Karen Rex, Silicon Valley Security Whistleblower: US Army Base in Florida Threatens National Security

Posted on September 17, 2019 by Ramola D | 2 comments

Report | Karen Rex | 9/17/2019

The US Army is known for telling its recruits to be "Army Strong" ironically the Army is strong in violating our National Security. New technologies created by the Pentagon's Brain, DARPA, have new weapons to use on US citizens on US soil apparently!

Image from https://spectrum.ieee.org/

The Army is currently targeting Americans on the very soil they are ordered to protect.

Karen Rex and Justin Pitts

Former **Army Ranger Justin Pitts** was attacked by non-lethal weapons by the **US Army's Program Executive Office Simulation, Training, and Instrumentation (PEO STRI).** They are located at 12211 Science Drive, Orlando, FL 32826. Justin was a personal friend, we were both what is termed Targeted Individuals. This is a new program run by our government. If you are unlucky enough to be put in this program, your life as you knew it will NEVER be the same.

Electromagnetic Frequency (EMF) and Cyber Operations

The US Army in this case is running what they have labeled **Electromagnetic Frequency (EMF) Warfare and Cyber Operations.** The Army is using the PEO STRI to run simulations that control a target's electronics, including his or her actual mind and body. The carrier EMF signals have the ability to send voices to your head that only you hear, termed Microwave Acoustic Hearing. The technology is so advanced that you can have EMF signals sent directly to your brain changing your mood. The technology causes all kinds of life-changing problems for those attacked.

US Army Ranger Justin Pitts

Justin and I met on YouTube. He was a kind, skinny, short southern Army Ranger that was targeted during his last year as a recruiter for the military. While he was still Active-Duty, the Army base in Orlando, FL started targeting him. Justin started hearing voices receiving Synthetic Telepathy. This is not too different to my targeting; however, Justin could not keep weight on his body. He was constantly eating junk food. Justin also had severe EMF attacks where his entire body would shake. His targeting increased when he, through

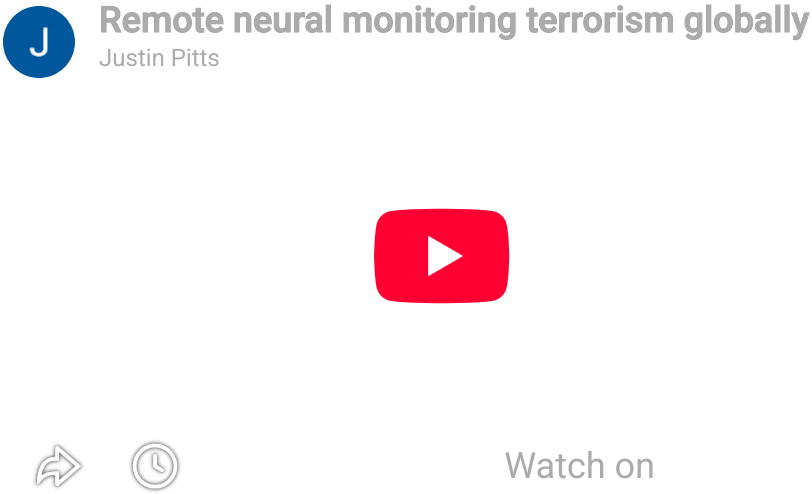

microwave hearing, heard someone blow their nose into a trash can while he was not at work. This gesture is common among military men. He had heard the guys at the recruiting office make that noise before and identified it. This was the first time he realized that someone had tapped into his brain. Justin's targeting would start to escalate at that time.

We decided to take our information and put it together to figure out a way to help expose the targeting of US citizens. We knew these were crimes against humanity not unlike the Nazi treatment of anyone they deemed unfit. These non-lethal weapons were designed in the last 40 years. Justin and I interviewed on YouTube to get information out about how individuals are targeted.

