Smart Shelter/ Station
Chronic Wireless Impairment Reversals

1993-2026

(Utah, Colorado, Arizona, New Mexico)

8jan26
17oct26

During the past 33 years of Smart Shelter's work the following list of 56 medical conditions have been completely reversed or dramatically reduced with simple removal of patients to meter verified White Zone (wireless radiation free) locations in duration on remote wildlands sites in this 4-state area. This remediation through short, medium and long term elimination of Synthetic Electro Magnetic Radiation (leaving only the natural geologic functional Schumann Resonance in tact) produces proof of cause and effect to which there is no question or rebuttal.

This country today faces a deterioration in trust of telecommunication, military, medical, pharmaceutical and governmental/ regulatory competence and effectiveness which has resulted in untenable health care costs, collapse of effectiveness and public addiction/ debilitation placing all our welfares and the viability of this country itself in dire jeopardy…dilemmas we have today absolutely no other choices but to remedy at once.

The abandonment of Provocation Testing research protocol to be replaced by these simple and dramatically cost effective Remediation/ Removal procedures is that solution..not to mention bringing our science and medicine once again into compliance with the Hypocratic Oath of first doing no harm. Pharmaceutical masking of normal reactions to hideously deteriorated Environmental degradations…chemical and electromagnetic…then returning the patient to the anomaly already nearly killing them is draconian economy, industry, science and medicine. This must stop now.

The return of our scientific research community to conditions preventing industry compromise along with the Dark Agency/ Dirty Tricks Spin/Thugging actions against these legitimate researchers must be legally prosecuted and brought to an end…they are crimes against not just humanity…but against all life itself.

The last bastions of wireless radiation free wildlands in the American West are rapidly disappearing without necessity or reason…they are critically important to this future solution and must immediately be protected and preserved. They harbor the only environments in which complete insectary, pollinators, flora and fauna…including humans can now safely sustain and exist.

The primary system of first impact in Electro-Magnetic Toxification is that of the Meridians of Eastern Medicine..proven accurate and effective (also verified systems of remediation) through over 2,000 regional case studies and 33 years of proven effects.

There are many causes for any specific Chronic Condition. This is but one. It must be the first one suspected, tested, verified or eliminated because it is panoramically the most common, diagnostically the most immediate and cost effective regimen known and involves no artificial pharmaceutical contaminants interfering with testing and functions which make the Provocation Regimen dysfunctional. Corporate profit is not a legitimate argument against cost effective health.

Our experience in terms of proven causality and also effective and durational remediation of the following Cases approaches 100%. The Remediation Regimen must be conducted by trained professionals not tied to industrial interests…done in Schumann Resonance Remediation Facilities verified to be free of all Synthetic Electro Magnetic Contaminants and leaving the Schumann Fields measurably intact and unimpaired. The simplest, cheapest and immediately available of these facilities exist already in our wildlands White Zone Estuaries…needing only assurance they stay that way.

The reduction or remediation of these impairments, if effected by simple removal, constitute proof conclusive and indisputable of Synthetic Radiation being the cause. No further substantiation is possible, scientific or legally defensible and supersedes any suspicions of psychological or belief system causality by obvious proof and requires no further substantiation nor medication for entitlement to reprieves, damages and demands for protection.

The success of this baseline research must now guide our procedures and protocol as we correct and accurately verify the problematical effects of unlicensed, addictive and out of control obsession with wireless communication and the consequence of its global saturation. Increasingly, the American public is becoming dramatically aware of this…especially in its subliminal stimulus addiction effects ingredient in President Donald Trump's declaration that over 3/4 of our youth no longer health qualify for the Military Defense of this country.

This list provides us not just with the proof, but also the solution…and we will all hope…the time to see its success.

Remediated Chronic Impairments List *(56 entries/ 21jan 2026)*

Chronic Fatigue
Fibromyalgia
Sleep Cessation (total)
Sleep Disturbances/Impairment
Nightmares

Asthma
Tachacardia
Arhythmia

Atrial Fibrillation
Hyper Tension (Blood Pressure Spikes)

Balance Impairment
Geographic/Geo-Magnietic Orientation Disruption
Chilling/ Body Temperature Deregulation
Inflammatory Allergic Rhinitis
Dermatological inflammatory welts

Full body/ regional Hives (on Wifi Router Saturation Exposure in duration)
Verbal/ Writting/ Speech disruption (computer/wifi use)
Neurological/ Meridian body/ pathway inflammation/ pain
psysoriasis sores

2nd Degree topical burn/blistering
Depression
Panic Attacks
Tooth/ Abcess pain/ inflammation/ infection
Erectil Dysfunction

Libido impairment (women)
Libido escalation (males)
Accelerator Pedal Leg Inflammation (automobile driving)
Metalic bone implant inflammation
Suspended healing of metallic pin fracture surgery

Short Term Memory impairment/ Dementia
Spiritual/ Meditative relaxation impairment
ADHD
Type II Bi-Polar Disorder (medically diagnosed)
Suicidal Compulsion

Device Cross Addiction use triggering
Sewing Machine legs
Wireless Device Use Compulsion
Wireless Device/ Stimulant Addiction Denial Reversal
Tinnitus

Migraine Headaches
Extremity paralysis (leg, hand/ fingers)
Grip loss
Muscular Dysfunction
Vision Impairment

Irritable Bowel Syndrome
Mold Allergenic Reactivity

Systemic Candidiasis
Rouleaux Blood Accumulations/ Clots
Leg Lesion/ Psoriasis Episode

Specific Meridian Control Point Inflamation/ Infection
Spinal Injury Inflammation
Right Hand/Arm Keyboard/Mouse Operation Inflammation
Immune impairments to virus/ bacterial infection
Complete reversal of Electro Sensitization reactivity from Severe Alpha 2 to mild Alpha1 allowing return to continuous urban domicile (Tucson, Az)

Accelerated aging

After Notes/ Conclusions/ Recommendations

What remains is formalization of this investigation, construction of Testing and Remediation Structures (Schumann Resonance Remediation Facilities- SRRFs), verification and expansion of results and development of shielding/ resonance techniques for retrofit of domicile, working, public and educational structures to restore now decimated global health.

Not to pursue this course, turning radiation and global health treatments around, means surrendering into futility against the obvious and likely immediate development of an even more deadly viral pandemic…the oncoming Covid-20 and inevitable global economic, cultural and environmental collapse…followed likely by global regional warfare…likely because instead of studying, learning and changing…instead the world jacked wireless frequencies, dismantled power regulations and trippled devices sales.
