK, Estonia – I would like to have some EMF-free quiet place in every country.

2350 – Christel VDF LEMMENS, Belgium – Artificial EMFs are detrimental to ALL forms of life on this planet!

2351 – HD, France

2352 – Violette GOULD, France

2353 – MA, France

2354 – Agnès BIENFAIT, France

2355 – . C., Argentina – It's important.

2356 – MC, Belgium – I have that problem, too.

2357 – SE, Spain – Because I suffer from EHS, and many of my friends do too. I knew someone who committed suicide when he was 13 years old. Therefore, there is no need for high radiation levels or intensity to maintain our connections. Up to 3G, everything was fine and I was barely electro-sensitive. With 4G, everything is much worse, and 5G is lethal. Literally!

2358 – Ilse VDF LEMMENS, Belgium – Wireless technology is bad for humans, animals, and nature! It must be stopped .

2359 – MR, Estonia – I take care of my health.

2360 – MJ, Belgium – I myself am experiencing negative symptoms from the radiation and so on, and—along with my neighbors—I have filed an objection to its expansion in my town.

2361 – Lionel LINTILHAC, France – Our situation is becoming tragic.

2362 – NB, France

2363 – Béatrice AMOUROUX, France

2364 – MD, France

2365 – Maryse SPRINGER, France

2366 – DL, France

2367 – SH, Slovakia – I support this for my own sake and for the sake of future generations.

2368 – Mother UUE, Estonia – I want a place free of noise pollution! It's absolutely unbearable to be outside with 5G.

2369 – AP, France – I know people who suffer from network antenna radiation, and I often hear about the harmful effects of 5G antennas.

2370 – ID, France – My family and friends are affected by ehs, it is important to me to contribute to improving their quality of life

and to highlighting their disability which is too little considered, poorly supported and poorly received by most of the medical profession.

2371 – Светлана Давыдова, Kazakhstan – I agree that electromagnetic radiation interferes with our lives.

2372 – BH, Kazakhstan – I know people like that, and I know how much they suffer because of it. I support them.

2373 – Paola SOLA, Spain – I hope you will report on this problem, which is becoming more common than previously thought.

2374 – Dominique ABER, France – I stand in solidarity with any action that will fight against what causes serious harm to the health of citizens, animals and nature.

2375 – Patricia FONTAN, France – I am very familiar with this problem.

2376 – JL, France – I am the spouse of a person with EHS.

2377 – VB, Belgium – The effects of EMF can be harmful to human, animal and natural health.

2378 – MB, France – I have a friend in this situation and it would be good if everyone became aware of it because even if we are not sensitive to it, our body suffers the consequences.

2379 – MB, France – IT'S AN EMERGENCY!

2380 – Gaëlle GOUZOUGUEN, France – Supporting people affected by this still little-known disease. Hoping this will make a difference.

2381 – А. Л., Russia – I'm worried about this.

2382 – GF, Belgium – I know someone who is EHS.

2383 – GV, Belgium – It's better for your health.

2384 – Fabien PETIT DIT DANIEL, France – I feel solidarity and I find that important.

2385 – Laurent BASTIN, Belgium – Because a friend is suffering from it.

2386 – AK, Kazakhstan – Take measures to accommodate people with disabilities.

2387 – VS, Belgium – Because I know the danger of electromagnetic radiation.

2388 – BB, Russia – This is how it must be done.

2389 – Ando ARU, Estonia – I am EMF sensitive. Thus I understand the importance of this topic!

2390 – Laetitia ESCALLIER, France – My life has been on hold for 8 years, because someone with EHS can no longer go anywhere... What about other people who don't consider themselves electrohypersensitive (EHS)? Cancers, strokes, heart problems, illnesses at increasingly younger ages... We are all EHS, electromagnetic radiation kills! So STOP!

2391 – MD, Belgium – I'm well aware of the consequences on people's health.

2392 – Jozef CARDON, Belgium – Because it is high time to take this into account.

2393 – Sonia DE WEVER, Belgium – I know 2 people who had to sell their property to avoid radiation and move to where there are fewer negative waves for their health.

2394 – Risitas ISSOU, France – I had my right arm amputated because of bone marrow cancer, because of my phone because I was constantly sleeping on my 2 phones (Personal and Pro).

2395 – Jean-Luc BAYARD, France – I am aware of the critical situation of many people affected by EHSensitivity. And of the need to take this public health problem very seriously. It is not a new phenomenon, but it is reaching increasingly alarming proportions.

2396 – AR, France – I have a friend who suffers from EHS.

2397 – FL, France – SOS SAVE OUR LIVES!!

2398 – Giovanni SILVESTRI, France – For my electro-sensitive sister.

2399 – Isabelle ROGER, France – Being EHS, I cannot find suitable accommodation and workplace; my mental and physical health is compromised.

2400 – AP, France – A friend's mother has suffered from this condition for years; she is forced to isolate herself, to endure it without anyone understanding. Something must be done. Please.

2401 – Chantal Cordiez, France – I am electrosensitive. I had to sell my apartment, which I loved, because of the two cell towers located near my balcony. I am living a real ordeal with my neighbors' Wi-Fi. We are subjected to electromagnetic radiation all day long; this pollution never stops and it's getting worse and worse. It's not normal to live like this. It affects the entire planet and all living beings: people, animals, and nature.

2403 – Patrick PILON, France – It is necessary to await the conclusions of scientific research before any installation. This digital development must be carried out with respect for the health of our animals and the public.

2405 – CG, France – I support this message.

2406 – Nadine DELCOUR, Belgium – These are essential for good health.

2407 – Catherine PETERS, Belgium – This concerns our collective future, our collective well-being, our collective health. If we are not yet impacted by this problem today, we could be tomorrow. This is not something to be taken lightly. We must weigh the economic interests of some against the well-being, the social life...the very lives of many others! May human reason prevail!

2408 – Etienne VAN STEENBERGHE, Canada – The subject concerns me.

2409 – Françoise JUMEL, France – I think I am electrosensitive.

2410 – CL, France – Disabled (with orthopedic equipment in my body and metal in my teeth), I suffer from EHS and have been subjected for seven years (meter reading following power cut / estimated bills since then) to pressure from EDF and ENEDIS for the installation of a so-called «smart» meter!!

2411 – NV, France – I know someone who suffers from it.

2412 – Guylette MENEAY, France – I know the suffering of electrosensitive people.

2413 – Marina BYA, Belgium – I am against the development of these electromagnetic radiation which is a danger to living beings and nature.

2414 – Olivier BROUWERS, Belgium – The problem is real and serious for health.

2415 – ML, France – I am EHS. I would like to be able to enjoy a garden without electromagnetic raiation.

2416 – EL, France – Electromagnetic radiation is a real poison that kills life, even in small doses. All living things, all matter, function with electromagnetic fields.

2417 – DM, France – I know people who are suffering because of this situation.

2418 – SP, Belgium – Humankind is destroying itself in various ways. Money and power are the culprits.

2419 – Vinciane DE SCHRYVER, Belgium – I am terribly sensitive to electromagnetic fields that are ruining my life and my health!

2420 – MB, France – I am electrosensitive and it complicates life too much and isolates me from others!

2421 – Vincent RERAT, Belgium – Even though I am not personally affected by EHS, our whole family is concerned about this issue. The increasing exposure to artificial electromagnetic fields is a real source of worry for us, our children, and our society in general. Recognizing hypersensitive individuals is an essential step towards stricter regulations on this matter. No one should be ostracized or have their life turned upside down without a valid response and the implementation of appropriate support structures.

2422 – EE, Belgium – I am disabled AND electrosensitive with weakening muscles, tinnitus, tingling in my head, and my ears feel hot inside when someone uses a mobile phone in the car or is 60cm away from me... Thank you for taking this into account. I didn't believe it.

2423 – MD, Belgium – Finally someone who thinks about it!

2424 – Benoît PIEDBOEUF, Belgium – I became aware of this health problem and was able to see its effects on people.

2425 – FL, Belgium – I am noticing effects on my health and that of my loved ones. I want to protect my children.

2426 – PM, Belgium – For the health of everyone and everything on our planet.

2427 – MS, Finland – I am electrosensitive.

2428 – CA, Belgium – I sign because it is time to care for life and because I am convinced of the harmful effects of electromagnetic radiation on living beings, and therefore on humans. Being highly sensitive, I feel their negative effects all the more acutely. It started in my adolescence in the early 1980s when a radio antenna was installed approximately 200 meters from my home.

2429 – Carla CHILO, Italy

2430 – Marco NALDI, Italy

2431 – NK, Belgium – I have serious concerns about the mental health of the population in the coming years. Today's victims are already a sign of things to come.

2432 – Eric GICQUEL, France – It's time to think!

2433 – Barbara DECLEIRE, Belgium – The medical and environmental consequences of 4G 5G gsm everywhere wifis is urgent to take into account Let's take care of life.

2434 – Marjon TAS, Nederland – I have EHS, and it has shaped my life. Because of this, my freedom, my well-being, my social circle, and my opportunities for growth have been compromised. You have two options where you can see what you're saying about this and what you're doing. I know you have the opportunity to learn what the Word says about the door, and then you have to leave it in the right position.

2435 – ID, Belgium – I am a person who is EHS.

2436 – NA, France – I have been hypersensitive for 3 years and my life has become complicated; I have access to fewer and fewer places. People with electromagnetic hypersensitivity (EHS) need places where they can live, receive treatment, work, etc., without being exposed to electromagnetic radiation.

2437 – Jean-Philippe COLTEL, France – I sign because it is no longer possible to live like this and these crimes continue without anyone at the political level taking action and recognizing the proven impacts of EMF raiation on health and living beings and we are being killed constantly every day without being able to live normally and people who are incredulous have no serious information in the news and everything is being hidden from us (...) No longer being able to live normally and be free to do and go where I want, where we want every day as before when these deadly technologies did not exist, (it was paradise on earth), today it has become a total confinement and I (we) no longer have a social life and can no longer go anywhere, moreover, the noose is closing every day. I can no longer go shopping, go to the doctor if needed, go to the hospital if needed, or go to the dentist, etc., because I have a cavity, an umbilical hernia, etc., and I can no longer get medical attention... Do I just have to die here without any regard for anyone?! I can no longer see my family, friends, or anyone else, go to the markets, go into town when necessary, or to the countryside in certain areas—increasingly, the countryside is being surrounded... They are killing everything and ruining our lives! When will this finally stop?! These deadly technologies must be officially destroyed and stopped at all costs. God bless you!

2438 – PJ, France – Electrical pollution is affecting more and more people and nothing is being done for them.

2439 – CC, Belgium – I am a victim of electrohypersensitivity.

2440 – Maik NAUJOKS, Germany – The health of all those affected is a matter of great concern to me.

2441 – NL, France – I know several people with severe electromagnetic hypersensitivity who are greatly affected, and I my-

self am, to a lesser extent, sensitive to electromagnetic fields. Furthermore, I am aware of the urgent need for action.

2442 – FF, France – I am deeply concerned and... appalled by the relentless (and systematic) pursuit of profit at the expense of people, animals, plants... (of our planet Earth, and even the galaxy)!

2443 – YL, France – A friend has these symptoms...

2445 – Marie-Françoise BIQUET, Belgium – I am EHS... and I wouldn't wish it on anyone!!

2446 – Lene HANNISDAHL HAUG, Norway – I am severely hypersensitive to electromagnetic fields, and my life has become completely unbearable since the cell phone carriers installed 5G equipment near our house. I suffer around the clock and am just trying to survive.

2447 – BA, Belgium – I am sensitive to this issue, I would like more attention to be paid to it.

2448 – PK, France – Stop electro smog pollution.

2449 – Emmanuel BRUNEL, France – Out of solidarity.

2450 – TM, Germany – Impacted myself.

2452 – TM, Germany

2453 – CG, France – I am registered as electrosensitive in the national database. It's high time these harmful effects stopped by putting human health first: «First, do no harm.» Modernity could certainly avoid causing harm if this were the priority. We are all, absolutely all, affected.

2454 – NL, France – I know several people with severe electromagnetic hypersensitivity who are greatly affected, and I myself am, to a lesser extent, sensitive to electromagnetic fields. Furthermore, I am aware of the urgent need for action.

2455 – Neisje PLAISIER, Austria – I have suffered incapacitating symptoms near a tech source in 2019.

2456 – Hervé BARADAT, France – I am a member of an association that fights against electromagnetic pollution and helps people with EHS.

2457 – NB, France – I share all the points of this petition.

2458 – Sophie BRUNETTE, France – I suffer from electromagnetic hypersensitivity (EHS) and a cell tower carrying all the mobile phone operators has just been installed 700m from my home. I am also active with a local association to help find alternatives to electromagnetic radiation.

2459 – GS, Belgium – I suffer from EHS (Electromagnetic Hypersensitivity), experiencing severe and increasing physical suffering for the past 8 years (constant inflammation, unbearable pain, vomiting, nausea, and incessant headaches, stomach aches, and backaches, day and night, due to exposure to mobile phone masts). It's hell, day and night. There's no moment of physiological respite.

2460 – DF, Belgium – To me, the damage caused by electromagnetic radiation to the human body and living things in general (animals and plants) is undeniable and, in fact, visible in many ways. I myself suffer from increased inflammation, sleep disorders, anxiety, chronic pain, and mental fog, despite numerous measures taken to combat these disorders.

2461 – CO, Belgium – A huge number of my patients are victims of this, and suffer serious consequences for their physical and mental health.

2462 – Hénène PELOUZET, France – I am sensitive to electromagnetic fields.

2463 – VT, France – I am electrosensitive with paralysis upon exposure.

2464 – OB, Belgium – After attending H.E.C. Liège and the U.L.B. – Solvay Business School (= please take me seriously), ..., I graduated from a European Institute of Natural Medicine and became a certified scientific geobiologist. Among my acquaintances and friends, there are many people with EMP and even EHS whose lives have been destroyed. The authorities are either stupid or unable to read a scientific study. They would do well to think of their own families and friends, who are also affected by ALL THE NEGATIVE HEALTH IMPACTS (starting with sleep disturbances, impaired mental concentration, and infertility) THESE IMPACTS HAVE BEEN SCIENTIFICALLY PROVEN FOR OVER 30 YEARS BY NUMEROUS PUBLISHED STUDIES ON THE IMPACT OF EMFs ON OUR HEALTH, notably on PubMed, the world's leading official repository for academic medical studies. At this point, we all have the right to ask questions.

2465 – Joanne HERDER, Nederland – The precautionary principle must be respected, health comes first for humans, flora, fauna and the planet.

2466 – Christophe SIMON, France – I have been suffering from Electro Hyper Sensitivity for 6 years, at a severe level now, and it is strongly impacted in my daily life.

2457 – Diederick SPRANGERS, Netherlands – I'm pretty familiar with the scientific literature and I'm convinced of the problem (although I don't have EHS myself.

2468 – HV, France – Insomnia, tinnitus, arrhythmia.

1469 – OM, France – My father-in-law is electrosensitive and it's an unspeakable struggle in everyday life.

2470 – Robert VAN WAGE, Nederland – I, too, am sensitive and just had to leave my house because the radiation levels were too high.

2471 – Filip PETERS, Belgium – I know and see 100%, both from personal experience and from consulting numerous studies, that electromagnetic radiation is very harmful to all living beings.

2472 – Bärbel KROMER, Germany – I am a concerned person and I suffer.

2473 – Nathalie WAIBEL, France – Health is the most precious thing there is, and freedom ends where that of others begins.

2474 – SC, Belgium – I am sensitive to electromagnetic radiation.

2475 – NL, France – Electrosensitive Friends.

2476 – Patrick ONRAET, Belgium – I am concerned by this problem, which is being questioned by my medical profession and by the experience of a close friend.

2477 – CG, France

2478 – TC, France – Under house arrest since 2008 (3G). The Covid lockdown is a joke compared to this. Cell towers: nightly updates resulting in two hours of insomnia every night. Neighbors' Wi-Fi and digital TV: tidying up, difficult decisions. Exhausting outings (for groceries): weaving between bipeds who might draw their weapons before I have time to move 10 meters away, even when aiming for off-peak hours, at opening time, Tuesday to Thursday. Medical care is rarely available. Ambulances, firefighters, hospitals: IMPOSSIBLE. Will I still be able to use a phone if I'm forced to have a router because they're phasing out the copper lines? This would prevent me from doing any administrative work, since I can no longer use a computer or go to public places.

2479 – Madeleine DEFARGES, France – Let's stop talking about the precautionary principle, since it's proven! The fact that it's not recognized is the problem for those who want to maintain doubt. EHS is one of the pathologies of EMFs; there are all the others.

2480 – Françoise MARCHADIER, France

2481 – Wally VERBOOG, Netherlands – I agree with this and call on all healthcare and government professionals, as well as telecommunications workers and employers, to take radiation seriously and take appropriate measures. This is especially important for people with electromagnetic hypersensitivity (EHS), starting with ensuring safe living and working conditions.

2482 – H.T., Belgium – I suffer from radiation, electrosmog, and magnetic fields. They make me sick, exhausted, and tired; I get heart palpitations, pressure in my head and body, ringing in my ears, trouble concentrating, etc., etc.

2483 – MV, Belgium – I am myself a hypersensitive person and I know several friends who are in the heart.

2484 – Pieter DE KLERK, Nederland – Because of the many cell towers and their excessively high power levels, I've developed EHS, which isn't recognized by the authorities—and they're even deliberately turning a blind eye to it. In short, it's a struggle to survive in every aspect of life: work, leisure, and relationships. In fact, it's impossible to hear anything in the Netherlands. Enjoying life is totally out of the question!!!

2485 – GC, Belgium – I have friends who have these problems.

2486 – MD, France – I am severely disabled by electrohypersensitivity and no social life is possible, as well as exclusion from care.

2487 – JC, Spain – I sign this appeal because I am already very well-informed about electromagnetic fields (EMF), their toxicity, and the very real harmful consequences on human, animal, and plant health. Personally, I live in an increasingly hostile environment, surrounded by invisible radiation that I measure daily, so I have had to improve my skills in anti-radiation protection techniques. It is regrettable that the masses are themselves fueling the advancement of 5G, 6G, and other technologies.

2488 – MM M., France – Because I trust you and because raising awareness of this issue is important, people are suffering.

2489 – LK, Belgium – I know someone.

2490 – AK, Belgium – I know someone affected.

2491 – Franck GAILLOT, France – I am convinced that the effects of OEMs on humans and nature will be one of the next health catastrophes.

2492 – CJ, Belgium – This is a real problem that should not be ignored.

2493 – Beatrix ANNAU, Austria – I am myself hypersensitive to electrosmog.

2494 – Bengt HAKANSSON, Sweden

2495 – Sophie SAUTRE, France – I have very few opportunities to work, I am apprehensive about moving, I feel sidelined by society.

2496 – Renaat VAN HAUWERMEIREN, Belgium – I know someone who has this problem and I definitely want to support her in this way.

2497 – Darya PRIMAK, France – Helping and supporting those who are suffering.

2498 – CH, Germany

2499 – ES, France – I have relatives who are affected.

2500 – RL, France – I want to be inclusive.

2501 – AV, Belgium – An acquaintance is in the case.

2502 – Rob VAN DER BOOM, Netherlands – The risks of electromagnetic fields (EMFs) for human and environmental health are not yet accepted by formal institutions in nearly all countries. Science shows that many diseases and malfunctions of organisms are promoted or caused by EMFs. We call for a change in the authorities' approach to handling research.

2503 – Peter BELAEN, Belgium – In my private life, I have to deal with the comments of people I've encountered in my home (my old house, a career setback, being "saved" at my office or in public places, etc.) because more and more types of radiation are becoming the norm in our daily lives (Wi-Fi, remote controls and automated systems, Bluetooth, etc.) and are being increased to ever-higher frequencies. When I see the physical and emotional consequences all around me, I can't help but be deeply concerned about this trend, which is considered "normal" without prioritizing the most important issues (including public health). I wonder if this is just another European "asbestos story"?

2504 – JF, Spain – May the harm done with electromagnetic radiation be discovered.

2505 – Catherine RICHARD, Luxembourg – I have a close friend affected by EHS and I think it is time to take the condition of EHS seriously.

2506 – JG, France – I feel these artificial radiation.

2507 – BL, France – I am very concerned following the installation of two antennas on the roof of my building 6 months ago; since then, my health problems have been piling up. This appeal really needs to be widespread to denounce this public health scandal.

2508 – GA, France – I feel concerned.

2509 – Klaus Kirchner, Germany – Because health is at risk and I have health problems due to the activation of 5G (forced irradiation).

2510 – Gerrit EGBERTS, Nederland – There is plenty of evidence to support this!

2511 – Rodolphe AUGIRON, France – This is truly a public health problem that is, to this day, completely ignored. No chance, not even of dialogue, is being seriously considered. A social injustice in my opinion...

2512 – BV, Belgium – I am electrosensitive. Symptoms: throbbing pain during phone calls since 2006, tingling and burning sensations in my fingers when touching Wi-Fi-connected screens, pressure on my ears and a tight band around my head when using Wi-Fi, flashing lights in my head when using Bluetooth, and so on. Very sensitive...I no longer go out to avoid further deterioration and these sensations.

2513 – CD, UK – Because this is incredibly important.

2514 – SF, Belgium – I have EHS and I suffer daily because of my environment. I'm afraid for our children!

2515 – Maryse LAURENT, France – I sign the appeal because the threat is terrible for the planet, for us and for our children.

2516 – Ingrid WREDEN, Norway – The ubiquitous radiation from wireless technology harms all life, because all biological life depends on very weak electromagnetic signals. The neurons in our bodies communicate in electromagnetic and electrochemical "whispers", and most biological processes depend on electrical ions traveling across the membranes of each cell in our body. To believe that we are unaffected by man made radiation from our technology is naive and shows little understanding of the fact that we are electromagnetic beings. The signals used in modern wireless communication technology are foreign to the body and to the environment. We have evolved without pulse-modulated microwave radiation, and the natural background radiation in the microwave spectrum is very low (almost zero) compared to today's levels of man-made radiation. Radiation from wireless technology acts like an environmental toxin, and we already see the consequences. I am particularly concerned about children and young people, who are suffering from greatly increased rates of headaches, concentration problems, behavioral disorders, learning difficulties, fatigue, depression and anxiety – symptoms that are also seen to increase significantly in laboratory animals exposed to this type of radiation from ordinary wireless devices. The exposure in classrooms is enormous, and even at home children are not free from it. In animal experiments, researchers have found that radiation from commonly used wireless technology creates oxidative stress, damage to the central nervous system, DNA-damage and an increase of certain forms of cancer, among other detrimental effects. Some individuals are more sensitive than others, and the most sensitive suffer greatly! The radiation is even imposed on them in their own homes, without their consent. The policy of ever increasing the use of wireless technology in our society is damaging. It is abusive against vulnerable groups. We are ruining people's lives with this, and it has to stop! (The ubiquitous radiation from wireless technologies is harmful to all life, because all biological life depends on very weak electromagnetic signals. The neurons in our bodies communicate through electromagnetic and electrochemical «whispers,» and most biological processes depend on the electrical ions that pass through the membranes of every cell in our bodies. To believe that we are unaffected by man-made radiation from our technology is naive and demonstrates a lack of understanding of the fact that we are electromagnetic beings. The signals used in modern wireless communication technologies are alien to the body and the environment. We evolved without pulsed-wavelength radiation, and natural background radiation in the microwave spectrum is very weak (almost zero) compared to current levels of man-made radiation. Wireless technology radiation acts as an environmental toxin, and we are already seeing the consequences. I am particularly concerned about children and young people, who are suffering from a sharp increase in headaches, concentration problems, Behavioral problems, learning difficulties, fatigue, depression, and anxiety—symptoms also observed in laboratory animals exposed to this type of radiation from ordinary wireless devices. Exposure in classrooms is enormous, and even at home, children are not spared. In animal experiments, researchers have found that radiation from commonly used wireless technologies causes oxidative stress, damage to the central nervous system, DNA damage, and an increased risk of certain types of cancer, among other harmful effects. Some people are more sensitive than others, and the most sensitive suffer greatly! They are even subjected to radiation in their own homes, without their consent. The policy of continually increasing the use of wireless technology in our society is harmful. It is abusive toward vulnerable groups. We are ruining people's lives with this, and it must stop!

1517 – PM, France – It is urgent to act for life.

1518 – MM, France – I am not currently electrosensitive, but I sometimes experience symptoms such as headaches and other ailments. I suspect electromagnetic radiation is responsible.

2519 – Yuliya PRIMAK, France – Totally agree with the EHS people.

2520 – Nadine VERGNAUD, France – For the future of all the little children in this universe that terrorists seek to disconnect.

2521 – Joëlle DEMOULIN, Belgium – I suffer from electromagnetic hypersensitivity (EHS) and multiple chemical sensitivities, without sufficient income to leave this unhealthy house (electric heating, ungrounded electricity, cramped rooms, etc.). I made my son ill by moving into this house, and I still dream of leaving it after all these years, so I can also take in a young, mistreated

dog... The Black Virgin has also just taken away my small allowance of €260.00/month, just when I need to buy new anti-radiation devices, especially so we can sleep better (from the neighbor's Wi-Fi)! Thank you from the bottom of my heart for this appeal.

2522 – CC, France – I know people with EHS whose daily life is an almost unbearable ordeal.

2523 – CV, Nederland – I have known for 14 years that I am sensitive to electromagnetic fields. It is becoming more and more difficult to avoid them. As a result, we isolate ourselves more and more.

2524 – Agnes GALERNE, France – I wish that: – areas can be protected from electromagnetic pollution for electrosensitive people – health professionals are informed and trained in these new pathologies,– public authorities inform the population of the dangers of excessive exposure from mobile telephony.

2525 – AA, Spain – I am suffering from emerging diseases without the administrations interfering and leaving us to die alive.

2526 – Marie-Claude SUDAN, Switzerland

2527 – Martine DORIAN, France

2528 – Gilbert MARTIN, France

2529 – Jano MARTIN, Belgium

2530 – Danielle FRESSE, France

2531 – Christiane ESTEVE, France

2532 – EE, France

2533 – Carole ALAZRD, France

2534 – Karine DELPORTE, France

2535 – Sylvain DALLO, France

2536 – AG, France – Electromagnetic raiation is making us sick. We must avoid all the suffering of those with electromagnetic hypersensitivity (EHS), who, incidentally, are the canaries in the coal mine. What will become of the children?

2537 – LV, France – I can no longer access my workstation, a wifi router has just been installed above my head, (severe pain, confusion etc.) I am going to lose my job.

2538 – JH, France – I am suffering from EHS (Electromagnetic Hypersensitivity). I haven't been able to work for a long time. No social life. No family life. NOTHING. Just survival. A living dead. Constant fatigue and pain. I'm looking to move, but where to? And how? EHS often goes hand in hand with financial insecurity. HELP!

2539 – Michele CLAES, Belgium – There is an urgent need to act, inform, and educate the general public on this issue.

2540 – RK, Nederland – People sensitive to radiation need to be more aware and supported.

2541 – Martine CHARON, France

2542 – ND, France – This is important.

2543 – MF, France – We are all in danger.

2544 – CF, France – I understand their concerns and suffering.

2545 – Jean-Pierre HERBIN, France – EHS incompatible with life on Earth.

2546 – CB, France – I live not far from a 5G antenna, and I suffer from very frequent, debilitating migraines that last for three consecutive days. I also experience mood swings and constant fatigue. Furthermore, we are bombarded almost daily, and even several times a day, with chemtrails sprayed directly over our house and across the entire town. It's horrific what we're going through! This must all stop quickly for everyone's sake.

2547 – QM, France – I feel directly concerned because this is a real health problem even though I am not affected by this disease.

2548 – CC, France – Yes, this is becoming URGENT. STOP to the pollution from electromagnetic radiation

2549 – GM, France

2550 – BE, France – I sympathize...

2551 – RF, France – I myself am EHS.

2552 – SI, France – Because 5G isn't enough, soon there will be 6G and antennas everywhere!!

2553 – JH, Canada – EHS must be recognized and white zones must be integrated.

2554 – IR, France – I am concerned.

2555 – Jacques LE BOUEDEC, France – I am EHS.

2556 – GM, France – I don't want antennas.

2557 – AP, Belgium – I think that ALL living things are impacted by certain types of radiation and that electrosensitive people are warning the world. For the sake of convenience and comfort, we avoid thinking about it... now, no one will be able to claim they didn't know!

2558 – Caroline BOULAY, France

2559 – KH, Sweden – 5G is available for long periods of time, with Wi-Fi, Bluetooth and other connections, which can be connected to the planet. Cars are blamed, but they have existed long before the climate went haywire. On the other hand, electric cars contribute to the deterioration. From its "smart" system, it is now possible to use it. People with environmentally related illnesses such as EHS, MCS and ME are affected particularly hard, because they have nowhere to go where they can be free from symptoms caused by this.

If you have a long time to go, you will have to wait until the end of the day. In Sweden, people turn a blind eye to all the studies that exist in the world. The same also applies to illnesses caused by this. Afterwards, you should wait for the man to take care of the job, after which the man will wait for the man to do the vet. Dare to take action on this, otherwise it will be too late.

2560 – Lyne FIRCO, France

2561 – Mickael MARTENSSON, Denmark – I have family members who are suffering.

2562 – Heike HABEL, Germany – It is urgently needed.

2563 – Hubert FIRCO, France – I myself suffer from this little-recognized pathology.

2564 – NB, France – Everyone is affected.

2565 – JJ, Germany – My friend is seriously injured.

2566 – GW, UK – As someone with EHS (Electromagnetic Hypersensitivity) of many years, I am particularly keen that this governmental betrayal of public health be called out.

2567 – Janine McNAMARA, USA – I have severe disabling EHS. I have been unable to work or get disability. My parents were supporting me financially and housing me, now they have died. I have no idea what will become of me now. This is a humanitarian crisis.

2568 – Pierre BEAUFRANC – France – I am sensitive to the suffering of EHS.

2569 – Kate HAMO, Denmark – THIS IS AN IMPORTANT QUESTION!

2570 – YB, Luxembourg – Significant devastating effects.

2571 – FB, Luxembourg – Everyone is affected.

2572 – Pia SASSO, France – A genocide disguised as technological advancement.

2573 – Dominique BONNAL, France – I am increasingly bothered by the neighbors' wifi (dizziness, insomnia...) and a project for a new 42m antenna in the town!

2574 – Johanna VON ALLMEN JUGIAN, France – I wish that we could all live without this harmful radiation.

2575 – Sylvestre BIFFOT, Gabon – EHS causes significant damage, and governments are slow to acknowledge this condition. Our efforts will support this issue.

2576 – Pierre VERGOBBI, France – My wife has EHS and suffers from it.

2577 – Bruno MONFEUILLARD, France

2578 – Clémence BONFAND, France

2579 – Françoise CUNEO-VIDAL, France – I have been EHS (Electromagnetic Hypersensitivity) since 2012, a socially isolating situation because few people realize the effect of electromagnetic radiation on our daily lives; it's a matter of survival!

2580 – Romain GAURAT, France – I know someone affected .

2581 – AB, France – A 5G antenna is going to be installed 500m from my home

2582 – Céline SCHMITT, France – I am ehs, and I would like not to end up in a cave (besides, there won't be enough for all of us).

2583 – SG, France – I am electrohypersensitive; I have no life anymore. It is urgent that technology be put at the service of life, not the other way around! Everyone is impacted by this scourge; we can't take it anymore! No more access to healthcare, government services, sports, or work. It's an assault, and there's little consideration from others. It's an aberration, nonsense, and our health, our lives are in danger! Urgent measures must be taken for all living things: animals, plants, and future generations! It's torture I wouldn't wish on anyone! It creates oxidative stress, denaturing our DNA. This EMF raiation is inundating us and are everywhere. Elected officials must take this into account, help us, and warn citizens about the harmful effects of this excessive radiation, all for financial gain! What is our future? There are more and more of us! Must we live in caves to survive?

2584 – Laure MAYER, France – The effects of all this electromagnetic radiation are underestimated. We are only on the verge of knowing the true extent of the damage.

2585 – ZG, USA

2586 – SH, Israel

2587 – Peter RUTJES, Netherlands – Because of EHS, I live in isolation; I have no social life, no job, no suitable public transportation, and no access to public spaces such as hospitals and doctors' offices. Administrative procedures, banking, and identity verification are shaped by the monopolies and the proliferation of smartphones and smart meters.

2588 – AT, Germany – Impacted myself.

2589 – CK, Germany – I am impacted.

2590 – NL, Belgium – I have debilitating chronic fatigue.

2591 – LD, France – Public health issues.

2592 – BB, Germany – I am personally affected by this, and it is finally time for politicians to take this issue seriously and for the public to be informed, because this is a technology that, while great and convenient, does not represent true progress—quite the opposite! This so-called progress is directed against all LIFE!

2593 – CD, France – Electrosensitive, I need places with low levels of electromagnetic radiation to recharge (which is the case at home in the countryside). Elsewhere, depending on the duration or intensity of radiation, the upper part of my body, primarily, heats up, I feel tension, which gradually leads to headaches, then difficulty concentrating... Then... this feeling of having to flee by getting away as quickly as possible. For example, it's becoming increasingly difficult not to use the internet on my mobile phone for essential tasks, like rebooking a train ticket when I've missed my first... there are no longer any ticket counters with staff in some stations... it's difficult to travel without Wi-Fi (trains, planes, hotels). Could we be given alternatives so that we can live?

2594 – Aude TANGHE, Belgium – This appeal is essential for what comes next. Too many people are suffering.

2595 – AK, Germany – It is a form of physical harm. People, animals (insects), and plants (trees) suffer as a result.

2596 – MG, France – Artificial radiation is harmful to all living beings: humans, animals, plants... We can speak of torture, of homicide... By artificial radiation, we must understand electro-

magnetic radiation of course, but also infrasound waves (wind turbines) for which there is no protection for those affected, and other types of artificial radiation...

2597 – Hélène MEXMAIN, France – I am EHS – MCS.

2598 – CH, France – I am EHS! and I am aware of the impacts on all men and all of creation!

2599 – PH, France – Aware of the pain of people who are EHS.

2600 – Pascale MUSSAULT, France – I am a palliative care physician and have become electro-hypersensitive (EHS) after living opposite a 5G antenna. Seeing my health deteriorate, and that of increasingly younger patients, is intolerable. The precautionary principle must be applied.

2601 – JV, France – EHS

2602 – AA, France – I have suffered from EHS (Electromagnetic Hypersensitivity) for several years, and it prevents me from living and sleeping, even in my own home. My nervous system is affected. I'm exhausted! I had cell towers removed in the Ardennes region in front of our house. This was after I discovered a cluster of deaths and cancers linked to these towers within 10 years or less! Now, in the Paris region, I can no longer tolerate my neighbors' Wi-Fi, all the 5G antennas in the neighborhood, and even less cell phones. Even in hospitals, it's a nightmare! We want to be treated for this, truly, and to be able to live again and be taken seriously!!

2603 – Dominique RAGOY, France – It's so important!

2604 – François GENETAY, France – Thank you.

2605 – Laurence MONNERET, France – I support this awareness.

2606 – Laurence LILAS, France – I completely agree with this awareness

2607 – VL, France – Adheres to this awareness.

2608 – DL, France – I fully agree with this awareness.

2609 – Marie-Catherine BUCHOT, France – My daughter is a victim of this disability and I see her suffering, isolation and helplessness every day, due to the non-recognition of this disease by the ARS and public authorities.

2610 – Diana CONSTANZA CARVAJAL, Colombia – Electrosensitivity is a physical response to a hyperconnected world and it is urgent to take effective and forceful measures to protect public health, especially that of new generations.

2611 – BT, France – Electromagnetic radiation is everywhere; it's difficult to escape them. Every nook and cranny must be covered. It is urgent to have vast areas of «white zone» (areas without coverage) in each region to preserve biodiversity and a good quality of life.

2612 – Linda KURTZ, USA – I am electrosensitive. I am one of many affected.

2613 – Lyne DUCROCQ, France – Affected by EHS! Fed up and rejecting electromagnetic radiation!!!!

2614 – MD, France – People with EHS need to be able to take refuge in white zones.

2615 – MM, Luxembourg – I want to support this cause.

2616 – AB, France – I sign, I am Electro Sensitive.

2617 – JW, France – Out of solidarity with vulnerable people, I had a professional life that was seemingly isolated but nonetheless involved driving with a phone and Bluetooth! Knowing that every healthy person is a sick person who doesn't know it...

2618 -CM, France – I am sick (electrosensitive syndrome) and can no longer enjoy a normal life in public areas, in cities, and even in my own house due to the presence of public or neighboring Wi-Fi and antennas.

2619 – JC, UK – I have been affected by RF radiation from my cell phone. The joints in my fingers, particularly those in my right hand which I use for texting, have become inflamed and deformed.

2620 – CD, France – So that everyone can become aware of it.

2621 – JR, France – Electromagnetic pollution remains a real danger to the living world in all its forms. It is high time that appropriate measures are taken.

2621 – JR, France – Electromagnetic pollution remains a real danger to the living world in all its forms. It is high time that appropriate measures are taken.

2622 – SL, Belgium – Health is paramount.

2623 – Stefan SATTLER, Belgium – We need awareness and action!

2624 – MB, Belgium – You only need to listen to Dr. Paul Héroux to know that this radiation is harmful and poison those who are sensitive to them.

2625 – JM, France – I am EHS.

2626 – FB, France – Out of solidarity because radiation of all kinds 24/7 can only be harmful to all living things (human/fauna/flora), can disrupt sleep, and cause chronic fatigue, even tinnitus and other ailments.

2627 – MG, Canada – I know many Electro-hypersensitive people and I support them.

2628 – Rey BÄHLER, Switzerland – EMF pollution makes me sick, and also others who don't know it and don't want to hear about it; they'd rather die. What is most horrifying is the noticeable adverse effect that EMF pollution already has on animals and especially plants; all the while, big wireless companies are still pushing for even more wireless coverage. This insanity must stop.

2629 Fabienne CRESENS, Belgium – The health and suffering of a segment of the population must be taken into account and addressed. Thank you on their behalf.

2630 – Françoise DEPAUW, Belgium – Alert. Stop.

2631 – ES, Germany – ...I am concerned myself and I do not know how to defend myself against what affects my health.

2632 – RP, France – A family member is affected by this problem so I am sensitive to this appeal.

2533 – MM, France – In the name of the obligation to assist persons in danger, I demand a comprehensive reform on the danger of artificial EMF radiation.

2634 – AP, Belgium – I am electrosensitive and more and more people around me have symptoms and complain of ailments identical to mine.

2635 – BM, Belgium – I support minorities in the name of inclusivity.

2636 – PS, Belgium – This is unbearable for these people and we MUST intervene quickly.