Cyber Reconnaisance (Karen Rex) and Justin Pitts (Due Hass) Interviewed by Nexx Level

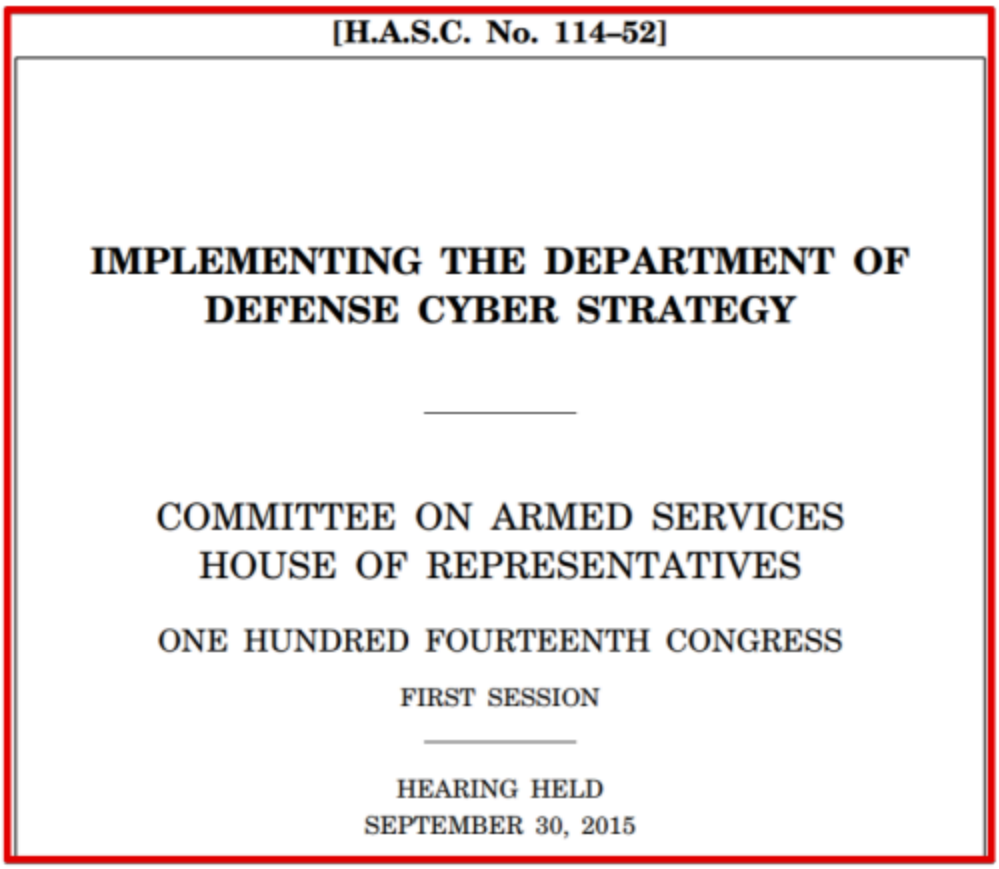

Justin was targeted with gang stalking. He had military helicopters and planes fly over his home in South Carolina. Justin was smart and had the ability to review the Army's Cyberspace and EMF Operations FM 3-12 Manual that is available online. Justin's targeting would continue and his hearing one person turned into a classroom of Army soldiers exchanging paperwork and talking. He would be in his home and hear the classroom become animated. He saw cars drive into his neighborhood with Florida license plates at this time. Justin continued to also be targeted throughout his body with electromagnetic-frequency-attacking causing him to shake uncontrollably. No matter how much they attacked Justin, he continued to fight back going up the Army's chain of command to expose the National Security violations.

Justin Pitts in his own words, September 5, 2018, at his Youtube channel

Targeting Individuals Threatens National Security and Abuses the Security Clearance System

The targeting of the individuals threatens National Security and abuses the security clearance system. The Army is also committing treason, murder, cyber espionage, human trafficking, violating children's online privacy act (COPPA).

[H.A.S.C. No. 114–52]

IMPLEMENTING THE DEPARTMENT OF DEFENSE CYBER STRATEGY

COMMITTEE ON ARMED SERVICES
HOUSE OF REPRESENTATIVES

ONE HUNDRED FOURTEENTH CONGRESS

FIRST SESSION

HEARING HELD
SEPTEMBER 30, 2015

https://fas.org/irp/congress/2015_hr/dod-cyber.pdf

The Congressional hearing dated September 30, 2015 stated that definition of cyber included "emerging technologies, drones, nanotechnology, and a slew of other technologies which the term cyber is inadequate to define." This is true and is why Targeted Individuals have a hard time trying to explain what is going on with them. Targeted Individuals will be labelled a psychological dysfunction by uneducated citizens. However, these crimes are really happening.

