A Report on Non-Ionizing Radiation

Carpenter, Neutra and Wartenberg Argue for Precaution

January 19, 2007

Three senior members of the public health community —each with extensive experience with EMF health research— have called for precautionary policies to limit leukemia risks to children. At a public hearing convened by the Connecticut Siting Council (CSC) on January 9, David Carpenter, Raymond Neutra and Daniel Wartenberg testified in support of prudent avoidance, as advocated by the Connecticut Department of Public Health (DPH).

Read our special report on the Connecticut hearing, with extended excerpts from Carpenter, Neutra and Wartenberg's prepared testimony. (See also our previous coverage of Connecticut's efforts to establish a state EMF policy.)
