Comments to FCC on Notice of Inquiry, ET Docket No. 13-84

We have just learned that Chairman Wheeler of the FCC wants to implement wireless networks throughout the United States, slated for a vote on July 14, 2016.

We, and many others, cannot tolerate wireless technology anymore. My wife has EHS, and we both have had Cancer, she Colon, and myself Bladder Cancer.

To allow total penetration of wireless EMF all over the United States by the FCC under this 5G Proposal, is unconscionable, especially in light of the recent National Toxicology Program's multimillion dollar toxicology study report finding that wireless technology radiation, well below FCC guidelines' limits, but similar to that used in the wireless industry, causes brain and heart muscle Cancers!

http://www.scientificamerican.com/article/major-cell-phone-radiation-study-reignites-cancer-questions/

Many enlightened countries have wireless standards thousands of times lower than the FCC guidelines, to protect their citizens.

The FCC is NOT protecting us. It is up to our elected officials to protect us by voting against this proposal, and forcing the FCC to lower its acceptable standards of radiation to a level consistent with enlightened countries around the world.

Please help in this effort!

Sincerely,

DR. & MRS. CHARLES TUCKER