Justin was able to start to file complaints with numerous military and intelligence agencies. He went up the Army's chain of command and this went nowhere. Then, he was harassed by the military planes in his neighborhood, so Justin filed a report with the Oconee County, South Carolina Sheriff's Department. This was not enough to stop the program. Justin went to US Army Special Operations and Military Police to file complaints. However, people including military and intelligence agents do not know about technologies torturing US citizens on US soil. This is by the very definition ***treason***, *punishable by death*.

Justin then was clever enough to start recording phone conversations when he filed complaints. His perpetrators told him where they lived and their names. Justin had one of them come near him. This perpetrator told Justin his name over the Acoustic Microwave Hearing from the base in Florida. The man's name is Joshua Pierce, Sergeant 1st Class, Non-Commission Officer. This perpetrator had a complaint filed by Justin to the FBI.

Justin contacted the NSA and filed a report with them since the Army was violating National Security with the Cyber and Electromagnetic Warfare tools at their disposal. Next, he contacted an UN journalist and NATO's biomedical military command.

Justin talked with Presidential correspondents, however, he could never get his computer secure enough to send the information to the White House. Finally, when all these attempts to stop the targeting did not succeed, he went to Washington, DC. Justin tried to have Congress listen as well as the Pentagon. Unfortunately, this technology is so powerful that people at all levels are mind controlled with electromagnetic frequencies. Functional MRIs are also used to read and change people's thoughts and minds.

