Smart Shelter Network

Gary Lee Duncan

Bio - History

17pct26

Smart Shelter Network has functioned as a regional non-profit for 33 years servicing the Electro-Sensitized and aware in the Tabauache Corridor (Moab, Utah to Aspen, Colorado to Santa Fe New Mexico- 65,000 sq. miles)..networking 2,000 cases of Synthetic Electro-Magnetic and Chemical toxification and providing no-cost/ no sales support to the public…

We are connected to and recognized as integral contribution to the Global Independent Bio-Physics research community….conducting long term, accessible research, practical living solutions, consultation, publications and case studies to those needing them without barriers of cost or sales.

Smart Shelter is creditedted to have saved at least 3 lives with these resources… documented in 6 books (especially those by Shannon Rowan and Julia Lupine). It uses Remediation Regimen (removal to safe locals) rather than Provocation Research modalities(testing applying more toxins) and has proven beyond doubt the ingredient of Oriental Medicine's Meridian Bio-Energetic Systems in Environmental Allergenics. It has completely corrected 56 chronic inflammatory medically diagnosed conditions doing this (see accompanying report- including type 2 Bi-Polar Disorder)

Much of our work is carried on in the remnant, un-radiated wildlands of the Desert South West and has identified 93 White Zone safe locations there, which our Land Steward Program has…for the past 26 years…preserved, cleaned and cared for. The fact that ESs (Electro Sensitives) as well as all habitat, insectary, flora and fauna, are healthy and intact in these locals…though they are categorically toxifying and disappearing wherever cell reception exists…. substantiates beyond question the legitimacy and verifiability of our conclusions and solutions. We return that debt with care of the land that heals us.

Smart Shelter was founded and run by its present Director Gary Lee Duncan…80 years of age, clean and sober recovering alcoholic for 39 years, decorated Viet Nam Veteran, trained in Conventional Experimental Physics at University of Colorado by Dr. Frank Oppenheimer(Manhattan Project) including advanced mathematics, Architecture at UC- Berkeley and Screen Writing at UCLA…taught at the University level in 3 institutions…self studied with mentorship for the past 33 years in Bio-Physics.

He is a National Endowment for the Arts/ Utah State Novelist Awardee (2023-Electro Sensitive fiction), featured in Harpers Magazine, New York (Oct 2024-12 pages), founder/ producer of the Telluride Bluegrass Academy/ Workshop Series and also Telluride Writer's guild, Alpine Bank Performing Poetry Award Winner (2018), Ruby Sisson Tall Tales Award (short stories) 2019). He has 216 technical publications in the field..personally distributed on request without cost (PDF)… U.S. Veterans Administration Physicians certify his Electro Sensitization producing myriad medical anomalies. He is VA classified with 100% Service Connected Disability and has lived in his truck Geneva in the wild for 26 years.

Past careers include Architecture/Structural Engineering/ Construction Supervision (Manitou River Houses/ Telluride, Colo)… Ward Family passive solar/ straw bale home (Olathe, Colo-83% stand alone energy efficient) retains certification in advanced solar engineering and design- Dr. Douglas Balcom, National Renewable Energy Laboratory, Golden, Colo.), Master Cabinet Maker (Ft. Hill Construction/ Hollywood- cabinets in Madonna's Bedroom and Jeff Bezo's Kitchen…Beverly Hills, Calif) Touring solo singer/ songwriter 9 years- Desert South West), Heat of Re-entry studies, National Aeronautics and Space Administration (NASA)-Mariner Space Module/ Ames Research Laboratory,, Moffat Field, California.

At age 17, Gary was offered a full ride scholarship to Iliff School of Theology by the Colorado Bishop of the Methodist Church to become a minister. Apparently he got too busy.

Age 19 nominated to the Vigil Award/ Order of the Arrow…highest honor in the Scouting program.

DJ / News Director at 5 public radio stations..including the U.S.S. Hancock-aircraft carrier/ Tonkin Gulf. He resigned a Naval Officer's commission following the Mi Lai Massacre- later to be justified in the books by Defense Secretary Robert Macnamara… who signed his orders to the war zone.

He dances a regionally famous Bluegrass clogging step anywhere good music and kilted Scots abound ,despite V.A. verified severe emphysema and acute asthma…both severely exacerbated by Synthetic EM Wireless Urban Radiation.

He just leaves a little early and drives 30 miles into the wild canyons where he can breathe again and sleep…at least so far.

When he discovered that Electro-Magnetic radiation and chemical toxins from the L.A. Cabinet industry were what came close to killing him 3 times…diagnosed by a native German Naturopathic Physician trained in the Bau-Biologie Movement (the Germans have known about this since the end of World War II)…and simple removal remediated his pain…he dedicated the rest of his life to this work…all without barriers of cost and did that on $1,000 per month Social Security and savings from his mother's will.

“The only thing that makes any sense to do…after all of this…then surviving because of that gift…is to do nothing but the next right thing. And so that’s what I do.”
