Dear FCC,

Re: Docket 19-226

I am writing as a mother and grandmother to tell you to please stop NOW with your implementation and activation of 5G. You have not had any studies done for biological harm on 2G, 3G & 4G yet you cling to "the long-outdated notion that the only impact of exposure is "thermal" (heating of human tissue), despite thousands of published, peer-reviewed studies showing biological harm at non-thermal levels for various frequency ranges." Telecom companies have not done a study for biological or environmental harm. The **non-industry** peer-reviewed studies show there is harm below the level of "thermal" exposure."

The ultra high frequencies being considered here from 5G may also interfere with the natural world in ways we don't yet understand. We already know that lower frequencies do great harm. Now you want to put 5G everywhere, and those, like me who are sensitive will have nowhere to go and be safe and neither will you. You have made no special considerations for pregnant women, children, the elderly, those with chronic illness or those who are electrosensitive, like me. This is a very dangerous proposition and you must stop now and wait until real studies are completed by scientists and physicians unrelated to the telecom industry, not engineers and physicists who have no understanding of the biological world and its needs. Our lives are in your hands. Please use the precautionary principle, stop and wait for confirmation of its safety before proceeding.