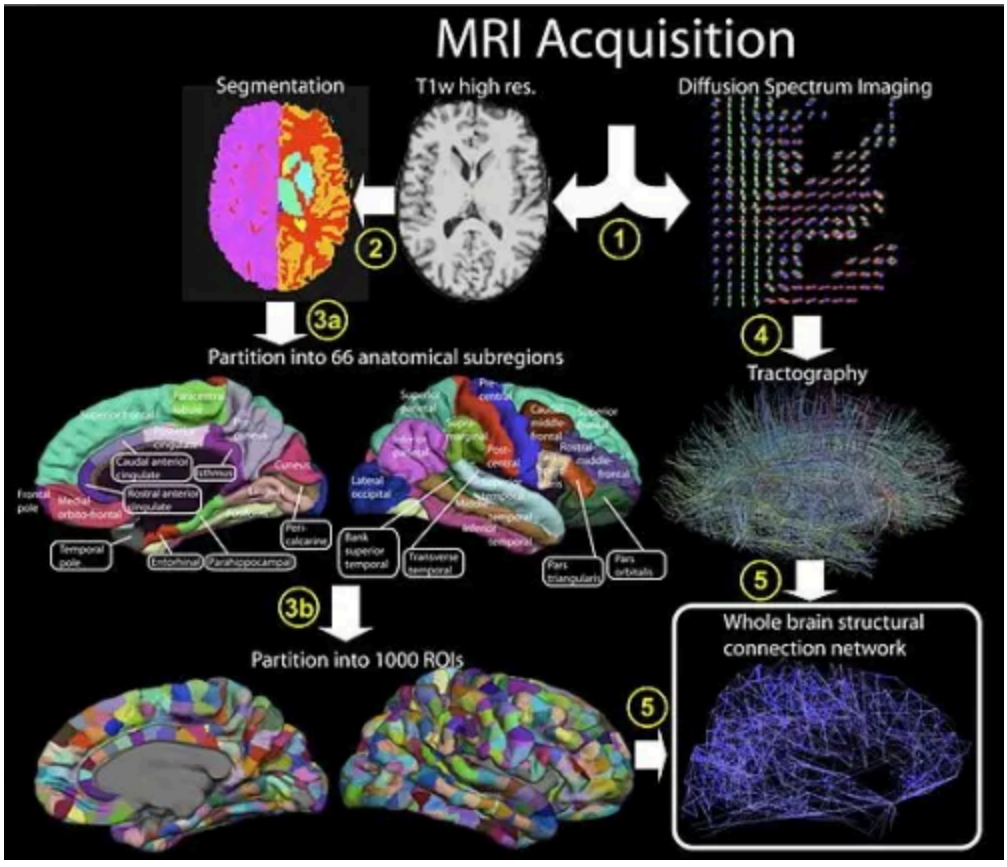

Image from https://derinstrateji.wordpress.com/

Our world is no longer a free will society. We can be mind controlled without our knowledge at anytime. That is how truly powerful these weapons are becoming. All of Justin's complaints fell on deaf ears, and he started to become very depressed. I did not see Justin at that time. If he was feeling that way it was probably an inserted frequency and not actual depression.

In December 2018 around Christmas, Justin supposedly took his own life; I do not believe that to be true. I cannot believe it when the soldiers at the US Army Base in Orlando, FL have the power to insert frequencies to make you feel how they wish. It is extremely unfortunate that I lost my friend, but he has left us the ability to stop the PEO STRI**.** This base is threatening our National Security by causing a substantial and specific danger to public health and safety. This is one of thousands of crimes they commit hiding behind a security clearance that needs revocation. We can together stop this base from taking all Americans' free will. The 5G network will only enhance the crimes they are already commit daily. The PEO STRI is abusing their authority, causing gross mismanagement of military assets and wasting taxpayer funds.

