Standars for human exposure to RF should be more restrictive.

In my family, several children were born with brain damage. the mothers of these children were users of cell phones while pregnant. My 3 children and myself suffer of electrical sensitivity, ES, a health condition caused by exposure to wireless radiation. My ES is life-threatening. See doctor's letter explaining how my ES is life-threatening. Exhibit 1B, Attached.

I have been injured, driven out of my job and home, I can not longer drive, travel, or stay inside buildings or a hospital, because the explosion of wireless technology.

the number of ES increases everyday. Some school districts are concealing evidence that the wireless devices used inside schools is making some children electrical sensitive, and is responsible for the high rate of sickness and absenteism, for the high rate of children with terminal diseases and for the poor academic performance.

For a case in point See Jesus Mendoza et al, v. Sharyland Indep. Sch. District et al., Civil Case No. M-11-29 (S.D.TX.) Undisputed evidence and claims established fraud on the Courts to conceal the fact that at school, students and teachers are being exposed to dangerous radiation, including power densities exceeding the federal safety limits. Respectfully Submitted,

Jesus Mendoza 31 August, 2013.

RE: Jesus Mendoza

To Whom It May Concern:

The above patient is under my care. In case of emergency health care, please do not place this patient in close proximity to sources of electromagnetic radiation.

He is currently suffering from severe hypersensitivities to chemical fumes and odors along with electromagnetic sensitivity. Exposure to sources of radiation including power lines, electric motors, computers, fluorescent lights, and wireless devices, cause Mr. Mendoza severe pain, swelling of vital organs, breathing difficulties, speech impairment, and concentration and memory deficits.

If you have any questions regarding this please contact me.

Sincerely Yours,

Alfred R. Johnson, D.O.
ARJ/smm