2637 – Elisa CARPIAUX, Belgium – This is an unbearable situation for some people!

2638 – BD, France – I stand in solidarity with electrocuted people who are highly sensitive

2639 – Bruno POLITI, Belgium – I am convinced that this has a very negative effect on all living things. Please note that it does not take effect for 2 years. If you do this, you may find that there are no problems, and the problem may not be obvious.

2640 – EO, Germany – I'm affected by this myself. I see the damage to nature; I hear about calves born blind; I've seen crippled chicks. It's almost getting out of hand!

2641 – KV, Estonia

2642 – Cécile GOUZEE, Belgium – Out of solidarity.

2643 – AL, Belgium – I know people with EHS whose lives are very complicated because of the radiation we create with our technologies and we must think about the future of our children... of life on earth... this is becoming urgent.

2644 – AT, Poland – I am EHS.

2645 – DD, Belgium – For the well-being of electro-sensitive people.

2646 – AB, Nerdeland – Because I suffer the consequences myself, socially and physically.

2647 – Michel FOROPON, France – I am electro-sensitive.

2648 – Henryk BANACH, Poland – I am convinced that EMF is harmful to the environment, especially to human health.

2649 – AU, Nederland – I know the effects of radiation myself.

2650 – SM, France – I have had problems related to electrosensitivity for 7 months.

2651 – MC, Poland – I sign the appeal because I believe that electronegativity to electromagnetic fields is a real health problem in society, as recent studies indicate.

2652 – Mr. K, Poland – I help my friends, but I also care about my own safety and that of my family.

2653 – Ruud SIKKING, Nederland – As an EMF measurement specialist, I am familiar with the terrible symptoms of EHS.

2654 – Catherine LAGARDE, France – I was EHS for several years.

2655 – CT, France – I am Electrosensitive.

2656 – SB, France – I have EHS and I suffer every day whenever I move around. We are forced to flee certain places. We no longer have the freedom to come and go, the right to health...

2657 – FW, Australia – I know what these frequencies can do effecting the function of the brain, constant changes in frequencies all Day every Day cause sleeping problems its Torture ...

2658 – Juliet Kelly – Ireland – We were lied to, like with cigarettes, wireless radiation is very harmful; many might not realize they are sick from it. I was one canary in the coal mine trying to stop 5G and all Wi-Fi in my town; no one listened. I was mad. My world is so small now; I can go nowhere; there are crowds of people. Living in my town is crippling as I am surrounded by masts, antennas, smart meters, and mobiles. #EHS

2659 – Fabien VANDE VELDE, Belgium – I have a friend, whom I haven't seen for a long time, who suffers from these symptoms and it is thanks to her that I saw this petition.

2660 – AJ, Poland – An important health question.

2661 – Kirsten HELLIER, UK – Its too much already.

2662 – Karine WATELET, Belgium – Human and health scandal.

2663 – Shari CHAMPAGNE, USA – After many untested and unregulated towers went up over my home, office, and animal sanctuary, I became sick. After a long journey to find out what was happening, I was diagnosed with radiation exposure, then radiation poisoning, And now it's ELECTROMAGNETIC RADIATION SYNDROME (ERS). My animals and neighbors are dying.

2664 – Jennifer JANSEN, USA – (...) It is constant harassment. Pulses in through my ears 24/7.

2665 – Evelyne MEXMAIN, France

2666 – Thomas GÖTZINGER, Germany – I am myself a victim.

2667 – RN, Belgium – I am EHS. Computer scientist by profession.

2668 – Mirella CAPELLI, Italy – Electromagnetic fields have biological effects on all living organisms.

2669 – Annie DERRIEN, France – Because I see the lives of my daughter, who has EHS (Electromagnetic Hypersensitivity), and my son-in-law, who no longer have a social life, who constantly suffer from migraines and fatigue, and who can't take the subway without being bedridden the next day. I wouldn't wish this on anyone; those who are hesitant should see the list of sources and studies.

2670 – Sarah ALVAREZ, Belgium – The industry is ignoring the harmful effects of electromagnetic radiation and supporting sensitive individuals

2671 – JR, Germany – Because discrimination through electromagnetic pollution drives people into financial ruin, social isolation, and loss of homes. Without a safe place to live, some resort to suicide. Urgent change is required.

2672 – Gérald MEXMAIN, France – My wife has EHS-MCS, a permanent disability, an intangible prison, a general misunderstanding, a caged minority, a life that weeps in the face of human rights. (...), a shitty world, as George Abitbol would say.

2673 – ML, France – I am EHS, and misunderstood and invisible.

2674 – AS, Spain – I join all these people. This must stop for everyone.

2675 – CC, Australia – I hereby sign this appeal to be in solidarity with EHS bringing attention to the severe and prolonged suffering endured as a result of Electromagnetic Radiation (EMR). My experience has not only been one of immense physical and emotional distress, but also one marked by complete ignorance, dismissal, and negligence from both Australian authorities and medical professionals (except one extraodinary doctor I honor with all my heart and soul, my treating Dr. MB) For over a decade, I have been forced to live like an environmental refugee, displaced and unsupported, with no assistance in securing housing or suitable work. I have battled the system with no avail and I have been denied basic recognition of my disability, leaving me to navigate this debilitating condition without the fundamental support I need. I have been humiliated, disbelieved, and dismissed, despite the overwhelming nature of my suffering. At times, I have been subjected to inhumane living conditions, relying on temporary accommodation in remote areas where I was left to fend for myself. This appeal is not just a call for help, but a demand for recognition of the suffering EHS have endured due to the failure of authorities to act with urgency or compassion. I sign this appeal in hope of a future where those like me no longer face such cruelty and neglect.

2676 – DL, Australia – I am severely electrohypersensitive and am disabled and isolated 98% of the time because of it. I also know another woman who can't sign

2677 – Alan Manson , Australia – EHS is affecting so many people because the amount of radiation throughout communities is increasing. It MUST be limited at least !

2678 – Daniel HOLLAND, Australia – Life is a living hell for me. A cell tower that was analog when we moved there has not only turned into a microwave transmitter, but a second base station has been built around it. I became so unwell I was flown to the city hospital. I have been couch surfing since then, over six months now. We are trying to sell our house. 20 meters from my house is killing us. My nervous system is completely shot after 13 years of exposure .

2679 – EL, Belgium – I sign this appeal because we are not receiving honest information on this subject because, once again, it is money that rules?

2680 – VP, France – When will there be a comprehensive reform of European regulations on exposure to electromagnetic radiation, taking into account the recognition of biological effects?

2681 – KP, Belgium – I sign because my life is no longer the same. I suffer mainly from severe migraines and insomnia (the list of drawbacks caused by electromagnetic radiation is long and well-known). I find it incredible that productivity takes precedence over well-being.

2682 – MM, Spain – I am electrosensitive.

2683 – DB, UK – I suffer from EHS and my disability is ignored by my government. I will soon have nowhere to live that doesn't make me extremely ill .

2684 – Antonio GAGLIARDI, Italy – More and more people are electrosensitive.

2685 – CM, France – In order to reduce electromagnetic pollution, and to take care of humans, to live healthier lives.

2686 – RA, France – To support.

2687 – PA, France – To help.

2688 – Caroline SOWERBY, UK – I have been affected by LFN and RF EMF. I'm a personal trainer of 27 years and have lost all mobility.

2689 – Anana TERRAMORSI, France – I am electrosensitive and wifi and cell towers, plus the planes full of heavy metals that spray us every day make me sick.

2690 – Luc HENRY, France – For the survival of humanity and freedom.

2691 – PL, France – Electromagnetic radiation are a major problem, it's time to make things happen.

2692 – CM, France – Because it is sensitive, a subject of public interest.

2693 – TR, Italy

2694 – SG, Italy

2695 – SF, Spain – I know people with EHS.

2696 – Enough studies show that electromagnetic radiation is a source of serious illnesses, including cancer, and we shouldn't wait until half the population has headaches to do something about it. Especially since 5G antennas are being deployed everywhere!

2697 – Dominique DUBOUEF, France – I am electro-hypersensitive to electromagnetic radiation.

2698 – SC, UK – This is a crime off humanity (..) this is a fight for humanity.

2699 – MF, Spain – Health

2700 – Yann DELATY, France – The problem has worsened and is increasingly worrying. Every citizen has the right to dignity and access to healthcare. Imposing this pollution on the general environment is criminal. We must inform our fellow citizens and fight against these injustices.

2701 – Jérémy HUGUES, Belgium – Some everyday symptoms have been significantly reduced by avoiding the use of devices emitting electromagnetic radiation: headaches and joint pain. I believe that electromagnetic fields are silent killers, greatly underestimated, and it's time to wake up! We must protect ourselves and our children!

2702 – Isabel SANCHEZ BIANCHI, Spain – We talk more and more about technology and we see more and more electrical

devices appearing. WIFI is everywhere and you can turn yours off because there's the neighbors' WIFI.

2703 – Viviane TIS, Belgium – I have a friend who is electrosensitive and I know that her life has become a nightmare.

2704 – AM, France – I have been electrosensitive since 2015, and I can tolerate it, but for how long?

2705 – Grzegorz KORWIN-SZYMANOWSKI, Poland – I want to have a choice, I want to be free.

2706 – CP, France – I am EHS.

2707 – Kirsten RATHJEN, Germany – I am electrosensitive myself and have CFS/ME, so I can no longer work. My ability to participate in daily life is very limited. I'm very afraid of having to go to the hospital someday. Right now, I have to move again.

2708 – JD, USA – My wife is disabled by electrosensitivity. (All life is being harmed and microwaved. Pulsed wireless pollution signals need to end. There are NO safe levels of man-made radio frequency. They all disrupt our biology as well as the planet and all life on earth.) – Arthur Firstenberg.

2709 – AL, Belgium – Since I suffered from Guillain Barré syndrome, my nervous system is very sensitive. My home is my haven of peace, which is now threatened by the compulsory installation of digital meters. Where can I go?

2710 – Darline LEVRAU – Belgium – I have EHS and want to be heard, along with everyone else who is aware of these harmful frequencies and radiation.

2711 – LS, USA – I've become much sicker as a result of exposure to EMF fields from computer and cell phone technology. I've developed increasing damage to different organs in my body as a result of increased exposure in a nursing home that is not paying attention to the high use of technology that is literally bleeding through old wiring into the room I am in here. And I was supposed to be a computer software expert and teach people how to use computers. Well, that didn't work.

2712 – AQ, Belgium – I sign the appeal because I am electro-hypersensitive.

2713 – Morena BRAGLIA, Italy – And an emergency now.

2714 – Karla LEAL, USA

2715 – Sifiane EL ASAD, Belgium – I am worried about the future of species.

2716 – DB, USA – I have been suffering with EHS since antennas were installed over my apartment before COVID. With the proliferation of cell towers, antennas, and satellites, it's just a matter of time before everyone is sick.

2717 – EM, Spain – I am electrosensitive.

1718 – Pascal PAQUIN, France – Out of solidarity.

2719 – Christian VAN HOUCKE, France – The invisible can be insidious, unsuspected, destructive...

2720 – GL, Canada – This is incredibly important.

2721 – Joël GORD, France – There is no pollution, nor war, except that which is visible to all. The most pernicious ones penetrate us completely without our knowledge.

2722 – JN, France – 5% of the population is hypersensitive.

2723 – NL, Israel – This causes damage, I wish there was more information.

2724 – Laurent BESSON, France – Electromagnetic radiation is too ubiquitous and harmful to the health of living beings...

2725 – JL, France – Since the introduction of new 5G waves, I have been experiencing changes in my body, including quite severe tinnitus and even temporary bouts of hyperacusis requiring the use of noise-canceling headphones...

2726 – Jean-Pierre HOKA, France

2727 – Dominique PROST, France

2728 – Cyril GERENTE, France

2729 – NT, France

2730 – JD, France – I am EHS.

2731 – Jacques LEJEUNE, Belgium – I have been EHS for 20 years now & EVERY DAY I get bouts of pain in my feet and legs. EMP just destroys my life.

2732 – Marianne NICOLIER, France – Electrosensitive people have the right to a life that takes their illness into account, without being excluded from society.

2733 – Gérard BONNET, France – I gladly sign this appeal because I am myself hyper-electrosensitive, therefore very aware of this problem, even if in my case it is a bearable electrosensitivity, which results in recurring insomnia totally linked to exposure to elecrtomagnetic radiation!

2734 – YP, France – I agree with your comments regarding the danger of electromagnetic radiation, it's impact on the health of populations, and the measures to be taken to remedy it.

2735 – JD, France : Science is increasingly proving the harmful effects of electromagnetic radiation on some of us. Why wait without taking action?

2736 – Sophie BIANCHI, France – I sign because it must be awful to become electrosensitive and it can happen to any one of us without warning.

2737 – Nurit YEHEZKELY, Israel – I sign the appeal because my body became EHS 5 years ago.

2738 – Susan FORSTER, USA – In 2004 I organized a SPECT brain scan pilot study of firefighters who were living/working at a California fire station where the first 2G cell tower in town was placed. They began experiencing neurological symptoms as soon as the tower was activated including severe headache, cognitive impairment, lack of attention, inability to go to sleep, inability to wake up or waking up as if they had been anesthetized, and on occasion getting lost on 911 emergency calls in the very town they had grown up in. Six men who had never had HazMat (chemical cleanup) exposure were tested. All six fire-

fighters had brain damage following a five-year exposure to the 2G tower. Firefighters are the strongest of the strong among us. When firefighters become the proverbial "canaries in the coal mine," what about the rest of society?

2739 – EA, France – To support EHS.

2740 – Christine CHAUVOIS, France

2741 – JS, France – Too tired, I need rest.

2742 – ES, France – I am unwell.

2743 – Iwona PIERTZAK, Poland – I live under the G5 mast and contracted blood cancer.

2744 – Harold Hauptmann, Belgium – 5G and higher-frequency waves are harmful to life on this planet. Enough is enough. In the name of business, we cannot continue to generate ever-increasing impacts on public health and the health of our natural environment with impunity. The precautionary principle must mandate biological impact studies and public referendums for every antenna installed.

2745 – HW, Belgium – I am a beekeeper

2746 – Raymond VIAL, France – I know people involved.

2747 – DJ, France – It's high time all these elected officials opened their eyes, turning a blind eye to the disaster already upon us!! Stop this harmful fog!!!

2748 – Olivier BACON, France – People with electromagnetic hypersensitivity (EHS) are whistleblowers who bear witness to the dangers of electromagnetic fields (EMF) and the proliferation of these technologies everywhere. Let's be vigilant in preserving areas free from electromagnetic radiation (forests, schools, colleges, high schools, and other places of refuge for people with EHS).

2749 – VL, France – I defend and protect life, nature against the forces that are slowly destroying them.

2750 – CW, France – I have been electrosensitive for 14 years.

2751 – SL, France – Aware of the dangers.

2752 – Claude BERAUD, France – I am an electrician specializing in biocompatible electrical systems, so I regularly encounter people with EHS (Electromagnetic Hypersensitivity). I am sensitive to this issue.

2753 – Agnes PHILY, France – I am impacted by emF radiation and especially on my sleep.

2754 – PD, France – Convinced of the harmful, toxic effects of electromagnetic radiation on the human body and because there is another way to envision technological progress more in harmony with human beings, I sign this appeal to stop the development of this electromagnetic pollution.

2755 – LM, USA – I had to see a functional medicine doctor for treatment following high EMF exposure. I have a TBI, and it took me back to the early days!!

2756 – BP, France – I have been EHS since 2003 (!); and suffered a severe stroke in 2008.

2757 – R. BELLISLE, Canada – I am severely electrohypersensitive and, as a result, I know that it is absolutely necessary to take measures to protect people affected (and those who will be affected) by radiation and to ensure them refuges.

2758 – VM, France – EHS

2759 – SB, USA

2760 – CM, France – I simply sympathize.

2761 – RL, France – To support

2762 – KB, France – Because everyone should have the choice to live where they want.

2763 – CL, France – I am EHS

2764 – Martine MESSEMAEKERS, France – Many young people are victims of brain tumors!

2765 – MC, France – So that respect for everyone's health takes precedence over the lure of money.

2766 – Rosaestrella ORTA, Mexico – Because I have been electrohypersensitive for 12 years and it's not just about feeling electromagnetic radiation, I have medical studies that show the physical damage.

2767 – CV, France – I am EHS and I suffer greatly from the isolation that this causes, from my inability to access care, whether at the doctor's, the dentist's or the hospital.

2768 – Pierre COUTOUX, France – People with electromagnetic hypersensitivity (EHS) are our sentinels of the artificial electromagnetic environment. The ECHR is seized: APPEAL BY GREEK CITIZENS BEFORE THE EUROPEAN COURT OF HUMAN RIGHTS AGAINST THE DECISION OF THE GREEK COURT OF JUSTICE CONCERNING THE 5G WIRELESS NETWORK.

2769 – MC, Belgium – I sign the Appeal.

2770 – Barbara DULIERE, Belgium – It is urgent to make things happen.

2771 – DB, Belgium – Today, this is no longer just a theory. After living outside the city for over 25 years, life has unfortunately brought me back. It only takes a few hours for me to feel tingling and pressure on my head, which persists and intensifies over the following days. As soon as I leave the city, the effects diminish within a few hours, and after 24 hours, there's almost no sign of them. Back in the city, the symptoms return. In the area where I live (in the city), I've detected no fewer than 40 Wi-Fi networks connected to 5G frequencies. This, combined with dozens, even hundreds, of connected devices, plus radio waves, plus connected vehicles, transforms what could be passive pollution into a veritable life-size microwave. It only takes a short time to feel it physically and energetically, which also causes concentration problems and unbearable energy pressure. Just as with smokers in the past, freedom of choice dictates that the choice of some to be «connected» should not influence the choices of others, and even less so public health. To regulate this phenomenon, it suffices to observe the natural frequency of an area (without electromagnetic emissions), linked to respect for living organisms, and to adhere to this rule. Those who disrupt

the natural order for reasons of conflicting interests should be prosecuted for endangering living organisms, the lives of others, and for deliberately harming public health. We should create designated connection zones for those who wish to use them, just as we created designated smoking areas and booths after recognizing the harmful and toxic effects of secondhand smoke.

2772 – CB, France – EHS, I am experiencing increasing behavioral problems after unavoidable exposure to EMFs and sensitivity to cleaning products...

2773 – JD, Belgium

2774 – Xavier-Alexandre PONS, France – I support the cause.

2775 – Renaud DETRIXHE, Belgium – I stand in solidarity with people who suffer from artificial electromagnetic radiation.

2776 – Nathalie DELHAYE, Belgium – I stand in solidarity with a friend and all those who suffer from this problem. I myself quickly experience pain from EMF radiation, in my eardrums, in my head, a deep, intense pain, if the conversation is even slightly long on the phone.

2777 – Andy VERMAUT, Belgium – Because I care about the health of our fellow human beings, our friends and our family.

3778 – CT, USA – This torture has to stop! It is a violation of universal Human Rights, the Nuremberg Code amongst other Constitutional Rights in the USA. No one gave consent for these technologies to be tested on us.

2779 – Jean-Paul BONTEMPS, France – I have to unplug the wifi at night in order to be able to sleep at night.

2780 – IC, Belgium – I am electrosensitive myself and it has a significant impact on my life.

2780 – IC, Belgium – I am electrosensitive myself and it has a significant impact on my life.

2781 – KS, Belgium – It is necessary.

2782 – LL, France – I have tinnitus, more and more young people have it, it is becoming a major public health problem.

2783 – DD, France – The state must protect its citizens.

2784 – RK, Germany – I am slightly affected.

2785 – JF, Australia – I am sensitive to artificial EMFs; globally, we need places where we can be without being constantly bombarded.

2786 – Bente Gilbu TILSET, Norway – I had to give up my job as a scientist, and my family had to move because I developed EHS. Symptoms started while working in an office with a high magnetic field, combined with the use of a mobile phone (in 2003).

2787 – AA, Spain – I sign the petition because I am one of those affected after three huge antennas were installed next to my house and because, since then, although I am fortunate and was able to gradually recover through a great deal of sacrifice and with the support of my family and friends, I am meeting more and more people whose lives have been destroyed, and because it affects us all, even though some people do not associate their illnesses with the growing exposure to electromagnetic fields. Please, stop this madness now!!!!

2788 – FT, Brazil – I believe that we need to act now to reduce EMF in our countries.

2789 – AA, Belgium – If this has a clear impact on micro-animals or plants, then it is clear that a moratorium is needed because humans are composed of sensitive micro-cells like all living things.

2790 – PK, Belgium – I know several people who are electrohypersensitive.

2791 – MW, France – I know people with EHS.

2792 – Frank MATHIEU, Germany – I have always had an abnormal EEG (since 1972) but lived a normal life. Since April 2000, I have suffered from epileptic attacks (mostly absences). Medication does not prevent me from losing consciousness from time to time. I have found a correlation between measured EMF (high and low frequencies) and the number of seizures.

2793 – S G., Norway – I want governments to be informed about their discrimination against thousands of people.

2794 – Michele DAIL, France

2795 – TB, Italy – EHS is in a very serious condition, increasing and correlating all of its electromagnetic conditions as it becomes incontrovertible in the major studios of the problem, such as Belpomme-Irigaray.

2796 – Epi CURVIN, France – Far too many people are suffering from this increasingly significant impact on their health due to electromagnetic pollution. STOP EMF pollution!

2797 – GG, France – So that we take care of the dangers of radiation.

2798 – Regis DE POORTERE, France – I know people who are electrosensitive. It's extremely difficult for them to live socially because everything is connected these days. Recognition of electrosensitive status, allowing the development of «white zones» (areas without electromagnetic fields), developing studies to understand the effects of electromagnetic radiation, etc. – all the measures requested in this petition seem necessary to me.

2799 – Christine JOSSIEN, France – I am electrosensitive.

2800 – Magali ROMAN, France – I am extremely EHS.

2801 – Gilbert BUSCAGLIA, France – EHS for thirty years, I observe that the public authorities remain stubbornly deaf to our suffering despite the tenacious relay of whistleblowers and representative associations and NGOs.

2802 – PM, Norway – I have EHS, and it disturbs my sleep (among other things), which is actually a serious issue. EMFs reduce my quality of life.

2803 – FE, Belgium.

2804 – Elisabeth LUCAS, France – I am electro-impaired and I would like to be able to live, to receive treatment, to reintegrate into society. LIFE, not DEATH.

2805 – Hildegunn AADLAND, Norway – This is about human rights .

2806 – PB, Norway – I got the problem after neighbor got the the new smart meter that everyone must have in Norway. Got immediately very sick and had to sell the house and move to another one and get worse economic situation and also problem to keep work due to all wifi and cellphone everyone is using with bluetooth nonstop. We need to find better solutions and not install wifi everywhere and use cables instead in hospitals, hotels, schools and so on. This will affect more and more people in the future.

2807 – SR, Norway – MF, Wifi, 5G, etc. are destroying people's health, get rid of this filth.

2808 – Johan LINDSTROM, Norway – The authorities' unregulated use of the electromagnetic spectrum—through the emission of electromagnetic fields (EMF) from cell phones, Wi-Fi, Bluetooth, and smart meters—is cause for concern because it exposes people to potential health risks without adequate regulation. These EMFs can cause biological damage, particularly at the cellular level. In the heat exchanger, EMF affects the mitochondria, which produce energy. EMF in the form of electron transport, which is produced by reactive oxygen species (ROS), causes toxic stress. This damages mitochondrial membranes and DNA and impairs energy production, a condition known as mitochondrial dysfunction. The result is the onset of symptoms: the nervous system and muscles are activated, and the organs that rely on energy are the hardest hit. EMF can be triggered by a hyperactive calcium channel (VGCC), which causes abnormal calcium influx into the cell. EMF can affect neurotransmission and hormonal regulation, as well as contribute to neurological problems caused by stress and depression. The authorities' failure to regulate ignores these risks, despite mounting evidence. Without measures to limit exposure, we risk increasing health problems at a time when wireless technology is growing rapidly.

2809 – Peder Sverdrup, Norway – Electromagnetic radiation from humans has increased very rapidly over a historically short period of about 100 years, to a level where some become ill and their lives are ruined. For all others, it represents increased stress on the body, making it another source of common Western chronic diseases, now occurring in increasingly younger populations.

2810 – Marcel HONSBEEK, Norway – As an EMF measurement specialist for VEMES and EMFconsult, I know how EMF exposure is stealing your quality of life by draining your energy and lowering your sleep quality. Protect yourself before you get too sick!

2811 – IP, Norway –Radiation levels are too high, 5G is harmful to everyone, and the telecommunications industry has free rein.

2812 – May-Britt NILSEN, Norway – Radiation is harmful.

2813 – NB, France

2814 – SS, Norway – This is a health problem and we want it to be recognized as a diagnosis.

2815 – Petter HAUGLI, Norway – More and more people are bothered and affected by electromagnetic radiation.

2816 – SW, Norway – I ended up disconnecting from the power grid because the power Company threatened to cut me off if I did not comply with their new smart meter installed in my bedroom. I was already living a simple life with no running water and little modern appliances because of my sensitivities as well as the wish to live close to nature. I felt they gave me no choice. My health is more important than being connected to the grid. The power companies are given way too much power to do whatever they want to their customers. Even destroying lives. Brute force.

2817 – Dorte SKULSTAD, Norway – My life is constantly disturbed by electromagnetic fields.

2818 – OH, Norway – After assisting people with electromagnetic hypersensitivity (EHS) with shielding and mitigating electromagnetic fields (EMF), I clearly see the benefit of living in a low EMF environment. The current ICNIRP guidelines do not protect people and must be revised as soon as possible to take into account the biological effects at exposure levels 1,000,000 times lower than the current «safety standards.»

2819 – Tone JOHNSEN, Norway – I am EHS and I suffer a lot. Yes to white zones.

2820 – MS, Norway –It's about protecting all life, not just humans, because we are all dependent on one another.

2821 – NB, Norway – I am hypersensitive to electricity.

2822 – KK, Poland

2823 – TF, Norway – I have been electrosensitive/electrohypersensitive for 30 years, with the many consequences of isolation, exclusion and health problems that this brings. It has become increasingly difficult to live on this planet with the widespread use of wireless technologies.

2824 – Anne Ragna SANN, Norway – I am electrosensitive. EMFs cause me health problems and prevent me from participating in society.

2825 – Katharina VINGMARK, Norway – I am Electrosensitive. For nature, all children, and the children to come!

2826 – HE, Norway – Jeg blir syk av EMF – I am sick because of EMFs – humans, animals and plants are sick – EMFs contribute to the destruction of nature and all living things.

2827 – ES, Norway – Electromagnetic radiation is harmful to all living organisms, including humans, animals, and plants.

2828 – Ingunn SWANN, Norway – The right not to be exposed to radiation is a human right in accordance with the right to free and informed consent enshrined in UN law. I demand radiation-free zones!

2829 – AB, Norway – I am sensitive to electricity.

2830 – TH, Norway – Is very sensitive to EHS.

2831 – Mona S. ANDERSEN, Norway – My health problems started in 1998 after I started using a mobile phone for the first time. I was only 26 years old at the time. It took over 20 years before I understood the connection. I have now shielded myself

from WiFi, mobile, DAB etc. (to which I react very strongly, with severe headaches, pressure in the eyes, red rashes, constantly new inflammations and strange episodes of illness that the specialists cannot find the cause of...) for a few years, and I notice a big difference in my health. After we had to accept having 2 smart meters installed in our house in 2024, the episodes of inflammation started again. My negative reactions to electromagnetic fields keeps me from living my life as I wish, and keeps me from being a social part of my family and my community. And makes me a burden for my country and my town, because I am too sick to be able to work because of my body's reactions to especially WiFi and smart meters, but also mobile phones, tablets, electric cars and so on.

2832 – EA, Norway – I sign because I myself am hypersensitive to electricity.

2833 – PL, France – Change.

2834 – AO, Norway – Because electrosmog is not good for my health.

2835 – CR, Norway – Because I am electrosensitive.

2836 – Tone Torp ANDERSEN, Norway – I am hypersensitive; my life is severely limited—I can no longer work, use public transportation, or participate in society. I am a refugee in my own country. This affects my children and my family. I've missed out on much of my children's upbringing because neither my body nor my mind functions properly—the pain is too intense, or the exhaustion knocks me to the ground. Now I know my mind is radiation; you know it's alive—I'm in the delta and you're there, mind you, and it doesn't matter. My mind is functioning again. I don't want to be a burden on the society I live in; I'm actually a resource, but all the radiation completely takes me out of commission. Let me and others be allowed to become a resource again. After all, I'm lucky—it's worse for those who don't understand why they're suffering, and there are plenty of them.

2837 – Jostein RAVNDAL, Norway – I can't travel because it's impossible to find hotels without WiFi. I get headaches and sleep poorly when exposed to WiFi radiation.

2838 – HS, Norway – Important for society and for all of our health.

2839 – AT, Luxembourg – I was previously afflicted with EHS and know many others who still are.

2840 – HW, Norway – I am concerned about the spread of electromagnetic fields in our society and its many adverse effects on humans, animals, and plants.

2841 – RR, Norway – Harmful to people, animals, and nature .

2842 – LV, Norway – I am EMF sensitive. Struggling to function with EMF in society.

2843 – Maryse Springler, France

2844 – MS, Norway – For the good of all living organisms on Earth, today and tomorrow.)

2845 – TN, Denmark – I suffer from extreme EHS and I can only encourage someone to create an association that would find the place with the least radiation in the world and create an EHS community there for those most affected by EHS. This is also key to getting EHS recognized as a real illness.

2846 – Rita Sund KORNBERG, Norway – It is very important not to harm the health of humans, birds and bees.

2847 – TF, Norway –1. What about the 2016 European Guidelines—are there any countries that follow them? 2. Can a country refuse to adopt an ICD-10 code for electromagnetic hypersensitivity? 3. Rejection of assessment (justified based on a study): Rejects documentation regarding causality and offers behavioral therapy as the best-documented treatment (2022). 4. What about the precautionary principle? (European Commission, Feb. 2000) 5. Can you manage the diagnosis or not? This is because EMF can affect the body, potentially causing cancer, altering calcium levels in white blood cells, etc. (Mats Hansson -/90 and Ann-Marie Lidmark -96) 6. Is the research on electromagnetic hypersensitivity credible? (Assar Fager -/03)

2848 – Aurélie MAUMON, France – I suffer from EHS (Electromagnetic Hypersensitivity) following prolonged overexposure to EMFs and then to the influence field of the particle accelerator at CERN in Geneva. I am 29 years old and disabled except in a white zone (area of low radiation).

2849 – AB, France – I know someone with the conditions.

2850 – BG, France –EHS is real – but those who survive it are normal. How many people put their hands into the fire and withdraw them before they burn? Life protects and survives – the government is imposing this technology on us and we are all suffering – we must re-evaluate the meaning of life and respect all life – Zen.

2851 – Else FROYNES, Norway – I am injured by electromagnetic radiation and have been exhausted since before the year 2000.

2852 – KL, Norway – I know too many people suffering from something resembling damage from EMF.

2853 – Fabienne SICARDON, France – I am the mother of a person with EHS whose life is heavily impacted by this intolerance, which is a real disability...

2854 – Yvette SICARDON, France – My granddaughter is very impacted: loss of job and loss of social life.

2855 – PI, Norway – The wireless industry commits a crime against humanity!!

2856 – Catherine ABEMONT, France

2857 – Beatrice AMOUROUX, France

2858 – Marie-Christine CHOCTEAU, France

2859 – DL, France

2860 – MD, France –

2861 – Franck COUSIN, France

2862 – ML, France

2863 – JM, France

2864 – Laurence BRETON, France

2865 – Nathalie PRINCE, France

2866 – Catherine BOUCHER, France – I have lived in my house for 30 years. In February 2019, a «Linky» smart meter and its PLC (Power Line Communication) technology were installed in my neighborhood. I quickly experienced intense overheating in my ears, which led to ear infections diagnosed by my doctor. I also suffered from headaches, tinnitus, extreme fatigue, and a rapid heartbeat, even without any particular exertion. In November of the same year, heavy snowfall caused a general power outage in my village for several days. To my great surprise and joy, I immediately regained the comfort of my home and my health. As soon as the power was restored, my symptoms returned, and the atmosphere in my house changed. Since then, I have been living with as many fuses as possible switched off, using rechargeable lamps, and with the heating unbearably low above 17 degrees Celsius. My health remains poor to this day, and I often sleep in a van in my yard. This has been my reality for the past 6 years.

2867 – Régine BONNEFOND, France – My life changed drastically in February 2019 when the «Linky» smart meters were installed. Since then, I've been living without light, with just four electrical outlets in the kitchen. I can't tolerate cell phones or cell towers for long. I plan every outing: off-peak hours for shopping... No more movies, shows, parties... I'm avoiding the world. This is life, or rather the non-life, of someone who is electro-hypersensitive!

2868 – Stéphanie ROBERT, France

2869 – Edwige JAULT, France

2870 – bB. D., Norway – I have been hypersensitive to electricity since 1997.

2871 – AE, Norway – We must stop the insanity.

2872 – EL, Norway – It's getting worse each year, so we need to stop this damaging pollution ASAP – before it is too late.

2873 – TL, Norway – I have family members who are seriously affected by EMFs.

2874 – Hélène ROCA, France – Because electromagnetic pollution exists and a lower apparent sensitivity is not proof of an absence of harmfulness.

2874 – Hélène ROCA, France – Because electromagnetic pollution exists and a lower apparent sensitivity is not proof of an absence of harmfulness.

2875 – EV, France – It is important to react to the consequences of these electromagnetic exposures which are so harmful to health.

2876 – Anne-Catherine BRAWACKI, France – I am electrosensitive.

2877 – LJ, France – This is crucial.

2878 – Mark-Andrew RACKLEU, New Zealand – I am a targeted individual.

2879 – Tove SCHATVET-RIISAGER, Norway – I myself suffer from dizziness and headaches, heart palpitations and memory problems when there are too many devices, phones and so on, near me.

2880 – GA, Norway – People, animals, and plants must be protected. We need genuine research across the entire field.

2881 – VM, Norway – I am electrosensitive.

2882 – GT, France – I think 5G is sufficient. We don't need 6.7 or 8G.

2883 – Oddgeir LANGEDRAG, Norway – I'm sick of everything wireless.

2884 – Una GIBBONS, Ireland – My life is becoming increasingly difficult because of pervasive EMR – just about everywhere.

2885 – Vibeke Dahl SKELTON, Norway – I had health problems for a long time and complained a lot, including sunburn, tingling, a rapid heartbeat, and fatigue. The situation only improved when I turned off the heating cables and stayed away from electromagnetic fields. An EMF measuring device was my savior. Since EMFs are invisible, I often reacted several hours later. For 20 years now, I have lived almost normally while being hypersensitive to electricity, but I have to be careful, especially in new places.

2886 – Philippe AUJAMES, France – I have suffered from electromagnetic hypersensitivity (EHS) since 2016. I went through an acute phase where I couldn't even tolerate electrical current, and I moved three times to escape cell towers. Since living in a healthy environment, my sensitivity has significantly decreased, and I can venture into the city. I sign this appeal so that everyone has access to a healthy environment and so that no one else has to go through what I went through.

2887 – Marielle DIETRICH, France – I am concerned.

2888 – Fredrik NIBE, Norway – EMF pollution is harmful.

2889 – Anette KRISTENSEN, Norway – I am emf sensitive and suffering with chronic health issues due to exposure.

2890 – Vera Victoria JACOBSEN, Norway – We are exposed to harmful influences!

2891 – FT, France – People with electromagnetic hypersensitivity must be treated and cared for. Laws must change.

2892 – Susana AGUADO SORIANO, Spain – Stop electromagnetic pollution, including TV signal.

2893 – IS, Belgium – My sister is electrosensitive and I wish to live away from electromagnetic disturbances.

2894 – AM, France – I am experiencing ringing in my ears and I am having trouble sleeping and recovering from my workday.

2895 – Berit Swanberg, Norway – I think electromagnetic radiation is unhealthy, not only for people, but also for animals and plants. Protected areas are necessary. Necessary measures must be implemented.

2896 – MV, Norway – I agree with the appeal.

2897 – Sabrina SABEG, Switzerland – Enough of polluting and controlling us.

2898 – Costa PINTO, Democratic Republic of Congo – I cannot tolerate exposure to wi-fi: dizziness, migraines, nausea and heart palpitations.

2899 – AM, Norway – Too much radiation will eventually destroy the basis of life for all living beings.

2900 – Anne Grete HANSEN, Norway – I am electrosensitive.

2901 – Sabrina IDIR, France – Despite raising awareness about the dangerous effects of electromagnetic radiation and its impact on health, psychiatrists have accused me of being schizophrenic... many of us are under stress, and in the Île-de-France region, it's getting worse and worse. People become hysterical if they don't have a charger for their phone. Wi-Fi is everywhere, and they don't even realize that it's disrupting the climate system. An astronaut has warned us, but nobody cares. I only use my phone at night and without Wi-Fi because it's unbearable during the day. Between that, the LED headlights on cars, and the excessive screens in the subways, it's time for organizations like yours to take a stand and demand an end to this all-digital world.

2902 – SB, Norway – It's a question of balance.

2903 – Philippe GEBELIN, France – There need to be areas in France free from magnetic fields.

2904 – Marie-Elise HANNE, France – Our safety is at stake.

2905 – CG, France – I worked on an airbase where I believe I was overexposed, and I too had Essure implants for 15 years. I developed confirmed electromagnetic hypersensitivity in 2023, following the removal of the implants. I live less than 50 meters from a high-voltage power line. It's unbearable.

2906 – MD, France – This is a major health problem and we must finally know the truth and take into account the pain of the victims and the need to address this in order to prevent others and improve the health of our fellow citizens and animals!

2907 – ED, Canada – I have a friend with EHS and I have a disease that doctors can't find.

2908 – Thomas THRAEN, Germany – I am a doctor and I refer you to the study by Prof. Dr. Belpomme, University of Paris, 2020

2909 – FD, France – I am aware of these dangers to living beings and I am against them.

2910 – PS, France – It's obvious to sign, we should rather ask those who don't sign, why they don't sign!

2911 – CL, France – This is real pollution.

2912 – Anne VAN RUYSKENDSVELDE, France – One of my friends suffers from these emissions. We are happy to turn off all Wi-Fi signals when we are together to relieve her.

2913 – VG, France – I have been HES for over 10 years and face the incomprehension of many.

2914 – Lillian JORGENSEN, Norway – Because I myself am very sensitive to radiation and think it's important to bring attention to this!

2915 – SB, France – I sign it in solidarity with people who are electrosensitive, even though I am not yet affected!