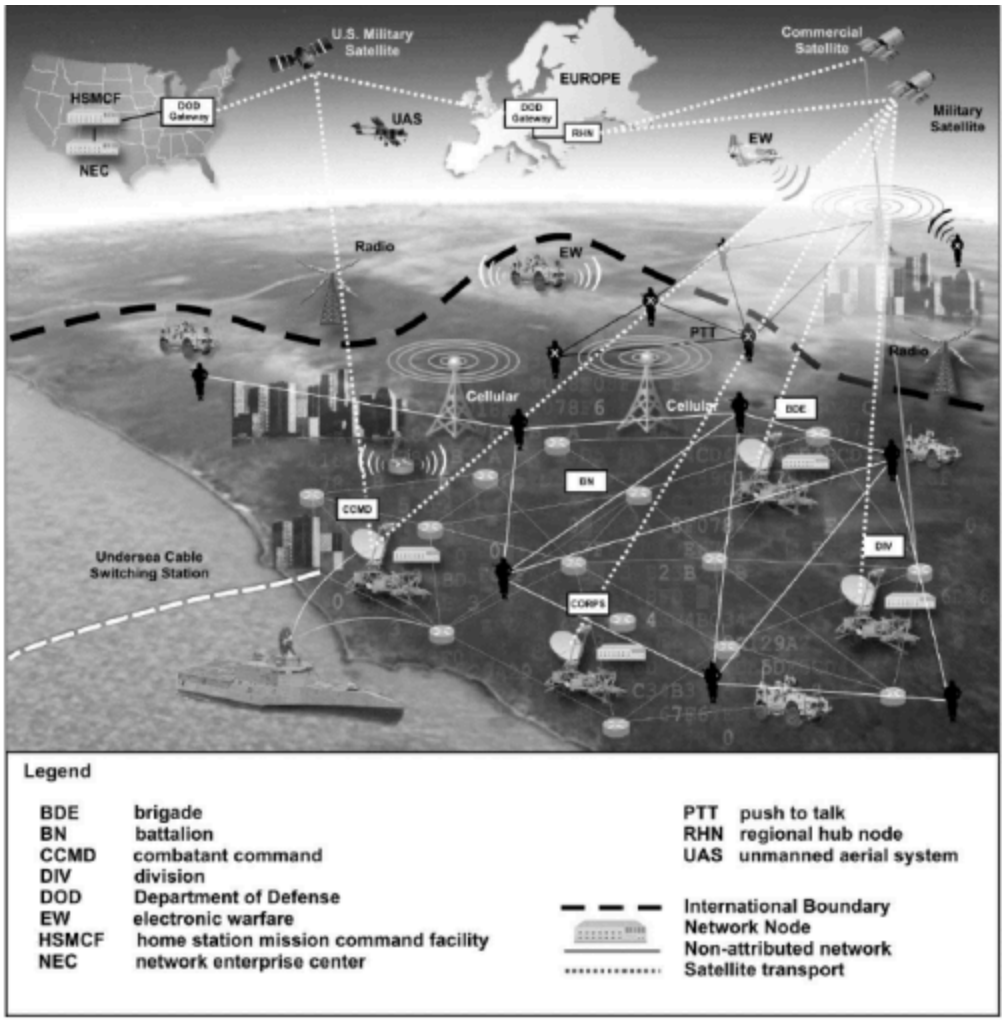

Figure 1-1. Visualization of cyberspace and the electromagnetic spectrum in an operationa environment

Image from FM 3-12 Cyberspace and Electronic Warfare Operations

Mainly, I am bothered by the children that they can essentially mind control to do whatever they wish. This is a sick form of pedophilia, and these soldiers are criminals. The amount of people under the treasonous Cyber and Electromagnetic Warfare will continue to increase. Thus, more citizens will become human experiment test subjects without consent.

Neuroweapons kill US Veterans at a staggering amount daily. These programs are murdering good people as they come back from war. We must join together and support Targeted Individuals notifying Congressional Representatives. We can also fight back by filing FOIA Requests for the US Army's PEO STRI program, alerting Inspector General offices, and Civil Liberties offices everywhere.

Image from http://paintbottle.com/brave-new-world-movie.html

We must not turn a blind eye to our enslavement. No matter who is in political office or where you are, you will not have free will to go and choose what you want in life. Our children deserve their innocence and freedom. America's children deserve protection even if you choose to be complacent, what about the children of our nation and the entire world? Please, if you do not understand the technologies, try to, for our nation is at stake in a major way.

> We must always remember what Thomas Jefferson stated, "Does the government fear us? Or do we fear the government? When the people fear the government tyranny has found victory. The federal government is our servant and not our master!"

> ***Karen Rex*** *describes herself as a Targeted Individual and former Security Operations Manager and contractor with Lockheed Martin. An Accountant & Business Information Associate with degrees from De Anza College in Silicon Valley, Karen has 15 years' experience as Construction Financial Controller and Software Migration Engineer in the Bay Area. A whistle-blower of Cyber Espionage in 2015, she is currently a Whistle-blower of the Targeted Individual Program being run by the US Army.*

Once Again, A Memo to President Trump: Massive Surveillance State Abuses | Treason on the Ground, in the USA: Public-Private Partners in Targeted Killing of Americans

Many thanks to Karen Rex for her article and information on unlawful targeting operations and disclosure as related to Remote Neural Monitoring Terrorism activities from an US Army base, as reported by late US Army Ranger Justin Pitts, and the broad framework of Cyberwarfare and Electronic Warfare operations within which they are putatively conducted. Many thanks also to Justin Pitts for his many commendable efforts to

report these crimes to both government agencies and the public–Rest in Power, Justin. Many thanks to Nexx Level for conducting that video interview with Karen and Justin at an important time. This article will be followed up soon with further discussion and analysis, including focus on related targeting technologies reported by those targeted as well as by government and military whistleblowers.

New Security Operations Lockheed Whistleblower Reveals National Security Violations, Treason, and Public Safety Endangerment via Electronic Weapons Simulation & Experimentation Programs from Orlando US Army Base

Posted on September 16, 2019 by Ramola D | 4 comments

—Ramola D/Posted 9/16/2019

A former Security Operations manager and Lockheed contractor has stepped forward to whistleblow on national security violations, treason against American citizens, and hazards to public safety engendered by abusive Electronic Warfare weaponry use on targeted Americans by a US Army operation named **Program Executive Office Simulation, Training, and Instrumentation (PEO)(STRI)** operating out of an **Army base in Orlando, Florida.**

PROGRAM EXECUTIVE OFFICE SIMULATION, TRAINING AND INSTRUMENTATION | http://www.ndia-cfl.org/wp-content/uploads/2019/05/NDIA-Briefing-No-Notes_23-May.pdf

Working currently on sending FOIA requests and letters of information to various offices such as the OIG and ODNI as well as civil liberties organizations, Cyber Reconnaisance (Karen) wrote recently to the Pentagon Security Clearance Review team, requesting that the military base be reviewed for violations of security clearance and national security (letter below).

