MY NEIGHBORS AND ANIMALS ARE DYING

I am SICK. My family members have been SICK SINCE more than a hundred UNREGULATED TOWERS WENT LIVE over our community.

This has been a challenge for me to get anyone to help in my community. I wanted to share my story in hopes of helping others. My story is one of many in Terrebonne Parish. After multiple (9) 300-foot 5G towers were put over our homes, four 300-foot 5G towers were put over my home and animal sanctuary, and four 300-foot towers were put over my office. At the same time, smart meters were put on my home, along with those of every other Entergy customer.

I began getting sick, very sick. It began in my petting area with heart palpitations, headaches, vomiting, ringing in my ears, confusion, bleeding gums, insomnia, nightmares, dizziness, anxiety, ears buzzing 24 hours a day, severe fatigue, muscle weakness, and more. I have now been diagnosed with radiation syndrome / EHS (electromagnetic hypersensitivity syndrome) caused by extreme exposure to radiation. Many residents are experiencing similar symptoms. Countless children are now suffering.

Being a very healthy person my whole life, this has been a life-changing situation. I am usually the one helping others; now I need your help. I never thought this could happen until I was forced to face it by becoming sick. I'm not sure where this illness will take me. However, I must do all I can to protect my family and my community. Seven neighbors on my street and friends have died after the towers went live over their homes. Many other residents are also sick.

My community is surrounded by towers that have no regulatory testing information, nor does our planning department ask for it, citing the FCC's outdated RF radiation guidelines. I became certified in RF radiation testing. I now test the towers and smart meters. I can confirm that the EMF (electromagnetic frequency) / RF (radio frequency) radiation being emitted is extreme for every single product, tower, and smart device I have tested.

It has been a fight to protect my family, my community, and myself, with EVERYONE CITING THE FCC'S OUTDATED RF RADIATION GUIDELINES. I had to learn all I could about this to protect my health and theirs. I've had to turn my home, where I have lived for 28 years, into an EMF-safe house (until I sell it), as well as my barn, which is surrounded by EMF material and protection. My bed is covered with EMF protection as well due to the radiation levels in my home. I now have to wear protective clothing all day. Leaving my safe area means becoming exposed due to the unbridled towers around me.

I am a very private person. This is not easy to share, but if I do not ask for help now, many more innocent people will be sick, or they will die like my neighbors, my friends, and my animals.

Since the towers went live, six of my horses have died instantly under the towers. All of my little animals have died. My 200-pound tortoises started going blind.

I'm not sure where the daily radiation exposure will take me, so I thought now is the best time to ask for your help in making a change.

THE FCC MUST REGULATE THE RADIATION, OR THE DEATH & DESTRUCTION WILL NEVER END.

Technology is safe only if it is REGULATED.

Always,
Shari Champagne