2916 – T, X, Spain – I don't want censorship or disinformation on such an important and widespread topic, health first!!

2917 – AG, France – We must protect life on earth, including human life.

2918 – EV, Italy

2919 – SO, Norway – I have been electro-sensitive since 2014 and have coped by shielding myself in different ways; costly, and of course socially difficult.These last few months my discomfort grew substantially, and after some long and intense investigation for the cause microwave – I discovered that 5G transmitters have been silently mounted in the lamp posts outside my house, without even a notice! I am now back to where I started over 10 years ago, but this time – facing additional physical problems ie – like nosebleeds – caused by the increased and different radiation, as "the internet of things" is brought to fruition through my home – without my consent. My home feels like a prison.

2920 – FR, Norway – I have EHS and am always looking for areas with no signal, but I'm surrounded by cell towers at work and at home.

2921 – CL, France – It is an absolute necessity.

2922 – VF, Iceland – We are all affected by electromagnetic pollution, so we will all benefit from reducing it and having more offline zones and pockets. Going offline is becoming an important trend. It's all about using technology wisely.

2923 – CR, France – This fight is close to my heart.

2924 – Daniel KRATKY, Brazil – This torture must be stopped for the sake of all our children.

2925 – Marie-France CUSTAUD, France – I am concerned as my young niece, aged 30, has suffered from electrohypersensitivity for several years; her struggle is daily...

2926 – AL, France – So that the call for help is heard

2927 – ER, France – I myself am EHS, diagnosed since 2006. The noose is tightening around us and (survival) is becoming increasingly complicated; not to mention the impact on social connection...

2928 – Tom BORRESEN, Norway – EMFs are dangerous for the elderly!

2929 – JD, France – I believe we need to move forward in prevention; public authorities must take action.

2930 – CS, France – To help.

2931 – LP, Belgium – EHS for 20 years.

2932 – Dieter BAAKE, Germany – I sign this petition because I am affected by EHS and, as a graduate engineer (electronics)

with 35 years of professional experience, I am an expert in this field.

2933 – Roberte FERRERO, France – In support of electro-sensitive people and in prevention for all of humanity.

2934 – Sylvie LELEVRIER, France – I am EHS.

2935 – CC, France – I am electrosensitive and I suffer.

2936 – CB, France – I support these people who are suffering and who are not sufficiently supported and recognized.

2937 – NC, France – I am EHS and I can no longer do anything because I am so affected and my brain is saturated and ready to give out, IT IS AN EMERGENCY.

2938 – Farida EL YOUSSOUFI, Morocco – I have been electrohypersensitive since 2008 and I would like to live in a white zone.

2939 – /2940 – Kristin and Turid STOBEJKEN and URI, Norway – Turid and I are extremely sensitive to radiation from the house and our surroundings. Signed by me, Kristin, with Turid's permission to include her, since she doesn't have a cell phone or internet access.

2941 – CR, France – I know someone affected and I know how debilitating it is. Furthermore, the increasing frequency of transmitters with each new generation can only worsen the situation. Your appeal doesn't mention 5G, which requires a denser network and more powerful transmitters than previous generations and could be a determining factor in the rise in cases. Best of luck and resilience to those affected!

2942 – MS, France – We know the family and the person disabled by this problem intimately.

2943 – Karoline NORDBY, Norway – I moved into a small apartment last year in Oslo, Norway. I couldn't understand the increasing brain fog, body aches, and more and more food allergies. After taking some measurements, it turns out the 5G signal is extremely strong. It makes me angry to know that the Norwegian government isn't taking action to build a society where we are safe.

2944 – José Enrique MARTINEZ LAPUENTE, Spain – We are all affected. It is time to stop this scourge of radiation that seriously affect our physical and mental health.

2945 – Andrew MILLER, UK – I have lived with electrosensitivity for 25 years. I know it to be a real condition. There needs to be more awareness of it in general and proper research into the effects of the proliferating wireless technology on human health.

2946 – AO, France – (...)

2947 – CJ, France – We are all electrosensitive. It's a public health issue. People with EHS are whistleblowers on this humanitarian scourge.

2948 – Jean-Pierre SICARDON, France – I am the grandfather of a 30-year-old woman who no longer has any social life or job. She is therefore without resources.

2949 – JS, France – This is an imperative awareness.

2950 – Per-Helge HARALDSVIK, Norway – Hyper-sensitive to EMF, suffers external and internal physical damage. Refugee in my own country.

2951 – Viviane DI SANTOLO, Switzerland – I am subjected to electromagnetic radiation on a daily basis and worried about the future like more and more people.

2952 – AC, France – Support for EHS sufferers because their daily lives are unbearable.

2953 – JF, Germany – We fell.

2954 – SC, Spain – I am electrosensitive.

2955 – TS, Norway – Many people are confronted with all the technologies present in today's society!

2956 – RL, Nederland – I feel involved.

2957 – Catherine LEFEBVRE, France

2958 – Jean-Luc LEFBVRE, France

2959 – CM, France

2960 – Catherine ABEMONT, France

2961 – Francine CROIBIEN, Belgium

2962 – Anne-Marie DUPUIS, France

2963 – CJ, France

2964 – CM, France

2965 – SD, Belgium – There is enough scientific evidence regarding the influence of EMP against biological life; turning a blind eye is simply unsustainable.

2966 – NA, USA –I also fight EHS with my nonprofit, The Scientific Alliance for Education.

2967 – Valérie FAUCUN, Belgium – I am electro-hypersensitive, which is extremely difficult in our society. We are excluded, and the most fundamental rights are violated: keeping our jobs, going to school, getting around, shopping, visiting museums, going to concerts, receiving hospital treatment... and simply staying home are all things that have become forbidden, that are an ordeal, or that have a terrible impact on our health. Not to mention the total indifference or the hurtful remarks. It's reminiscent of the darkest hours of our history. Yet, this is the present, even though electromagnetic radiation is simply a transmission method chosen for the reasoned development of digital technology.

2968 – RT, Germany – I myself am rather mildly or moderately affected, but I also know many people who are severely affected by EHS.

2969 – AH, Norway –I want sheltered places for those who cannot tolerate radiation.

2970 – Peter NOVOTNY, Canada – I believe in the science!

2971 – MR, Germany – My partner, EMP, is sick.

2972 – Isabella SCOTTI, Italy – It is important to protect our health and our children's future; we cannot continue risking cancer and suffering because of unregulated EMF exposure.

2973 – HV, Norway – When I bring up my electrical sensitivity, I'm not believed, I'm not taken seriously, and I'm discriminated against. I haven't received any health care either. In many cases, I'm treated as an inferior human being, and Norwegian bullying—the "village bully"—comes to the fore in people: a collective, invisible system of punishment where people believe they're loyal to the authorities and have the right to punish those they deem disloyal, acting as self-appointed executioners meting out their own justice against an internal enemy of the state... Electrosensitive people become lawless scapegoats in a so-called legal system. There is a lack of public information about research and the harmful effects of EMF in Norway. Cell phone use is portrayed as harmless. Electrosensitive people are portrayed by the authorities as mentally ill and are bullied on social media. Nevertheless, it has been reported in the media that brain and jaw cancer are the most common forms of cancer among children and young people in Norway. The link between cell phone use and brain and jaw cancer has been dismissed.

2974 – MC, France – I am a victim.

2975 – MB, France – In support of EHS.

2976 – MW, Belgium – For the return of common sense.

2977 – MB, France – Convinced of the danger that CEMAs represent for living organisms....

2978 – PR, France – I am convinced of this serious and little-known problem.

2979 – ER, France – This is an absolute emergency.

2980 – AN, Germany – This is is a very important issue that concerns us all. I am electrosensitive.

2981 – Claudia WOLFRAM, Germany – This is a very important subject that concerns us all.

2982 – AW, Germany – It is important to protect the people involved !

2983 – JR, Germany – Under the guise of progress, but in reality for simple profit, we impose on man and nature a technology whose harmful effects are proven. Those responsible should be ashamed!

2984 – Andrea HAUFLER, Germany – ...something must finally be done!

2985 – SG, Switzerland – I sign this appeal because artificial electromagnetic radiation is a violation of our bodies, because we haven't given our informed consent. Because nature is also being violated extensively, without any precautions. All living things are electrosensitive. And then one day you become electrohypersensitive, because you've exceeded your body's tolerance threshold. It hits you suddenly. Today it's me, tomorrow it will be you.

2986 – SO, Germany – I can very clearly see how our thinking and concentration skills, as well as our health, are being increasingly destroyed .

2987 – Petra-Angelika STROBELT-LOCKENVITZ, Germany – ...I myself have health problems caused by excessive exposure to radio waves.

2988 – MR, Germany – I am electrosensitive.

2989 – FV, Germany – So many fellow citizens and friends are concerned.

2990 – Rüdiger DIETRICH, Germany – Der Schutz mobilfunksensitiver MEnschen überfällig ist.
(The protection of people sensitive to mobile telephony is overdue.)

2991 – Sabine MAMO, Germany – Everyone's health is the most precious asset!

2992 – OB, Germany – I myself am EHS and for years I have been massively bothered by electrosmog in my work, in my search for accommodation and in my travels.

2993 – AP, Germany – I am sensitive myself and work with children whose protection is important to me. My colleagues don't understand.

2994 EW, Germany – I myself have been electro-hypersensitive for about 4 years due to external influences.

2995 – AH, Germany – I am affected.

2996 – Marlyse NEYROUD, Switzerland – EMF radiation is a danger to all of humanity!

2997 – Hanna TLACH, Germany – So many people would be healthier if there were less electromagnetic pollution.

2998 ND, Belgium – I began suffering in 1997, and to this day my health problems are multiplying and worsening. I want to inform people in order to stop the scourge we are facing.

2999 – CB, Germany – It is finally time that the health of people and all living beings is finally put at the center of concerns. Vaccination is not of much help.

3000 – EV, Nederland – I too suffer from EMS and I am concerned that although people think they are not affected, the effects now and long term of EMS will be baffling. The amount of transmitter antennas in our region is staggering – more than 50 antennas bombard us 24/7 – and why? We used to all be able to live without a mobile phone. And do we need this amount of coverage to function? I can no longer attend group meetings, go out for dinner to name a few situations, without suffering from the effects of radiation. People like me are excluded more and more from society.... We need 'safe havens' - radiation free zones to live, to recreate in, to be safe. Actually everyone would benefit from such zones even if they think that radiation is a non-issue....

3001 – Gabriele SAPPEL, Germany – Because I am electrosensitive and therefore cannot use a smartphone or tolerate the radiation from Wi-Fi and mobile phones.

3002 – AH, Germany – Governments and the public should finally wake up, face the facts and the ever-increasing harm caused by cell phones and other wireless technologies, and address the issue.

3003 – EF, France – I have also been EHS since 2017 and it would be good to create many white zones so that we can live normally

without suffering too much because even in the countryside there are many cell towers, and everything that is harmful to us, even when protecting ourselves as best as possible at home, the outside world is a constant danger!!

3004 – Anita SIEBURG, Germany – Because as someone affected by EHS, I find this important.

3005 – TW, Germany – I am affected myself.

3006 – Katou MALDO, France – I boycott smartphones and all these atrocious wireless gadgets that make people stupid and sick. I denounce this health scandal of cell phone towers, which are monstrous warts on our environment and are gradually killing life! Let's stop supporting the system and start saying NO to all of this. We live very well without it!

3007 – ED, France – I suffer from electro-hypersensitivity.

3008 – Audrey BINET, Canada – As a Mechanical Engineer who can no longer work because of experiencing severe EHS symptoms, I see the issues of EHS as a public health issue that needs to be addressed for the good of humanity.

3009 – Brendan ROUGON, France – My mother is electrosensitive.

3010 – Linda C. GULBRANDSEN, Norway – I am electrohypersensitive. Artificial electromagnetic fields are a disaster to nature.

3011 – Irmgard STAEHLER, Germany – I am aware of the risks associated with radiation and am committed to protecting the health of my children and grandchildren.

3012 – EQ, France – Other methods such as Li-Fi, which uses light, need to be studied.

3013 – MR, Germany – The burden is heavy for many people and it is important to consider this and take appropriate action.

3014 – Christelle MEUNIER, France – Recognized as 79% disabled by electromagnetic fields

3015 – Sylvianne MURAT, France – There is an urgent need for action, the health stakes are considerable and the politicians elected by the citizens as well as the caregivers have a duty to do everything possible to protect them...They will no longer be able to say that they did not know.

3016 – Vcera KLEINEFENN, Germany – I am against mobile telephony for many reasons: health, data protection, resource consumption, etc.

3017 – TN, France – I have seen the suffering of my EHS friend for years and I would like to help.

3018 – Anthony DECOCK, France – (...)

3019 – Virginia GUERIN, France – I have been homeless for 3 years with EHS/MCS.

3020 – RM, Italy – ... because it is in fact everyone's problem, and perhaps mine as well.

3021 – MB, Italy – Because I know this illness very well and the discrimination it causes, starting with parents, friends, and acquaintances, not with doctors who don't study it and prefer to mistake it for a mental illness. Since the electric and magnetic fields that cause it are as invisible as viruses, they prefer to make money from cell phones when a meter of cable could save your life.

3022 – LG, Italy – I know friends who are electrically sensitive and I know how much suffering they are enduring, not only physically, but also because of the impossibility of being part of normal daily social life. They can no longer use or regularly visit places such as pubs, supermarkets, cinemas, pizzerias, many apartment buildings, etc., because they are now invaded or surrounded by radio transmitters, television antennas, computers, thousands of smartphones with Bluetooth, television antennas, 5G antennas. If we are creating a hellish future and a rapid increase in millions of isolated people, cut off from society...

3023 – AL, Italy – Just.

3024 – NM, Italy – I completely agree.

3025 – Luigino BERTONI, Italy – Come on.

3026 – RT, Italy – I am convinced that it is very, very harmful; I myself feel electrosensitive.

3027 – LB, Italy – I agree that EMFs are dangerous.

3028 – PL, Italy – The massive installation of antennas on the same pole, for example, must be stopped.

3029 – LB, Italy – I am against the devastating effects of electromagnetic fields, I find 4G and 5G useless, I surf the web and use my mobile phone on 2-3G without any problems, moreover this increase in wolts/meter is harmful to animals, bees, butterflies, birds and many others...

3030 – SJ, Italy – A call for survival: first, recognize Electrosensibilta at the national level, not just Molise and Calabria, because the rest of us are not invisible. I pray for human respect; we are all human, we all pay VAT, and then respect our pain and our rights. All those who don't believe us about our electrosensitivity problem, they just need to get a microwave, put their heads in it, and attack their core. Then they will be very happy with the electromagnetic field. We are not for increasing EMF to 4V/m. Pick up those who said to increase EMF. First, we need to shield houses against EMF radiation. I think my reasoning is correct.

3031 – R. R., Italy – Because I don't want it!

3032 – FP, France – :Stop crimes against humanity and genocide.

3033 – BV, Italy – I am electrosensitive.

3034 – CF, Italy – I am electrosensitive and I live in a camper van. I can only stay in town for 3 days because of the discomfort caused by my work. I had to leave my apartment because of an anti-frequency repeater in the bedroom. No one has reimbursed me for the inconvenience. I wonder how many people like me find themselves in this situation.

3035 – Anna Rita PEDRIZZI, Italy – Health and justice.

3036 – CP, Italy – Problems of super sensitivity to electromagnets.

3037 – MD, Italy – I sign so that even the stones know that electromagnetic radiation is harmful.

3038 – Claudio PELLEGRIN, Italy – To defend life.

3039 – RP, Italy – Yes to telephony..... But also and above all, the protection of health.

3040 – Alberto LUBRANO, Italy - Think about the moment to deepen the underlying theme of the invention of the electromagnetic wave.

3041 – AM, Italy – I sign for appropriate legislation.

3042 – LC, Italy – I am electrosensitive and I have suffered damage to my health.

3043 – CM, Italy – Because I don't want this chaos to continue and for me to be forced to endure what I didn't choose.

3044 – Marie-Francde GUENIN VERDIER, France – I have been EHS for 10 years since the installation of 4G.

3045 – JG, France – I have a close friend who suffers from electromagnetic hypersensitivity. I support your pursuit of justice in the treatment of these debilitating illnesses that disrupt the daily lives of those who suffer from them.

3046 – MR, Norway – The EMP VICTIMS collective asks you to make vital and essential decisions for all regarding public health and the environment.

3047 – DG, France – It is important to take into account the cumulative effect of different electromagnetic frequencies.

3048 – VF, Italy – It is right to protect the environment in which we live and the health of all living beings.

3049 – SP, Italy – And because we are in the hands of an oppressive and corrupt system.

3050 – VL, France – Eectro hyper sensitive.

3051 – MT, Italy – My son is electrosensitive.

3052 – CR, Italy – EHS IS GOING TO BE A VERY BIG PROBLEM FOR HUMANITY

3053 – Silvia CANDEL, Spain

3054 – LB, Italy – Science must find a solution to this problem in order to protect health. And seek alternatives to current technologies without harming living beings, whether human or animal.

3055 – KV, Germany – I am personally concerned and I fear for my life.

3056 – Matthew Asaro, USA – I am aware of the biological damage caused to all living things by prolonged exposure to non-ionizing electromagnetic radiation. I would like to inform the public of this issue and assist in mitigating and reducing the overall EMF exposure to the world's population.

3057 – OC, Italy – I agree with it.

3058 – Frédéric BLANC, France – I experience the symptoms at home. High or low frequency, I don't know. But I have cognitive problems, among other things (feeling unwell...)

3059 – SE, Belgium – I am highly sensitive and it makes life difficult. It prevents me from living everyday life properly.

3060 – MM, France

3061- XV, Belgium

3062 – AT, Belgium – I find the deployment too accelerated.

3063 – SK, Israel – I am sensitive to cellular radiation. I am having trouble finding suitable housing. There is a lot of radiation in all public spaces. It weakens me very quickly, to the point of dysfunction. I need quick help. Thank you..

3064 – FG, Italy – I am convinced that so much electromagnetism, which is also harmful to animals, could be avoided.

3065 – AP, France – :For the protection of those with electromagnetic hypersensitivity and others who are also affected without apparent signs. For respect for life in all its forms.

3066 – LS, Italy – Electrosmog For me, it ruins our health.

3067 – Gillian JAMMIESON, UK – The needs of those with EHS have been completely ignored by governments. Many EHS people are isolated and living in poverty because wireless radiation is everywhere. Now, as landlines are being abolished, the situation will become impossible, since VoIP routers have Wi-Fi that you can't get rid of, despite what we are told .

3068 – FT, Belgium – I myself am electrosensitive. Together with associations, we can have a greater impact on the public and be heard through national and international media. This concerns all segments of the population, particularly young people (protection of white zones, changes in legislation, etc.). Fauna and flora are also impacted.

3069 – Brenda ADEY, UK – People are suffering an it's being ignored by those in power .

3070 – VV, France – Chronically ill (disabled Mdph) since the 4G antennas were switched on, now suffer from EHS.

3071 – NC, Italy – For solidarity.

3072 – Deborah SHORT, UK – These deployments are polluting and dangerous to life on Earth. How many studies proving hardoto do we need before policymakers start to take notice? For telecommunications, we only need a fraction of the EMFs that are currently plaguing our lives .

3073 – SH, UK – EMFs are a health issue we, and particularly the authorities, need to wake up to. We are all electro-sensitive, not just those who show obvious symptoms .

3074 – LV, Belgium – It is important to act according to the precautionary principle because it concerns public health.

3075 – OP, UK – The increasing electrosmog needs to be recognized and dealt with, as EHS will only get worse if not .

3076 – Sally Beare, UK – The science showing biological harm from EMR and the existence of EHS as a genuine response to EMR is robust and has been acknowledged in four UK tribunal cases. This is indeed a humanitarian emergency and must be addressed, particularly as the number of sufferers is growing .

3077 – SK, Israel – I am sensitive to cellular radiation. I am having trouble finding suitable housing. There is a lot of radiation

in all public spaces. It weakens me very quickly, to the point of dysfunction. I need quick help. Thank you.

3078 – VD, Belgium – I want to protect everyone's health!!!

3079 – MH, Belgium

3080 – Jonh D., UK – It is correct!

3081 – Tanya FOX, UK – Aside from the suffering, this nightmare condition is making economically active people (like me) inactive. This is in no one's interest.

3082 – Ellen KROON, Netherlands

3083 – Anja JANSZEN, Netherlands

3084 – DS, Germany –It's good.

3085 – GD, France – At the end of 2024, after buying my first 4G smartphone, I became electro-hypersensitive to 4G mobile phone radiation. I sign this appeal to alert public authorities to the real danger of this technology!

3086 – Françoise DOSSIN, Belgium – I have long been aware of the multiple dangers of wireless technologies and stand in solidarity with their victims.

3087 – PW, UK – With increasing EMF radiation pollution, we are becoming keenly aware of the effects on people with electromagnetic hypersensitivity (EMS). We did not consent to this radiation pollution .

3088 – RO, UK – The rollout of huge numbers of cell towers in the UK without proper analysis of the detrimental impacts on all forms of life is utter lunacy. Simply abiding by the ICNIRP guidelines is not good enough. A much more robust independent code of practice is required, with the health and safety of all life at its core, as opposed to commercial interests.

3089 – HE, Norway – It's for the common good.

3090 – DG, UK – I want to help reduce suffering from EHS.

3091 – NG, France – I don't remember if I've already signed, I don't know if I'm electrosensitive, but probably. I experience burning sensations like needle pricks, headaches, etc. I've had severe fibromyalgia with degeneration since 2010. I've had 25 years of medical uncertainty. I only have a cell phone because I can't afford a computer. I live in Bordeaux. I can't move because I need to be near my mother, who is losing her independence. My two sisters are also affected; one is in a nursing home at 62 with brain damage, and my other sister has cerebral palsy. My 20-year-old daughter no longer lives with me.

3092 – YV, Belgium – I have EHS (electromagnetic hypersensitivity); I experience severe tachycardia and bradycardia when I watch television. I cannot tolerate Devolo devices or the radiation from the TV router.

3093 – Elisa CARPIAUX, Belgium – I stand in solidarity.

3094 – Gyslaine TRAPPIER, France

3095 – Jean-Louis SOMNY, France

3096 – Magaly RICART, France

3097 – Mireille BERGOUGNOUX, France

3098 – FG, France

3099 – Gaby LE BIHAN, France

3100 – Gerard LE BIHAN, France

3101 – Gerard BERGOUGNOUX, France

3102 – ME, Germany – I am personally affected by EHS. Because immediate action is needed to protect the population, wildlife, and flora. Because information is necessary and the dangers must no longer be concealed. Profit must not come at the expense of health.

3103 – Gerard DARREGOL, France

3104 – JV, France – I sign the Appeal.

3105 – AB, Germany – I am suffering from severe pain, nosebleeds, bleeding in the eyes, etc.

3106 – Michele Anna JAGANET, France – I have a friend with EHS and I know her problems and her distress... TERRIBLE.

3106 – Michele Anna JAGANET, France – I have a friend with EHS and I know her problems and her distress...

3107 - Michele ANNA, France – I have a friend with EHS.

3108 – OB, France – Because I'm electrosensitive and my body has a lot of problems. (I now sleep on an earthing mat and I no longer wake up with inflammation all over my body.) And... because I don't want to be tracked with a phone, as if I had an electronic bracelet on my wrist. And because with this diabolical technology, we're killing all life.

3109 – Laurence GUERETTE, Canada – In support of people close to me with EHS, and for the health of my family.

3110 – CG, Spain – It is a necessary and unavoidable initiative to improve EHS.

3111 – JF, USA – I am EHS and homeless because of it in my 70s. This is a disgrace !

3112 – MB, France – I sign the appeal because I am EHS – I sign this appeal also for all the children who are EHS and whose voices are stifled – I sign this appeal so that this pathology is finally recognized as a long-term illness – on the need for support for electrohypersensitivity: (I have sent my testimony to the Ministry of Health and the Government in this regard).

3113 – Carole RASSMUSSEN, Canada – My friends are victims!

3114 – AB, France – I am EHS, my life changed completely in 2007.

3115 – AG, UK – The proliferation of non-native electro-magnetic frequencies is the biggest elephant in the room globally right now. This is beyond an emergency to all living things. Negative impacts, such as on pollinators, are clear to those who are aware, and it is not hard to forsee how more saturation will cause irreversible destruction to living systems. Enough EHS people have already been lost, enough unimaginable suffering has been caused. This is a human rights and environmental emergency!

3116 – AV, France – I am chemically sensitive.

3117 – GD, Belgium – I am aware of the danger of electromagnetic radiation, which cause me inflammatory pain and fatigue. My mother is medically recognized as electro-hypersensitive and suffers daily with unbearable pain.

3118 – Benoît REIFF, France – My wife has EHS and just spent 13 years in the stables of an abandoned forester's house, without water or electricity. She has started living again since we moved to a remote, white valley, which was a few months ago.

3119 – ZR, France – I have EHS (Electromagnetic Hypersensitivity), recognized as disabled by the state but not by my neighbors! And I am appalled by everything we inflict on the world and on ourselves. Turn off your phone!!

3120 – PS, UK – This is wrong what they are doing, people are suffering .

3121 – ST, France – I am myself Electro Hyper Sensitive, and it is a complicated, isolated suffering.

3122 – SZ, Poland

3123 – M1chele DAI, France – I am affected; I can't take the constant electromagnetic radiation in my head anymore. I have depression and serious health problems. I moved into this apartment in March 2024 and hadn't noticed the «Linky» smart meter.

3124 – Alexandre L'ECUYER, Canada – I am electrosensitive.

3125 – Julie LEVINE, USA – I have EMR-S and am suffering. I had to move to the woods and I am isolated, fearing that cell towers will come here too .

3126 – PG, France

3127 – Ronald VIVAR, USA – My girlfriend suffers from a severe case of electromagnetic radiation syndrome and has been living a radically different lifestyle for the past six years because of it. She has also developed multiple chemical sensitivities and food allergies. She has also worked so hard to help raise awareness and is unfortunately no longer able to do so since her health has declined. Now it is my duty to advocate on her behalf and on behalf of others suffering from this condition.

3128 – ML, France – What is happening is a health emergency. If all this is not stopped, it will be a catastrophe for humanity.

3129 – Sandra GUILLAUME-GENTIL, Switzerland – Every human being must have access to fundamental rights regardless of their disability or situation.

3130 – Edith GUERETTE, Canada - I suffer enormously from all this radiation that is everywhere and increasingly powerful.

3131 – Stéphane HERVE, France

3132 – Clervie THITEN, France – Censorship of the harmful effects of low-frequency radiation is criminal. They kill living things (humans and trees, which are all dying one by one, every year in our garden. The sap no longer irrigates the trees!).

3133 – ZZ; France – Enough of having this «Linky» smart meter imposed on us against our will.

3134 – SM, France – :Disturbed by the antennas surrounding us, headaches etcetera.

3135 – Patrizia MAZZONI, Italy – I am aware of the biological damage caused by electromagnetic fields and the increase in pathologies related to electrosensitivity .

3136 – Francine JEAN HAKIM, France – Stop all this useless radiation since the connections are always down anyway!

3137 – CM, Belgium – I want to preserve white zones!

3138 – LV, UK – I have suffered with EHS since 2011. I and my sons were affected in Cape Town, South Africa. This continues to harm my life, relationships with others and to nature. I have worked as a Citizen Scientist with other professionals to record the damage done. With Olle Johansson, we published, 'Technological singularity: knowledge translation and ethics in 2018. I believe that EMR is a major contributor to climate change because it robs water from the atmosphere and harms tree and soil growth.

3139 – CC, France – In 2018, I was electrocuted in front of the «Linky» smart meter; I received a shock. Despite the mayor's request for a gesture of humanity and a medical certificate, they refused to install the old meter. I am extremely sensitive to electromagnetic fields. Therefore, I am not connected to the grid but rely on solar panel kits for camping at 75 years old, even though I already have serious aftereffects from the accident when I was young. I can barely get around anymore, even with an anti-radiation hat... What a wonderful, dehumanized society!

1340 – Laura J. Italy – In one day of strong exposure, I became disabled by EMF (mainly pulsed microwave wireless radiation from Cellular, Bluetooth and Wi-Fi) in 2019. I have had to be isolated at home close to 98% of my life since then. Although my condition got worse in one day, I was dealing with a decade of increasing inflammation, pain and muscle tension, anxiety, depression, tinnitus, insomnia leading up to the disability. We moved from the US to Italy because they "had" lower allowable EMF radiation limits. Just before moving to our new home in a rural area, Italy's government voted to increase the allowable v/m radiation exposure limits. They also added a second cellular tower closer to our home. Fortunately we are higher than the tower and it is not aimed at our home. Because of this we have many birds, butterflies, bees and nature all around our home. Everyone needs to know this invisible cellular radiation from towers, satellites, smartmeters and devices is killing our pollinators, important soil microbiomes, trees, plants, birds, insects, and harms every cell in the body. I am not special. Microwave radiation does not discriminate. It harms all life. Do some research and stop using wireless technology before you have cancer and Alzheimer's... It greatly impacts neurologic systems and sleep. It's worse than smoking in the amount of body systems it harms over time. Brain tumors and acoustic neuromas are rising, diabetes is rising... Pay attention and protect yourself by rejecting this dangerous tech. I have safer hard-wired computer and non-Wi-Fi router. I have not used cellular since 2019. Please stand with us!

3141 – BF, France – EHS VICTIM SINCE 2012

3142 – PC, France – I am EHS... and I want to protect the living world.

3143 – BV, UK – EMF pollution has devastating consequences for all life .

3144 Marie SARLET, Belgium – I suffer from hypersensitivity, chronic fatigue, headaches, immunosuppression, insomnia... problems amplified since the installation of 3 5G antennas around my neighborhood. A feeling of survival... isolation.

3145 – FC, Belgium – Capital to protect those with EHS.

3146 – PE, France – The mother of my children is EHS.

3147 – AV, France – With 5G, we're faced with enormous quantities of additional transmitting antennas to produce ever more microwave «smog,» on top of the fog of pesticides, perennial pollutants, and all the others I'm not even aware exist. Then, we'll try to medically limit only the symptoms of all these rapidly spreading diseases: cancer, Parkinson's, Alzheimer's, multiple sclerosis, mental and psychological impairments, incomprehensible violence...

3148 – MP, France –: We are all affected, this must stop, measures must be taken as soon as possible, there are already too many victims, and if only animals could speak! Our future depends on it!

3149 – ME, Belgium – For several years, my mother has suffered from electromagnetic hypersensitivity, a condition that has profoundly disrupted our daily lives. This hypersensitivity to electromagnetic radiation prevents her from traveling, particularly from leaving France to visit me in Belgium. Furthermore, her movements are very limited: she cannot drive long distances, which also complicates my travel, as she is unable to pick me up at the airport. Every day, we must adapt to the constraints imposed by her condition. Its effects are not limited to her physical health; they have also caused her progressive and severe social isolation, preventing her from participating in ordinary activities, despite all the adjustments and precautions we try to put in place to protect her. Electromagnetic hypersensitivity has thus profoundly impacted her quality of life, making it difficult, and sometimes even impossible, for her to have a fulfilling social life and normal independence.

3150 – AW, UK – I am electrosensitive and have been for over 30 years, and it's time we were given the same attention and care as others with disabilities. Furthermore, life expectancy is being diminished all over the planet, and this needs to be addressed .

3151 – Yvan POUGET, France – As long as it doesn't bother the majority of people, nobody cares, but that's not how you should think.

3152 – Rachel POITRAS, Canada – I am electrosensitive.

3153 – Marisa VANDENEYNDE, Belgium – I get sick from radiation.

3154 – CK, Nederland – This is an intrusion into this beautiful world.

3155 – Guilhem FAU, France – Because the biological effects of EMF aren't considered in current regulations, we need a new holistic approach. Technology is not a fatality; it's just a tool. Don't let a tool ruin your future .

3156 – Goikoetxea ESTIBALITZ, Spain – The establishment of laws protecting people's health must be a priority for governments.

3157 – Beatrice CASPARI, USA – I suffer from EHS and would like a safer world .

3158 – Juliet Kelly, Ireland – I am EHS and my world has become so small now: no concerts, no going to the pub, no groups of people, no going into town. All these things that used to bring me joy are now just an attack on my body .

3159 – FD, France – A vital step for all.

3160 – Agnes CRESSENT, France – I sign because my husband is extremely sensitive to electromagnetic radiation. His life is a living hell.

3161 – GP, Nederland – I don't want us to be further dehumanized.

3162 – AG, France – It is important to resist.

3163 – PC, Canada – I have been electrosensitive since 2025 and I am unable to get treatment in a CHUM hospital because the EMF fields are too powerful and I would have to stay there for 10 to 30 days.

3164 – Patrice GASPARI, France – My partner is EGS.

3165 – AK, France – I have a friend who suffers from Electromagnetic Hypersensitivity

3166 – Christian DRAGONETTI, France – We are not meat to be cooked....electromagnetism is not something to be taken lightly...I haven't been able to sleep more than two hours for three years... Enough !!!

3167 – Ilias SFIKAS, Belgium – Remove mobile phone masts from neighbourhoods !

3168 – SB, Germany - It is very important that the public is informed on this subject. I would like less digitalization.

3169 Hélène KEYSER, Canada – I am electrosensitive

3170 – SA, Israel – Out of concern for the children growing up now.

3171 – Els MEYLEMANS, Belgium – I myself, for example, experience a sharp increase in my body temperature when I am in an environment polluted by electromagnetic fields, such as at work, in places where there are pylons, in buildings with WiFi, etc.

3172 – Keith CUTTER, USA – Wireless Trespass Interferes with the Quiet Enjoyment of Our Homes! This year, I'm celebrating 40 years surviving electromagnetic poisoning — and I use that term intentionally. It's a much better label than «electrohypersensitivity,» because it's bad form to blame the one being poisoned. Beginning in the late 19th century, it was called Neurasthenia. Freud tried to rebrand it as anxiety disorder — a label doctors hung on me for over three decades — which, by the way, vanished after I began living in an RF-free environment. Beginning

in the 1920s, it was radio wave sickness. In the 1950s, microwave sickness. In the 1990s, electrohypersensitivity, or EHS. And most recently, a ridiculous term — which I won't even repeat — tossing the word "syndrome" on top like a final insult. It's time to stop destroying life on earth with these synthetic emissions. And yes — I signed the Appeal: Electro Hypersensitivity is a Humanitarian Emergency.

3173 – JV, Canada – I am EHS.

3174 – Jannett MEDING, Germany – I have suffered from MCS since 1966. I have been consciously diagnosed with EHS since April 2018, but I had already experienced symptoms since the fall of 2013. Initially, I had unexplained fever spikes, collapses in my apartment and also in the street, with periods of bodily paralysis lasting from 20 to 40 minutes to 2 hours. I also constantly felt intense pressure in my head. Since 2015, I have suddenly perceived electricity as gentle. Since September 2017, I have suddenly experienced burning sensations on my feet and lower legs due to RF radiation directed towards the neighboring apartment while I slept. From March 2018, I began to clearly feel Wi-Fi radiation and react with pain throughout my body, not only to distant but visible cell towers, but also to other people's cell phones in their pockets. Since then, the Life has become a living hell .

3175 – GP, France – As someone with EHS (Electromagnetic Hypersensitivity), I know the ordeal these people go through. The European Parliament stated in 2011 that this problem would lead to a public health scandal on par with asbestos, tobacco, etc. It also wrote that money should not be the sole objective of the lobbies that control cell towers, mobile phones, etc.

3176 – MC, Italy – Enough of electromagnetic pollution.

3177 – SA, Morocco – My aunt suffers from EHS.

3178 – JD, Blegique – Stop H.

3179 – Robert NELLIST, UK – Emr is slowly killing all life on the planet.

3180 – Patricia ORMSBY, Japan – With the initiation of 5G service in our area, I have developed signs of ankylosing spondylitis—a condition my father had after five years of work as a radio technician. I also have EHS, but have so far managed it successfully. I knew three EHS sufferers in the Tokyo area who suddenly died shortly after 5G was initiated. We are all forced into the exposure levels of radio technicians .

3181 – AP, France – Bravo for your initiative! I was very electrosensitive for a while and very affected. I had to protect myself, but I'm still sensitive in polluted places. What denial from governments and what manipulation from the people who produce wireless technology and other things! Our humanity is forced to continually fight against abuses against beings and nature. What a strange destiny for our innate intelligence! All of this could have been avoided with a little more wisdom and nobility of heart, rather than the greed that drives so many people to go against nature and the care of others. My heart is saddened to see so many brothers and sisters affected. But what can we do except fight, as you do so well, to move things forward and hope for progress?

3182 – UT, Germany – My wife has suffered from EHS for 10 years.

3183 – Romain LEBOURGEOIS, France – This subject must be known by as many people as possible because we are in the midst of the destruction of life.

3184 – MR, Italy

31 85 – PD, UK – The legislation regarding RF and EMF safety limits is in urgent need of updating to ensure that more people than are currently affected are not adversely impacted .

3186 – MB, UK – People with EHS should have equality with all other people in access to work, schools, public places and their homes. New, non-thermal guidelines are needed urgently .

3187 – JO, France – I sign because of too many problems, sleep deprivation, and pain.

3188 – CL, France – Out of solidarity with people allergic to electromagnetic radiation.

3189 – DL, Germany – I know a few people who are electrosensitive.

3190 – Françoise DAUCHOT, Belgium – I am Hes and I am afraid of tomorrow.

3191 – Nicolae HURTUBISE, Canada – My life is very complicated; electromagnetic radiation is everywhere. Where can I live? My financial resources are limited, and there's no guarantee against the installation of cell towers or the «super-powerful» Wi-Fi signals enabled by fiber optics that affect the neighborhood. I have to move, and it's a huge source of anxiety for me. The winters are long and difficult. I heat with wood and I shut off several electrical circuits, but I can't do anything about the very high magnetic fields emitted by Hydro-Québec's poles (the poles lack proper grounding). Since a Faraday cage doesn't eliminate magnetic fields, sleep becomes problematic again in the winter. The day there are no more places where I can feel safe, I know I'll have no choice but to end it all. Like many people with electromagnetic hypersensitivity, suicide is a thought I've had.

3192 – France PAGE, Canada – I am EHS.

3193 – MC, Italy – It is important to understand the motivation behind the incident and the consequences of the portano. If you do not know how to operate the human mind to contain the disturbing impulse in the dark, if you impregnate it in the first person, you must not abbassare but guard it!

3194 – Fanny BASTOGNE, Belgium – I'm a general practitioner and I notice how electromagnetic fields affect the health of many people (including myself). It's a global public health issue !