> *" They are committing treason, human trafficking, murder, cyber espionage, and violating children's online privacy act (COPPA). The other violations are abuse of authority, gross mismanagement, gross waste of funds, and putting national security at risk.*
>
> *These soldiers are targeting US citizens including children on US soil. These crimes use electronic warfare, electronic harassment, EMF non-lethal weapons, and microwave acoustic weapons to target US citizens on US soil."*

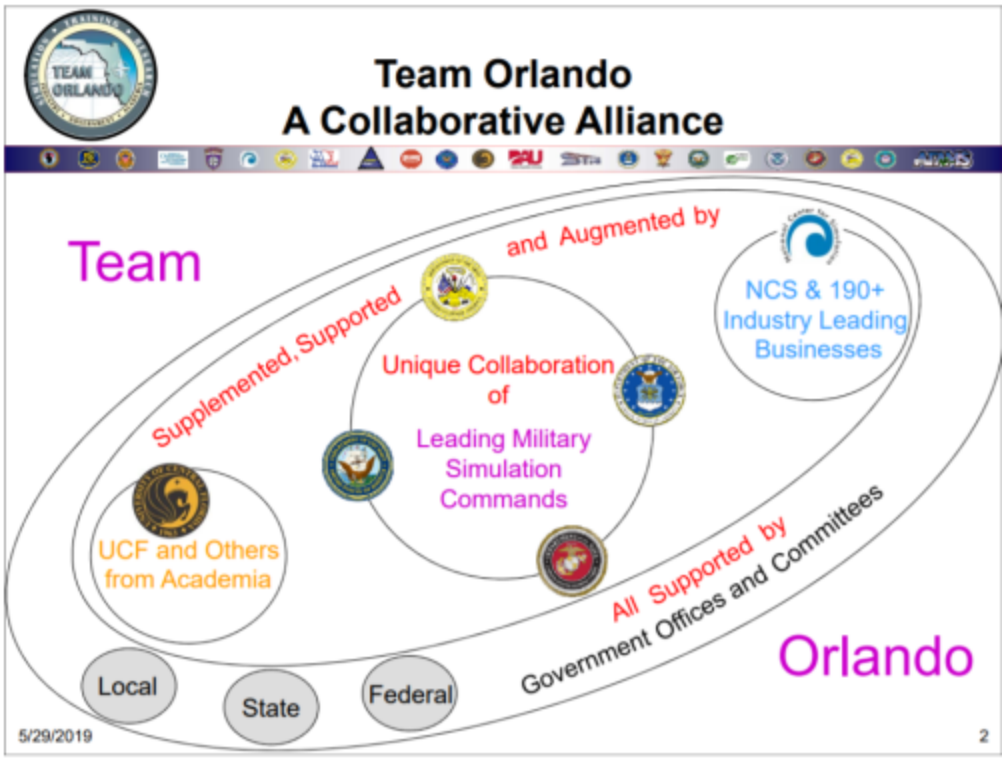

The base itself had been identified by late **US Army Ranger Justin Pitts,** a friend of Karen's who had reported that he was told as much by soldiers who worked there.

> *"The soldiers there have been located by violating their security clearance and alerting citizens they are using for experimentation who they are and where they are."*

Justin Pitts had made efforts to report violations of security clearance and abusive experimentation on Americans, going up the chain of command as per his Army training.

> *"Justin made a complaint to the US Army Special Operations, Military Police, Oconee County South Carolina Sheriffs Department, FBI, Pentagon, NSA, NATO, UN, and presidential correspondence. He warned all appropriate parties going up the correct chain of command for the US Army and the intelligence agencies."*

His death one month later, in December 2018, was reported as a suicide, but those today being targeted with radio frequency weapons know that neural and emotion manipulation can be achieved with this neuroweaponry and may have been responsible, as Karen surmises. (More needs to be investigated here.)

