AFFIDAVIT OF Margaret T. Patton

State of Massachusetts]

Middlesex County]

I, Margaret T. Patton, attest that my statements are true to the best of my knowledge.

Comment round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is Margaret T. Patton. My address is 43 Plain Road, Wayland, MA 01778
2. I am a retired journalist and editor.
3. In the Summer of 2007, NStar attached a wireless electric meter on the outside of my living room wall against my explicate instructions for the company not to place any wireless meter on my home. Since that time, I cannot concentrate on writing, as it is very difficult to compose any kind of meaningful article or letter. I have a history of always sleeping through the night, but since 2007, I have been constantly awakened in the night and unable to go back to sleep. I invited people who were electromagnetically sensitive into my home in 2012 who heard the wireless meter on the side of my house. When I took people to my screened porch, a man asked if high tension power lines were nearby, as he could feel the radiation. I informed him that high tension lines were within 800 ft. of my screened porch. I have written to NStar twice asking the company to remove the electric wireless meter, but to this date, I have received nothing in writing from NStar about removing the meter. I am looking to move to a place where there are fewer meters and cell phone towers, but cannot find such a place in the United States.

4. I was shocked to find out that in Europe, many countries have reduced the Safety Standards to 0.01 microwatts per sq. centimeter, compared to the U.S. Safety Standards of 1,000 microwatts per sq. centimeter, which are inadequate because the current rules are based on physics and engineering rather than biological studies. The European countries are also taking wifi out of schools, removing cell antennas and towers from areas near schools and other safety measures. When will the US. Safety Standards be reduced to such numbers as in Europe? How many children in the U.S. will be diagnosed each year with Autism before the American Government does something to slow down the spread of microwave radiation in homes? Please change the Safety Standards to help us now as our environment is being destroyed by microwaved radiation now with easy access to our homes because of wireless meters.

Respectfully submitted by

Margaret T. Patton