3195 – CH, UK – The dangers of EMR are well defined. My physiology perceives the biological impact on well-being. I have never given my consent to the manipulation and destruction of the environment. EMR is toxic to all living things.

3196 – Sophie VIGNITCHOUK, France – Living with a person with EHS, our life is impacted every day by this syndrome and we remain quite alone with this problem.

3197 – FG, France – Because the electromagnetic fog generated by 5G and soon 6G devices contributes to the establishment of an authoritarian technocratic regime. Because this development of a hyper-connected world disconnects us from life and makes us dependent on the bureaucratic matrix.

3198 – Thierry TELLIER, Belgium – The EMP victims are excluded from and by society, the "merchants" of radiation don't care.

3199 – MC, France – I am against exposure to EMF radiation, due to proven health problems. Stop all these installations.

3200 – Mélanie JALBERT, Canada – Because it's high time we stepped out of the shadows. In Quebec, we don't exist. This problem is never even mentioned.

3201 – Marc CRESSENT, France – Raiation is harmful to health.

3202 – Ulrike HENNIG, Germany – It is a shame that everyone, whether they want to or not, is constantly being poisoned and irradiated – Stop destroying humanity and nature!!!

3203 – MV, Belgium – I am electrosensitive.

3204 – KA, Canada

3205 – Colette MORETTI LIRA, France – Because electrosensitivity concerns us all.

3206 – CR, France – Being electrosensitive, with my health deteriorating as a result, I'm forced to use more and more protective equipment. It's expensive, we can no longer live like everyone else, and there's a huge risk of developing brain cancer or having a heart attack. It's not just a matter of daily discomfort; it's a life-threatening risk!

3207 – Olivier LE GAC, France – I have taken stock of the urgency for people hypersensitive to electromagnetic radiation who are among the great forgotten of a society obsessed with economic and strategic issues which take precedence over the health of people.

3208 – Claudine VANDERNOOT, Luxembourg – For a matter of public health.

3209 – Thomas KLEBER, Germany – I have been electrohypersensitive since 1999, after I got a cell phone, worked in an office with many DECT phones, and commuted by train for 3 hours every day, where many people were already using cell phones. Starting in 2012—and increasingly in 2014, 2020/2021, and 2024—my condition has been severely exacerbated by new large-scale cell towers directly affecting my bedroom, to the point where I'm now practically a refugee who doesn't know where to go or is holed up in the basement.

3210 – CR, France – I myself have been EHS for years.

3211 – MH, France – My brother is electrosensitive, I support this petition.

3212 – LM, Germany – I am very affected by EHS; all around me there are only cell towers, wind turbines, and recently a solar panel was installed on our roof without our knowledge; I live right below it. It's simply unbearable, even in shopping centers and even in parks. The radiation penetrates the entire body.

3213 – Martine MICHALSKI, France – In solidarity with EHS.

3214 – Marie-Julie CHAPUT, Canada – In solidarity with my aunt and for the precautionary principle + right to disconnect from the radiation, thank you.

3215 – AF, Belgium – My wife is sensitive to wifi, 3-4-5G and Bluetooth radiation (she cannot sleep because of this radiation, she has headaches, ...) .

3216 – Bijou DE BERS, Belgium – This harms the Living.

3217 – RA, USA – I have been suffering from this for over a decade.

3218 – FD, France

3219 – Valerie SANFILIPPO, USA – I get headaches from people's Wi-Fi.

3220 – SN, Germany – There is now a generation that knows only surveillance and radiation, like fish that consider the dirty water they swim in to be normal. Furthermore, I think all living beings react to pulsed artificial radiation. My hope is that the children of today's «smombies» will outlaw artificial pulsed radiation and that it will only be allowed in professions dependent on radios, such as firefighters, police, and ambulances. In 50 years, this will be the case. What will the price we will all have to pay by then? And will there still be bees? Not to mention that surveillance satellites—er, communication satellites—would no longer have any legitimacy to exist, much to the chagrin of the poor billionaires...

3221 – EB, Italy – It is possible that the light is too high and that it is electromagnetic when it comes to light and it is very easy to use for the salute of the tutti

3222 – Christine TAYLOR, UK – I have been suffering from Environmental Illness, electrical sensitivity, and multiple chemical sensitivity since 2001 when a fault in the incoming electrical supply caused extremely high electromagnetic radiation in the house I was living in, which damaged my health, and I have been sensitive ever since. Anyone can become sensitive to electricity and chemicals, and when your own home and the environment make you unwell, life is not easy .

3223 – GM, Scotland – To raise awareness, possibly stop the enslaught and the great reset !

3224 – René Messagier, France – :It is necessary that this problem be recognized at the medical, social and political level as an important cofactor of the pathologies of this century.

3225 – Marie-Christine MESSAGIER – In solidarity with people with EHS.

3226 – IR, France – Working in the field of electromagnetic protection, I read studies every day proving the harmful effects of artificial EM fields on living organisms. It is time for our decision-makers to face the truth and legislate on this subject.

3227 – KG, Germany – For years, I was extremely sensitive to electricity, and it caused me to go into ventricular fibrillation (I had to be resuscitated over and over again).

3228 – Dany POULLET, France – In the name of respect for Life, for the living beings to which we belong

3229 – AM, France – It's an emergency!

3230 – MJ, France – To protect Humanity so that we can continue to LIVE naturally.

3231 – Deborah CHANDLER, USA – I am ElectroHyperSensitive myself and am not able to find or afford safe housing. We need help urgently.

3232 – SJ, Belgium – Our health is important and we are already exposed to more than enough poisonings.

3233 – Jean-Claude LEBLANC, France – Tired of suffering.

3234 – Renée VACUS, France – Having become guinea pigs, let us stand in solidarity with one another...

3235 – FD, France – I am suffering from the effects of 5G and «Linky» smart meters; my life, my health, and my son's health are impacted. Palpitations, insomnia, tinnitus, headaches, constant vibration. We are subjected to significant and unbearable pollution without any recourse! The standards set by the ANFR (French National Frequency Agency) are unacceptable...

3236 – YD, France – To stop the lies on the airwaves.

3237 – BK, France – The harmful effects of overdoses of electromagnetic radiation on human health must be taken into account.

3238 – Alexandre DELARGE, France – I am sensitive to the issue.

3239 – JP, France – I became EHS in 2010 and the situation for patients has not changed since then, and it would be desirable for this to change.

3240 – SJ, Denmark – I myself suffer from EHS and I have difficulty finding a place to live, whether to live there year-round or to spend my holidays. I am also worried about sending my child to school, as there are often telecommunications towers in these areas and she could be affected by EHS, like me, due to the massive daily radiation.

3241 – Jean-Paul GUITARD, France – I think this consumer world is going crazy!

3242 – François HUBERT, France – For a friend who is concerned.

3243 – AA, France – I have experienced symptoms at my workplace related to the presence of several cell towers: burning sensations, loss of balance, and extreme fatigue.

3244 – SC, France – I have been alerting my network for a long time and am happy to see this well-constructed and well-documented appeal.

3245 – Lotte KRISTOFFERSEN, Denmark – I myself can clearly feel radiation from cell towers, cell phones, and Wi-Fi.

3246 – Nicole KAESER, Switzerland – I am EHS, I would like us to be recognized and for there to be white zones.

3247 – DM, France – Too many people suffer from electrosensitivity, without their suffering being addressed. Only at least one «white zone» (area with no mobile phone coverage) per region would alleviate their pain!

3248 – DB, France – I consider this subject to be of paramount importance. It is a public health issue.

3249 – Amélie RICHIR, Belgium – EHS is a humanitarian emergency.

3250 – Chantal CORNEAU, France – Not directly affected but in solidarity with the victims and outraged by the development of technologies without ethical consideration and without the precautionary principle regarding the consequences.

3251 – Alain PINARD, France – France ignores all expert warnings in all fields; France is run by lobbyists and finance in contempt of users.

3252 – AF, USA – I'm being directly affected by the massive rollout of wireless «smart» technology in my country. It's made me very ill, to the point where I am unable to work or function fully .

3253 – Marcel GARCIA, France – My daughter suffers from hypersensitivity.

3254 – MP, France – I support these people disabled by electromagnetic radiation, and demand a freeze on the installation of new transmitters.

3255 – FB, France – Enough is enough!

3256 – MF, France – We must stop destroying everything.

3257 – Tom PEARSON, UK – For the last 4 years my partner and I have suffered from EHS, it first started when we moved to a house near a phone mast with multiple 5G antenna. We made the decision to move home in 2024 to a house which we thought would be safer. We were on the road to recovery, symptoms were improving. But just last month a 5G capable mast was installed near us, this has meant our symptoms have worsened and we are at a loss about what to do. We are feeling so hopeless about the world we and our children live in. Something must be done to change to direction of these "advancements" in technology.

3258 DF, Italy – Thank you for your social commitment.

3259 – LP, Australia – A growing body of evidence links EMF/RF exposures to cancer and chronic diseases, e.g., Bandara, P., & Carpenter, DO (2018). Planetary electromagnetic pollution: It is time to assess its impact. The Lancet Planetary Health, 2(12), e512–e514. EHS people are the canaries in the coal mine.

3260 – LL, France – I know people who suffer from it and who cannot get around.

3261 – Laura CLARKE, UK – EHS is dangerous and ruins lives. This must stop.

6232 – CL, France – 5g antennas are dangerous for the health of everyone: humans and animals.

3263 – Carlo FARNESI, Italy – Because when I'm on my mobile phone a little more often, I get paresthesia in my legs, so I guess I'm electrosensitive.

3264 – MM, France – All united to help in this fight.

3265 – Patricia BURKE, USA – The pollution of the natural EMF environment is a humanitarian and nature emergency.

3266 – DG, USA

3267 – Cathy SCHELLER, USA

3268 – HB, USA – I have been suffering for so long but had no idea why. Society doesn't talk about this nor recognize the symptoms being caused by EMF poisoning. And when you try to educate people on this topic, they will all swear that they've never heard of it before and that they definitely don't suffer. Yet every single one of the people I've talked to have distinct symptoms of EMF poisoning too. But they believe they have this diagnosis or that diagnosis because that's what the symptoms align with so that's what the doctor tells them they have. But doctors rarely recognize any root causes. They only know how to apply a label to a list of symptoms and to prescribe medications that only subdue those symptoms, but they don't heal a soul. I'm now a prisoner on my own property. I cannot safely leave home. I risk my life each and every time I go out as I'm hit with frequencies enough to cause my heart to feel like it's literally rattling. I get restless leg syndrome so badly, I can't sit still. I get tightness in my chest. I get SEVERE anxiety. It's horrible. I'm so bad off, I can't even attempt a move to safer spaces because, at this point, they no longer even exist. So I'm moving out of my home and into my pasture in a beat up old motorhome to escape the worst of the frequencies. I paid for a home I can no longer safely inhabit. That's beyond wrong. It's nothing short of theft of my health, my security, my freedom to travel, my finances and has destroyed most relationships with friends and family. It's time we get some ACTUAL science on the table and we stop letting the entire world poison themselves and those around them.

3269 – Julie GALLAGHER, USA – I have been affected by the installation of smart meters. I experience nausea, sleeplessness, tinnitus, vertigo, rib pain, and anxiety. I don't know where to go to escape this nightmare .

3270 – MS, Australia – Perceptibly sensitive to radiofrequency fields since 2014 after greater presence of WiFi in shops, service areas and the roll out of more 4G towers. Caused by those exposures but also earlier exposures, including two years 20 meters away from a large communications radiofrequency dish at work, and other mobile phone towers. Never a mobile phone user, but in 2008 when caring for a family member reacted at low level to her cordless phone and its cradles – noted but not fully realized at the time because the exposures were intermittent and the symptoms mainly sleep disturbance and fatigue. Now live mainly housebound – house shielded. Symptoms with exposure are any or all of sleep disturbance, feeling "hyper", tinnitus, balance disturbance and subsequent sinus bleeding.

3271 – PS, Germany – I am myself electrosensitive, thank God not to that extent, but every Wi-Fi field causes muscle cramps.

3272 – Gaelle FAISANT, France – I am EHS and I suffer from the isolation that this imposes on me.

3273 – Marc François PAYA, France – A doctor who is well acquainted with the problem and a member of the International Academy of Environmental Medicine, I am concerned about the increasing number of victims without treatment.

3274 – SA, Israel – I am sensitive to radiation to a certain extent. Impossible to use a smartphone, not even on advanced televisions. But only on a computer connected by wires, a wired connection.

3275 – HT, France – My mother is EHS, and it is a real suffering for her but also for me not to be able to help her.

3276 – Pauline SCHURCH, France – Relevant circle.

3277 – FE, France – Let's prepare a healthy future for everyone.

3278 – SB, UK – I have been electrosensitive for about 10 years, despite telling myself for a long time that I must be imagining it. The symptoms are real, and for me, manageable if I avoid certain things. I feel deeply sorry for those who are more electrosensitive than me; how are they supposed to live in this world without recognition and protection ?

3279 – MV, Belgium – I had a brain tumor in Broca's area. Three other colleagues also had brain tumors in the same area of the brain. What is the correlation? We have all been using our mobile phones for over 10 years to call our clients from work from morning till night. In my case, the tumor was discovered in time, but unfortunately, it was too late for my colleagues.

3280 – José LEVESQUE, Canada – Antenna installation technician: I become very ill every time I am near an RF, 3G, 4G, LTE, 5G, WIFI, or Bluetooth transmitter. When I move away, my health returns.

3281 – LG, Spain – I am EHS and I know what that means.

3282 – JG, France – I have a brother with EHS who truly suffers from this condition and is desperately searching for a noise-free zone to live in peace. Public authorities must address this problem so that everyone can live normal lives.

3283 – Norah KROGMAN – USA – I am electromagnetically sensitive.

3284 – JD, France – I am concerned.

3285 – KE, USA – I was made sick by high speed internet (caused heart palpation, insomnia & anxiety) and even more sick when they installed smart AMI electrical meters a year ago (more ringing in my head, more exhausted, how have Hashitmotos's Thyroid disease and am closer to being diabetic). All of my new symptoms are a direct result of the meters that were installed all across my community. This needs to end before the pollinators go extinct, they just had a 70% die off. If they go we follow with in a year or two.

3286 – P. M., France – The ehs are in real suffering and are made invisible.

3287 – AT, France – Techno-solutionism is destroying all living things. The ecological transition via renewable energy sources is just a charade to make even more money off the backs of the people.

3288 – MD, Belgium

3289 – Chris DE CREUSTER, Belgium – I would like to know if you are in the next door, if you do not know what to do. I also want to be able to work in a radiation-free environment!

3290 – Tjitske BATEMA, Nederland – Because I myself have been sensitive to radiation for years—experiencing symptoms such as heart palpitations and insomnia, among others. And radiation-free zones need to be established. It is criminal that we, as humanity, are being exposed to radiation without our consent, with all the consequences that entails.

3291 – Hadas WIESS PELED, Israel – I have been suffering from EHS for almost 11 years. There is zero recognition of my situation. No one wants to know about it .

3292 – SL, UK – I have been reading about the harmful effects of EMF for some time and fought against the installation of a mast and homes beneath it, but we lost. It's all about money and population control.

3293 – Sonia KREBS, France – In support of the victims.

3294 – EG, France – My life is becoming increasingly complicated because of electromagnetic radiation, and paradoxically, it's difficult to see doctors without being «high»!!!

3295 – Catherine HESTEAU, France – I can't take it anymore. It is urgent that the situation of people with EHS be taken into consideration. Even in a professional context, the recommendations of occupational medicine (regarding this problem related to the environment) are not being implemented! How is this possible today?

3296 – AB, Germany

3297 – Kristen RATHJEN, Germany

3298 – RV, Nederland – It's very dangerous!

3299 – GD, France – All United, let's uphold the basic rights of every citizen! NO to the «Linky» smart meter mandate!

3300 – KS, Belgium – I myself have already suffered a lot from radiation (palpitations, constant head noises, burning tongue, restlessness,...

3301 – FV, Austria – When I'm in a place free of artificial EMFs (or with very minimal), I feel great. My head is clear, my heart feels free, it's easier to stay present, and I feel deep peace. I want to feel like this everywhere I am. I want to live a healthy life free from artificial EMFs. I don't want to have to keep wearing EMF-shielding clothing, shielding our home, doing a lot of research on such a complex topic, moving, and spending a lot of time, money and energy on EMF meters, shielding materials etc. Artificial EMFs are toxic. They don't just affect electrohypersensitive people. They affect everyone! Even if you don't feel them. X-rays are harmful even if you don't feel, taste, hear, smell or see them. And artificial EMFs affect plants, other animals, and microorganisms too. See photos of trees in cell tower beams, for example. So please, wake up, world!

3302 – VW, Austria – I am an EHS sufferer and we need it to be recognized as a symptom caused by the EMF in our surrounding environment and hold those corporations responsible for spreading it accountable..

3303 – Hélène DUBOIS, France – I want a planet where life is good. A healthy place!

3304 – NM, Belgium – My partner is electro-hypersensitive.

3305 – FD, Australia – It is indeed a humanitarian crisis. Those who do not agree with it simply don't know the long-term effects that are coming if we do not change course !

3306 – PJ, France -:Sincerely with you...

3307 – MC, UK – In memory of my wife who died, not directly from EHS but EHS prevented her being able to seek treatment for cancer.

3308 – KK, Nederland – I would like to get rid of all the radiation , it 's necessary .

3309 – MC, France – I sign.

3310 CI, France – Support, solidarity.

3311 – FF, France – I am in solidarity. This may already be within my family, friends, without knowing it or to a certain extent.

3312 – CB, France – Do what is necessary for these exposed people, it is truly a catastrophe.

3313 – Chabha ANSEUR, France – Unfortunately affected, it is time to break the code of silence and hold public authorities accountable. The world is controlled by criminal industries that constantly corrupt politicians to consolidate their power. Science and medicine are no longer immune to this corruption and have become complicit in this technological genocide.

3314 – Katarina HOLLBRINK, Sweden – I have EHS (electromagnetic hypersensitivity or EMR syndrome). Many people in Sweden suffer from it.

3315 – AV, Belgium – I am convinced of its harmfulness.

3316 – Fabienne GAL, France – I am aware of the consequences that impact all these ELECTROHYPERSENSITIVE people who find themselves isolated from their FAMILIES... FRIENDS!!! LET US ALL BE AWARE THAT THIS CAN HAPPEN TO ANY OF US FROM DAY TODAY.

3317 – AF, UK – I demand white zones everywhere in France, the UK and all of Europe and the cessation of installation of transmitters and any material affecting people with electromagnetic hypersensitivity (EHS).

3318 – ד . ד ., Israel – I am very sensitive to radiation.

3319 – KP, Germany – I myself am affected by EHS and it is now difficult for me to live in our "Smart City". However, I have a place where I can retreat and where exposure to electromagnetic radiation is low.

3320 – Cristina SILVESTRI, France – My sister-in-law is electrosensitive

3321 – Deborah HUNSINGER, USA – I suffer from Electromagnetic Radiation Syndrome, which has completely changed the course of my life, separating me from family and loved ones. I can easily live without a cellphone, TV, microwave oven, WiFi, smart meter, GPS or any other wireless technology, but I can-

not go to restaurants, church, the library, concerts, meetings, or any gathering where people have cellphones. My home is a cellphone-free zone, but I grieve daily for the sake of the planet, all its creatures, trees, birds, bees, and human beings, especially the children.

3322 – Kathlyn TILTON, USA – All life on earth is being damaged and killed by electromagnetic radiation.

3323 – MK, USA – I am aware of the hazards and am also affected by EMFs, smart meters in particular. So is my sister. She can't even use her cell phone .

3324 – JM, Nederland – I have been sensitive to radiation for years and can hardly move around. People sensitive to radiation are almost always locked up. The situation keeps getting worse and there is hardly any place to live without radiation.

3325 – A. ML., USA – I have been disabled by synthetic EMF .

3326 – Hélène RYCKMAND, Belgium – Having been mobilized on this issue as a Senator and informed of the health effects, I believe it is important to guarantee the preservation of white zones.

3327 – DC, France – I know several people with EHS who have had to move to remote areas and relocate. I am convinced that this silent illness is a real catastrophe for humanity and that it is essential to raise awareness with concrete facts and evidence, including testimonies from affected individuals, to highlight what is happening.

3328 – Corinne DONEY, France – I sign to report my distress regarding my health problems (intense fatigue, inability to concentrate, sleep, severe manic-depression, tinnitus, etc.). I was exposed for 18 years at my workplace at the Palais des Festivals in Cannes, due to antennas 4 and 5 and «Linky» smart meters.

3329 – Bert WIT, Nederland – I think there should first be proper research into the danger of EMF to the environment and humans, and therefore further regulation of the use of wireless technology.

3330 – Merie-Pierre GILLEPSIE, France –: Because white zones are essential given the severity of the effects on some people and, in a few years, probably on a majority. Also important because it's the only way to measure the real impact of electromagnetic radiation between those exposed and those not exposed. The precautionary principle is extremely urgent.

3331 – MC, France – It is unacceptable to put interest before health.

3332 – AM, France – I am EHS!

3333 – Christine RICHE, France – I met EHS people and I was able to verify what they say.

3334 – Dominic NELL, Germany – We have the latest impact of mobile and long-term Internet access, but we don't have to worry about it.

3335 – Paula CLEGG, UK – I do not consent to the increasing harmful EMFs that are being imposed on us silently and without warning .

3336 – DB, Nederland – Today it is the last time it has been used, but it is now available in the country where the 5G mast is already on 5G internet. Which is why I can say with 100% certainty that this is bodily terror being inflicted on us here! I have a whole lot of electricity, it's just a little bit cold, it's energetic! Once back, this was again completely the opposite! This is neither normal!

3337 – CH, France – You don't force someone with an allergy to ingest food that is harmful to them, risking their life. Why force people with electromagnetic hypersensitivity (EHS) to endure ever-increasing levels of pollution that slowly kills them, prevents them from working, having a family life, or accessing healthcare (hospitals are full of electromagnetic radiation, dirty electricity, etc.)? Allergic to electromagnetic fields, they are forced to endure more and more of them. Millions are excluded, not to mention the sick EHS sufferers left without medical care, because doctors and they themselves have not yet made the connection between their ailments and this invisible but lethal pollution.

3338 – Ursula Rischmann, Germany

3339 – Cheryl Mead, Australia – I've been physically affected by radio-frequency radiation since 2017, and became totally incapacitated in 2019. I needed to leave the city and move to a safe location in the bush in 2021. The harm from wireless technology must stop. Thank you for initiating this appeal .

3340 – SK, Australia – I suffer from EMS sensitivity. Can't be near toxic phone towers.

3341 – Marion FLOREZ, France – Because this disease must finally be recognized and States must take responsibility on this issue.

3342 – Kristof LEMMENS, Belgium – Too much radiation, life stops!

3343 – JS, Norway – I have been electro- hypersensitive since 2013. And I'm so tired that the radiation, smart meters, 5G, Bluetooth, etc., just keep increasing !!!

3344 – Gérard CUAZ, France – For several years I have had health problems in my home probably due to smart meters because I exhibit the symptoms of electro-hypersensitivity.

3345 – EP, France – I am EHS

3346 – Bradley Decker, USA – Electromagnetic escalation destroyed my life; estranged family, shattered career. No person should suffer this .

3347 – TB, USA

3348 – LS, Canada – I am disgusted that we are being poisoned from all sides by this predator.

3349 – CS, France – I myself am EHS and my life has become a living hell, both physically and socially.

3350 – Luc COLSON, Belgium – We were confronted between 1986-89 with the harmful effects of a 2×380000 volt HV line.

3351 – MV, France – My mother is electrosensitive.

3352 – Laurence BROSSIER, France – Because I know someone who suffers greatly from it. And furthermore, I am convinced

that even without symptoms, electromagnetic pollution is harmful to everyone.

3353 – KF, Australia – I can hardly sleep anymore due to the high satellites around my home and the EMF, CERN, phone towers, and microwaves that are turned on at night. My home, once a safe sanctuary , is now eight times over the legal limit , and the exposure is now so high it's torture .

3354 – RR, Belgium – It's no longer normal what they do to people. They don't consider us.

3355 – Rachel D. SMITH, USA – Thank you for this! I have also sent in a video because I too am a refugee. There are so many of us and it's just getting worse each year. I know several people personally who are also dealing with this. Some of them far worse off than I am. I have been on the run ever since I found out what the problem was in 2013, but I have been struggling with this for much longer. I have lived in a van actually, I've lived in a car and then I upgraded to an old van and then I upgraded to a van and a teeny tiny camper. Always trying to live away from all of the electromagnetic pollution in our world. Unfortunately, I ran out of places to stay. By the grace of the Good Lord my son and I bought a ranch in the Wilds of Arizona, and I lived in a little shed off grid until health issues made it impossible to stay. Of course I have no proof, except the proof of my own body, but I am certain that the 5g satellites made life on my beautiful ranch become impossible. I had to run, yet again. Now I am renting a house in Kentucky, where I am closer to family. Denser air, more humidity, lower elevation, more greenery, all of those aspects make life as an EMP Refuge more possible. I am down in a gorge, in the hills of Kentucky where the land itself helps to protect me from electromagnetic fields and radio frequencies. I have to turn off the circuit breakers in the back two rooms to be able to get any sleep at night but count myself as fortunate in being able to tolerate living in an electrified home at all. I've had to do a lot to the house to make it deliverable. Green wave plugs everywhere, disconnect the dishwasher, buy baseboard style heaters because the big heater was hurting me so badly. I have to be very careful about going out at all. I'm hoping that living here where there's no RF at all will help me to survive these trips to town. There are no words to express my gratitude for what you are doing here. For helping us to have a voice. A Stronger voice together.

3356 – DV, Belgium – I have lived under high voltage and later near a transmission tower, so I unfortunately know what it can do to your health.

3357 – NC, France – I dream of what I could do without all these electromagnetic fields everywhere, all the time. I dream of being able to live without being exhausted and sick the moment I do anything. I dream that others would turn off their cell phones, their Wi-Fi, their DECT phones just so I could spend time with them. I dream that manufacturers and industrialists would take this problem into account because everything works with «wireless» or power line communication (PLC) or harmful low-frequency fields. I dream that politicians would include electromagnetic hypersensitivity (EHS) in their efforts to protect the population and the living world. I dream that healthcare professionals would consider the biological effects of electromagnetic fields in their approach to welcoming, diagnosing, and treating patients. Supermarkets, workplaces, public transportation, hotels, campsites, cinemas and theaters, dance studios, libraries... so many places that have become inaccessible. When will I finally have the right to wake up and live?

3358 – IL, France – Because I myself am suffering from this problem, which has become increasingly severe since the installation of smart gas and electricity meters in our home. I feel like I'm being victimized, I feel powerless. My sleep is disturbed, I hear constant noises in my ears that are getting louder and causing me to lose hearing day by day.

3359 – Ulrich DIENEMANN, Austria – I'm personally affected by this, and I'm very disappointed that so many people who don't experience it themselves simply say it doesn't exist.

3360 – SC, Spain – Reduce electromagnetic radiation now !

3361 – BG, France – Unbearable for those with sensitive electroshocks.

3362 – Christophe COULON, Belgium

3363 – JM, Germany – "The dignity of man is inviolable." (Article 1 of the Basic Law / Constitution of the Federal Republic of Germany) Dear Federal Republic of Germany, finally stop trampling on the dignity of electro-hypersensitive people !

3364 – ME, France

3365 – Janik LAUZON, Canada – I am EHS

3366 – FZ, Italy – No person of good faith would violate the precautionary principle. No person of good faith would ignore the evidence of the harmfulness of electromagnetic fields. This is not a fight for justice, but a fight between life and death. Think within yourselves and realize the truth.

3367 – FL, France – I am sympathetic to and in solidarity with your struggle.

3368 – JV, Belgium – I am against 5G. It's useless, and against the wind turbines that are going up in what's left of the fields.

3369 – JJ, France – It is urgent to stop the global deployment of all these smart meters, mobile antennas, and other devices. Too many side effects are being knowingly ignored by a globalist profiteering elite who, among other things, want to control all human activity, disregarding health.

3370 – Cécile REY, Belgium – I am myself electrosensitive, and mother of five children who are at risk of being so.

3371 – Johanna BLAUKOWITSCH-WAGNER, Germany

3372 – Manfred Wagner, Germany

3373 – ST, Türkiye – As a reflection of haphazard urbanization, the placement of cell towers in the vicinity in violation of the law and the electromagnetic radiation emitted by electrical installations have been the reason for my support of the international campaign. This means there are certain issues that simply cannot be ignored. Electromagnetic field sensitivity is a natural

human reaction! It is, for the most part, a problem that requires preventive measures.

3374 – SC, USA – Because that major solar flare can't get here soon enough.

3375 – PB, Chile – Because I also suffer from symptoms when I am near high radiation. My body is sensitive to these fields and I understand what others experience.

3376 – SD, Chile – I signed the appeal because we suffer globally from the abuses of industries and parliaments that, comfortably ensconced in their altars, show no empathy and do nothing for those who suffer daily. If someone suffers, it's because things need to change. Living like this is not right.

3377 – VA, Chile – Too much electromagnetic pollution. It affects everyone, not only humans, but also animals.

3378 – CB, Belgium – In my circle, there are several people who are severely affected, and their situation has become unbearable. I have a close friend who is forced to live almost in seclusion. Thank you for doing everything in your power to help all these people in distress.

3379 – Adriana PENALOZZA, Chile – t is urgent to create zones without wi-fi, 5G and antennas in all countries of the planet; we are all suffering the consequences on our health...

3380 – ID, Chile – I firmly believe that electromagnetic fields are toxic to the health of humans and all living beings.

3381 – DD, Chile – I think that telecommunications companies should be sustainable; increasing their radiation by speed and thus damaging a being is not reliable or favorable in any case; they should manage the anti-radiation structure, only providing their service and what some people use.

3382 – MM, Chile – Strength to all those affected.

3383 – Cathy BREYTON, France – I fully sympathize with the life consequences of Electro Hyper Sensitive people and wish to help raise awareness around me.

3384 – FF, USA – I am a victim of electromagnetic radiation syndrome from wireless devices designed to harm.

3385 – SS, Chile – I have heard of people whose quality of life has been severely affected—who have been tormented and distressed—since 2020, following their COVID-19 vaccination.

3386 – DD, Chile – I sign because I support this cause.

3387 – Soren STECHER-RASMUSSEN, Belgium – We must radically reduce our use of the internet digital communicationn abd data storage for ecological (and ecological disaster), societal and health reasons.

3388 – VB, France – My 16-year-old daughter and I have been electro-hypersensitive for the past eight months. Our lives have become a living hell; it's hell inside us. We no longer have a normal social life and suffer physically (headaches, brain fog, nosebleeds, swollen lymph nodes, stomach aches sometimes accompanied by diarrhea, nausea, dizziness, and general malaise). We can no longer leave the house without protective clothing that shields against electromagnetic radiation. Our doctor doesn't know how to help us anymore.

3389 – Denis MARTIN, France – Hello, I witness the consequences of electromagnetic field (EMF) pollution almost every day. This is a serious problem for all livestock farmers and, above all, a serious public health concern that should be addressed with absolute urgency, if it isn't already too late!

3390 – Frédéric BLANC, France – I had a house built in a housing development last year, and for the past year, I've been experiencing severe symptoms there: waking up after a night in the house, cognitive difficulties, unrefreshing sleep, digestive problems, heart palpitations, heavy head, thirst, high-pitched tinnitus, difficulty taking a deep breath (very high-pitched and strident noise), tingling on the skin, skin lesions, a metallic taste in my mouth, loss of motivation, and low mood. I don't know anyone else with the same symptoms in my area. A 3G, 4G, 5G, radio, and radar cell tower emits radiation 800 meters away. And there's also a plan to build a new cell tower 80 meters from my house! (which appears on the radio map, but of course the residents aren't aware of it... (in social housing, obviously...). The doctor sent me to an ENT specialist who sent me to a neurologist who then suggested psychosomatics. I don't know what to do anymore...

3391 – Rachel VINCENT, France – I am electrosensitive.

3392 – GM, Germany – I have been affected myself for more than 10 years! No help and most of the time doctors don't know what the cause of emergencies is, even though it's always the number of cell phones that accumulates when there are more people in the room.

3393 – RA, Israel – Because I am aware of the dangers of radiation, and have been measuring radiation for 5 years, and since the Corona pandemic, the radiation in my area and in general has increased to an alarming level, I want to raise awareness of the dangers of radiation so that eventually radiation levels will be reduced by law.

3394 – Shade HANANIAS, Chile – It seems to me that we should support the minority, and I want to raise awareness about this issue.

3395 – Fanny BASTOGNE, Belgium – I'm a general practitioner and I notice how electromagnetic fields (EMFs) affect the health of many people (including myself). It's a global public health issue!

3396 – SN, Canada – Electromagnetic pollution is very dangerous.

3397 – DB, North America – I, too, am affected by EHS and believe something must be done before it's too late.

3398 – GD, France – Dangerous and deadly radiation. Electric + relay antenna installed in the church opposite our house.

3400 – June CARRIERE, Canada – To put an end to the harmful radiation .

3401 – Bart SEELT – Nederland – Bees are also victims. Without bees, little life.

3402 – Susan GUTHRIE, USA

3403 – ND, USA – I sign this appeal because I am suffering from symptoms of exposure to constant EMF radiation, which has saturated our natural environment. And yes, we suffer just as we do. I want this stopped .

3404 – MB, France – This is a serious danger to living things.

3405 – Sioux BERGER, France – Human and animal health is at risk. Recognition of the electrical problems is essential.

3406 – Daniel KUZYSZYN, UK – EMF is not as safe as we are told and can lead to many health problems.

3407–KW,Australia–Icannotfindsomewheresafetoliveandhave sold and moved five times in the past seven years. Now my home is no longer safe. It had very little radiation there early last year, but by October it was eight times over the legal radiation limits and is uninhabitable !

3408 – ER, France – I am myself electrohypersensitive.

3409 – Joris VAN DEN EYNDE, Belgium – A person close to me suffers from electrohypersensitivity.

3410 – KI, Italy – Electrosensitivity is a pathology in a strong increase and is therefore more possible than ever and is easily understood.

3411 – Sophie PUECH, France – I have been electrosensitive since 2016.

3412 – SH, USA – I have been a survivor for over 7 years now. I want to be able to make a difference in the lives of others who are going through this and thinking about harming themselves or others. The Lord has protected me. God bless you all !

3413 – DP, Canada – I have been severely electrosensitive since 2007 following an electrocution.

3414 – André VANDERMEER, Belgium

3415 – GM, France – I am EHS.

3416 – AL, Italy – Because it is necessary for our life and survival.

3417 – Marie-Ange LAMBOT, France – I am electrosensitive and can no longer sleep except when I'm exhausted. I have Crohn's disease. Every day I experience ringing in my head, stomach aches, dizziness, lack of alertness, headaches, and nausea. Please do something.

3418 – IH, Belgium – The situation is becoming critical for our health. The precautionary principle must be applied, and helping these people by limiting this pollution will be beneficial first for those with electromagnetic hypersensitivity (EHS) and then for public health. Our elected officials don't seem to, or don't want to, grasp the gravity of the situation, and if this happens, the entire society will end up shattered. Ladies and gentlemen of the political leadership, take responsibility and prove to citizens that nothing can be more important than their health and that those with EHS can regain their dignity and a NORMAL life.

3419 – Sophie CAVROY Switzerland – This is about a real problem .

3420 – LR, Switzerland – I will always fight for every Swiss citizen to be able to live freely and with the necessary support to live happily and healthily.

3421 – Catherine ABEMONT, France

3422 – Francine CROIBIEN, Belgium

3423 – Anne-Marie DUPUIS, France

3424 – Daniel PERRENOUD, Switzerland – I know several people who suffer terribly from ambient electrosmog in urban areas and find the lack of consideration from political and medical authorities regarding this very real pollution unacceptable.

3425 – CJ, France

3426 – Catherine LEFEBURE, France

3427 – Jean-Luc LEFEBURE, France

3428 – NB, France

3429 – EC, France

3430 – EC, Belgium

3431 – Sylvie COURVOISIER, France

3432 – Laure DAVIDIAN, France

3433 – Monique DELACROIX, France

3434 – JF, Belgium

3435 – HF, Germany

3436 – Helga HIPPMANN, Germany

3437 – Dieter KELLERMAN, Germany

3438 – Bernard LAPOSTOLLE, France

3439 – CM France

3440 – CM France

3441 – GO, Belgium

3442 – Denise OUBRE, France

3443 – Patrick OUIBRE, France

3444 – Dominique PAPIN, France

3445 – Patricia SCIMIA, Belgium

3446 – Noelle GODEAU, France – I am electro-hypersensitive.

3447 – Jeff LE NAVEOS, France – United and committed.

3448 – FT, France

3449 – EG, Sweden

3450 – TE, Germany

3451 – BT, France

3452 – VM, France Maladied

3453 – Jessica PASCAL, France – Electromagnetic radiation can be harmful.

3454 – ME, Germany

3455 – Anthony MARTIN, UK – Although not a sufferer myself, I know people who are adversely affected both physically and mentally. As this background radiation can only increase with the rollout of 5G and other systems, there needs to be a moratorium on further development of the technology until thorough safety evaluations are carried out.

3456 – Imel De BOECK, Belgium – I don't want to be forced to expose myself to so much EMS. I want to be in control of my own health.

3457 – DP, France – I support and I sign!

3458 – AB, Spain

3459 – Rachel COGNIAT, Switzerland – I have been living with this unrecognized disability for over 10 years, I am not entitled to any assistance or recognition, and I bear all the additional costs of health, rent, transport, protective equipment and loss of earnings resulting from my electrosensitivity alone, and it is high time that this finally changed!

3460 – EC, France – I know many people with EHS.

3461 – Tifenn HERVOUET, France – I have been working to improve the quality of life in nursing homes for 20 years.

3462 – RM, Italy

3463 – Marie BALESTER CARRETTE, France – As a Therapist I am already dealing with these cases through my association (...).

3464 – PJ, France

3465 – Elisabeth JUNG, Germany – Because I am aware of the harmful effects.

3466 – JP, UK – I am EHS and feel the effects of EMFs constantly, despite using a 'wired' computer and so-called 'landline' (VOIP) phone. The EMFs are everywhere I go, so I have to carry a special harmonizer device (very costly) to try to protect myself. I have been researching the tech for the past 6 years and can see that the uncontrolled, ubiquitous proliferation of RF frequencies is a crime against humanity and should be prosecuted at the very highest level.

3467 – Alison PRICE, USA – Because I have lived with this condition to the extreme for 24 years now, and it has to come out there to let the public at large around the world know about this and to put pressure on our government to change things .

3468 – Sébastien BERAUD, France – Support strength and honor.