PROGRAM EXECUTIVE OFFICE SIMULATION, TRAINING AND INSTRUMENTATION | http://www.ndia-cfl.org/wp-content/uploads/2019/05/NDIA-Briefing-No-Notes_23-May.pdf

Aware that national security is being violated and public safety endangered by the use of these weapons and trafficking operations on citizens and their children, Karen is seeking to expose these crimes, and alerting military and Intelligence authorities of the great harm to Americans.

Illicit Military Experimentation and Weapons-Tests Targets Individuals

One more piece in the puzzle regarding illicit, non-consensual human experimentation and weapons-testing by Military/Intelligence divisions and agencies with the stealth weapons of Electronic Warfare, which was recently highlighted in this second Memorandum to President Trump by this writer, and endorsed by NSA whistleblower Karen Stewart, this story will be further investigated at Ramola D Reports shortly.

US military and federal security clearance reviews were shifted to the Department of Defense last year from the Office of Personnel Management apparently after Edward Snowden and Chelsea/Bradley Manning's disclosures of classified documents prompted interest in periodic criminal and financial background checks of cleared personnel and backlogs of 700, 000 applications were noticed, according to the Associated Press.

Karen's letter to the Pentagon is below. Many thanks to Cyber Reconnaisance (Karen) for disclosing this matter and stepping forward to whistleblow on these crimes against humanity and Americans.

Subject: US Army PEO STRI National Security & Security Clearance Violations
Date: September 16, 2019 at 12:17 AM
To: whs.pentagon.esd.mbx.secrev@mail.mil

Dear Security Clearance Review Team,

I am a former Security operations manager that worked with Lockheed Martin in Sunnyvale, CA. It has come to my attention that the US Army base located at 12211 Science Drive, Orlando, FL 32826 is abusing the security clearance system and violating national security. My friend and US Army Ranger, Justin Pitts, was murdered in Newry, SC by the soldiers that told them they worked in Orlando, FL in December of 2018. This base operation named Program Executive Office Simulation, Training, and Instrumentation (PEO) (STRI) is a substantial and specific danger to public health and safety.

The soldiers there have been located by violating their security clearance and alerting citizens they are using for experimentation who they are and where they are. I am requesting that this base have it's current programs reviewed for security clearance and national security violations. They are committing treason, human trafficking, murder, cyber espionage, and violating children's online privacy act (COPPA). The other violations are abuse of authority, gross mismanagement, gross waste of funds, and putting national security at risk.

These soldiers are targeting US citizens including children on US soil. These crimes use electronic warfare, electronic harassment, EMF non-lethal weapons, and microwave acoustic weapons to target US citizens on US soil. If we do not expose this immediately my fear is that more US citizens will be exposed and possibly used as human experiment test subjects against their will. Please, investigate these programs and help stop them from committing violations against our National Security and abuse to security clearance system.

National security is at stake if no one exposes these new cyber, neurological, and microwave acoustic non-lethal weapons that are currently being used on US soil. Justin made a complaint to the US Army Special Operations, Military Police, Oconee County South Carolina Sheriffs Department, FBI, Pentagon, NSA, NATO, UN, and presidential correspondence. He warned all appropriate parties going up the correct chain of command for the US Army and the intelligence agencies. Please, review all documentation regarding Justin's complaints against this base and its soldiers.

I worked in Silicon Valley and ruined my career trying to expose these crimes. I would be happy to give you any other additional information you need to help you in your investigation. I have video, audio, and other documentation. I have sent a FOIA request on the US Army base and the PEO STRI.

I fear that the request will not reach the US Army FOIA office in Ft. Belvior, VA due to my computer web security being totally compromised.

I would like to help in anyway possible due to the fact that Justin is dead. I am making FOIA requests, and notifying the

Inspector Generals and civil liberties offices trying to expose these crimes myself.

Your time and attention is greatly needed to address the national security violations and abuse to the security clearance system.

Thank you,

Cyber Reconnaissance (Karen)
