Dear Sirs,

Standards for human exposure to radio frequency radiation should be revised. Exposure limits should be more restrictive. I live 900ft. from a cell tower I fought being put in in 1996 and three additional transmitters are being added. I objected and the Planning Board told me I'd have to go to Washington and change the law. I am a guinea pig, but Supreme Courts around the world (Italy and Israel to name two) are ruling that there is a threat and the studies are out there. It is disgraceful that the US isn't paying attention. Please act immediately Thank you.

Sincerely,
Martha Wunsch