3469 – LA, Ireland – It matters and I feel it in my body when close to these nasty devices .

3470 – Shannon ROWAN, USA – I have been suffering from reactivity to manmade EMFs since 2014, causing me to have to move (with my partner) several times, over thousands of miles, lose employment, lose friends, lose all kinds of support. I've struggled to keep my home many times only to have it taken away with a new smart grid, and smart meters forced on my home and been force evicted. I've gone to the fair housing dept., to lawyers and doctors, gotten a medical diagnosis stating I have EMS/EHS and MCS and need accommodation only to not be accommodated. I have to rely on the charity of others to get by as I am not able to get disability or find jobs that allow me to work without using a computer or cellphone. I am one of many millions. After I published my book "WiFi Refugee; Plight of the Modern-day Canary" in 2022 chronically my story and the stories of dozens of others made into refugees all over the world thanks to the unchecked expansion of hazardous wireless communications grids, hundreds have sent me their stories, and they are all the same, they all are seeking some refuge, somewhere they can go, live, work, play and be free from the ubiquitous torture of EMFs. I was recently contacted by an EHS sufferer living in New York City who is being forcibly drugged by her state who says that her suffering, her saying that WiFi and cellphones from the neighbors use is making her ill, is "paranoid and delusional". She is unable to free herself from the forced drugging (making her sicker) and unable to afford to move. It is criminal that ignorant people have the power to say that those suffering from exposures to technology that are demonstrably harmful (with tens of thousands of peer-reviewed scientific studies to back this), are simply mentally ill, and crazy. We are the sane ones, the world has gone insane, so addicted to harmful technologies that they cannot see it is harming them and all biological life. They would rather shoot the messenger than give up their precious "smart" tech!

3471 – AL, Belgium – You can't stop progress, but progress will stop us! Let's act against invisible weapons!

3472 – Lenka KABILA, USA – The deployment of wireless transmitting technology in populated areas, especially areas without any acknowledgment of the latest scientific data providing sufficient evidence that long-term overexposure to RF has a negative impact on human health and other living organisms, is unacceptable. I myself suffer from EHS (electromagnetic hypersensitivity) due to an illegally installed 5G cell tower, which has disabled me and caused permanent damage to my health. This needs to stop ASAP !

3473 – MB, France

3474 – LH, UK – I know how damaging this is to human health.

3475 – Andrius STURAS, Lithuania – CYBORGS AND TRANSHUMANISM ARE SCIENCE FICTION AND CATASTROPHES IN REAL LIFE, MAKE IT HUMAN AGAIN .

3476 – CP, France – I am an electromagnetic refugee; I was forced to sell my house after the installation of 5G. I currently live in a campsite, in the middle of the trees.

3477 – Barry West, UK – I've suffered from Havana syndrome, EHS since 2019 .

3478 – JB, France

3479 – EV, Germany

3480 – Jamila VALKA, Germany

3481 – Rosemarie STEMP, Germany

3482 – VR, Germany

3483 – HR, Germany

3484 – AR, Germany

3485 – Michaels GUNTHER, Germany

3486 – Sibylle GRIMM, Germany

3487 – RT, Germany

3488 – Réjane MERMET BOVEY, Switzerland

3489 – SL, France

3490 - Christiane HERVIEU, France

3491 – Jean-Pascal BOVEY, Switzerland

3492 – Andrea BECHERT, Germany

3493 – WH, Germany

3494 – MB, Germany

3495 – BR, France

3496 – Anne Kuhlmann, Germany

3497 – Ingrid KLING, Germany

3498 – HK, Germany

3499 – Sophie GALLOU, France

3500 – SB, Germany

3501 – Brigitte COURTAUT, France

3502 – Bruno CHRISTIAENS, France – I stand in solidarity.

3503 – CV, USA – In 2016 I began noticing many spontaneous symptoms happening while in my home and outside. I lived a symptom-free life, healthy with no aches or pains for the past 28 years. Despite this, I began to notice frequent spontaneous nosebleeds. Also, more frequent canker sores. I had streaks of light, like lightening, that would grow bigger and bigger obstructing my vision. I got frequent finger rashes. My thumb would be covered in a spider pattern of red lines that would open into cracks and was raw and painful. I had always been a sound sleeper, but my slumber began to degrade. I would wake up in the middle of the night trying sleep aids. I felt very restless. These symptoms came on so gradually I almost dismissed them. But as I created a list, I realized how many had appeared. I began feeling dizzy with labored breathing as I worked in my kitchen where the meter was located on the outside wall. Seeking relief for the shortness of breath I tried breathing into paper bags which helped a little. I began to have heart palpitations and my heart would sometimes pound spontaneously. I had never had dizzy spells before but now I had to sit down when I got them. I was in a low level worried state not really knowing where to go for answers when a friend recommended the documentary, Take Back Your Power. I watched this documentary and recognized all the symptoms mentioned were the same as mine. I began getting rid of the smart meters at my home and all appliances whose power source was microwave radiation. I am completely symptom free today although still sensitive to exposure. I'm careful not to drive by cell towers and I ask people to turn off their cell phones or let me put their phone in a Faraday bag. I don't expect any gathering of more than 4 people as it's a social disaster to ask people to turn off their phones. I almost totally lost my short term memory but when the smart meter departed, I got my memory back! I am so grateful.

3505 – MB, USA – I have EHS and struggle to live with it .

3506 – Wulf MENSE, Canada – I have a heart condition (Fib) because of sleeping too close to smart meters for 7 years .

3507 – AF, France – I am MCS and convinced that if each wave had a smell, I would faint on the spot.

3508 – Jacqueline BARRAS, Belgium – I am electrosensitive. I initially had problems sleeping in places with Wi-Fi, like hostels. Then, about ten years ago, my blood pressure became too high. After three years, I was able to link it to Wi-Fi, mobile phones, Bluetooth, etc. It is dangerous for me to go to hospitals, theaters, trains, electric cars, sports centers, waiting rooms...

3509 – Sophie BERNAT, France – Science without conscience..

3510 – Francis BERNARD – I am a victim (...)

3511 – DT, France – Personally affected

3512 – SH, Norway – The deployment of wireless communications is a growing global challenge that is causing disease among the population.

3513 – Laurence RUBERU, France – I'm afraid of electromagnetic waves.

3514 – SA, France – I support this cause.

3515 – FM, France – I am sensitive to this issue. It is important to fight against the emergence of EMFs. This concerns everyone.

3516 – Dorothée BEAUTRU, France – My children and I suffer from electromagnetic radiation (migraines, radiating pain). We are looking for a place to live that will protect us, but we are affected everywhere we go...

3517 – NG, France – I have been harassed for at least 4 years.

3518 – SB, France – Health problem following exposure to electromagnetic radiation.

3519 – MD, France – I'm suffering!

3520 – RV, USA – It's a fear cause.

3521 – SF, Belgium – My wife is EHS.

3522 – Sandrine JUNG, France

3523 – MM, Spain

3524 – Esther ABBOU, France – Because I myself am subjected to conscious and deliberate harassment by means of these electromagnetic raditaion, about which there is much to say, and, alas, because no one is safe from this ignominy. We are already many victims, sometimes driven to suicide. Thank you.

3525 – CP, Belgium – It is very important to protect all living beings who suffer from the disastrous consequences of this technology.

3526 – AB, France – I am affected and my life is becoming hell

just to find suitable accommodation.

3527 – AD, France – We are completely inundated with electromagnetic radiation. Cell towers and wind turbines are springing up everywhere! It's very worrying...

3528 – Gisela ZTTLER, Germany

3529 – VV, France – I am EHS and I suffer daily.

3530 – AS, Sweden – This is extremely important for human and planetary Health.

3531 – OP, France

3532 – AD, Spain

3533 – OB, France – I no longer have a life with this condition which deprives me of work, social life and sleep.

3534 – Luc RENDERS, Belgium – There is scientific evidence that establishes the danger of electromagnetic radiation generated by wireless communication networks.

3535 – SS, France – We are in a permanent fog of all kinds of electromagnetic radiation (electricity meter, water, telephone, radio, Wi-Fi, etc.). The authorities supposed to protect us have NO REVIEW of the impact on our health and force us to be bombarded with radiation 24/7.

3536 – LP, France

3537 – Matt THOMAS, USA

3538 – SP, Netherlands

3539 – RC, Switzerland – I am sensitive to this cause.

3540 – Susie COX, Australia – This is so very important. My children were diagnosed with electromagnetic hypersensitivity (EHS), and a couple of years later, I was also diagnosed and suffered from debilitating symptoms. It is becoming more and more common as technology increases magnetic frequencies, and it is becoming more and more difficult for EHS sufferers to live in this modern world. Please help .

3541 – Geneviève LAMBERT, Switzerland – I am friends with someone isolated in the forest and in distress! Thank you for starting this petition!

3542 – AP, France –: For several years now, my sleep has been disturbed (a maximum of 4 to 5 hours per night, provided I take sleeping pills). I experience tinnitus that prevents me from falling asleep, burning sensations on my skin, and joint pain triggered as soon as I approach cell towers, Wi-Fi, radar, etc., along with feelings of oppression. I feel like a walking detector... a never-ending battle...

3543 – KS, Germany

3544 – JL, Belgium – Because it must be horrible and a sensitive subject must be respected. I already suffer from noise and certain electrical vibrations, so imagine them!

3545 – XB, France – It is time to act for the electrosensitive.

3546 – SN, France

3547 – LN, Netherlands

3548 – CF, France – Suffering myself from electrohypersensitivity.

3549 – FC, Belgium – I am very worried about the side effects of electromagnetic radiation on living beings.

3550 – Jean-Pierre DAL MOLIN, France

3551 – Maureen SMITH, USA – In 2013, I became very sick with serious symptoms that affected my heart, skin, memory, stress hormones, etc. I was diagnosed by an environmental physician with EHS and moved north, which helped, but as more technology is installed, my symptoms are returning. I could never go to the hospital; it's not safe for me or others like me .

3352 – Beverly BARNES, USA – I have had to move twice because I lost my analogies meter. I got so bad and passing out that I finally got a pacemaker because my heart would stop and would have 20 second pauses. This happened after the smart meter was put on our home when we lived in Arizona. A building biologist came to our home and we had RF and microwaves 24/7. The utility company did not consider non-ionized radiation as a problem and made us live with it. We finally moved.

3553 – JC, France – The health scandal in France is becoming all too common, regardless of the exposure (chemical, biological, physical), but it is disheartening to realize that public health has long been neglected by the State! This is why it is essential that citizens wake up!

3554 – Namiah GONSET, Switzerland – I am sensitive to electromagnetic radiation and I am for the protection of Life!

3555 – FA, France – As a geobiologist, I incorporate the measurement of EM pollution into my work. It is very present and disruptive in many cases and to varying degrees.

3556 – CT, USA – I suffer from Havana Syndrome and I believe there are elements used that are also relevant to this appeal.

3557 – CC, France – I am electrosensitive and fortunately not hypersensitive.

3558 – Emmanuel COEURDEVEY, France – Electromagnetic problem on my farm.

3563 – Thomas VIGNEAU, France

3564 – RR, France

3565 – Eva BAHIA, Germany

3566 – Manfred HACK, Germany

3567 – HH, Germany

3568 – Irene MAERZ, Germany

3569 – Michaela PFEFFER, Germany

3570 – MF, Germany

3571 – Gunnar SAMUELSSON, Sweden - I myself saw my life destroyed by radiation from cell phone towers and today I cannot live normally and I have no place to live.

3572 – VH, Sweden – I have problems myself.

3573 – SN, Italy

3574 – Carl SMITH II, USA – I also suffer from EHS and have to wear a headnet for microwave radiation shielding .

3575 – MK, France – The urgent need for recognition and medical assistance for EHS.

3576 – Jan GELLHOED, Nederland / Germany – My wife has been electrosensitive since 2012, so I'm a victim of this as well. It's a social disaster. More than 6 years out of 12. Now heading to Germany for the second time; in some valleys, there's no radiation. It's striking that many people also have chronic Lyme disease (which can be confirmed by an infectious disease specialist). We've suffered financial ruin (moving costs, shielding against HF radiation, Lyme treatment, etc.). All these painful and severe symptoms: you can't just make this up (Dutch expression). I hope that compassionate doctors will stand up and go against the tide, just as doctors did back then with asbestos. It's up to the politicians now: there must be "white zones" throughout Europe where HF radiation is nonexistent. This will allow all those seriously ill people to simply go back to work and live their lives again.

3577 – OP, France – A friend's daughter has been suffering for a long time from this exposure to electromagnetic radiation.

3578 – Elisabeth JEß-KNECHT, Germany –I know the great distress of many people with EHS.

3579 – UH, Germany - I am concerned and I hope that the situation will be successful and improve, and that it will be recognized by the population, politicians, and the medical profession.

3580 – Michael KNECHT, Germany – My wife is concerned.

3581 – Gerhard MEYER, Germany – I know many people affected. Even back in the 90s, I was able to help people affected by electrosmog, but only in the area of electrical networks in the house. 50Hz, bedroom, etc.

3582 – MR, Spain – I highly suspect that EMFs are disrupting my health. They damage vulnerable humans and other biological species, certainly in the long term. They probably heat and dry the climate. Despite serious evidence, no one is studying these points .

3583 – Björn WEGNER, Germany – For health, we need to slow down and become aware of this topic and how to regenerate real health.

3584 – Valerie HOUNIEU, France – I have been electrosensitive to electromagnetic radiation since 2011. Having a normal life is almost impossible. It has a significant impact on my health (insomnia, headaches, extreme fatigue, dizziness, memory loss, muscle pain, etc.)

3585 – Marie Madeleine DIVAY, France – We are all concerned, it is very dangerous for humanity and animals

3586 – FM, France – This is a health catastrophe.

3587 – CR, France – I support people with electromagnetic hypersensitivity.

3588 – CP, France - The risks associated with all artificial electromagnetic fields must be taken into consideration.

3589 – Elena ROUVIER, Belgium – It is not normal to be exposed to all this electromagnetic radiation, totally out of harmony with Nature and our body!

3590 – Léon LANCELOT, Belgium – No harmful radiation around us!

3591 – Lucas LANCELOT, Belgium – It would be good if living conditions were better aligned with Nature and not with technologies with very high frequencies!

3592 – EK, Germany – I am EHS myself and I am excluded from normal life. Holidays are unthinkable for me.

3593 – JH, Switzerland – These demands are perfectly legitimate!

3594 – Görel AUNESDOTTER, Sweden – Because I'm one of the victims, and more and more of us are being affected .

3595 – Brigitte SCHAUER, South Africa – I myself experience these harmful effects and find that almost everyone is unaware of the colossal threat to nature. Subtle signs are often ignore until the damage is irreversible .

3596 – Sarah HARPER, UK – I am extremely unwell from this radio wave sickness.

3597 – Ingo BLIEFTERNING, Germany – I have been electrohypersensitive since 2012 and suffer very severely as a result: a) Physically : Difficulty falling asleep and staying asleep (I get an average of only 4 hours of sleep), constant pressure in my head, vibrating pain deep inside my brain (which has intensified since 5G), tinnitus, severe ear pain, severe muscular tension, dizziness/balance disorders, numbness in my face. - b) Mentally: Problems with concentration, difficulty finding words, analytical weaknesses (which used to be my strength), poor short-term memory. - c) Emotionally:Total resignation — because I can no longer find/have a place to live anywhere in the world and am being tormented day and night, and because the constantly advancing technology gives me a very bleak outlook for the future. - d) Socially: I can no longer participate in normal social life because the symptoms cannot be alleviated or corrected (for example, I can no longer stay overnight at my mother's in the city or go on holiday). - e) Economically: Because of the problems described above, I can no longer stay overnight at my mother's in the city or go on holiday). - e) Economically: Because of the problems described above, I can no longer work in my profession as an industrial engineer. As a result, I receive financial assistance from the state. I used to be a very good taxpayer, paying [the equivalent of] millions of German marks in taxes, and now I have become a welfare case because of radiation — bravo, Germany!! - The human being is an electromagnetic being! The greatest crime ever committed in the world is being perpetrated because it affects all human beings — even if not all people are able to perceive it. The damage is permanent and there is no respite for human beings. But a human cell simply does not scream when it is damaged! It is time for our so-called constitutional state to finally take the latest scientific studies into account and put an end to our

daily suffering and our lack of prospects. I alone lack the faith! It is corruption and human greed!

3598 – FB, France – Sick friend.

3599 – CB, France

3600 – Anne Catherine MARTIN, France – I am a retired doctor and I have been confronted with the distress of many electrohypersensitive people.

3601 – SB, France – I know 2 people who are severely disabled by these problems.

3602 – ML, France – My daughter is electrosensitive...

3603 – Véronique SIMONNOT, France – For the moment, some people are feeling the effects of magnetic frequencies, 4G, and soon they will add 5G. More frequencies = more people, until we reach the maximum human population. All of this will disrupt the living world.

3604 – Jean HUDON, Canada – The right to a healthy environment of the victims of electro-pollution MUST be respected and must take precedence over that of the users of wireless technologies.

3605 – Laurence VIVARAT, France – I am electrosensitive.

3606 – SV, France – For an electrosensitive friend and for others who are in the same situation.

3607 – AC, Corsica – I am currently in litigation with SFR because they installed a pylon fifty meters from my home.

3608 – Jacques LECA, France – The surrounding electromagnetic radiation creates bodily imbalances in all living beings because they function thanks to natural frequencies called scalar waves.

3609 – DB, France – Because we cannot accept the unacceptable. (...)

3610 – Valérie BERNARDEAU, France – More and more sick people and animals! Stop.

3611 – Bonino Raffaella, Italy

3612 – Marta SCHUSTEREER, Germany

3613 – Marianne COURT, France – Too much electromagnetic pollution impacting our health.

3614 – Aimé KERIGUY, France - I advocate reducing the number of cell towers.

3615 – Patrick DUTHOIT, France – A friend is suffering.

3616 – IS, France – I strongly support the appeal of those who are suffering from the excessive use of electromagnetic radiation in our environment, which is isolating them from community life—a great injustice. It is urgent that decisions be made for the good of each and every one of us. Thank you for your attention and your desire to bring happiness to everyone by protecting them.

3617 – ML, France – I am shocked by everything our leaders are doing to our planet and our health. Climate change shows us this every day. Please, let's reflect and repair the damage done by our predecessors.

3618 – David Martinez, France – A word to the wise.

3619 – CC, Spain – I am electrosensitive and I know the illness. We must be protected.

3620 – TH, Norway

3621 – BB, Belgium – I'm very sensitive to electromagnetic disturbances. I can feel their harmful effects before most other humans do (tested). So does Nature. Please help us protect all life and respect the natural electromagnetic fields so that life itself is respected and has a chance to restore to its natural, healthy state. Thank you!

3622 – Comics, France

3623 – SR, Spain – We are all more or less electrosensitive. We are all affected.

3624 – GM, USA – I live away from home due to unbearable symptoms. I wear protective clothing if I have to be exposed to EMFs.

3625 – Jeanine S. Deal, USA – People need to know the truth about EMFs and how they can destroy the health of both humans and animals, so that going forward, the welfare of all humanity and life on Earth is considered. We need to make the Earth hospitable to all life again.

3626 – JM., France – I believe the victims.

3627 – SD, Spain – I live in Barcelona and I suffer from ESH; there are days when it's unbearable and I don't feel well at all.

3628 – MK, Germany – I sign because I am affected.

3629 – LB, Germany – I am concerned and feel the restrictions and their social implications daily.

3630 – Jason CLARKE, UK.

3631 – AF, Germany

3632 – FL, Canada – I am also electrosensitive.

3633 – MR, Spain – Attack against public health.

3634 – JA, France – I sign because all people have the right to live in good health.

3635 – KV, Belgium – I feel so bad that we continue to let this mediocre progress affecting our health escalate further and further until even its organizers are co-sufficient, as if there aren't enough of them already these days and they are dying prematurely.

3636 – Katie HULSE, UK – I myself have been sensitive to EMFs – for nearly 20 years, and my life is very difficult and very restricted, though I am lucky to have a few around me who understand, whereas many like me have no support at all. I am very concerned that I may not be able to stay in my protected home long term as things around me change for the worse. The world needs to wake up to the debilitating effects of all EMFs for countless people, not just a few, but a sizeable proportion of the world's population.

3637 – DM, UK – Not enough is being done by the regulatory authorities to recognise that there is a problem with pulsed microwave radiation.

3638 – MJ, UK – I have been seriously impacted by EMFs .

3639 – Timo VIRTANEN, Finland – I'm a EHS person.

3640 – Daly MERINO, France

3641 – JL; UK – I am electrosensitive and the recently installed water smart meters along the grass verge of my road to detect water leaks in rural areas has caused serious radiation burns and other unbearable symptoms every day since. I am also woken nightly in the early hours of each morning when the smart meters transmit their data which causes excruciating pain for over an hour. During this time it is impossible to sleep until the transmitting ends. Apparently, the smart meters operate at 868MHz and uses LoRaWAN technology.

3642 – VC, Italy – I am also sensitive to EMFs and radiation of all kinds!!! When I am in nature, I am reborn. When I return to the city, I feel very unwell, with an illness that doesn't go away unless I return to nature! I take medication, but I can't continue like this my whole life! STOP THIS RAVAGE ON HUMAN LIFE!!!! YOU ARE DOING NOTHING BUT DESTROYING LIFE!!!!

3643 – JM, Germany – I myself am severely affected by electrohypersensitivity – low frequency and high frequency. We urgently need help and understanding.

3644 – RM, Germany – I am personally affected.

3645 – Paul VAN OMEN, Belgium – I suffer from heart rhythm disorders, so I use a mechanical clock to partially turn off my body's rhythm both at night and during the day.

3646 – Peter BRUUN, Denmark – It is a humanitarian crisis .

3647 – Yngve RUSBJERG, Denmark – I sign because I'm tired of fleeing and living in "exile." The radiation is making me sick and affecting me greatly. I've suffered from EHS for many years, and it's getting worse and worse as the country becomes increasingly littered with cell towers, etc. Sincerely, Yngve Rusbjerg.

3648 – ST, France – No one should be left behind. Electromagnetic raiation is not harmless...

3649 – Christian MOHR, Denmark – Today, EMF/EMR is arguably the world's biggest environmental problem.

3650 – ND, Canada, Quebec – Because every signature, every name added to the Appeal list can make a positive difference. Thank you for your work.

3651 – KL, Denmark – Because I completely agree with the above.

3652 – Patty HEMINGWAY, UK – I am electrosensitive.

3653 – MD, Belgium – have had symptoms since childhood (1979), probably EHS, HS (no clear diagnostic criteria yet) due to a genetic predisposition and linked to EMR and the increase in satellites, telecommunications, electronic applications; EMF/RF etc. More research, diagnostic criteria, and above all, more clarity, knowledge and recognition among medical/educational staff, and appropriate legislation concerning PEMF and dirty electricity is a must for the preservation of life and health for all organisms.

3654 – Haldis Marie HOLTHE MJAVATN, Norway – I'm hypersensitive El and I struggle with this every day. My laptop is always in airplane mode and it works 100% if I have a wired internet connection.

3655 – Françoise DUPONT, Canada – I live in hell every day.

3656 – Dagrun HEGGEM, Norway – This is important.

3657 – AC, USA – I had papillary thyroid cancer and neuroendocrine cancer. I know there are many people who have cancers directly caused by EMFs.

3658 – MA, India – As a Computer Science student, I understand the harmful effects of electromagnetic radiation. The literature on the subject, in its early development and expansion, clearly shows its effects on the electromagnetic nature of human beings. I appeal not only because I see what electromagnetic radiation (EMR) is doing, but also because I want to see what is happening.

3659 – Mia GADE, Denmark – It's dangerous and I don't want my children or grandchildren to grow up in this situation.

3660 – Jossen ELIASSEN, Norway – Electrical hypersensitivity affects many people. And measures must be taken.

3661 – EU, Norway – Electromagnetism makes me sick.

3662 – LV, France – An antenna is being installed next to my house.

3663 – Linda NAUD, France – I sign because no one asked me to have cell towers installed everywhere, nor to have a «Linky» smart meter forcibly installed in my home. I feel illegally invaded and I am suffering from loss of balance and severe headaches.

3664 – EG, Norway –I am very sensitive to electromagnetic radiation.

3665 – EU, Norway – We need to be heard and not be sick everywhere.

3666 – PB, France – I had a stroke and I don't need electromagnetic radiation (...)

3667 – MG, Spain – STOP LEGAL TERRORISM...

3668 – LL, Switzerland – I am affected.

3669 – Siri YDSTIE, Norway – Hoping that it will help.

3670 – Lothar HORST, Germany – Because I myself am EHS and I know many people who, for this reason, live in sometimes inhumane conditions.

3671 – Anne BRESARD, France – I have been campaigning since the beginning of mobile phones and relay antennas, having been electrosensitive for several years.

3672 – NG, France – I am a victim of electromagnetic wave torture, as are my three dogs. I have lost several of them to rapidly progressing tumors.

3673 – MH, UK – I sign in order to support the end of thistotalitarian governance! And the dismantling of the cell tower weaponry !

3674 – Bente HVIDSTEN, Norway – It is harmful to health!

3675 – AS, Switzerland – I myself am electrosensitive and cannot use a mobile phone for this reason. This cost me my last job and rendered me «unemployable.» For the time being, I therefore live without a mobile phone. I haven't «regressed» to the Stone Age, but social exclusion due to the digital divide is no longer science fiction. I am not anti-ICT, and certainly not considered stupid, because I don't use a smartphone. I use the internet daily via a wired computer connection, not only for my work but also to help my loved ones, especially the elderly. I am concerned about the race towards a fully digital world, and especially the race towards a fully wireless digital world. How am I supposed to get around (buy tickets, access train platforms, even fly), make payments (and provide proof of payment) for myself and my elderly relatives, fulfill my civic duties (filing taxes, voting soon, etc.), download official or medical documents when every single action requires authorization/validation (supposedly secured) via code or identification transmitted by mobile phone?! There are already so many public places (libraries, training centers, community spaces) that I have to forgo or whose use tires me out and disrupts my well-being in the long term?

3676 – Belgium – Fed up with this problem, this crime against life that has been going on for decades and is getting worse every year.

3677 – FW, Germany – I am convinced of its necessity!

3678 – PJ, Luxembourg – I sign this because we need to help the babies who are born, the children, and anyone else who will be affected by this in the future .

3679 – Mahamadou TOUNKARA, France – I sign the appeal because it shows decision-makers that a large number of people support this cause.

3680 – Laura SALDIVAR TANAKA, Mexico – I consider myself an EHS person, I have studied the phenomenon and I am very concerned that governments and decision-makers are ignoring the issue .

3681 – Rubi RIVERA, Peru – I am an electrosensible person, a victim of the electromagnetic fields, living in Lima Peru and forming part of the technical team of the electrosensible community in Peru and in Peru we are lucky because this condition was recognized in my country through a ley project that ha If you present at the conference, we don't want to be silent. Our lives are destroyed and necessary to be exposed. Electromagnetic contamination has been caused by the deaths of all electrosensitive humans in Peru and the world. It's time for the authorities to recognize this condition and protect their electrosensitive citizens.

3682 – EL, France

3683 – Kati MURAT, France – The health of my family and my animals at our traveling educational mini-farm has been threatened since the installation of the Bouygues cell tower! Headaches, dizziness, and skin problems in my animals... We were here before it. It is urgent that we act to protect our well-being and our environment. I sign the petition to demand action and defend our right to live free from nuisances!!!

3684 – Ludovic AUTHIER, France – I understand the difficulty of finding a place to live in such a widespread network. The effects of electromagnetic radiation on hydrogen molecules, and therefore on water, and therefore on living organisms, are well established. It's always a matter of dosage. Others may be hypersensitive, such as pollen or other factors.

3685 – KA, Norway – I want everyone to have the opportunity to be healthy.

3686 – Claudine MIAS, France – Hello, I became electro-hypersensitive (EHS) after the arrival of 3G and 4G in the metro, and then after heavy exposure at work, my condition worsened. I lost my job, and then, when a cell tower was installed near my home, I fainted as soon as it was activated, and my health deteriorated, forcing me to move. It's time to legislate, to apply the precautionary principle. Becoming electrosensitive is a matter of exposure time and power. It can happen to anyone. Today, 5% of us are speaking out, but how many are still silent? And how many will there be tomorrow? It's time to act. We are the barometers of a situation that is wrong, a danger to all forms of life. That's why I sign.

3687 – Jacqueline ANDERSON, USA – My health was affected by the effects of smart meters and non-native electromagnetic frequencies.

3688 – DR, Germany – The harmful radiation must be stopped.

3689 – Runne Gorm PEDERSEN, Norway – We must stop the spread of radiation in society.

3690 – LP, Norway – I've seen how this affects people.

3691 – Vincent ROSSIGNOL, France – I am sensitive to radiation.

3692 – SH, USA – I am EHS. I was living in the city, miserable, with doctors telling me I was healthy, despite my symptoms. I had multiple miscarriages and many health concerns. After I figured out the root cause was RF/EMF , we moved to a rural area, got rid of Wi-Fi, and got a corded landline. My symptoms disappeared, and I went on to have two more healthy pregnancies. I'm definitely signing the appeal .

3693 – MS, France – I am concerned about electromagnetic radiation, a real scourge, a great danger for sensitive people who find themselves facing gross incomprehension and the impossibility of remedying these phenomena which are growing with each new installation (fiber and other meters, more and more antennas, etc.) cancer, memory loss, sleep disorders, etc... the uncomfortable lot of many people of all ages and a dull and silent anger at not having had the possibility to refuse this killer meter (the abominable «Linky» smart meter).

3694 – Dian VAN CAUWENBERGH, Belgium – I had to move for the same reason.

3695 – MH, UK – Sick of feeling sick from the onslaught. The lack of safety studies says it all, a pestilence on every living thing!

3696 – Christiane LE DAUPHIN, France

3697 – SF, Switzerland S. B., Switzerland

3698 – RC, Switzerland

3699 – SB, Switzerland

3700 – MS, Switzerland

3701 – Milly RAUOS SENAUDE, Switzerland

3702 – MB, Switzerland

3703 – MM, UK – I am also a sufferer – this has to stop.

3704 – David BAIZE, France – I know at least 2 people with EHS.

3705 – Mercedes CABANAS CORTES, Mexico – I have tinnitus, but I don't have high blood pressure; I lose my balance and my fingers go numb when I move them on my iPad.

3706 – Sylviane MURAT, France – An increasingly harmful environment with pollution of all kinds and increasingly younger sick citizens.

3707 – TD, Germany

3708 – KS, Germany

3709 – TW, Germany

3710 – SK, Germany

3711 – MK, Germany

3712 – Angela LEYDENDECKER, Germany

3713 – D. L, Germany

3714 – VM, Germany

3715 – SM, Germany

3716 – MV, Germany

3717 – S. Z, Germany

3718 – JB, Germany

3719 – PB, Germany

3720 – Maria FINSTER, Germany

3721 – JL, France

3722 – EM, Germany

3723 – DP, France

3724 – JC, France

3725 – JS, France

3726 – Gabriele ZYLAK, Germany

3727 – Didier MALLET, France – I know that EMFs are harmful.

3728 – GC, France – I am electrosensitive and feel very concerned.

3729 – Alain CARPON, France – By 2030, Professor Belpomme estimates that 30% of the population will be electro-hypersensitive due to artificial electromagnetic radiation (cell towers, mobile phones, wind turbines, etc.). Currently, the figure is 10%. In 2017, ANSES (the French Agency for Food, Environmental and Occupational Health & Safety) recognized the figure as 5%.

3730 – JV, France The precautionary principle.

3731 – Mireille DOUSST, France – For the precautionary principle and for future generations

3732 – J. M., France – Out of solidarity.

3733 – Sylvie GERMAIN, Canada – In the name of the planet and all its living beings.

3734 – FR, France –: A friend has been suffering from EHS for several years. She is forced to stay home most of the time. I have been able to observe her state of fatigue.

3735 – JT, France – My wife is showing sensitivity to electromagnetic radiation.

3736 – CB, France – My body can no longer tolerate EMF radiation, tachycardia, violent vertigo, mass hair loss, migraine and more.

3737 – Maike FAUST, Germany – 2018: Mobile phone providers like Nokia and Vodafone warn of the cancer risks associated with phones. This warning is not addressed to consumers, but to shareholders! 2019: A court ruling in Italy compels authorities to inform the public about health risks (including tumors). 3. People with electromagnetic hypersensitivity are also protected by the United Nations Convention on the Rights of Persons with Disabilities. The right to life also includes the right to live in areas with no mobile phone coverage.

3738 – JL, France – At a time when we must save our planet, amidst all the global ecological warnings, all world governments must realize that they are destroying our planet and all its living inhabitants. Will money, speculation, and politics still be useful and necessary when we have all disappeared from our beautiful blue planet? A word to your consciences, speculators and powerful figures of this world! Joëlle Larbre.

3739 – VP, France – I know people who are affected.

3740 – DR, France – Citizens must be informed by operators, and antennas should be shared.

3740 – DR, France – Citizens must be informed by operators, and antennas should be shared.

3741 – m; V., France – We must reserve living spaces free from electromagnetic fields for people who have developed EHS (Electromagnetic Hypersensitivity). And we must reduce the current level of electromagnetic fields to prevent an increase in EHS cases in the future.

3742 – Maike FAUST, Germany – MZ, Germany – I find the way the EHS theme is being handled inexcusable: ignorance, misinformation, political inaction.

3743 – PA, USA – I feel effects from the EMFs produced by these devices .

3744 – CM, Switzerland – I know a family that suffers from this syndrome.

3745 – Sarah JONES, Australia

3746 – MD, France – I was already a victim of electromagnetic harassment in 2007. I am a regional representative for the EHS Hearts association.

3747 – Elisabeth BRUN, France – I know the daily difficulties faced by people with electromagnetic hypersensitivity (EHS)!

They are a factor in exclusion. The harm caused by electromagnetic fields to living beings must be taken into account by our leaders.

3748 – LT, UK – I am EHS person living in the U.

3749 – JH, Australia – I suffer from EHS.

3750 – Evelien BROERE, Nederland – The ever-increasing amount of EMF is threatening and devastating for humans, animals, and nature, and too little attention is being paid to this problem. Think also of the enormous energy- and water-intensive data centers, wind turbines and the role of AI in this, satellites, etc.

3751 – Beatrice CASPARI – I am electronically sensitive, recognize the health emergency that wireless technology is creating and want to help create more safety in this world.

3752 – MD, Belgium – I have been electrosensitive for a very long time and have firsthand experience of the harmful effects of being in an electromagnetic environment, but also of the healing experience when one withdraws to a place where there is little or no radiation. If one remains in an electromagnetic environment that affects us without responding to our body's cries for help, our health can deteriorate very rapidly without any limit. The further the illness progresses, the more difficult it is to recover, and it is therefore important to know that it can also be fatal if one has gone too far without intervening because the electrosensitivity has then become extreme.

3753 – C. Le François, France – Display my name, surname and country message: People around me are suffering from artificial electromagnetic fields.

3754 – Noémie PRIVAT, France – We are all concerned, this problem is major, and very little known.

3755 – Hélène NOYER, France – Radiation invades and harms us.

3756 – FC, France – I have been Electro-Sensitive since December 2024 (when I turned on my new router (Livebox 5). My life has come to a complete standstill since that day.

3757 – FV, France – A close relative is affected by this disease.

3758 – Julie Foulard, France – I know someone who is affected.

3759 – Mirella CAPELLI, Italy – They're making us all sick just for their own economic interests.

3760 – Nicolas SIMON, France – I have been suffering from EHS since a 5G antenna was installed in line with my home, I am living in hell in my head and body, it's a horror!

3761 – Yolett JAROBA, France – :.....Because there are people who are very sick because of EMF radiation.

3762 – Frédérique GARCIA, France – EHS.

3763 – Marie-Françoise BILLAUD, France – I am EHS, I can no longer go out and have been living confined at home with protective equipment since 2018.

3764 – Marie-Madeleine DIVAY, France – I am against these infrastructures.

3765 – BC, France –: This pollution must be denounced and fought because it harms the health of living beings. Electro-hypersensitive people are no longer truly living; they are merely trying to survive in real pain. This is harmful even for people who have not yet felt the effects.

3766 – Odile FRANCHET, France – I was EHS.

3767 – WT, England – It's very wrong, this EMF is harming people, animals, plants, and trees everywhere; it needs to stop.

3768 – MC, UK – Personal experience.

3769 – Brigitte BECAVIN, France – It is more than time to act!

3770 – SB, France – I live with someone who is electrosensitive and I myself am increasingly feeling radiation, albeit more lightly, during excessive exposure in the city or in very exposed places.

3771 – A. H, France – May help.

3772 – JK, New Zealand – It is ruining health in all countries.

3773 – Kathy BATES, USA – I was injured in an acute event when I touched a cell phone screen. I've now been isolated from the world for 8+ years. I haven't left the property in 18 months because Arkansas covered 95% of the state with EMR by PBS transmitters. An action that got Vatican Radio sued and ordered to pay by the Supreme Court of Italy in 2011 for the 41 people who died of leukemia who lived within 6 miles. We live 15.6 miles and I woke up with the house spinning violently. I haven't been able to leave the house w/o feeling sick since this happened. Deadly electric meters FORCED on us here that were BANNED in two countries at the federal level by the Austrian Chamber of Physicians and the Swiss Physicians for the Environment for fear they are deadly with immediate and cumulative effects. » 3 dead women and deadly readings found all over town/service area. I've written to everyone in the state...(...)

3774 – MG, USA

3775 – Anne HUDDLESTON, USA – We as humans deserve to be protected from the harm and danger of EMFs. They are destructive and harmful to human, animal, and plant life.

3776 – LJ, USA – I have a medical statement of disability from a physician. It is most urgent that our governments act quickly to provide a safe haven from wireless technologies while they work to find permanent solutions. Please put a halt to further rollouts.

3777 – LC, France – My father is EHS.

3778 – Dominique VERRIER COMPAIN, France – Because it is unacceptable to do nothing for people who are electro-hypersensitive, and because we also know scientifically the consequences on living beings!

