Re: COMMENTS ON NOTICE of Inquiry
ET Docket No: 13-84

Date: 8-29-13

Received & Inspected
SEP 05 2013
FCC Mail Room

The FCC does need to reconsider and tighten its standards for RF Radiation Exposure. I'm in my 60's + have been electrically sensitive for over 15 years. With the proliferation of wireless technology I'm facing new limitations on my access to facilities where Wi-Fi is installed. Consequently I'm unable to use Amtrak, intercity buses, or libraries with computer work stations. I can quickly tell the difference between restaurants and hotels with WiFi + those without it. I can spend only a few minutes in bookstores or churches with Wi-Fi installed. Even outdoor WiFi hotspots can cause problems, and a nearby commercial development surrounded by cell towers is increasingly off ~~the~~ limits. I do not have a cell phone and allow no one to bring one into my home. I avoid cars equipped with GPS devices. My reactions are primarily Neurological and there are no physicians, at least in this area, who have a clue as to how to treat this condition. How long will it be before I and others like me have "No place to hide"?
