Re: Comment on Notice of Inquiry, ET Docket No. 13-84

I have been electromagnetically sensitive for more than 10 years. There are many others like me. We are hidden from the mainstream as we can not fully participate in society. My own life is very restricted by wireless technology as it causes me to experience episodes of erratic heart beat, sharp head pains and headaches. Basically, I am unable to freely move about in public. Just imagine what your life would be like if this happened to you!

I can not watch TV, use a computer, cell phone, be near someone using a cell phone, a wireless router or a cell phone tower. I can not fly, ride a bus/train since wireless. I have to greatly limit my time in buildings that have wireless. This means I am excluded from most public buildings and hospitals. Now that antennas are being placed on telephone/electric poles, there are areas of the city I can not enter. I was fortunate that my local government

No. of Copies rec'd 0
List ABCDE

Agreed to move a router near my home or it was causing me to experience a real fear & pollution.

There are fewer and fewer places for people like me to have sanctuary.

Why does the FCC persist in ignoring scientific research that recognizes wireless technology to be fraught with health consequences?

You need to revisit your standards and the existing research so more and more people will not be harmed as they will be with the direction you are currently moving.

Sincerely,
Marcia Hermberg.