3779 – Monique PLAISIER, Australia – I have suffered debilitating, incapacitating symptoms since 2019, since overexposure and new dental work. But never when at some distance from technology. I also continue to suffer from the disbelief, denial, ridiculing and dismissal by others, and the damage to all relationships and social life. Changing dental work 7 times has

always changed how bad my tinnitus is. A bridge was removed and a large zoom on that side of my head was gone. White composite fillings were reduced in thickness and brand and it made the tinnitus more bearable. Turns out all white composite now has added metallic-magnetic particles like Barium and Silane to make it easily distinguishable on xrays. All technology uses magnets of varying strength to function and connect all the time, and I think it accidentally connects with our dental work, which amplifies that the radiation near our brain and cochlea, and causes damage. Including a proportion of the 749,000,000 mostly unexplained cases of tinnitus in the world. Tinnitus is also linked to alzheimers. My tinnitus fees like it is damaging my brain. I am still suffering but it is better then incapacitating and I can work and sleep reasonably well now. Hopefully when I get rid of all dental work I will have no more zooming in my head. We are just the first to feel the damage, others will increasingly follow. Please listen to the overwhelming scientific evidence and personal stories that all this radiation is not actually healthy and is harming us already. Help us, save us, save our children as well as our grandchildren. EHS is a humanitarian emergency.

3780 – JC, UK

3781 – Florence LEMONNER, France – For the recognition of EHS, financial and medical support for victims until the end of their lives, funding and advancement of EHS research, the development of safe zones...

3782 – Romain KOENIG, France

3783 – JE, UK – I am extremely disabled by the severe reactions of my body to the continuous assaults of all kinds of electromagnetic radiation and fields. I never consented to them. Everyone, but especially children and their carers, is entitled to true and relevant information about the harmful health effects of the communication technologies that have been imposed upon us, instead of the denial and deception of the greedy.

3784 – GA, France – Soutine to a friend.

3785 – Marleen VAN MELLE, Portugal – I can no longer live in my home country, even a month's vacation is too much. The tinnitus gets significantly worse if I am exposed to EMF for a long time. I would like the standards that applied in the early days, 6 minutes per day, to be respected again.

3786 – JC, France – I am EHS.

3787 – TB, USA – I have Havana Syndrome and have suffered significant non-kinetic brain injuries for years, causing me to lose all quality of life and everything I ever worked for.

3788 – PP, France – A person close to me is affected by EHS and their life is completely turned upside down.

3789 – Claudine VAN MEENSEL, Belgium – My beloved son is highly electrosensitive.

3790 – BW, USA – I suffer horrible chest pain and crippling insomnia from close proximity to Wi-Fi routers/hotspots, towers, and Bluetooth. I can no longer live in most places. In fact, I'm still living in my car because I can't find a room to rent where my noise meter doesn't nearly explode. A living nightmare.

3791 – FV, Belgium – I know people who are electrohypersensitive.

3792 – BL, Belgium – I am the father of a severely affected child (an adult, but affected for over 10 years) whose multiple pains related to this EHS situation are a real health problem due to this exponential wave radiation...

3793 – Emmanuel VELSCH, France – People in my circle are affected.

3794 – Bernard LEROY, Belgium – We know people suffering from these real nuisances, which have been recognized for ages by scientific studies, but nobody cares until the day when all this becomes totally irreversible...how to raise awareness and who will try to turn things around?

3795 – EF, Germany – For 30 years I have reacted strongly to high-frequency radiation and, due to the new heating laws and the obligation to use heating measuring devices, I can no longer stay in my apartment, which is otherwise protected.

3796 – OL, France – This concerns me and my loved ones.

3797 – PD, France

3798 – SF, Germany

3799 – Francine GAREL, France

3800 – Jurgen HERICKS, Germany

3801 – ML, France

3802 – Ursula MONZEN, Germany

3803 – EM, Belgium – For several years, I have discovered that I am very sensitive to high-frequency radiation from cell phone towers, Wi-Fi, DECT phones, etc.—in short, wireless communications. This has affected my life to such an extent that I can no longer participate in all the usual and necessary activities in our society (library, administrative services, sports, etc.). Wherever there is radiation, I pay for it afterward with very bothersome physical ailments. I am therefore drawing attention to this problem so that it is taken into account. After exposure and a stay in a «safe» environment, the ailments slowly disappear, and it is possible to live «normally» again. But the problem remains the same: where can I find a safe «white zone»? That is why I am asking that more wired applications be made possible and encouraged.

3804 – HS, Switzerland – I am severely disabled by electric, cellphone, and radar radiation, so I cannot work.

3805 – CS, France – I sign this appeal because I suffer from electromagnetic hypersensitivity (EHS) and want to protect natural life on our beautiful planet. Artificial electromagnetic radiation is destructive to this life form.

3806 – MK, Sweden – I am severely affected by numerous symptoms of radiation from Wi-Fi, the 5G mast, the cell tower, and the electricity meter. I have to move to survive. Many people are in the same situation as me. The authorities deny that we can have symptoms, even though there is NO research on this. The authorities we should trust do not exist. It is not possible

to inform the Radiation Protection Organization. Doctors are not allowed to inform or decide on the pain and suffering of patients due to radiation. The government is responsible. The telecommunications companies are responsible. This is the Swedish democratic way of dealing with the people's right to protection from dangerous environmental pollution that can harm the Swedish people. This is a violation of human rights. ADHD. Autism in children is increasing dramatically, ADHD cancer in adults. Social welfare goes to telecommunications companies. Landlords make money from antennas on rooftops, without They don't care about their tenants. «Move out,» said the landlord. «Sweden isn't democratic; greed and misinformation thrive here.»

3807 – Thierry LAURENT, France – We have no choice, we have to take them down.

3808 – SV, France – I know someone who is affected.

3809 – Cristina SPADA, Italy – For the health of future generations.

3810 – DS, Italy – HSEM patients need protection of their health and the right to an inclusive life.

3811 – VS, Italy – My wife being electrosensitive, I became aware of the problem. I would like to support this appeal.

3812 – PB, Italy – I am suffering from EHS due to excessive electromagnetic fields at work. I feel very unwell as soon as I touch the telephone.

3813 – AB, France

3814 – RR, Belgium – I sign because I am myself electro-sensitive and I cannot stand seeing all these 4, 5, 6G antennas everywhere, including in my own home in Belgium (...)

3815 – CL, France, Martinique

3816 – Yves DEBIEVE, France

3817 – AD, France

3818 – MV, Italy – I am not EHS but I know I could become so because I know the harmful effects.

3819 – Elisabeth BUCHS, Switzerland

3820 – MC, France – I request that serious studies be conducted on the dangers of all types of electromagnetic radiation (wind turbines, 5G antennas, photovoltaic panels, mobile phones, etc.) and that measures be taken to protect the population and all living beings from any health risks...

3821 – Cinzia DI BARI, Italy – The biologic process based on life is based on electrical reactions, over-the-counter chemical reactions are passed through materials and electronics, with the formation of electromagnetic fields. Heart and brain are powered by electricity: electromagnetic exposure does not modify the physics in temporary and/or permanent mode. Nervous system and automatic sensor switch, its operation, electronic and/or photo switching. The endocrine system generates electromagnetic stimulation that regulates the frequency. Gli esseri vii e sistono grazie la risonanza de Schumann e risentono delle su oscillation: introdurre ulteriori EMC artificiali causes interference on natural radiation. Study epidemiology if possible only a posteriori and it seems that there is a campaign of acquisition of data abbia coinvolto, ad esempio, i medici di base. Invok the principle of mass safety.

3822 – Laurence WUIDAR, Belgium – Migraines as soon as I am in the presence of a modem emitting wi-fi, not to mention the proximity of an antenna: at any moment the home is threatened.

3823 – Aksana KLIMAVETS, Italy – More and more people will suffer.

3824 – Ginna ANDERSEN, Germany – For the past eight years, I have suffered from high-level ME/CFS, both in terms of FN and FH. As a result, I have no job, no home, no money, and very few social contacts. I can't find a way out of this situation because I am too disabled; but there are also no medical or social services to support me. I so desperately need housing in a protected area so I can finally have some semblance of a life! In such a protected place, we, the affected individuals, could network and support each other to survive in this world.

3825 – Jamie THOMAS, USA – (...)

3826 – Clara Lidia SETTIMO, Italy – I am electrosensitive and I fear I will have nowhere to survive in the future.

3827 – DR, Italy – This is important.

3828 – VM, Italy – Protect the rights and health of human beings.

3829 – Isabel AGUDO, Spain

3830 – TD, Belgium

3831 – LK, France – I am electrosensitive.

3832 – Nicola AGOSTI, Italy – The current EMF values and the senseless proliferation of antennas are a CRIME against HUMANITY!

3833 – GB, France – I sign because my wife and I are against these 5G pylons which are ruining the lives of all living beings on earth.

3834 – Fiona KELLAGHAN, Italy – I would like electrosmog to be stopped!!

3835 – MP, France – I am convinced of the devastating effects of EMFs on humans, fauna and flora and that it is urgent that European regulations take into account and recognize the effects of EMFs on our health and make the necessary decisions;

3836 – LM, Italy – I am in favor of electrosensitives.

3837 – MD, France – Electromagnetic radiation is a great danger to humanity and animals.

3738 – AC, Italy – I think the dangers of artificial electromagnetic fields are very worrying.

3839 – EW, France – I myself launched a petition for white zones.

3840 – SW, France è In order to be able to live.

3841 – ND, France – I was diagnosed as highly electrosensitive

by Professor Belpomme (in 2017). And I am still very affected.

3842 – CR, Belgium – Must we wait for another pandemic? Those who claim to be insensitive, do you think you're so because you feel nothing, you have no pain, your body doesn't suffer? Look beyond your wallet.

3843 – BP, France – The suffering of people with EHD must be taken into account.

3844 – DH, Belgium – Emergency.

3845 – SB, France – I feel very tired.

3846 – Cristina ACQUISTUCCI, Italy – I too suffer from electromagnetic sensitivity.

3847 – JG, France

3848 – PG, Italy

3849 – JO, France – I am EHS medically recognized.

3850 – Virginie VERDOU, France – I am concerned and things need to change!

3851 – Esteban PILLOT, France – My mother is electro-hypersensitive

3852 – Susana AGUADO, Spain – I suffer a lot.

3853 – CB, Belgium

3854 – Raf VERBEKE, Belgium – Support

3855 – PC, France – I am electro-hypersensitive so completely concerned.

3856 – Petrea BRIKKEN, USA – I too have suffered with this issue. Many more do and have no idea. It is harming the entire world, not to mention heating the planet and wasting energy. The science is clear and has been for many years .

3857 – CB, Belgium

3858 – Sharon Ross, USA – I am electro-hypersensitive, and the people I live with refuse to comply with my needs and will not remove the smart meter from my home. I react badly to a certain area in my home, and I cannot spend time there. They simply don't believe me, even after I received a letter from my doctor .

3859 – Damian May, UK – I have suffered from electrosensitivity for the last 20 years. Things need to change for our future generations to survive and thrive.

3860 – Juan TOMAS, Switzerland – From the very first moment I came into contact with this stone, my life was never the same again. Until that fateful day in December 2018, my health had been impeccable. Apart from the occasional cold or ear infection, I had never had any health problems. My life had revolved around my work, my true passion. For 35 years, I had built my career around my profession, enjoying the process of bringing major projects to life, seeing them materialize, and finally placing them in the hands of a satisfied client. In Switzerland, language was always my biggest barrier. My French was poor, and as the years went by, it became increasingly difficult. Everything came down to taking a simple French class. A sudden ringing in my left ear interrupted my concentration. "Someone must be talking about me," I thought, remembering an old Andalusian saying. But the sound did not go away. It persisted—constant, relentless, unbreakable. I quickly began visiting doctors, acupuncturists, ENT specialists... I was looking for answers, but all I found were more questions. I took classes, adopted a healthier diet, and tried alternative therapies. Nothing worked. Even so, I tried to normalize the tinnitus and carry on with my life. Then came 2022, and with it, new symptoms. First came sleeping problems. Then came mood changes, sleep paralysis, and memory loss. I eventually left my stable job in search of something closer to home, because the fatigue had become unbearable. I started sweating more frequently and profusely, without any apparent reason. An operation at work no longer went as smoothly as it should, and I began making mistakes that I had never made before. In 2023, despite having a comfortable job, the situation worsened. The headaches intensified, and my sleep became increasingly fragmented. A new sound joined the tinnitus: interference resembling the signals of an old radio or a bus transmission. The answer would eventually come to me. Everyone insisted that I was healthy, that I was simply suffering from depression. But I knew one thing: it wasn't depression. It was despair.

3861 – Annarosa CESARETTI, Italy – I know the devastating effects of electromagnetic fields from personal experience. I have been fighting for protection for years.

3862 – Magali SILVESTRE, Belgium – This is a very important health issue that concerns us all!

3863 – Shunya SCHIRMAIER, Colombia – This concerns my friend and the others, as well as myself!

3864 – MT, Canada – I am sensitive to electromagnetic radiation.

3865 – Véronique VANDEVEN, Belgium

3866 – AC, France – I know people in this situation and have myself suffered from an extremely polluted environment in the Paris region. I was fortunate enough to regain my health in a wooded area in the countryside. It is time to open our eyes to these intolerable situations and to take into account the real suffering and risks to human health, as well as the inability of these people to exercise their rights (access to healthcare, housing, etc.).

3867 – EC, Spain – I have been electrosensitive for almost 7 years in a very acute form, living in isolation. From my experience and my pain in this process, I want to do my part to help raise awareness of our illnesses and for humanity and the elites to become aware of them.

3868 – Antony EKE, UK – I have been suffering from the ill effects of something for years...and recently i cant be in my own house anymore as it makes me sick. I get a massive pounding headache...my heart papitates as if im in fear/adreanal stimulation. My body heats up and I feel my legs start to loose power/strength. I hear what sounds like an engine running /pulsing.... but its not a sound!!..its hard to explain it it more of a sort of doom like pulsing!! It sort of goes through my whole body....my

senses pick it up first and my ears feel all wooly and then the headaches come! Im going to try and sheild one good room in my home completely, by lining the walls with a metal layer and using metal fine mesh screens over the windows....I hope to the creator this allows me to be in my own home ...and at least to maybe relax again...or get some sleep without being cooked by this thing! I currently sleep far away from the tower in my van...but I fear that they are putting them everywhere to create a hideous grid!! This needs to stop!! All internet needs to be redesigned to be just cables or something! I fear its too late though...there is massive ignorance and denial about this. People are so addicted to their internet and mobile devices! Over the next decades millions will die and suffer from the effects of this, and it will go undiagnosed because there have not been...or the results have not been publicized and made common knowledge! All these people are idiots who can feel and suffer...they are sensitive, intelligent human animals... Who knows what this stuff to wildlife...I guess at least the birds can fly to areas where its effects are lessened. Thank you for your understanding.

3869 – ER, France – Having some knowledge of biology, I know that electromagnetic fields have an impact, among other things, on cellular exchanges, which can be disrupted, and therefore on homeostasis. I am also aware of the cocktail effect, or synergy effect, which can be both positive and negative! We belong to a complex world where multiple factors combine, so much so that we cannot control the results! (See Edgar Morin's rules for thinking and acting in complexity.) Making short-term decisions is a disaster for life.

3870 – Ivanne de PRAT, France – I have EHS (Electromagnetic Hypersensitivity). I have difficulty being in social situations. I am a mother of six children: I think about their future and their health. I am also an electrobiologist: and I see more and more people in poor health and desperate because they find no one to listen to their suffering. Finding suitable solutions and giving them hope has become my calling!

3871 – Joanne HERDER, Netherlands – Strong EMF protection! We see you live and see all the flora and fauna, and the planet and the universe!!!! (Because it must be disclosed in the name of public health.)

3872 – Colette BEIQUE, Canada – I am living in hell on earth.

3873 – TW, Nederland – Because this must be revealed in the name of public health.

3874 – Maria LOURDES, Spain – I am a person who suffers from EHS and I have been asking for help from all the health institutions in Spain for more than two years. I am very sick and I only receive psychological and physical abuse, psychiatric treatment, polymedicating, and being mocked! We demand help now!!! White zones in Spain now!!!

3875 – DL, UK – I am electrosensitive and suffering. I know other people who are the same. This has to stop.

3876 – AR, France – I have been electrosensitive since 2020. My nervous system is affected. Tingling throughout my body, chronic fatigue... 4G/5G, Bluetooth, and Wi-Fi should be avoided. We are all targets; those who don't report it don't make the connection with electromagnetic radiation.

3877 -Ralf ZEHLE, Germany – Through my last contact with a person affected by this, I've come to realize all too clearly just how profoundly people's lives and the consequences of their illnesses are shaped by the omnipresent high-frequency radiation. There's no way to escape this unless you're wealthy enough to buy a remote island in the Pacific... This situation is unacceptable; those affected must be able to live and sleep in their familiar surroundings without suffering severe health consequences!

3878 – BC, France – Electromagnetic radiation is harming our world. Personally, I have tinnitus, and I think it comes from this... We must stop destroying our planet with antennas, stop destroying animals with this EMF radiation, stop ravaging our brains with it. These people deserve to live and be happy, so let's act!

3879 – Laura MARINE, France – Hello, I myself have been a victim of electromagnetic radiation due to the new Orange Livebox router, which has attacked my central nervous system. An Orange employee explained to me that he had to leave the company because he developed tachycardia due to electromagnetic radiation, and he confirmed that Wi-Fi attacks the central nervous system! STOP THE ELECTROMAGNETIC Radiation THAT IS KILLING LIFE ON EARTH!

3880 – CB, France – I've lived opposite a cell tower for 20 years, I'm getting increasingly tired, and probably suffering from electromagnetic hypersensitivity! Let's limit all these wireless technologies!

2881 – SN, New Zealand – It's a moral and ethical problem that affects humans, animals, birds and bees alike.

3882 – FF, Spain

3883 – PP, Belgium – Technological advances must take into account all parameters and never harm health, which is a human right.

3884 – CV, Belgium – I have EHS and I'm always sick, I have nowhere to go and I don't want my children, family, friends and others to have to endure this unbearable situation.

3885 – GS, Belgium – So that my daughter and I can soon get better.

3886 – Sandy LANE, Belgium – I am myself sensitive to radiation.

3887 – AF, France – I am fully concerned because I have been suffering from EHS due to symptoms for over 7 years.

3888 – AF, France – Radiation hurts me.

3889 – SG, Belgium – This is important and too little known.

3890 – Anne GRUCHET, France – We, attacked from all sides, must stop the carnage!!!

3891 – SS, Belgium – It is urgent to protect man and our beautiful nature from these electromagnetic pollutions which continue to increase.

3892 – Iail MacGILLIVRAY, Canada – This is a humanitarian emergency and action is required immediately.

3893 – AV, Belgium – I am electrosensitive.

3894 – PC, France – I understood a long time ago that it was harmful to the population, environment, plants and animals.

3895 – CR, France – Because it's more than important, it's vital for everyone

3896 – Olivier BONFOND, Belgium – It is fundamental to take care of Electro-HyperSensitive people.

3897 – AR, France – :On Earth everyone needs to be able to find their place. We need a moratorium and in-depth studies without conflicts of interest on the toxicity of electromagnetic raiation.

3898 – Virginie FOUET, France

3899 – Benjamin MOULUSSON, France

3900 – Marja TON, Netherlands – I personally suffer greatly from electromagnetic radiation, which prevents me from going anywhere. Especially when I go to shopping centers, I feel faint.

3901- Karin WAGENAAR, Nederland – I identify with everything written under EHS above and the requirements described are my greatest desire in this life.

3902 – MM, Nederland – Because the dangers and physical disturbances of electromagnetic radiation are severely underestimated and should finally be taken seriously. The dangers and physical complaints related to electromagnetic radiation are severely underestimated and should finally be taken seriously. Decent and independent research is needed, as well as recognition of the damage caused by EHS.

3903 – CH, Nederland – I myself am electrosensitive and I feel the urgency directly.

3904 – NM, Netherlands – have more and more complaints to make.

3905 – MD, Belgium – I sign to support my mom and all others suffering from EHS. I witness her physical and mental struggles every day. I wish her relief in every way possible.

3907 – Billy Bénédicte, France

3908 – Demove Fabienne, France

3909 – Demove Marion, France

3910 – Tiavo Dominique, France

3911 – Maud Lievre, France

3912 – Vaury Tony, France

3913 – Randgree AM, France

3914 – Deniret, France

3915 – Maisonneuve, France

3916 – Chalard, France

3917 – Casapo, France

3918 – Fossier Sandrine, France

3919 – Ducat Paricia, France

3920 – Fayet Christine, France

3921 – Anduret Isabelle, France

3922 – Paulat Lucie, France

3923 – Ciezk Isabelle, France

3924 – Buzzi Catherine, France

3925 – Fabienne Chevaleyre, France

3926 – Dacheux Luc, France

3927 – Peronne Maïalen, France

3928 – LW, Netherlands – It is harmful to humans and nature!

3929 – GT, Belgium – A friend has a severe form of EHS.

3930 – Milou VAN ROOJI – DE VRIES – EHS is an important issue for the well-being of my family members and others.

3931 – AW, Sweden – I am affected myself and have been forced not to go to cities or regions where there is radiation.

3932 – S; F., Sweden – I have been sick since the new electricity meter was installed in the entrance hall 3m from my room! And 5g 40m from my apartment! It's insulting to be forced to do this despite refusal!

3933 – Saskia VAN ORLY, Nederland – I find it quite disturbing how we are being blown to pieces!

3934 – Frédéric ANDRE, France

3935 – Luc MUKENDI, DRC – I sign the Appeal

3936 – ER, Nederland – I hope to raise awareness about the health impact of all the technologies around us. We only realize the impact they can have on our health when we are victims of them. You get sick and then have to prove it because no one believes you. This has to change!

3937 – KV, Netherlands – I have suffered from health problems related to wireless technology for years.

3938 – JS, Switzerland – For better consideration of health problems.

3939 – PM, Netherlands – I am EHS and demand greater awareness of the negative effects of EMF. The Netherlands is lagging behind.

3940 – Han RENTING, Netherlands – It is high time to draw everyone's attention to this subject!

3941 – BD, Nederland – Myself, and our daughter.

3942 – VP, Sweden – I am hypersensitive to electricity.

3943 – Maria-Luisa CICCARELLI, Belgium – I think it's important.

3944 – TV, France – EHS.

3945 – MS, Belgium – Microwave illness due to a mobile phone tower four doors down the road. I received a subpoena to be forced to have smart meters installed.

3946 – ID, Belgium – I have a friend who suffers from electromagnetic hypersensitivity and I see firsthand how difficult it is for her to function in this society, both professionally and socially, especially when it comes to housing. I hope that solutions can be found for these people, or indeed for everyone. After all, we are all exposed to radiation. Good luck!

3947 – c ; l ;, France – I am EHS.

3948 – Monica VDF DEL VALLE SANTIN, Nerdeland – I myself became totally disabled due to EHS [occupational illness].

3949 – MA, France – My wife and I are electrohypersensitive.

3950 – Arie SPAAN, Netherlands – I sign because many people (most) have no idea how debilitating this condition is and how it affects all living things. We need to find a way to deal with the industries and governments that continue to facilitate this.

3951 – GA, France – Being EHS, I wish to limit electromagnetic radiation because it is a very uncomfortable situation.

3952 – MM, France – I sign because I know EHS people in my circle.

3953 – JJ, Argentina – I was 4 years old when I was electrosensitive. To do so after I had a surgical intervention in which I was affected by a metallic aleación more precisely of titanium than the principle because it was never more than algo pasajero pero con el tiempo investigando Notado que el titanio es conductor y hoy se por testimonio de otras personas que a esto se le llama electroenividad independientemente de que tenga o no tenga conexión y que me sienta por momentos mejor esto es a realidad hay electromagnetismo en todo el mundo y aquí en Argentina también.

3954 – DH, Belgium – I am affected by EMP. I am also very concerned about the obvious health issues it brings along.

3955 – SM, France – I am electrosensitive.

3956 – Claudie WAHLER, France – Because I suffer from EHS (electromagnetic hypersensitivity) and with the «Linky» smart meter and all electromagnetic radiation, I have many symptoms and I can't take it anymore... Help! It's high time to act...

3957 – Daniel DonNelly, UK – To make people aware of this environmental impairment disability.

3958 – JB, France – «Linky» smart meter installed during my absence and without my authorization. Since then, I've had constant tinnitus and disturbed sleep. I'm 71 years old and find all this surrounding electromagnetic radiation very difficult to tolerate.

3959 – RD, Belgium – I am a hypersensitive and electrosensitive person.

3960 – Bruce Evans, Australia – EHS has made me a refugee in my own country and has left me isolated and unable to function normally. It has affected every area of my life.

3961 – RN, Belgium – Stop the deployment of 5G and its radiation.

3962 – CR, France – I am EHS.

3963 – Janet MENAGE, UK – I am aware of many people, young and old, who are unable to continue in employment because the workplace, e.g., schools, universities, and hospitals, is saturated with Wi-Fi and mobile phone radiation, which makes them ill.

3964 – VP, USA – I have been trying to tell anyone who would listen about the dangers we all face with this technology for over 10 years. No one cares. I would be sohappy if there were an awakening in the general public to this danger.

3965 – MB, Switzerland – I suffer from radiation.

3966 – Ludovic GOUESBET, France – I have suffered from EHS (Electromagnetic Hypersensitivity) since the summer of 2017, made ill by the «Linky» smart meter installed in my home. It eventually rendered my house uninhabitable. I finally got Enedis to remove the meter after three years of requests. The condition they demanded was my silence! Enedis KNOWS that the «Linky» smart meter is a major disruptor of the health and sleep of the French!

3967 – Muriel LEROY, France

3968 – Olivier BONJOUR-DECHAVEAU, Belgium – I know people in the situation and I find their demands fundamental.

3969 – Françoise DEFOE, France – Because we are all potentially victims of ehs.

3970 – SD, Ireland

3971 – NS, Ireland – I'm interested in this subject. I wear a regular watch.

3972 – CR, UK

3973 – Lisa Lovelady, USA – We are all suffering from the effects of RFR and this will only continue if we do not reject this outgrowth of radiation. I care about all of those who are suffering.

3974 – MR, Germany

3975 – Heinz RADDEN, Germany

3976 – KF, Germany

3977 – ME, France

3978 – Françoise RICHON, France – There's a code of silence surrounding the suffering caused by electromagnetic fields; we need electromagnetic-free zones! People need to turn off their cell phones on public transport; it's worse than smoking!

3979 – Maryvonne ARDOUIN, France – I stand in solidarity with all those who are victims, I am myself concerned, even if I am in a bearable way, for the moment.

3980 – BF, Canada – I am electrosensitive.

3981 – Sylvie NAWASADIO, Belgium – It is important to do it.

3982 – CB, France – A very close relative of mine is undoubtedly hypersensitive to electromagnetic fields. (...)

3983 – Reza GANJAVI, World – Important cause.

3984 – Anne CLAEYS, France – I sign this appeal to give a voice to all those who are suffering from the general indifference of public authorities and citizens alike, in the face of the distress

of no longer being able to live amidst this proliferation of artificial electromagnetic radiation. They are whistleblowers despite themselves!

3985 – MD, France – To defend people sensitive to electromagnetic radiation.

3986 – Marie-Jose TONNAER, Australia – These frequencies are having a detrimental impact on the health of humans, animals, and our environment. I do not consent to this toxic radiation.

3987 – Thierry VERNE, France – EHS for a long time, partly relocated.

3988 – Caroline VIGNERON, France – I sign because it is a matter of public health.

3989 – AA, Belgium – I have friends who are suffering. I am starting to feel the negative effects myself.

3990 – SC, France – Because action must be taken!

3991 – Richard GODELIEVE, Switzerland / USA - I suffered severely from electromagnetic pollution for 15 years. The situation is very serious: I know many people suffering who don't know where to live; the pollution is everywhere.

3992 – PD, France – We are not EHS but made EHS by acute aggression or by cumulative doses to pulsed multiplexed digital radiation which creates electrical inductions and sequestrations of ions preventing their freedom to participate in the concentration balances of our biochemical processes, thus destroying our homeostasis with the agreement of the State infiltrated by the system (...) of mobile telephony.

3993 – Muriel ALLAERT, France – See the video testimony "Juliette".

3994 – Moyra BLACKIE, UK – I have been suffering with hypersensitivity for about 10 years now. All nerve endings are extremely sensitive.

3995 – Sarah AUDOIN, France – Because she is a victim of electromagnetic harassment...

3996 – Hans-Werner KIOSZE, Germany – Local authorities ignore the problem.

3997 – RP, Germany – I am electrosensitive, so I have many health problems, I cannot work, I live most of the time in a caravan in a radio hole. I am therefore excluded from a normal life, from social contact, etc., and I suffer from symptoms such as pressure and pain in the head, exhaustion, cardiovascular problems, hypertension, cognitive impairment, tinnitus, etc., which decrease significantly after a few days in the radio hole. This permanent situation is extremely trying!

3998 – Wolfgang SCHÜTZE, Germany – I want to stand in solidarity with those affected.

3999 – Marie-Christine HARY, France – Everything is becoming digital and goes through mobile phones. But turning one on triggers migraines for me. I can't take public transport because everyone has a mobile phone on... Etc. etc. etc.

4000 – CD, Germany – Even the WHO classifies electromagnetic radiation as carcinogenic. Hundreds of studies can also be found at www.DiagnoseFunk. It is harmful to everyone, not just to electrosensitive people. They simply experience it more intensely. It is a criminal crime against all humanity

4001 – MP, France – I am electrosensitive.

4002 – JA, France

4003 – Karine EDEL, France – I am electrosensitive and, like everyone else, I have to fight to try to survive. Many people are unaware of the seriousness of electromagnetic radiation. Thank you.

4004 – Valérie de Fosseux, France – I know many EHS sufferers who are living in hell.

4005 – FP, France

4006 – Chantal LEVEQUE, France – A friend is affected.

4007 – M/ J., Denmark – Family with EHS.

4008 – MM, France – I am also EHS.

4009 – Bruno RYPKO, France – Laws are needed to regulate the spread of electromagnetic radiation that is dangerous to humans and ecosystems!

4010 – LD, France – I am also electrosensitive.

4011 – Laura MARTINAZZI Italy – I am electrosensitive.

4012 – TL, France – A member of my family is affected by this problem.

4013 – GC, Italy – I suffer from electromagnetism.

4014 – DD, Italy – I am electrosensitive. Let's stop this environmental catastrophe. Let's recognize electrosensitivity and its harms. Let's protect our children!!!

4015 – Laarry CAMPBELL, USA – My wife became disabled due to EHS in 2010 after working in a call center with over 140 computers.

4016 – Reginald DE PODESTA DE WALEFFE, Belgium –: We don't need 5G except for unavowed and intrusive purposes

4017 – Françoise BOLLE, Belgium – I believe this is an infringement of a fundamental right, here the integrity of persons, and more broadly of the environment.

4018 – Tamara GEERTS, Belgium – People's health and well-being is paramount and a priority. I'm fed up with lobbyists and money taking precedence over this fundamental principle of health and well-being.

4019 – CW, Belgium

4020 – Gabrielle LEFEVRE, Belgium – I know someone who is hypersensitive.

4021 – SS, Switzerland –

4022 – NL, France – I am EHS.

4023 – Anna-Maria FRUSCIANTE, Switzerland – Electro-hypersensitive since childhood, my life took a painful turn with the advent of 4G, and even worse with the arrival of 5G. I fear for

our youth and for my future with the anticipated arrival of 6G and beyond...

4024 – DC, Belgium – In support of my electrosensitive friends, out of solidarity and empathy.

4025 – NB, France – This is a coming health scandal.

4026 – Violette PALLARO, Belgium – I support people suffering from EHS.

4027 – VB, Belgium – I know people who are suffering.

4028 – MV, France – I sign because I'm fed up with all this electromagnetic radiation that are destroying us and making us sick. If you could intervene, that would be great!!!!

4029 – DC, Belgium – In support of my electrosensitive friends, out of solidarity and empathy.

4030 – Dan VAUTRIN, France – Yes to the precautionary principle, to transparency in all projects affecting health, yes to independent studies. Let's think of our children.

4031 – CS, Belgium – :Every person has the right to have a living space that does not cause them suffering.

4032 – Vincent PATAR, Belgium – We are being forced to endure all this electromagnetic radiation (5G networks everywhere) without any concern for the real needs of the population!

4033 – JV, Belgium – I want a zone to exist for people who have no choice and are suffering.

4034 – YH, Belgium – A friend is suffering from this pollution.

4035 – TI, Belgium – Supporters.

4036 – AC, Belgium – Electromagnetic radiation make me anxious on a daily basis and it becomes unbearable without medication.

4037 – AN, Belgium – I have a friend affected by this problem who lives somewhat reclusively because of electromagnetic radiation. I also find it harmful.

4038 – Paula HIRSCH, Belgium – The survival of humanity is a matter of involvement and solidarity. Without solidarity, we are at the mercy of a multitude of threats. If we think that what happens to others will spare us, it means we are incapable of learning from the lessons of history. To be indifferent to the fate of others is to ensure that there is no one left to fight alongside us when we are no longer fighting. No 5G.

4040 – JH, Belgium – My daughter is a victim of this EHS syndrome.

4041 – Lisa E FIGAREDO, USA – Like many others, I am very sensitive to EMF.

4042 – Axel PLEECK, Belgium – I stand in solidarity.

4043 – Françoise GRENIER, France – I sign because it is high time that we made our voices heard in force to make ourselves recognized; the health of our youngest is at stake, who are not informed of the dangers and who have even become, I would say, addicted to the systems that are being sold to them.

4044 – Sonia Patricia OSORIO GIRALDO, USA – I am a person severely affected by electromagnetic hypersensitivity and we deserve fair treatment.

4045 – PV, France – I am EHS. I live in Paris with a dozen antennas on the roof of my building and as many around it, not to mention the «Linky» smart meter... I no longer have the means or the energy to find a new place to survive. I am dying slowly, painfully, and in general indifference. Every day I face pain, skepticism, even mockery. I am alone, isolated, without any social life or help whatsoever. It is probably too late for me, but the authorities, whoever they may be, must become aware of the distress of EHS sufferers and do what is necessary to save them.

4046 – LD, Canada – For protection and freedom.

4047 – MB, France – Because I am sensitive and I have a lot of pain.

4048 – SK, Australia – I have severe EHS. My right to exist freely has been taken from me through no fault of my own. I see native trees all around me in severe distress, in addition to so many animals and, of course, human beings. This global, criminal aberration has to stop.

4049 – LC, Belgium – I have been EHS for 20 years.

4050 – Marie-Helene PELE, France – I wish to live in a HEALTHY environment in every respect. Electromagnetic radiation, chemicals, and certain behaviors—because they are unsuitable—always have harmful consequences on our lives, our health, and our well-being... If this stops, we will ALL live better lives.

4051 – NV, Belgium – The harmful effects of electromagnetic radiation is scientifically proven, even if governments refuse to acknowledge them for economic reasons. They impact the entire population, as well as animals and plants, to varying degrees, sometimes very severely. People with electromagnetic hypersensitivity (EHS) lose all social life, and their work is significantly affected.

4052 – CR, France – I am EHS.

4053 – Marie-Noëlle VELAY, France – Solidarity.

4054 – Tom MAHE, France – We need to make ourselves heard calmly first. I would like to propose a simple protocol that would allow all ANFR employees to contact journalists. To share their concerns and name those who are hostile to their honesty, without getting fired.

4055 – Colette WOESTYN, Belgium – People with electromagnetic hypersensitivity (EHS) should be medically recognized and supported; cases are multiplying and the current situation is unbearable for them. Protected living spaces for people with EHS are also needed, and technical installations should perhaps be re-evaluated.

4056 – Martine LUYTEN, Belgium – Numerous cases.

4057 – JC, Belgium – The cause is becoming increasingly important.

4058 – Angle Arbona Mari ANXEL, Spain – I am hypersensitive and I perceive when radiation increases, whether from satellite antennas or Wi-Fi, with headaches, dizziness, and nausea. If

it's at night, I perceive it from noise, and it bothers us at certain times, at rest times, at midday and in the early morning.

4059 – Mechthild TREIS, Germany – I am myself electro-hypersensitive.

4060 – WW, USA – This abuse, constituting crimes against humanity, must STOP. This is not God's teachings. Not the Golden Rule!

4061 – Pilar VILLACORTA GAGO, Spain – I am a woman suffering from the hell of electrohypersensitivity.

4062 – AS, Saudi Arabia

4063 – JP, Belgium – It is essential to take this into account.

4064 – Hartmutt HOFMANN, Germany – Concerned.

4065 – ED, USA – I have extreme pain, electric stabbing, migraine, nausea, vertigo around cellphones and all things SMART. I have been searching for a white zone…but even the Redwood Forests have satellite receivers. I am considering ending my life — I hear communities exist, but I can't find them.

4066 – AG, Belgium – I know someone affected.

4067 – AB, Belgium – Because my stepdaughter is suffering.

4068 – Karen PLUCHART, Belgium – I have a friend who is electrosensitive; her life has been hell, I witnessed it firsthand. When she was able to find a competent doctor in this field and obtain a machine that measures this radiation, she was able to prove to her family the reality of her suffering, which was very real and indeed caused by radiation. They didn't believe her… I welcomed her into my home many times, in tears, so she could have some rest, because I am fortunate enough to live in a secluded area, near a wood, in an environment protected from electromagnetic raiation.

4069 – Sabine WINTERHALTER, Germany

4070 – Geneviève DEROISSART, France

4071 – LD, France – I am EHS- CHIMICO.S, I sign for this scourge of electromagnetic radiation which continues to increase and which harms our well-being and that of fauna and flora.

4072 – Renaud CROLS, Belgium – I agree with everything expressed there.

4073 – RL, Germany

4074 – FG, Belgium – I know some people who are ehs.

4075 – SB, Belgium

4076 – CI, Belgium – We must take into account electrosensitive people in our society.

4077 – SA, France – Suffering from tinnitus and hyperacusis. Life on hold. Limited medical care. I have to manage on my own.

4078 – UB, Germany – I know electrosensitive people and their suffering, I know that they must be helped and that this suffering must be prevented prophylactically for others!

4079 – Katrin ISERHAGEN, Germany – My mother was afflicted, she was ridiculed for years and died because of her weakness and growing intolerances.

4080 – Dörte BACHMANN, Germany – I myself have health problems related to radiation.

4081 – CL, France – Health must take precedence over money.

4082 – JD, France – I know too many people whose lives have become a living hell.

4083 – Sebastian DÖHN, Germany – Absolute emergency!!!

484 – JP, France – I know some EHS.

4285 – GJ, Switzerland – It is scandalous that the multiple consequences of electromagnetic radiation on the health of living beings are still not recognized, for financial reasons, despite the numerous studies that prove it. Electromagnetic hypersensitivity (EHS) must be recognized.

4086 – DM, France – This is a public health problem and it is urgent to stop all these nuisances which are so harmful to health, we are all concerned.

4087 – Caroline REMONAD, France – I am electrohypersensitive, seriously abandoned in this respect by the elected officials who would be most likely to intervene to at least enforce my most basic rights, particularly with regard to Resolution 1815 adopted in 2011 by the European Parliamentary Assembly.

