Comments to FCC on Notice of Inquiry, ET Docket No. 13-84

Dear Sir /Madame, 7/13/16

The proposed 5G Spectrum Frontiers will only benefit industry and will further devastate our health, particularly that of our children. There are countless studies proving that wifi, cell phone emissions, AMR digital meters etc are **harmful to the biology of human cells**. 5G Spectrum Frontiers will push this threat to a whole new unprecedented level.

There has been no National Environmental Policy Act (NEPA) review of the environmental and human health impacts of moving forward with 5G. The FCC has put the cart before the horse in creating rules for 5G without first studying the safety of 5G for humans and the environment. There is consensus within the scientific community that the existing FCC limits for wireless radiation do not protect the population from biological effects (www.EMFscientist.org)

As I'm sure you are aware a very recent **US GOVERNMENT $25 Million Study from** the National Toxicology Program (NTP) released results showing that radiofrequency radiation (RFR) can indeed both break DNA and cause cancer - http://www.saferemr.com/2016/05/national-toxicology-progam-finds-cell.html and http://microwavenews.com/news-center/ntp-nyt -
The NTP scientists who led the study demanded immediate action by the government to warn the public. The FCC is ignoring this and other dire warnings.

I urge you to do your jobs and protect the American people from this disastrous heath threat.

My family has suffered from the radio frequency microwave emissions from Smart Meters that has been forced on our home by the utility companies.

Yours sincerely,
Lisa Katselas
