Subject: NOI # 66-67 - non-thermal biological effects of rf radiation exposure

To Whom it May Concern:

I live in a large apartment complex in the city of Boulder, CO. Approximately eight years ago, a cell tower was placed on the roof of my building. Within days, I began to have headaches and eventually started to suffer from tinnitus. My headaches continue and my tinnitus condition, which plagues me 24 hours a day, has become almost unmanageable. Just recently I sought the help of a audiologist who prescribed hearing aids with a special sound masking component to help relieve the constant ringing and buzzing sounds.

I share my personal story with you to let you know that people are being harmed by the build out of the wireless industry and the upgrades to the system to provide more power to a growing number of wireless devices.

I urge you to look at the science that supports the links between my particular medical conditions and radio frequency radiation.

Yours sincerely,

Scott Spiegel
