Brief Comment

Wireless has destroyed my life! Over the years as more and more wireless and EMFs have been added to our society, I developed severe sensitivities to it. At first I couldn't be near people's cell phones, then the cell towers made me ill and weak, then they put a "Not So Smart Murder Meter" on my house in 2008 and I had no idea what a Smart Meter even was let alone that they changed the meter on my home. It took us months to figure out (after I went away on a trip and all my symptoms from the Smart Meter stopped), that it was the meter. It almost killed me. It stopped my heart every night and paralyzed half my body, it constantly caused my heart to act up each day either by tightening, jerking, rapidly and irregularly beating, I had continuous bleeding every day, it gave me severe vertigo, neurological damage, tremoring, severe brain fog, severe pain in my lymph nodes and extremely painful electrical shocks in my body, paralyzed my joints and limbs for weeks or months at a time, it caused nerve damage and numbing, circulation problems, severe insomnia, messed with my sugar levels, shut down my kidneys, caused a Diabetes type 3 (which I only get when I'm around EMFs), hormone imbalance, severe cramps in my uterus, caused all the systems in my body to go completely

haywire, caused a form of artificially forced depression, and so much more. Eventually I found out they switched the meter on my house to a “Not So Smart Murder Meter” and I had it removed but the damage was already severe and the sensitivities did not go away or decrease. I slept in the middle of my living room floor for the rest of the years in that house cause I was so ill and sensitive from EMFs. Only 100% abstinence can keep the symptoms from appearing or getting worse. This is impossible to do in today’s society since EMFs and environmental pollutants are everywhere. Not So Smart Murder Meters also have an extremely high risk and record of catching on fire and illegally track and collect data inside one’s personal dwelling. Citizens were never informed nor asked to opt in to this toxic program. After wireless destroyed my health, I then became severely sensitive to all forms of EMFs (RF (wireless), magnetic/electric fields, and dirty electricity). So now I’m sensitive to all electric including appliances, wires and plugs, EMFs from a motor or vehicle and more. I can’t handle any chemicals, molds, toxins, gasses, or smoke even in small quantities. I can no longer drive or I can pass out or end up in a coma, it shuts down my kidneys, shoots my sugar levels in extreme differences in a short period of time, and gives me brain fog so badly that I lose all cognitive function and develop both Parkinson’s and Alzheimer symptoms from neurological damage. Even being a passenger in a car can cause this from a short ride. I can no longer work, go to church, get around, shop for groceries, or be around people with cell phones, electronics, or chemicals. I can’t travel or be in a city/town without side effects and permanent damage to my health and I can’t use hospitals or medical offices. Millions of people in America are completely disabled and homeless from wireless. Studies show that at least 50% of the population will be hypersensitive to EMFs by 2017 due to the rapid increase in numbers and these figures were not calculated with the addition of Global Wifi, 5G, or any other radiation being released which uses even more power. There are so many people sick from wireless that doctors are changing their practices over to just focusing on radiation sickness. I personally know a long list of people severely suffering from this. I can’t be near a single cell phone without severe instant pain and in a short time can completely shut down my body or stop my heart. Global Wifi was beamed down over my house this past Winter and it killed my dog and almost killed me. I was knocked out instantly as if someone shot me with a strong radiation gun. I didn’t know it was Global Wifi at the time because I never heard of it. I thought maybe someone put up a new tower or wireless device in the area so I called all the utility companies and told them I could feel wireless really strong and it was killing me and asked if anything new was put up. Everyone said no. Then one day it just lifted and I knew it wasn’t something new in the area. Then I found out from others that Global Wifi was being experimented on us in this area. I was unable to function and barely get up from January to June from the radiation poison they placed on me. Other neighbors got extremely ill too who can not feel wireless as I can actually feel it. One guy ended up in the hospital from it and is still there. He has weak kidneys and a heart condition and the Global Wifi experiment shut him down completely. There were complaints from other neighbors as well of brain fog, dementia, and lack of cognitive function during that time. (Watch this video to see how EMFs affect the body on the cellular/biological level; The Truth About Thermal Effects & the Good & Bad of Microwave Radiation on the Cellular/Biological level and How it Affects EHS/MCS, Cancer, Autism, and more

