Dear Mr. Secretary:

Re: **Comments on Notice of Inquiry, ET Docket No. 13-84**

I urge you to limit the exposure of radio frequency radiation to which our population is exposed. I am sensitive to WiFi and have had to remediate my home, getting rid of all wireless devices. It is difficult for me to shop in stores with a heavy electronics base, I am dizzy in cars with too much technology, large crowds, and libraries. I have a wire in my jaw from an accident, and so using a cell phone is impossible for me as I am sensitive to the waves. I am not alone. There are thousands of persons who are electrosensitive because of exposure to electricity, cell towers, or radar installations. I know numerous friends who were early adaptors and heavy users of technology, and have died from brain tumors, have thyroid cancer or salivary gland cancer. It is not safe for the population to be exposed to such levels of radiation. Please protect our health and do biological studies of the consequences of radio frequency radiation.

Thank you for your consideration.

Sincerely,

Brenda Johnson
