Brief Comment

My home has been bombarded with the new 5G millimeter wave radiation of an antenna on the powerline within 100 feet of my house where my husband, 2 year old daughter, and I reside. I am fuming because I live in fear of my daughter contracting cancer within the next 20 years of her life. The fact that I am an electrician and I'm installing new LED lights that are compatible with 5G in schools now gives me more to worry about my own health as I'm being doubly exposed. I have been getting headaches, dizzy spells, feelings of disorientation, and nausea from radiation exposure.
