To Whom it may concern, May 13,2020

My name is michelle elliott and I have been fighting the negative effects from all my electronic devices and Wi- Fi ever since I began working for Plumas County. I used to think this was a great job for me until my health began to quickly go downhill. I became less able to see from being radiated all day by my computer screen and would go home completely exhausted after working then be in bed by 7:00 P.M. my joints were always hurting and I became dizzy and nauseous all the time and would get Migraines every 2-3 weeks. Another thing, when on my breaks I would walk for 15 minutes and started to notice that it was harder to breath and my skin would become real hot like it was on fire! All Symptoms of radiation poisoning. Please see Attached PDF.

I told my coworker Amy after doing research online that I was sensitive to EMF and had Radiation poisoning. I tried to tell the Management Annalist and Quality Assurance Manager the things I discovered with no outcome or ideas to help me even the IT Tech. did not seem to have any ideas or knowledge to help me either. This is horrible and people – Parents, Teachers, General Public need to know this is poison really exists so to protect themselves.

Now that we are ordered to stay home, I have been on FMLA Leave and have not been at work where all the EMFs are and feel somewhat better, except when I go to the stores in town. I have been doing research on how to heal myself and wanted to voice my opinion on the matter. NO TO 5G,6G,7G,8G,9G,10G ect. And so forth.

I michelle elliott stand against this for the health and wellbeing to all the people and Children here in America and all over the World.

Much love,

michelle elliott