4288 – Sifiane EL ASAD, Belgium – I find it despicable to forget a part of our society because of an unverified scientific experiment solely for the benefit of unscrupulous multinationals. We are being excluded out of selfishness and bourgeois complacency. Shame on us.

4089 – ER, France – The deployment of 5G must be stopped pending a moratorium on the effects of this technology.

4090 – CC, France – I am also sensitive to this type of nuisance.

4091 – C. D., France – When I stay near a Wi-Fi router, «Linky» smart meter, or use my mobile phone for too long: I feel very unwell, anxious, then immediately afterwards: overcome by a wave of tingling, then heavy sweating, dizziness, a feeling of weightlessness…

4092 – Fabien DEHASSLER, Belgium – I have a natural empathy for the victims concerned and I support any approach that can make this world more livable for all.

4093 – Angelo DELLO SPADALE, Belgium – I am sensitive to the suffering of electrohypersensitive people.

4094 – CL Belgium – I know several people who suffer terribly from it.

4095 – MM, Switzerland – this is important to me;

4296 – c; k;? Germany – Because I too want to live without radiation. I know the dangers.

4097 – MD, France – These antennas are not here for our benefit. Other wireless communication technologies exist that are not harmful.

4098 – BB, France – I think we are all concerned by this rather unknown danger; prevention is better than cure.

4099 – PJ, France – I developed EHS (Electromagnetic Hypersensitivity) because of the integrated circuit in my circuit breaker (it contains capacitors that take over as soon as the breaker is switched to the down position, so the main circuit breakers must be switched off). In short, the circuit breaker generated resonant frequencies until I crushed the integrated circuit (it's impossible to dismantle new circuit breakers these days). Eventually, you develop EHS, and the slightest oscillation causes pain...

4100 – MG, Belgium – To support a friend.

4101 – Laurent DOCQUIER, Belgium – This is an abuse in every respect!! It's being imposed!

4102 – Ghisaline SIGUIER, France – I developed electromagnetic hypersensitivity (EHS) following the installation of wind turbines in my village. I have the ability to hear certain waves: infrasound (always have, but the encounter with the wind turbines was a revelation), I hear the radio frequencies that control these machines, and I hear Wi-Fi. Currently, following the installation of a cell tower 1 km from the village, I hear new sounds. These technologies are absolutely invasive; they penetrate everywhere. They have been measured at my home, but the prefect claims they are inaudible. I was only able to get the Wi-Fi turned off, which was undoubtedly the worst thing: headaches so bad I wanted to bang my head against the walls, insomnia, nausea, dizziness (I fell and broke my nose), micro-vibrations throughout my body, constant anger, no way to organize my life, waking up at 1:30 or 3:00 AM followed by exhaustion, weak legs, other electromagnetic radiation is harmful too, no rest for my mind, it's constantly buzzing. No solution: the ENT specialist told me the only option is to move, but you have to be able to afford it! Complaining makes you a target for ridicule! I'm in contact with Virginie D., who has had her second bout of cancer, fighting with exemplary courage, but like all of us, she's looking for housing. I'd also like to take this opportunity to pay tribute to Michèle Rivasi! An exceptional woman. Courage to all, because no one will come to our aid. The French Agency for Food, Environmental and Occupational Health & Safety (ANSES) can't seem to decide to produce a proper study. One wonders why? «So we are doomed by the lure of profit, a short-sighted vision because when there's no one left on the planet except robots, who will have won? I've come to believe (since 2018) that this mistreatment is deliberate; otherwise, nothing could be simpler to stop! If we add to that the measures recommended regarding end-of-life care, euthanasia, and encouraged suicide... yes, encouraged, since it's forbidden to oppose it. What can we conclude? Human life no longer counts.»

4103 – Nicolas PERNET, Switzerland – The situation of exposure to non-ionizing radiation is dangerous for human health and well-being and also for fauna and flora.

4104 – MC, Belgium – I am myself becoming increasingly concerned because of the new antennas and a SAMA and I would like this to be taken seriously by the authorities.

4105 – Nadine SPRANGERS, Belgium – I stand in solidarity!

4106 – FT, Belgium – By support.

4107 – Jacques DHALLUN, France

4108 – m; A., Belgian – It's vital!

4109 – FF, Belgium – I find it intolerable that we are massacring humanity for the benefit of technology.

4110 – France QUENON, Belgium – Every person suffering from this syndrome should be able to live in a healthy environment! Furthermore, 5G is also harmful to birds.

4111 – Fabienne ARBOIT, Italy and Belgium – EHS myself, I pray for an awakening of consciousness, which I hope will come in time. There is still time to save humanity.

4112 – Peppino CAPOTONDI, Belgium – I am sensitive to hypersensitive people, even though I am lucky, at the moment, that everything is going well for me on that side.

4113 – Laura GIRARD, France – I know someone who suffers from this and I sympathize.

4114 – Marie-Laure BERAuD, Belgium – People are suffering, having to leave everything behind for idiots who want to watch movies everywhere and play stupid games. Unthinkable!

4115 – SR, France – When will those who make the decisions consult those who are affected by their decisions?

4116 – Pino LONOBILE – I support and understand the approach of people who suffer from this form of hypersensitivity. And that we are all potential future victims.

4117 – Nicolas GAYRAL, France – I have seen my father die and my mother wither away for almost 20 years because of exposure to artificial electromagnetic radiation.

4118 – Eric JANER, Belgium – People with electromagnetic hypersensitivity (EHS) who know they are affected try to avoid electromagnetic radiation. Those who are unaware of their condition remain 24/7 exposed to the cause of their illnesses and discomfort. As a result, there are many more cancers, autoimmune diseases, etc., among young adults and children. It's clear something is wrong, but we refuse to look in the right direction. I sign so that doctors are informed and can inform their patients, and so that people with EHS who want to remain healthy can live protected from radiation, at home, in doctors' offices, shops, etc.

4119 – IA, Germany – I am affected myself.

4120 – SM, Belgium – Because it's important and there should be more support for people who suffer from this. In our fast-paced society, with radiation and mobile phone antennas, we are exposed to these kinds of frequencies.

4121 – GC, Belgium

4122 – Ruth Diane BROMAN, Belgium – I am personally and jointly concerned.

4123 – Madeleine STANESCU, Switzerland – I am not concerned but your cause is legitimate.

4124 – Anne-Laure LAGAE-KOKKINOS, Belgium – Solidarity.

4125 – Paulo CIRADO, Portugal – Hi. I have been electrosensitive

since I was very young. Since 3G became available everywhere, my health has changed and I have been very ill. I currently live in the city and am surrounded by various antennas. I will now need to relocate to the countryside because I can't feel well. I can't have a job and I can't have a relationship because the radiation affects my body. I hope something will be done because there are many people who will have miserable lives with so much radiation around us.

4126 – Catherine RIVERA, France – I am aware of this issue because of the many people who have health problems related to the increase in radiation and I myself am electrosensitive.

4127 – MH, Belgium – I support this request to help a friend.

4128 – AL, Belgium – This is an important issue, and we must work together to implement measures to create areas free from electromagnetic raiation. Too many people are suffering, misunderstood, and rendered invisible.

4129 – Katia FONTAINE, Belgium – I am very sensitive to noise and I can understand the hell that some of us go through.

4130 – Nathali DELHAYE, Belgium – I know Kristien and I know she's not a pathological liar, and I understand her struggle. She's right.

4131 – AR, Belgium – Friend experiencing this situation.

4132 – Maria Luisa ELGUERO GALLEGO, Spain – I am electrohypersensitive, very sensitive, and they are killing us!

4133 – Sandrine PETIT, France – :We must protect ourselves and protect nature, which is also suffering.

4134 – MR, Belgium – Everyone is EHS to varying degrees. It's akin to a slow death that will eventually lead to humanity's demise, ...

4135 – CL, France – Many people with chronic illnesses are rarely informed by doctors of the possibility of their bodies becoming electrohypersensitive due to significant and constant exposure in their professional environment, their homes, all shops, places of study, leisure, healthcare, and sports facilities (schools, universities, stadiums, hospitals, means of transport, etc.), all saturated with electromagnetic radiation declared potentially harmful and dangerous by thousands of medical research and studies.

4136 – GR, France

4137 – Christine RICHE, France – I have EHS people close to me and I can see the damage.

4138 – EB, France – I am EHS.

4139 – NR, Belgium – I support all forms of disability and the recognition of these disabilities.

4140 – CB, France – My sister is EHS.

4141 – MB, France – I am HES and I want to protect my children and those of others.

4142 – SZ, Germany

4143 – Caroline BOUCHOMS, Belgium – I am electrosensitive.

4144 – Lilliana De Lucca, USA – I am a victim of electromagnetic radiation (EMR). After years of non-stop radiation attacks, I was professionally tested and several radiofrequencies were found in my body. I was also tested for brain and neural injuries by a qualified neurologist who found my non-concussion brain lesions and diagnosed me with Havana Syndrome, also known as AHI (Anomalous Health Incidents.

4145 – JT, UK – I am also EHS, have had to move several times due to the signals and give up work.

4146 – BL, France – Major health hazard.

4147 – NK, UK – I am a person with EHS (Electromagnetic Hypersensitivity). The suffering is immense and has impacted every aspect of my life. I demand that my voice be heard. Why should my life be ruined by your technologies? I am one of millions similarly affected by this great injustice. We deserve to be recognized, and we deserve and demand the same rights as anyone else. And if you listen to the wisdom of our bodies, you will learn that all living beings are adversely impacted too.

4148 – CM, France – Life becomes hell for these people.

4149 – Corinne ROUAULT, France – Because I am not sick but a victim of technology. I wish to regain my full health and no longer be a victim by having the means to protect myself, to heal myself, and to live simply and joyfully.

4150 – Isabelle HARTZ, France –: I suffer from EHS and MCS and am struggling to survive; it's an exhausting battle we're all fighting. I urgently request access to areas with no mobile phone coverage to find decent housing.

4151 – CT, Belgium – I am sensitive to electromagnetic radiation and it impacts my cognitive abilities.

4152 – Waldy KIVITS, Nederland – Electrohypersensitive people have the right to participate in social life in the same way as everyone else.

4153 – Jean LOUYEST, Belgium – We cannot decently leave anyone behind.

4154 – JT, France – I have been EHS for 15 years.

4155 – DM, France – In support of a friend who is suffering from electromagnetic radiation which is making her life impossible and I am afraid for her.

4156 – Peter SANDERS, Belgium – The house where I grew up was next to a transformer station that converts electricity from high voltage to medium voltage. As a child, I was always tired, very often sick, and listless... I was constantly just trying to survive and drag myself through life. When I went to boarding school, I noticed that things kept getting better for me there. When I turned 26, I moved to a place with very little radiation. Although it's in the hands of those who know it, it's best to express your thoughts with ease. The first few years went very well. But then you need to know what to do with it. It turned out that the issue stemmed from the operation of DECT phones, Wi-Fi, and the phones in my home. Currently, I'm still active as a contrac-

tor, but I prefer low-radiation job sites where there are no cell towers nearby, Wi-Fi is turned off, and the area is shielded. My assistants also use smartphones without any data traffic, so it doesn't take too long. This is where the cable is connected. It's very clear that this doesn't mean all activities can be carried out. When I become overwhelmed by electromagnetic pollution, I function very poorly and feel terrible. This is an urgent appeal to ensure there are no more victims!

4157 – R. vd AKKER, Nederland – I am Electro sensitive. Take me a while to find that out. There are 45 thousand researches with shocking findings for man, animal and plants, see bioinitiative.org for a summary. It robbed me of my life and career. I can go nowhere in this irradiated world. Dutch government recognized on 4 July 2019 the assistance of electrosensitivity, that it is: -a pure physical phenomenon; -can completely disrupt the lives of patients; -that it materializes far below the current exposure limits. But in the mean time all they do is: -the telecommunication industry is allowed to continue; -the government sells the frequency licenses for a lot of money; -medical industry profits from lots of sick people seeking treatment; -sufferers get no compensation for even the simplest things like shielding; -most people are addicted to their Smartphone or feel forced to use one. People are controlled with the data collected from them through their Smartphone; These powerful industries and governments keep lying to everyone about the health impact: Everyone is affected but some more than others.

4158 – Björn SPIERING, Germany – I am personally affected and I can show solidarity with others affected.

4159 – JB, Slovakia – I agree with the entire text, I wish to offer my support.

4160 – Philippe MONNIER, France

4161 – LT, France

4162 – Corinne TONNELIER, France

4163 – Jean-Paul TONNELIER, France

4164 – SS, France

4165 – Alice HOTBERT, France

4166 – Gisèle DURANT, France

4167 – Ruffin FORT, France

4168 – Nicola HARDY, France

4169 – Jean-Luc COËDIC, France

4170 – Marie-Laure REBREYEND, France

4171 – Willy GIELEN, Nederland – Because I suffer from EHS myself and it imposes restrictions on my daily life.

4172 – IG, Nederland – It's really necessary.)=

4173 – Philippe ALVAREZ, France – Hypersensitivity to electromagnetic radiation must be taken into account!

4174 – Janneke CROMJONGH, Nederland – I myself have become hypersensitive to electromagnetic fields, and the impact of this is enormous. I can no longer do anything without worry. The burden of EMF causes me to function well below my potential—energetically, cognitively, mentally, and practically—and I find that a real shame, because I only live once. The world (doctors, politicians, and fellow citizens) isn't listening (yet). Even though they could be the next victims.....

4175 – MJ, Canada – I am extremely EHS. Life cannot be lived with how affected I am. My ability to function in any way is massively impacted. There is nowhere I can go to live a normal life.

4176 – Cristina GUZMAN ORTEGA, Spain – I am affected.

4177 – JK, Australia – I am a building biologist who has CIRS (thus I am sensitive to EMFs) and all of my clients' health are suffering horrendously because of all the exposure we have to endure in today's world.

4178 – Christophe LAMBERT, Belgium – Too much digital pollution.

4179 – Maria Nazzera MASSARI, Italy – Why I have been fighting for years against the installations of 4G and 5G antennas.

4180 – Gianna IANETTA, Italy – Radiation is harmful to human health. Please note that there are limited licenses.

4181 – Marie-Lou FOBIS, France – EMF radiation is dangerous.

4182 – AP, France – The risks associated with electromagnetic radiation are currently not sufficiently known and taken into account in local and national decision-making.

4183 – Liliana JETTI, Italy – I sign because it is right to protect electrosensitive people!

4184 – Chiara PEROTTO, Italy – I want preliminary studies on the damage to life, before the use and implementation of this technology.

4185 – GN, Italy – We are all HUMAN beings and therefore deserve RESPECT!

4186 – Marilena ARDIZIO, Italy – The health of all living beings above all.

4187 – LF, Italy – I think that exposure should be reduced in all cases, because I believe it brings more problems than benefits to everyone.

4188 – Silvia TODESCHINI, Italy – I am aware of the harmful consequences of any electromagnetic installation on the health and life of any living organism.

4189 – DA, Italy – And now, let them cease their lies perpetrated and spread by all possible means.

4190 – Lidia BEDUSCHI, Italy – Thank you!

4191 – Violetta PAVESI, Italy – It was the moment of closure or mode that disrupted the population.

4192 – Gemma JEVA, Italy – To protect myself, my loved ones, and everyone's health.

4193 – Mauri MANUZZI, Italy – It's disgusting to have to endure everything that is imposed on us in the name of a pseudoscience that does not represent me(...).

4194 – M. R., Italy – Is it necessary to protect health ?

4195 – A. R, Italy – I am aware of the damage caused by electromagnetic pollution.

4196 – AB, Italy – I agree.

4197 – MB, Italy – Life is not defied by ignorance and economic interests. Everyone has a right to health, even those who end up with cancer because their neighbor has a router pointed at their head in their wall, or a cell phone left on with all its Wi-Fi, Bluetooth, biometric data connections, GPS, and various remote control consents, even without consent. There must be a balance in everything. The frequency war was not a choice; it was imposed.

4198 – Dirk HANNES, Germany – I can tell blindfolded if a mobile phone is in airplane mode or not. I just hold it to my head. 10 out of 10 correct. Stop irradiating everything and everyone just because you want to monitor people!

4199 – MG, Italy – Governments must recognize electromagnetic pollution as a risk factor for human life and reduce its impact.

4200 – CF, Italy – I am one of the victims.

4201 – Aurora TRON, Italy – Electromagnetic fields are causing harm to people and animals, but nobody talks about it or wants to take it into consideration because the telephone companies call the shots and those who should be protecting the health of citizens are blind, deaf and....

4202 – RW, Netherlands

4203 – RK, Netherlands – EMF radiation is seriously damaging my health. Due to excessive electromagnetic radiation, I have developed EHS and am no longer able to work. We need white zones in every country to provide shelter for vulnerable people who are struggling to survive in this sadly polluted world.

4204 – DG, Poland – Elimination of pollution from artificial electromagnetic fields generated by technological devices.

4205 – LB, Australia – This is an emergency of epic proportions and quite possibly the biggest physical threat to all life on the planet. We don't have long left, as this has already been harming us for decades.

4206 – EB, Belgium – Because this electromagnetic pollution is catastrophic, many people suffer from it, and I am Electrosensitive.

4207 – Driss EL ATLASSI, France – Because this electromagnetic pollution is catastrophic, many people suffer from it, and I am Electrosensitive.

4208 – Cécile BOURDAIS, France

4209 – Hugo DESPOEZ, France

4210 – JL, France

4211 – Johanne STRORCH, Germany

4212 – MG, Italy – I want a cleaner world.

4213 – VA, Canada – Action is essential.

4214 – Elidan ARZONI, Switzerland – I have suffered the harmful consequences of 5G on my body and my life.

4215 – Pietro EMILI, Belgium – To prevent the population from being increasingly controlled.

4216 – Antonella CONTI, Italy

4217 – Elaine WATSO, UK

4218 – Fiona METHA, UK

4219 – MD, France – This problem is very serious, has been reported for a very long time, it dramatically isolates the people concerned.

4220 – NS, Germany – Right to a habitat and biosphere free from any influence.

4221 – EP, France – I feel like my head is exploding.

4222 – JW, Sweden – We have the right to lead a healthy life, MAKE OUR HUMAN RIGHTS A REALITY!!!

4223 – Mikael JANSSON, Sweden – This must be stopped immediately!

4224 – BD, Germany

4225 – CB, France – This is essential for people sensitive to electromagnetic radiation.

4226 – Anne-Marie LAVIE, Canada – I feel very much concern, especially for the young children.

227 – CB, Italy – I agree.

4228 – Teresa DIANA, Italy – We must free ourselves from our oppressors; our lives depend on it.

4229 – AM, Nederland – Tat electromagnetic pollution cease immediately.

4230 – HB, Netherlands – Because electrohypersensitivity and electromagnetic pollution must stop.

4231 – Javier BLANCO, Spain – I have suffered from this condition for 15 years, like many other people.

4232 – NG, France – I am a victim (...)

4233 – CK Belgium – Supporting a friend who suffers from electromagnetic hypersensitivity.

4234 – GA, Canada – I am invisible.

4235 – LM, France – I stand in solidarity.

4236 – PS, Belgium – Elected officials do not take electrosensitivity into account.

4237 – Alice LENTJE, Netherlands – I suffer from EHS myself and can barely go anywhere anymore.

4238 – DB, Nederland – Since 2016/2017 I have suffered from significant discomfort due to hearing high frequency sounds (diagnosed as tinnitus although, according to tests, I have perfect hearing). I am very worried about the health of many people. Many people hear these sounds, can hear the radiation and do not dare to talk about it.

4239 – MB, Netherlands – Because we need to be healthy as humanity.

4240 – EK, Nederland – I have suffered from disorders linked to HF radiation since 2009, which continue to worsen (it took me years to understand the cause) and which considerably limit my life, particularly on a social and professional level.

4241 – AS, Nederland – I have not been able to participate in social life for years and am forced to live in social isolation.

4242 – HD, Nederland – I am also a victim.

4243 – NB, Belgium – There is an urgent need to intervene in this situation.

4244 – EB, Nederland – Electromagnetic radiation is harmful to health, and people who do not wish to use wireless devices are exposed to this radiation against their will.

4245 – PV, Nederland – I have EHS myself.

4246 – Pieter NIJNTJES, Nederland – The nuisance suffered by an ever-increasing group must decrease.

4247 – JL, Belgium – We humans are undergoing a process of evolution without giving sufficient thought to its potential and already proven consequences. Humans have demonstrated time and again that they pollute their own environment at the expense of their well-being and health. It's strange that this apparently still isn't clear enough. Think before you act ...

4248 – JV, Nederland – The problem must be recognized and solutions found.

4249 – DB, Nederland – I too am experiencing difficulties and numerous problems with mobile devices, and near my home, the cell tower is becoming increasingly congested in order to intensify the electromagnetic radiation, making it a veritable silent killer, which we continue to deny as such because we have become dependent on it, due to the government. The latter also has the heavy task of fighting crime using radiation-emitting devices. There is therefore no going back, but the downside is that many people are getting sick.

4250 – Hugo SCHOONEVELD, Nederland – EHS is an important but solvable problem that deserves attention and study of measures and perspectives.

4251 – BM, Nederland – Familiar with this problem.

4252 – JT, Nederland – We far exceed the standards for radiation and are under the control of the European Parliament and Big Telecom operators!

4253 – CD, Belgium – I am sensitive.

4254 – HW, Netherlands – I have known since 2008 that I suffer from EHS. The problem is that my world is getting smaller and smaller. Going to a restaurant, attending a cultural activity, going on vacation, all of this has become almost impossible.

4255 – Peter LENTJES, Netherlands – Last 30 days I have been suffering from EMV and have been diagnosed with it. In 2018, I unfortunately had to stop working because of the new Wi-Fi installed at my workplace, which made me very ill. Social activities are no longer possible, because there is Wi-Fi everywhere. It is possible to use a smartphone, but I cannot tolerate it for very long.

4256 – Mohly AMER, Palestine – I hope they will obtain their rights.

4257 – Fred DE JONG – Because I'm in so much pain that my life is ruined.

4258 – ML, Belgium – On what grounds am I supposed to have radiation passing through my home, my body—and even while I'm on the move? Because it's in the public interest? Yes, just like cigarettes, which were marketed as medicine before it was acknowledged that they had killed millions of people. Like asbestos, which was considered safe before people realized it was carcinogenic, and so on... Making something toxic indispensable is a crime against humanity, and to claim ignorance when one is actively involved in this field is simply impossible—at best, it amounts to willful blindness; at worst, it's a refusal to admit the truth, given the immense financial stakes involved.

4259 – Danielle COSYNS, Belgium

4260 – Michel SARTEAU, Belgium

4261- Niki BEST, France – These harmful frequencies can be changed into healing ones... much needed.

4262- AA, Nederland – Because I fully support this initiative.

4263- Geert BURSSENS, Belgium – I absolutely agree.

4264 – Michèle DEBRUYN, Belgium – One of my sons is seriously affected. This harmful electromagnetic radiation is unfortunately invisible and weave an increasingly dense network through which we live. It's so easy to ignore it, but that only encourages its silent harm, far more dangerous than a certain virus (the one we were sold with a barrage of lies!). When more than 50% of the population suffers from EHS (Electromagnetic Hypersensitivity), what will we do with this 5G and these other similar communication technologies, useless yet so coveted? Who will keep the wheels turning? We can never have too many people signing this petition!

4265 – Maud DE MICHELE, Belgium – By support

4266 – Dr. Maria Margaretha Hedwig Haring, Netherlands – I live in a city in an apartment where radiation has increased by 409% since the introduction of 5G. I have headaches. So please stop 5G transmission, smart meters, and smart cities. Go back to GSM.

4267 – Alain RINCKHOUT, Belgium- Everyone has the right to a good and healthy life.

4268 – Eddy SMITS, Belgium – Request from a person with the disease.

4269 – Valentina MARIDATI, Italy – Because it's a real humanitarian emergency!

4270- SF, Italy – Electromagnetic radiation is harmful to humankind, both to individuals and to society. This is a real phenomenon with very serious consequences; therefore, measures must

be put in place to address the problems it generates and prevent further harm to people.

4271 – Stefan SATTLER, Belgium – Supporting people in distress, encouraging reflection on possible alternatives regarding the use of technology...

4272 – KD, Belgium – I support.

4273 – Julien FERREIRA, France – Former salesman of connected objects who became intolerant to electromagnetic radiation.

4274 – DF, France – Members of my family are affected.

4275 – BD, Nederland – I have been Ehs since 2006, my world has become almost unlivable.

4276 – S. BLANCHARD, Canada – I have signed because it is horrible to be electrosensitive, and people and nature need to be protected from electromagnetic pollution.

4277 – Sven LONGEVAL – I have friends who are affected by electromagnetic radiation and I sign in support of them.

4278 – Marc DESNEUX, France – Frankly, I'm fed up with being a radio deserter. I've chosen to stay put, in a protected zone, despite local opposition (from the town hall). There are fundamental rights that are being trampled on far too often these days. It's high time we reminded people of them and enforced them. This has gone on for far too long.

4279 – Christian OMBA, Belgium – Because it's important

4280 – MKM, NETHERLANDS – The EMV has been sent to you by its authorizers. I want to review and sign this program. Well, since the '90s were already in use, the system has already been updated. My husband and I now live in a forest, with no immediate neighbors, far away from everything—a situation we're grateful for. Any bus, any train, any transportation required for your journey. My children, who are completely unaware of all the harmful effects of wireless technology, live too far away for me, since I no longer drive the car myself and my husband works for both of us; no employer is willing to adapt the work environment so that I can take care of my own needs.

4281 – Aurore PICAVET, Belgium – A friend of mine is suffering terribly from this syndrome, and I would like her to be able to feel good somewhere

4282 – Katty GILLET, Belgium – Too many of my acquaintances are suffering the negative effects.

4283 – Senne POTTIE, Belgium – Electro-magnetic signals in pulses are generated and documented in effect when they are activated. De wereldwijde verspreiding van zendmasten en haarp en toename van draadloos internet overal, heeft net als micro-golven een zeker, doch onzichtbaar effect op hersenen, zeker die in volle ontwikkeling, Verder en meer diepgaand is natuurlijk steeds wenselijk, al zijn de gevolgen voor de algehele mensheid onweer-legbaar.

4284 – Simone SIMON, UK – I am a victim of EHS; it is a disabling condition and it's time that the men, women, and children affected by it are taken seriously.

4285 – ASM, Spain – Every day, more and more people are experiencing symptoms of electrosensitivity and chemical sensitivity.

4286 – MC, France – I sign this appeal as an EHS (Electromagnetic Hypersensitivity) professional and in the name of the fundamental right to a healthy and health-respecting environment.

4287 – FG, France – In the name of respect for human dignity and the right to a healthy environment.

4288 – CV, France – Because I myself have become EHS and I suffer from it.

4289 – CT, Belgium – I personally know at least one person with electromagnetic hypersensitivity and can currently only see them at their home, which is located in an area with no cell service and is at risk of losing that status. I am seriously worried about the consequences for the health of everyone living there.

4290 – RME, Spain – I am EHS and I totally agree .

4291 – FOV, Spain – I suffer from both diseases.

4292 – MJJ, Spain – I suffer from EHS. Insomnia and recurring migraines. This illness is horrible. We need areas free from electromagnetic pollution to live;

4293 – MDM, Spain – SSC (CENTRAL SENSITIZATION SYNDROME).

4294 -J.-MM, France – I know an electro-sensitive person and I discovered their difficulty in living.

4295 – Thierry SUSINI, France – My cousin has this syndrome

4296 – CB, France – I have been electrosensitive for 14 years and my life is becoming increasingly difficult.

4297 - Louis VERDIER, France – I am EHS as are other members of my family (grandmother, mother, brother and aunts).

4298 – Ulla Lizabeth LINDAHL, Sweden – This is the best time. (We must make ourselves heard.)

4299 – Eva VILLEGAS, Spain – It is an irresistible desire to damage humanity and the planet. The levels of sustenance that many of us live in are completely inhumane, apart from a collective suicide by incident. With the hermoso that you live in harmony, enjoying all of our and our maravillas... Apply our medications to return to normalcy!!!

4300 – Obdulio VILLEGAS BENITEZ, Spain – I have a sister with electromagnetic hypersensitivity syndrome.

4301 – Liliana ORSI, Spain – stand in solidarity with these victims.

4302 – David VILLEGAS, Luxembourg – For you EV. To keep white zones. And support sensitive people.

4303 – NMV, Spain – I myself am a victim of excessive electromagnetic radiation... And it's only getting worse... They're killing us.

4304 – Begoña VEGA CALLE, Spain – For a question of ethics and humanity.

4305 – SF, Belgium – I feel concerned about electrohypersensitivity and the omnipresence of artificial radiation in our territories.

4306 – Emilia Matilla ALVAREZ, Spain –To improve the lives of people sensitive to electromagnetic radiation.

4307 – KNK, Canada – I am a victim and on my deathbed. I have lost my home and my career, I am totally displaced, and I am residing in a cave in western Canada. It is beyond terrifying in every town. I cannot go home; I have no direction, no way home... I am forced not to fly because of 5G, and I cannot travel on highways through any towns, otherwise I risk death!

4308 – NS, France – By looking into this problem, I am getting to know more and more people who are electrosensitive.

4309 – MB, Russia – I support this concern.

4310 – Jean-Francois BRILLET, France – My brother has suffered from this disease (Electro and Chemo Hypersensitive) for more than 10 years and lives without electricity in a closed room which he leaves very rarely.

4311 – Christine BRILLLET, France – My brother-in-law suffers greatly from this condition; it would be wonderful to find a cure...

4312 – LL, France – I have tinnitus; more and more young people have it, it's becoming a major public health problem

4313 – Brigitte REMY, France – this is important because some people are truly disabled.

4314 – MF, France – this is important because some people are truly disabled.

4315 – DTV, France – I believe that electromagnetic pollution is a humanitarian emergency and must be treated as such.

4316 – CH, UK – This issue has been ignored for too long and now presents itself as an emergency. Just ask, are we a healthy society? The answer is clear, and action must be taken to address this dangerous situation directly.

4317 – DE, France – Because legislation should prioritize life over profit. I love having internet access, making phone calls, etc., but long live the dead zones and disconnections, even for people who aren't sensitive to electromagnetic radiation!

4318 – CM, France – I sympathize with and support those sensitive to the negative effects of electromagnetic radiation in their struggle to assert their grievances by denouncing the horror of living in a magnetically polluted environment that is harmful to human and animal health.

4319 – FT, France – More and more radiation and people impacted.

4320 – AV, France – I stand in solidarity with people who are vulnerable or sensitive to electromagnetic radiation, or who may develop this sensitivity in the future due to the increasing intensity of this insidious, invisible pollution. With each new technological generation, microwaves increase, the number of antennas increases, electromagnetic smog increases, and the authority that limits this volume (ANFR) simply keeps raising the acceptable exposure threshold...

4321 – AG, France – I am EHS

4322 – VG, France – I have suffered from electromagnetic hypersensitivity (EHS) for three years. I sold my house to move to a relatively isolated location away from cities, free from electromagnetic fields (EMF), after undergoing surgery for a serious cancer. Since then, I no longer use electricity, and my smartphone has become useless because even sending or receiving a text message triggers unbearable pain. Going into town, even just to see the oncologist, is torture. I thought I would finally live in peace, but for the past few days, I have been forced to go to the forest, to a mobile blackspot, and sleep in my car because «they» have increased the power of a cell tower. When will this end?

4323 – Anouk GANZEVOORT, Belgium – I am hypersensitive to noise. So being sensitive to electromagnetic radiation... I completely understand!

4324 – Marie-Claire ESCALIE, France – This ever-increasing hyperconnectivity everywhere, and the associated electromagnetic pollution, is a nuisance for all living things, humans and animals alike. Some, like me, are very sensitive to it. Others believe they are not affected, but are unknowingly impacted and can suddenly experience a significant decline in their quality of life! Finally, there are those with extreme EHS... and it is truly inhumane to ignore their condition, which should instead be considered a warning for everyone!

4325 – CM, France – I am concerned by this problem and more and more people are, as well as animals; it is a health emergency measure that concerns us all, that concerns all living things.

4326 – MJP, UK

4327 – Guy BERAUD, France

4328 – BM, Switzerland – I suffer terribly from this; I still can't sleep at home because of the effects of 5G.

4329 – Laurent DESPLATS, France, 4500 independent scientific studies prove the harmful effects of electromagnetic radiation and electric fields, yet the authorities, who are perfectly aware of this, are burying their heads in the sand. Worse, they keep raising exposure limits. I won't even describe what they are; this reality speaks for itself. As someone suffering from electromagnetic hypersensitivity, our only option is to survive on the margins of society (because ALL our fellow human beings prefer their smartphones and Wi-Fi to our health and friendships), becoming increasingly isolated and marginalized. So, tell us about «living together»...

4330 – Isabelle BOONE LOPEZ, France

4331 – Brigitte REMY, France – This is important for people with electromagnetic hypersensitivity.

4332 – NP, France

4333 – ML, France – I have suffered from EHS for more than 10 years and I feel marginalized because of this problem: living on the margins of society.

4334 – SL, France – I am hypersensitive to electromagnetic raiation.

4335 – MH, France – No one is safe and it causes a lot of suffering.

4336 – AAP, France – I am EHS

4337 – GH, UK – Care and protection for EMF sufferers is very necessary; it is essential to provide care and protection to people suffering from the effects of electromagnetic fields.

4337 – GH, UK – Care and protection for EMF sufferers is very necessary.

4338 – MG, France – In support and prevention for all

4339 – Jan Van GILS, Nederland – Wireless technology is a high-risk technology, as proven by tens of thousands of publications and experiments.

4340 – HV, France – Heart problems

4341 – LR, France – Because it's time to come together, and because I've been forced to remain silent for far too long. I believe it's possible to make things happen, together.

4342 – VS, France – I think it's time to act together.

4343 – Nigel Wells, Sweden – I want respectful democracy in the EU and not commercial dictatorship, at whatever cost.

4344 – CL, France – My brother is electrosensitive. He lives in seclusion in a forest, homeless (with only his car), and every time he moves to take a shower or go shopping, he suffers terribly and takes several days to recover. Heatwaves, tick and insect bites, loneliness, cold, lack of comfort (even the bare minimum), rain and humidity, disrespect from passersby, and incomprehension from forest rangers...

4345 – Sylvie COMBALAT, France – I have become electro-hypersensitive because of this uncontrolled EMF pollution

4346 – BH, Spain – Someone close to me is affected, I am all the more sensitive to it.

4347 – MK, France – I am (a little) electrosensitive

4348 – GK, France

4349 – IL, France – In support of several people who no longer know how to survive

4350 – CO – This is a crucial issue for preserving life. Thank you for your action!

4351 – BS, France – To have the harmful biological effects of artificial EMFs recognized

4352 – CR, France – People are suffering and we must give up the nuisances in order to live well together.

4353 – JB, France – A member of my family is affected. Seeing the difficulties these patients face and their limited options for protection, I thank those working on this research.

4354 – JBTS, France – Radiation that kill all life, proof available.

4355 – HC, France – Courage.

4356 – EPC, Austria – I myself suffer from EHS.

4357 – MB, France – Let's take care of our ecosystems and living things.

4358 – AMR, France – I am electrosensitive.

4359 – Heide FALKE WICHERT, Germany

4360 – AAP, France – I am EHS.

4361 – Nicole LETARD, France

4362 – NB, France – End to catastrophic effects.

4363 – MB, France – A friend has this disease

4364 – JC, Belgium – My wife is affected and the medical world is turning a deaf ear!

4365 – Elisabeth MILLOT, France – I am EHS.

4366 – VP, France – I am electro-hypersensitive. I have taken refuge in a relatively protected area. I see people with EHS arriving in search of a place to live. But I can do nothing for them. I don't have access to even the most basic healthcare (hospitals, doctors, etc.).

4367 – JP, France - I am electro-hypersensitive.

4368 – Nathalie ROCHER, France – I am electrosensitive, and suffer from headaches as a result.

4369 – JC, France – I became EHS in 2007 after working for 10 years opposite cell towers, being exposed to wifi and a DECT at home for many years and working on an old computer not connected to an earth socket!

4370 – MAB, France – Too many people increasingly affected.

4371 – CH, France – Living 80 meters from a cell tower, I gradually developed electromagnetic hypersensitivity: from skin problems at the very beginning of the tower's installation to heart problems, high blood pressure, memory loss during conversations, and insomnia after eight years of exposure, at which point I understood and learned the source of all my ailments. I had to flee my home, losing contact with my entire family. Now confined to a house with thick stone walls, I have recovered from my physical ailments, but I am still hypersensitive to artificial radiation, which prevents me from living freely outdoors... I am not alone in this situation, and in fact, it's much worse when I think of the many people (some of whom I have met) who live a nomadic existence in their cars!

4372 – Ngoc-Hiêu DÔ, Canada – The WHO must recognize the biological effects of EMFs, protect human health and the environment.

4373 – Rachel LIN, Australia – We are being knowingly poisoned in every way — Electromagnetic radiation is one way. The tin foil hatters — while there's more effective way to do it — were right all along. And it is very wrong, and foolish, to mock them. Some are more sensitive than others to the effects of Wi-Fi, electricity, Bluetooth, etc. Thank you EMPvictims.org. Thank you .

4374 – FB, France – I am sensitive to all these victims and hope that the public authorities and all those concerned can act together to change things and move in the right direction for the health of the greatest number.

4375 – AT, France – It's time to take our health into consideration!

4376 – Sonia VILLEMUS, France – The issue of electromagnetic

radiation is becoming truly worrying. I myself have been electrohypersensitive since 2012, I suffer from it like many others, and I am concerned for future generations. I sign this appeal because it is simply a commitment to preserving life! And thank you to each and every one of you for your support.

4377 – BG, France – My partner and I are suffering from the effects of electromagnetic radiation, which manifest as skin redness on our eyebrows and lips. This redness fades a few hours after we disconnect all Wi-Fi sources, turn off the router, and unplug the power outlets...

4378 – TB, USA – I have EHS and man-made EMF is harmful to everyone.

4379 – KH, UK – I am someone who suffers from Electromagnetic Hypersensitivity; better recognition for this condition is long overdue.

4380 – Anja Schmidt, Germany – The expansion of LTE, 5G, and Wi-Fi proceeded 'almost unnoticed' during the COVID-19 pandemic. For electrosensitive people who experience health problems as a result of exposure to massive amounts of radiofrequency radiation, downtown areas—including buses and trains—have now become off-limits. Many affected individuals who contact our Hamburg citizens' initiative (https://bi-mobilfunk-hamburg.de) and ask for support confirm this. There is little we can do to help; radiation-free living spaces are not available, and dead zones have been eliminated. Digitalization could be designed in a way that is compatible with health and the environment. Why isn't this happening? Why isn't the legally enshrined precautionary principle being applied? So far, we have received no answers to these questions from industry or politicians.

