Brief Comment

I have been severely impacted by the 4G technology for the past 6 years. I can no longer work. I can't go anywhere that has wireless internet without becoming very ill. I can't go to Walmart, the gym, the hospital, can't fly on a plane or walk inside an airport, and have to have a $750 lamp in my room that reduces the radiation just to be comfortable and be able to sleep. I have 32 4G networks in my neighborhood that are measurable in my home. Going up to 5G, I am certain will kill not only me but children and others who's immune systems will be destroyed. Cancer will be rampant. Perhaps that is the goal. If that is your goal, I can assure you, it will work.
