To whom this concerns:

The infringement of wi fi exposures has completely changed my life from a normal out door, communicating living to complete seclusion in my home.

I cannot go to the doctor, grocery store, movie house, shopping, visit a hospital, travel, the beach, the dentist, nothing. I had to go out to a more remote area of suburb to be in a house.

It causes severe dizziness, muscle spasms inability to think, and complete collapse to where I am bedridden.

First it was just cell phones, now it includes computers and different electronic items you can buy. It is getting worse and needs to be reduced substantially, unless you want us to die.

Wake up and correct this situation before its too late, before we die.

Sincerely