4381 – PC, France – This world has gone CRAZY and out of control, every living being, animal or nature must be protected...

4382 – PL, France – We use technologies whose full effects on living beings are unknown, of which we hide a large part of the effects that we know, and which we more readily direct towards evil than towards good.

4383 – AB, Spain – To protect the most vulnerable and everyone else.

4384 – Magalie Marguerite, France – I am electrohypersensitive, diagnosed in 2018

4385 – AB, Liechtenstein – I am ehs myself.

4386 – Jennifer SALMON, France – I sign this appeal because I've been suffering from EHS and MCS for about four years. It has completely destroyed any hope of a dignified, decent, and peaceful life. Now, no more plans, just survival, living day to day... A living being, drained of its vital essence...

4387 – Jon PAYN, UK – I have EHS, which makes life difficult and painful. Here in the UK, most NHS staff, private consultants, and government representatives treat me with ridicule and even contempt. I am very concerned for the future of my children and all children who are not being told about the dangers of EMFs, while the whole world seems intent on increasing their use.

4388 – MOC, France – I am aware of the harmful effects of electromagnetic radiation on human health.

4389 – Anna VALLS COLL, Spain – I suffer from multiple chemical sensitivity, which is also an invisible illness in the same family, and I am calling for an appeal to be launched to help people who, like me, have problems with chemicals in their environment. We are also asking for protocols to be put in place so that we can stay in enclosed spaces free of chemicals (air fresheners, perfumes, and paints with high VOC content) that prevent us from carrying out most of our activities and having a decent social life.

4390 – CB, France – EHS.

4391 – Edwin VAN TROOSTENBERGHE, Belgium – I know I have the potential to grow.

4392 – CS, Netherlands – I myself have suffered from EHS due to HF EMF since October 2019. Recognize EHS!

4393 – Christine DUCHATEAU, Belgium – I suffer from EHS.

4394 – IJ, Netherlands – The world is for everyone!

4395 – Helena Filomena, Nederland – Because I suffer from it myself.

4396 – LE, France – My wife is electrosensitive.

4397 – Corinne ROUALT, France – We are both emitters and receivers of electromagnetic radiation. Let's focus on the ones best for us, reprogram our brains to react to artificial electromagnetic fields, and free ourselves from emotional and psychological memories... so we no longer feel pain and can rediscover a life connected to ourselves and others in complete harmony and good health! Corinne EHS is on the path to zero sensitivity to artificial electromagnetic radiation!

4398 – EM, Belgium – I am a victim myself! We must act. Because I/we are suffering.

4399 – Karin VAN DER MEIJ, Netherlands – More public awareness is needed on this issue and it must be stopped!

4400 – Julien GAUTIER, France – the deployment of all these technologies which pose public health problems in our country, food sovereignty problems in other countries and ecological problems in general, disgusts me.

4401 – Claudie BARAVEL, France – It's normal to have a safe haven, it's like banning sick people from going to hospitals!!

4402 – HM, Austria – Worry.

4403 – MD, France – I am aware of the growing difficulties faced by people around me.

4404 – MJ, France – The increasingly dense network of EMF radiation is disrupting health in invisibly and, above all, secretly.

4405 – Jeannie MARSH, UK – I feel that I am sensitive to EMF. I suffer headaches, aching all over, and lack of energy. I do what I can to minimize this. It's hard in the UK as so much stuff can only be bought online. We're sprayed daily, and chemtrails are always evident in the sky. We now have mass surveillance, all using 5G. It's an attack on all life.

4406 – CE, UK – It is so important that people should listen to the evidence and stop all this before it is too late.

4407 – Rogier SCHIPPER, Nederland – Because the radiation from cell towers must be reduced.

4408 – Sophie ACKERMANN, Belgium – I am electro-hypersensitive and I can no longer work because of the unsuitable environment and I had to leave my home.

4409 – Catherine KIEFFER, France – I am affected and getting a diagnosis is a real ordeal.

4410 – CM, Netherlands – I suffer from EHS.

4411- CK, Germany – Since the installation of 63 smart meters and a Superlink C transmitter in our house this summer, I have been suffering greatly from electrosensitivity.

4412 – SS, Nederland – I too suffer greatly from all this radiation!!!

4413 – CR, UK – I have electrosensitivity and I'm suffering immensely. I also have neuropathy and fibromyalgia, and all of this has severely aggravated since the 5G rollout in my area.

4414 – Sebastiaan STRUWE, Netherlands – My life has been ruined since 2020, following the launch of 5G. It has made me extremely ill and caused permanent hearing damage. I was also forced to leave my home, which I had spent seven days working on. I fled the Netherlands for two years and went to Egypt, where almost all of my symptoms disappeared. No more than 1.5 years in the car. I no longer need to carry a sleep aid. However, we're still using the ANWB, and we know that the door is on the right side of the vehicle—and it's not the same as tinnitus. My head is constantly electrified. In this case, it's direct-to-direct transmission in my current state. Help—I'm being attacked by frequencies and pulsating low-frequency tones.

4415 – Michel CUSTERS, Nederland – I have suffered severe health damage, and every day I experience more and more harm. EMF exposure on this scale is an experiment on humanity conducted without humanity's informed consent, and as such, it must be judged in a Nuremberg-style trial, and those behind this rollout must face the consequences.

4416 – EG, Switzerland – I am a victim of electromagnetic radiation (since 2022). Like most cases, this has dramatically changed my life and that of my family... health, social contact, ability to independently earn a living...

4417 – Andy Hooley, New Zealand – I am electrosensitive and feel the effects from the man-made EMF environment.

4418 – ML, Netherlands – It is torture with lethal outcomes.

4419 – MPWA, Nederland – I developed EHS as a result of the 5G rollout in March 2020, and my daily activities are severely limited. I've lost my job. I'm in pain day and night and feel terribly sick because of the radiation. I've already spent thousands of euros trying to function even somewhat in this sickening world full of radiation: streetlights, solar panels, wind turbines, cell towers, Wi-Fi everywhere, glass, etc., etc., etc.

4420 – Rik Bodewes, Netherlands

4421 – DB, Netherlands – It is necessary to protect people .

4422 – FM, France – It's time to sound the alarm. Pathologies are emerging, their causes unknown, amid widespread indifference.

4423 – PN, Belgium – My friend has EHS and is living a nightmare.

4424 – PA, France – I am electrosensitive.

4425 – CP, France – I know people with EHS and I see their daily suffering and difficulties. I myself am sensitive to certain types of electromagnetic radiation and can feel their effects.

4426 – ML, France -One of my relatives is affected and is suffering very painful consequences.

4427 – Alain CUNY, France

4428 – RD, France – I sympathize with all those who are and have been exposed to magnetic radiation and I support the EMP Victims collective.

4429 – MB, France – My husband has been electro-hypersensitive and completely isolated for 6 years. We have lost so much!

4430 – JB, USA – I am sensitive to EMF radiation and my wife is 99% allergic, forcing us to live in areas without cell phone coverage and vulnerable to the expansion of telecommunication networks.

4431 – Christine MALFAY-REGNIER, France – I support the struggle of environmentally ill people for their recognition (I am primarily chemically sensitive)

432 – IF, Deutschland - I am personally concerned.

4433 – Maria NAZZARENA, Italy – I know the damage that electromagnetic radiation can cause to living beings. My mother was electrosensitive. Exposure is constant for everyone and is therefore no longer acceptable.

4434 – Ghislaine GILLE, France – I am being parasitized by electromagnetic radiation, as are my husband, my sheep, my horses, my dogs, and my chickens. The forests are being scorched by this radiation. All living things are affected. We don't need antennas to live. We need trees, plants, and animals to live. My suffering is sometimes so intense that I no longer have the will to live.

4435 – AT, Italia, It is necessary if there is any harm to the espousal of the situation, but it is specially designed to be more sensitive and does not require any consequences.

4436 – BD, Spain – I want to stay healthy so that I can contribute to the community and help keep Europe strong.

4437 – Claude GUERETTE, Canada – I believe this is an important public health issue.

4438 – DC, Canada – What we're experiencing right now with all this EMF radiation bombarding us is a real catastrophe. The first and main reason is health-related.

4439 – MR, Canada – I wish to remove myself from this pollution.

4440 – BJ, Canada – For everyone's health

4441 – Suzie LOVEDAY KING, UK – Damage from EMF must be

made known.

4442 – Micheline COSSETTE, Canada – Right to a non-communicating meter

4443 – Edith GUERETTE, Canada – Because of my hypersensitivity to electromagnetic radiation, it's ruining my life!

4444 – MJ, Canada – I am electrosensitive

4445 – MG, Canada – I am concerned about the health of children and animals, and I am electrosensitive myself, and it's really not easy to leave the house to go shopping or to a funeral, etc.

4446 – ML, Canada – I live with a disability, and this invisible air pollution adds to this disability with symptoms that could be controlled by regulations and standards for electromagnetic hygiene in every home.

4447 – PA, Canada – I support this petition.

4448 – Huguette LEBEL, Canada – I have friends who are electrosensitive and I don't want to become one. I protect myself with wired devices at home and I don't have a smartphone.

4449 – MD, Canada – I want to live on a planet that is healthy on all levels...

4450 – René ROBERT, Canada – I am bothered by electromagnetic radiation.

4451 – Julie GALIPEAU, Canada – This is an extremely important societal issue. This pollution is invisible but very present in our environment. Everyone is affected by it, whether they feel it or not.

4452 – MBG, Canada – I am concerned about the impact of EMFs on the health of our children, of everyone, including wildlife and plants.

4453 – LC, France – Because.

4454 – SA, Canada – I am sensitive to electromagnetic raidiation.

4455 – JM, Canada – This is important for the health of humanity, to reduce cancer, depression, misunderstanding... it's time to do something...

4456 – FM, Canada – Empathy for those who suffer

4457 – PMdPR, Spain – I wish to defend this cause in favor of people suffering from magnetic hypersensitivity and to establish therapies and corrective measures to address this problem.

4458 – Daniel STERL, Canada – I wish to champion this cause in support of people suffering from magnetic hypersensitivity and to implement therapies and corrective measures to address this problem.

4459 – ZSP, France

4460 – FL, France – I am EHS

4461 – OR, Spain – Signed.

4462 – CG, France – To uphold the right to life....

4463 – AM, UK – To protect the uninformed and vulnerable .

4464 – Dinant BERGSMA, Nederland – I suffer from the consequences of electromagnetic fields every day.

4465 – MMS, Nederland – I fully support this urgent appeal.

4466 – Daniel NOURISSO, France – Mayors are granting building permits for housing (including 'social' housing) near High Voltage lines where the thresholds exceed 400 micro Tesla, housing where at-risk populations reside (pregnant women, young children).

4467 – Jan NEELS, Nederland – I find this absolutely necessary.

4468 – Alberto CELA CRIADO, Spain – In 1999 he began to recognize the symptoms of electrosensitivity (insomnia, sleeplessness, head pain, etc.) after living 150 meters from a mobile phone antenna for more than 7 years, and without an electrical substation (35 years). function) located on the same ground as the antenna. However, it is important to note that when using the devices to discriminate, the fact that most of this affects me will be a harmless accident located only 10 centimeters from the head of my bedroom, which will last for less than 18 years. For another part, intensive use of the computer with the antiguas catódic ray tube screens lasts approximately 6 years until it ends and confirms my symptoms. However, over the years of research, it has transformed the sufrimiento into a creative force that has allowed me to improve progress and noticeably my health through nutritional and detoxifying procedures, as well as identifying and reducing the impact of electromagnetic and environmental contamination in the environment. more immediately. Currently, I am asking other people to help me maintain better health and quality of life, which is probably the best service in the field of electromagnetic radiation medicine in the world, which has proven the health and depth of miracles that have brought me experience. We hope that electrosensitivity will be recognized officially throughout the world.

4469 – Susanne LARSSON, Sweden – ELECTRICAL HYPERSENSITIVITY IS A SERIOUS AND CAN BE FATAL. PROTECT HYPERSENSITIVE PEOPLE FROM ARTIFICIAL ELECTROMAGNETIC FIELDS AND TAKE THEM SERIOUSLY!

4470 – MH, Belgium – I suffer from EHS myself.

4471 – VH, France – Following the installation of a «Linky» smart meter in my former home in 2018, I began experiencing insomnia and tingling sensations in my throat, tongue, nose, forehead, and the top of my head. I had to sell my property, and we are currently living in a mobile home, but unfortunately, the situation is worse because two cell towers surround us. The «Linky» smart meter is located on the campsite, and I have to work as a cell tower operator to keep my job. Since 2022, I have been waking up nearly 180 times a night, some times due to sleep apnea and the rest for unexplained reasons. For the past few months, the tetany attacks have continued during the day whenever I'm supposed to be resting. The two neurologists I've seen have prescribed me epilepsy medication such as Tegretol and diazepam, which has only made things worse. We are selling everything we own to move to the Dordogne region, away from the grid. This is a nightmare for me, my family, and especially my partner who supports me. Sincerely.

4472 – KD, Belgium – I have a friend who is sensitive to EMF and I find this essential. The problem is not yet sufficiently known/recognized.

4473 – FT, France – I am electrosensitive, I suffered two comas due to six Linhy meters behind the wall separating my room and a cell tower. I have been disabled ever since. Yes, I sign for all of us – the electrosensitive.

4474 – Xavier MORET, France – I am directly concerned

4475 – GR, Germany –I have been suffering from radiation syndrome for 7 years and I am completely isolated. I can no longer go out in public or do my shopping without wearing a burqa that completely protects me from radiation. It is also practically impossible for me to go to the doctor and I don't go to the hospital, because there is Wi-Fi everywhere and I can't tolerate that radiation. So I am buried alive, and nobody cares. What a wonderful new world!

4476 – Jean-Paul BIESSY, France – We are all immersed in far too much electromagnetic radiation. A day will come when we and our children will become electro-hypersensitive. We must break free from our addiction/slavery to all things digital by boycotting as many connected devices as possible!

4477 – Georg H., Germany – Given that exposure to electromagnetic fields has reached levels that have for too long disregarded the human rights of those affected from a health perspective, it is high time to establish protected zones for those concerned. But as we have seen so far, lobby-funded science and its affiliated organizations are able to simply deny fundamental human rights or dismiss them as irrelevant.

4478 – Michel LHUILLIER, France – I have several close relatives who are electrosensitive, that's why I feel concerned.

4479 – ML, Germany – Pollution of the Earth's atmosphere by high-frequency electromagnetic radiation is nothing more than an additional, even more harmful and insidious form of pollution, on top of pollution from chemicals and exhaust fumes. And since the air surrounds and permeates all living things, it represents an insidious and deadly danger to humans, animals, and plants.

4480 – JW, UK – I sign this appeal because, in my professional work building bespoke radiation equipment, I have seen firsthand that current exposure limits—based solely on thermal effects—do not reflect the full body of research. There are thousands of studies showing biological effects well below these limits, and I have met people whose health is genuinely affected by electromagnetic exposure. I want to add my support to those living with EHS and to call for safety standards that take all evidence into account.

4481 – KOW, Nederland – This is becoming unbearable for me.

4482 – BP, Germany – I suffer from electromagnetic hypersensitivity. Living with this disease is very difficult, even more and more difficult (social isolation, non-recognition of the disease.

4483 – PV, France – Electrosensitive

4484 – VG, France – I have EHS and I can no longer leave my home. I ask that we be helped and taken care of.

4485 – OS, France – I'm all too aware of the bio-effects of EMR, having been seriously affected myself — and having collaborated with numerous scientists, researchers, and doctors around the world on this issue, in addition to publishing a book documenting the scientific evidence. I have also had firsthand experience of the corruption at WHO regarding wireless radiation, and their continued efforts to conceal their own evidence (published many years ago) confirming the adverse effects of EMR.

4486 – CS, Australia – I have EHS and suffer daily pain and mental anguish. I am dying inside, knowing and witnessing the destruction and suffering of the animal and plant kingdoms, subjected to the horror and confusion of the senseless, relentless electromagnetic scourge that is blanketing the planet.

4487 – EVL, Belgium

4488 – BMB, Sweden – I sign.

4489 – MR, Germany: The reason I sign this is: utter despair—radiation everywhere from Wi-Fi, DECT, smartphones, and Bluetooth (I live in a village WITHOUT a cell tower). I can't find a place to live anymore and am currently stuck in 2.5 square meters (my kitchen). This isn't a life anymore. Well, I guess I'll have to sign "The Break-In. Death" after all. But actually, I didn't want to die just yet.

4490 – Anna HANSSON HEUER, Sweden – My mother struggled with EHS like so many others, this must be made visible, for all our children!

4491 – Sarah JOHANSSON, Sweden – Many people suffer from the harmful effects of radiation.

4492 – JD, France – I am chemically and electrically hypersensitive

4493 – Florence TIERS, France

4494 – IB, France – I am affected by all hypersensitivity pathologies with the consequence that my social and professional life has been blocked for more than 25 years.

4495 – IW, Sweden – Soon there is no one left who is not affected in some way. Birds, insects, pets, etc. and plants are dying and disappearing in ever greater quantities.

4496 – JL, Sweden – No one should be excluded from society, regardless of the hypersensitivity they suffer from.

4497 – Christian AUBERT, France – I am electrohypersensitive

4498 – SP, Sweden – Without measures, those affected will suffer greatly and there is plenty of research showing the detrimental effects of EMF on human health.

4499 – ER, France – Electromagnetic hypersensitivity (EHS) is a real, documented condition, supported by numerous scientists and physicians. Yet, and alarmingly, it is currently completely ignored by public authorities, both in terms of its recognition and the establishment of protective facilities for those affected. This is the public health scandal of the 21st century: just as with

asbestos, public authorities, the justice system, and wireless technology companies will have to answer for their responsibility regarding the harm inflicted. In the immediate term, the recognition and protection of EHS victims are the priority.

4500 – PL, Sweden – I've had tinnitus since 5G launched.

4501 – MM, France – My 27-year-old son is electrosensitive, which is a major obstacle to any activity (phones, antennas, Wi-Fi). I am also electrosensitive and do my shopping wearing a precious anti-radiation hat, but I avoid all gatherings of people because of their addiction to phones/miniature antennas.

4502 – Susanna RABERG, Sweden – May the truth prevail!

4503 – Philippe MATET, France – Everyone has the right to a healthy and non-pathogenic environment, and wireless technologies, neither indispensable nor irreplaceable, should not be allowed to destroy anyone's environment.

4504 – HB, ¨Belgium – I have a friend who is EHS.

4505 – Pip REYNOLDS, USA – 5G is lethal to all living things.

4506 – EDK, Netherlands – Since 2009, I have developed severe symptoms which, after 10 years, were found to be due to radiation. Over the years, my health has deteriorated considerably because of the radiation. It is only in a radiation-free zone that I am beginning to recover. One of my greatest wishes is to be able to live and work in a radiation-free zone, because at the moment, I am completely isolated from society and cannot participate in any activities.

4507 – TVE, Nederland – My sister suffers from it. And I too feel the effects of EMF radiation, but to a lesser extent.

4508 – WDK, Nederland – It's just a matter of time. (I want to support my sister).

4509 – CDK, Netherlands – Family owned by EHS. (A member of my family suffers from EHS).

4510 – CDK, Netherlands – My sister is very sensitive to electromagnetic radiation and suffers from many ailments.

4511- JD, Nederland – Some people are very sensitive to electromagnetic radiation. This is harmful to public health.

4512 – TVH, Nederland – I hear many stories of people who really suffer from the effects of electromagnetic raadiation.

4513 – STK, Nederland – Through this petition, I support my daughter-in-law's fight to be able to lead a normal life in a radiation-free environment.

4514 – KF, Germany – The health of men, animals and the environment must take precedence over technology, and EHS aspects must be taken into account.

4515 – EP, France – Hello, I am electrosensitive to electromagnetic radiation. I have physical problems. I had surgery on my left knee and am having difficulty recovering. I live in an old house with stairs. I have a lot of memory problems. I struggle to find my words, and I was also deceived by a company... The house has hidden defects. I received a prescription for a PET scan, but it takes a very long time. I received the blood test results yesterday.

4516 – EF, Belgium – I am electrosensitive

4517 – Alexandra NAOUOMFSKI, Belgium – I have a friend who is affected

4518 – EB, Belgium – I am familiar with electrosensitivity and I have friends who suffer terribly from it.

4519 – Thomas PIRE, Belgium – Scientific progress is not compatible with the survival of humanity and well-being.

4520 – Sonia NEEFS, Belgium – Courage Kristien, and let's hope they don't install 5G in your neighborhood now that you've had to leave Brussels.

4521 – Dominique BONNAL, France – I AM BEING HARASSED BY MY NEXT-HAND NEIGHBOR'S WIFI DAY AND NIGHT.

4522 – Christiane CAPPONE, France – I myself am a victim of electromagnetic radiation; I am practically in lockdown every day. But I am fortunate enough to know what is bad for me, which is why I am still alive.

4523 – OL, France – It is no longer possible to protect oneself, in addition to new technologies and hyperfrequencies, dirty electricity has become a nightmare in our homes, neighborhood pollution has become everyone's pollution.

4524 – JG, Belgium – A service between friends.

4525 – Amandine DUPUIS, France – suffering for 20 years from debilitating musculoskeletal disorders and recurring fatigue, I have just been diagnosed with EMF intolerance

4526 – Regina HAFFKE, Deutschland

4527 – DDM, Belgium – Vriendendienst

4528 – CB, France – In support of people with EHS

4529 – Szalapska MALGORZATA, Poland – I have two cell towers next to my house and I was hospitalized twice because of a high electromagnetic field. It increases my heart rate and causes heart pain. It affects coordination and causes brain pain.

4530 – SP, Luxembourg – Responding to the call of Electro-Hypersensitive people and denouncing this ignominy.

4531 – Mireille ROSSIGNOL, France – I sign the appeal for my health and freedom of choice;

4532 – FG, France – EHS

4533 – RM, USA – I am tired of myself and other innocent victims suffering without a voice, housing, and equal access to the rights that others without this disability often take for granted.

4534 – Elizabeth BRUN, France – Health scandal! They're not even applying the precautionary principle! Our poor children will have to suffer the consequences; everyone is affected because anyone can become electrosensitive...

4535 – PV, France – I am affected by electro-sensitivity.

4536 – CT, France – I have a friend who is affected, and I witness her distress and the real consequences of electromagnetic radiation on her life and health. I also think we are all affected.

4537 – Nathalie BLOSSIER, France – No response for treating eHs-MCs by the medical profession

4538 – Michael TAYLOR, UK – ENOUGH SUFFERING

4539 – JPV, France – I am electrosensitive

4540 – Else K. NORDHAGEN, Norway – I have moderate EHS, and since 2017 I have written several books and scientific articles on the topic, e.g., about self-referencing authorship behind the ICNIRP 2020 Guidelines, where the authors are behind 88% of the trusted literature they reference, including «independent» scientific reviews. This is not acceptable science!

4541 – Unni HOIVANG, Norway – I suffer from headaches, difficulty concentrating and tinnitus when there is too much pulsed electromagnetic radiation.

4542 – Tan IMOGEN, Australia – There is no alternative but to take action in this emergency!! As an aware and displaced EHS sufferer, I cannot witness this wanton destruction and disregard for ALL LIFE ON THIS PLANET without taking steps to halt it.

4543 – AB, Germany – I have long been interested in this issue and would myself like to have areas without mobile network coverage. The indifference of the competent authorities to this important matter must finally end; those affected must be helped as quickly as possible.

4544 – Fabrice LE VECHEN, France – Since 2009, tinnitus has been a part of my life, I don't know the exact causes, my ENT doctor hasn't found anything abnormal.

4545 – AT, Belgium – I am electro-hypersensitive.

4546 – LF, Belgium – It is also essential to take into account the unintended effects of our means of telecommunication, whether one is [already] EHS or not.

4547 – LG, Belgium – A friend is electrosensitive and is finding it difficult to cope with this situation in this ultra-connected (and disconnected from humanity) world.

4548 – CD, France – Life is in great danger.

4549 – Sandrine GIRON, France – I am electrosensitive, and it's debilitating. The health risks, the suffering I endure, some treatments are no longer accessible to me, nor are large cities. The anxiety of not being able to cope with going to the emergency room in an absolute emergency. The persistent fatigue; I'm in survival mode with a sword of Damocles hanging over my head. When will cancer or an autoimmune disease trigger? As for a social life, forget about it.

4550 – Melanie DUCAMP, Belgium – I am outraged by the systematic and irreversible degradation of our living conditions and by its repercussions on public health.

4551 – Laurent LIEVENS, Belgium

4552 – ML, Belgium – Out of solidarity with all people with EHS and because the precautionary principle should be a priority before generalizing the use of any new technology.

4553 – IS, Belgium – Because it is essential to take into account the opinion of all the specialists who have been warning about the dangers of electromagnetic radiation for many years and because we are all bombarded with waves that are harmful to our health as well as to the rest of the living world.

4554 – Simon BEUGNIES, Belgium – Some friends of mine suffer from electrosensitivity.

4555 – Thomas BECKER, Germany

4556 – Eduard MEßMER, Germany – Mobile telephony is part of an infrastructure that shapes our present and helps determine our future. However, just because it is useful does not mean that mobile telephony is without problems. Not everything that is technically possible is necessarily desirable from a social point of view. Not everything that is useful is necessarily safe. And not everything that remains invisible is necessarily without effect.

4557 – Marc LABYLLE, France

4558 – CR, UK – EMP needs to be investigated and addressed with proper, independent scientific research.

4559 – PR, Sweden –I don't feel good near 5G and Wi-Fi.

4560 – FG, Sweden- I am a victim of the harmful effects.

4561 – Ben Lake, UK

4562 – Martin DYMOCK, UK

4563 – Marie WINQVIST, Sweden – I am practically a prisoner. I live behind silver curtains because of my neighbors' Wi-Fi, which gives me dangerous heart arrhythmias. If I go outside, I have to make sure I know where the 5G masts are. If I come near one, I get very sick.

4564 – Helena SUNDT, SU7DE – A growing awareness that wireless radiation from mobile phones, antennas, and Wi-Fi-enabled computers is harming all life on planet Earth and must be given special attention and significantly reduced before irreversible damage occurs on Earth.

4565 – HS, Sweden – People get sick!

4566 – Ewa JARL, Sweden – I am a victim myself and I know how harmful electromagnetic fields are to your health!!

4567 – Sophie BEL, France

4568 – EE, Sweden

4569 – Jiminez Manrique, Spain – Forced exposure to EMF radiation is the most urgent concern of our time. (...)

4570 – JB, Sweden –The left has been facing this problem since the 1990s.

4571 – Mikhail Y. Leu, Taiwan – Learn more about this issue. (Learn more about this topic)

4572 – Ann BRODIN THORSSON, Sweden – I am concerned myself.

4573 – Nina PALSTAM, Sweden – The fact that this case has been swept under the rug is worrying .

4574 – FI, France

4575 – Olga DARIC née JURIC, France – I have been a victim since the «Linky» smart meter was installed in my building in December 2018 without permission or a vote. It's a low-income housing building from 1968. My studio apartment is 23 square meters. On the landing, there are three «Linky» smart meters, just two meters from my bed! My problem: ringing in my ears and headaches. I've never had a cell phone because of this sensitivity. My computer has a wired internet connection. No TV!

4576 – CL, France – I am electrohypersensitive and multi-chemically sensitive....

4577 – Juan Jose ZARAGOZA, Belgium – Solidarity

4578 – Christian HUBERT, Belgium – As a bio-electrician, I am convinced of the need to take action for electrosensitive people.

4579 – PF, Netherlands

4580 – AM, France – EHS support

4581 – CMM, Spain – I am electrosensitive, I offer you my full support.

4582 – Eli Eledina GORGULLO RIVERA, Spain – I'm electrohypersensitive and I'm going through hell.

4583 – Anne FONTAINE, Belgium – For a habitable future!

4584 – Linda CLARINI, France – Hello, I sign because I have been suffering from this since 2020 and I have lost everything because of this disability, I am homeless and trying to rebuild a decent life (recognized as EHS in April 2025).

4585 – RM, Canada – I have EMF sensitivity and cannot maintain a quality of life in my country.

4586 – SRW, USA – I am disabled with an eye sight disease.

4587 – Olivier JOBIN, France – I have had fibromyalgia for 20 years. A specialist came to ensure that my future house has shielded electrical wiring. I don't have Wi-Fi, only Ethernet, and no smart meter. However, my future house will have a smart meter inside. To have the smart meter outside, I would have to pay Enedis €3,000. No smart meter in my modest home, no 5G. I am a member of the association (...) I have Schermann's disease, gastric reflux, and an OB (obstructive sleep apnea).

4588 – JF, France – Our health is in danger caused by this magnetic radiation.

4589 – SP, France – I sign this appeal because I am electrosensitive and can no longer tolerate this hyper-connected world. I have been constantly ill since the development of these 5G antennas, whereas before I was fine... headaches, tinnitus, vertigo, brain fog, difficulty concentrating, repeated vomiting, memory loss, abnormal weight gain, a metallic taste in my mouth, etc. I have difficulty tolerating LED lighting, bright lights, and using any computer or phone. I cannot stand city noise, and I experience extreme fatigue, exhaustion, and heart palpitations... the list goes on. I love nature and living things, and I want to move elsewhere very soon. We urgently need protection in areas without coverage.

4590 – AK, France – I sign in support of people with electromagnetic hypersensitivity and for the health of all.

4591 – AR, Sweden - I am EMP

4592 – Torkel ATERBOM, Sweden – I am EMP

4593 – SK, Sweden- I am exposed to electromagnetic radiation and I support this fight...

4594 – KC, Netherlands – I myself have felt the effects that electromagnetic radiation can have on my nervous system.

4595 – ML, France – Because I am one of them...

4596 – AM, France – I stand in solidarity.

4597 – Valerie SANFILIPP, USA – I get afib from wifi.

4598 – Anne THALER, France – I am very aware of the implications of this problem.

4599 – TW, United States

4600 – DL, France – Read «The Invisible Rainbow» by Arthur Firstenberg. And you will understand why – among other things – the world is in such a bad way.

4601 – AB, France – So that the impact of electromagnetic radiation is truly recognized and taken into account

4602 – LT, Canada – Two friends are highly sensitive

4603 – Edwin DE ROODEN, Netherlands – For 5 years, I have suffered from all types of radiation: Wi-Fi, Bluetooth, LED lamps, electric cars, telephone, and the electrical network inside my house. I feel and sense this radiation.

4604 – RB, Nederland – I have problems at home. The floor seems to be under tension. I can't walk in orthopedic shoes.

4605 – MVD, Nederland – The last time this happened, the last time it came, it was the last time I said it. (As this disease causes me a lot of suffering, I think it needs to be remedied.)

4606 – CG, UK – I know so many people who are directly affected! We're all exposed, and some communities across the world are more affected than others. For our sakes, the exposure should be zero! Not to mention all the wildlife that also suffers but can't speak out against the harm inflicted on all of humanity!

4607 – Gene MITCHELL, USA – I have disabling IEI/EHS/MCS. It caused my 2022 Heart Attack. I told them at the ER no metal and I could not take medications without severe side effects, they dismissed my concerns and stuck a piece of metal in my chest and prescribed 7 medications, 6 of them I could not take. I have lived in my van for over 8 years in an effort to avoid emf's and other triggers. I have over 20 symptoms including Microwave Hearing. The medical system has called me crazy and paranoid, while dismissing evidence presented to them.

4608 - Françoise GRANDJEAN, France – For the past two years, I have developed electro-hypersensitivity due to Wi-Fi, which, in a house very well insulated by its thick walls, reached 4V/m daily. I was already sensitive to electricity before, but it wasn't debilitating.

4609 – Helga BAKER, Usa – I am seriously affected by ELECRTO MAGNETIC HYPERSENSITIVITY. It is debilitating for me. The medical system here in the States does NOT acknowledge the fact that this is a real condition. They just want to prescribe anti-depressant and anti-anxiety medications to the victims. This EHS is a real problem for me and many like me. It is 24 hour a day torture! Please help!

4610 – BG, France – I am currently in this situation(...)

4611 – Christina, Belgium – The digital world, radiation, etc., monopolize space. They leave no room for «EMP» lives, nor for people who are still just biological organisms. This seems almost deliberate?

4612 – Fanny VINET, Belgium – We should take into consideration the effects of this pollution and take action now.

4613 – BMAZ, Ecuador – Exposure to electromagnetic radiation is increasingly affecting more and more people, whether they are hypersensitive or not.

4614 – Serge LABBEYE, France – They are slowly roasting us alive. Stop the proliferation of antennas, stop the satellite emissions that are never discussed.

4615 – NG, Spain – I am aware of the impact of EMFs on living beings and their consequences.

4616 – Baptiste Hugnet, France – I am electrosensitive and it is high time these crimes stopped.

4617 – PF, Portugal – In my work as a geobiology consultant, I help people with and without EHS achieve a healthy sleeping environment. I'm familiar with several such cases, and I fully support this alert and the continued action.

4618 – SD, Switzerland – I have to move due to health problems caused by 3 5G antennas located less than 150m away. (One on the roof of my building, about 7m above my apartment.)

4619 – Monika NEUENHAUS, Brazil – I am highly electromagnetic hypersensitivity (even though I understand that this term needs to be changed, I will use it). Thank you for this initiative.

4620 – KN, Brazil – It is extremely urgent that people with EHS be seen and included in society, not only to protect them, but also to protect all of humanity from the harmful effects of radiation.

4621 – Chris BAUM, Switzerland – Who will take responsibility for this unnecessary suffering?

4622 – LN, Brazil – Tenho uma irmã eletrosensível. (I have an electrosensitive sister.)

4623 – JCFD, Brazil – I agree.

4624 – RS, France – have become highly electrosensitive over time. In a society that demonstrates a complete lack of sensitivity and carelessness in this regard, a change of mentality is essential, especially as the harmful effects of 5G, 6G, and subsequent generations continue to increase.

4625 – Peter Bayer, Germany – I myself suffer from EHS and am increasingly affected. GSM, Wi-Fi, Bluetooth, ...

4626 – Deanna MUNSON, USA – I have smartmeter-induced EHS/MCS since 2011. I left home and now have nowhere to live. No agency will assist me in finding safe housing. I am now bedridden and crippled under high-voltage power lines in a trailer. I cannot tolerate plugging in, so there is no hot water, bathing, refrigeration, cooking, or adequate heat because I didn't qualify to have my smartmeter removed before permanent damage or to live in a safe place without neighbors, Wi-Fi, powerline communications, smartmeters, etc. So I am dying fast from continuous additions to the network with no limits to these technologies. Natural living is now banned.

4627 – CSJ, Spain – I am EHS.

4628 – JDJ, Spain – My health is affected by electromagnetic radiation.

4629 – NT, Spain – To raise public awareness of the effects of radiation on technology and their consequences on health.

4630 – JJ, Spain – I hope it works.

4631 – MB, France – They installed 10 state-of-the-art antennas on the roof of my building in the St. Assiscle residence, Les 4 Cazals, Perpignan.

4632 – Brigitte SAUVAGE, Belgium – I am electro-hypersensitive and feel the harm that this radiation does to us; it's torture! What's unfortunate is that those who feel nothing believe it doesn't affect them! What a mistake! Furthermore, all this radiation is being deployed for a bad cause!

4633 – Philippe DUBERN, France

4634 – JB, France

4635 – FF, France – Life will disappear.

4636 – GM, Canada – Humanity is in danger

4637 – AC, France

4638 – Susanna GROESZ, Belgium –I can't go anywhere anymore, I want to live in a healthy, radiation-free environment so that I too can feel good. Because I worry about young people who don't know what's happening to them, but who will have to pay the price when the world is so saturated with radiation that it will no longer be habitable.

4639 – Stephane DUCHE, France – I feel abandoned in the search for housing and a life of dignity.

4640 – NN, Norway – I am electro-sensitive.

4641 – IB, Germany

4642 – CG, France

4643 – LC, UK – The earth is dying and all life on it.

4644 – Thyphaine ROMEO DE LOUVIGNY, France – I am EHS classified MDPH, and my access to certain places flooded with Wifi is very problematic, if not an ordeal.

4645 – IS, France – I hear the hissing of radiation : it's not tinnitus. I'm against the deployment of military technology among the population; 3G was already quite sufficient.

4646 – IdW, Nederland – Because of EHS, I lost everything: my job, my relationship, my family, my health, etc., etc.

4647 – BL, France – I am a victim of this.

4648 – KG, UK – Mobile phones and wireless (or even being near our router, which is wired with Ethernet cables) cause an ache or pain that can last for hours. Even holding a phone while receiving a text message sends pain up my arm that continues for hours.

4649 – Rira KORNBERG, Norway – I myself am very sensitive to electromagnetic fields and I wish to find a safe place to live, which is impossible at the moment.

4650 – Peter JOHANSSON, Sweden – The precautionary principle should always be applied to anything that could be harmful over time!

4651 – MP, France – My brother Jean-Pierre has been suffering from electromagnetic hypersensitivity (EHS) for seven years and could no longer work at his job. It started with two suicide attempts, which resulted in hospitalization both times and subsequent disability benefits. Since then, things have only worsened, until he started sleeping in his car in the forest. His car, a 2001 model, had fewer electronic devices, and he would put it in a «white zone» (a safe, unsafe area) because it was becoming impossible to live at home. Tensions rose at home, as his family refused to accept his condition and the decision to cut off all electronics. Over the years, he lost the ability to walk, was constantly exhausted, and life became unbearable. He would tell me on the phone that he wanted to end it all but didn't want to suffer, end up in the hospital, or be left disabled for life. I tried to reason with him as best I could, and he was in tears on the phone. He told me that all the doctors were making fun of him, both at the hospital and his primary care physicians, because one was retiring, another was moving to a different region... and they kept saying, "We're not going back to the Stone Age for you," so he felt isolated. As time went on, he stopped visiting his extended family because he knew very well that no one would turn off his cell phone or disconnect the Wi-Fi and all the other distractions he was experiencing. Finally, on the evening of Monday, August 31, 2026, his wife received a call from the Gendarmerie (French National Police) telling them what shoes he was wearing and the color of his t-shirt because, unfortunately, his face was badly disfigured, as he had just jumped from the Pont de la Caille suspension bridge in Haute-Savoie, the highest bridge in the world at 147 meters. My brother knew that the next day, work was going to begin there to prevent anyone from ever committing suicide again. Cremation this Saturday, September 12, 2026.

4652 – FM, France – Public health concerns everyone.

4653 – AL, Sweden – Current topic.