https://www.youtube.com/watch?v=_Up8bqiJN2k The amount of radiation they beamed down was extremely strong. It was severely tormenting. I lost weight, lost all cognitive function, had strong suicidal/depression frequencies placed on me, and my cells and mitochondria were completely wiped out and I had severe abnormal chronic fatigue. I was not even able to lift my arms or get up the majority of the day. I was severely weak and just lay there crying. This is not only inhumane and cruel but it is illegal and unconstitutional to torment, experiment, or place these toxins on our bodies. We will be holding anyone accountable and liable for this that does not vote against it and does not take serious measures to protect us! This is a declaration of war and an invisible holocaust being placed on its citizens. Wireless is a neurotoxin, genotoxin, and a carcinogen. 5 G spectrum is just as dangerous, if not more, than Global Wifi and both will reach everyone everywhere with no way to opt out. Also, chipping everyone and everything (as Mr. Wheeler stated in his speech) is illegal tracking and surveillance and proves that this is a Big Brother Agenda that he and other Narcistic leaders are trying to put forth. Other countries are removing wireless because so many people are becoming disabled from it. America is the only country that keeps promoting dangerous technologies on its people as experimental rats! As Mr. Wheeler himself stated that he is not a medical doctor and does not care about safe radiation levels, you need to listen to the evidence from the medical doctors and scientists that are not “bought out” or threatened by the cellular industry or government. The cumulative effects of all these EMFs are not being calculated and the “thermal imaging” safety standards were not created for medical or biological effects on mankind or the environment but were created for “technical standards” only as the scientists themselves stated. Thousands of studies show that the current standards are billions and billions of times higher than what is biologically/medically safe and the government is wanting to raise these standards billions of times higher than the deadly doses already existing and it is illegal to experiment on us without informed consent. Many children are severely tormented by wireless and EMFs. They can’t even have the slightest exposure without a complete meltdown. This is abuse! Wireless can not be controlled. It reaches across everyone’s properties and boundaries which is encroachment and is illegal. Stop increasing frequencies and radiation levels. Narcistic leaders will never be satisfied and will continually ask for more. Someone needs to get this under control before it is too late. There will be no safe place for anyone to reside or live away from this radiation poison and torment. Land lines are the safest and most secure services we have so far. Either hardwire everything with proper filtering/shielding and cancelling of EMFs or come up with safer technologies. For an alternative energy that is good for the environment and can run motors and devices without electricity to reduce the amounts of EMFs we are using see the “Air Compression with the Trompe System” links below. In the meantime, back off our bodies, families, properties, and children and give us safe zones to live in. Zone yourselves in and kill yourselves off if that is what you want to do. I don’t agree with it but keep it off of us! Wireless microwave pulsed radiation is the number one killer of bees and pollinators and a famine will develop from this. It also kills crops and animals along with humans. Wireless also increases mold and biotoxins (including Lyme disease) over 600 times in your body and environment and is also creating a mold epidemic. Weakening and disabling America is not progress! It is criminal! Sincerely, Concerned

Even LEDs have blue light. CFLs and fluorescents, in addition to blue light, release toxic amounts of mercury and have flickering. Artificial lighting releases EMFs with non-iodizing radiation and produce the same effects that EMFs from other sources do and also shuts down melatonin, causes diabetes, neurological damage, etc. Also, many people develop eye damage from blue light and EMFs. Using the least amount of artificial lighting in the day and nighttime is best. Going down with the Sun and rising with it will really help but when exposed to artificial lighting use the following tips listed at the bottom to help block it “Morning sun has blue light in the spectrum, but it is balanced with the other colors in the sun so you get the exact amount you need to reset your circadian rhythm by getting out in the morning soon after rising and being grounded outside as well for 15 minutes. It resets melatonin as well. No blue light blocking lenses should be worn with the Sun. Just with artificial lighting. Blue light doesn't just affect our eye clock, it also affects our skin surface, and our skin detects this color. Jack always recommends that if there is blue light exposure and you're inside, make sure your body is covered up from the blue light exposure, as well as your eyes.” Here is an app for the computer to help block blue light: (You can also go into the settings and make it more orange.) There are screens that can be added in front of your computer screen in addition to block it. https://justgetflux.com/ Here is a blue light map to see how much there is where you live. You want to live in the darkest places possible and avoid as much light as you can especially at night but daytime exposure also affects your body:

Regular glasses to block blue light: Zenni Opticals sells them. They shouldn't be worn out in the sunlight though because our eyes need the full spectrum UV light. These lenses block all UV and blue light but have a clear lens. You can get any style you want, and when you order them, you'll have the option to add “Beyond UV” to your glasses. You can get them in prescription and nonprescription. http://www.zennioptical.com/beyond-uv-blue-blocker Goggles to block blue light buy here: https://www.amazon.com/Uvex-Blocking-Computer-SCT-Orange-S1933X/dp/B000USRG90 Jack Kruse is really the top of the list when it comes to having information on blue light, non-native EMF, circadian biology and quantum biology.
