Comments to FCC on Notice of Inquiry, ET Docket No. 13-84
Comment by Brent Dalton

My name is Brent Dalton and the current RFR exposure limits have impacted my wife's well-being and caused her to experience health problems.

My wife is a toxic mold survivor. She was exposed to it in 2006 and although she was able to return to work in 2007, her nervous system was greatly damaged and she remains sensitive to certain things. One of those things is RF emitting devices and wireless technology.

Within 2 weeks of moving into an urban apartment in Richmond, Virginia, she started to have symptoms of burning in the head, headaches, dizziness, forgetfulness, fatigue, extreme pain throughout her body, and muscle twitching and tightness. After our own investigation, we found there was a bank of "Smart Meter" electric meters that emitted RF frequencies from the local utility company near our apartment. We also found out that a store below us was using a wireless router and the signal was emitting from it 24 hours a day. The apartment management company allowed us to move a little further away from the bank of meters into another apartment. Even though she found some relief with some symptoms, she was still in pain from the wireless routers from the neighbors.

We then moved to a rural area into a house away from neighbors. She improved greatly but still had some pain. We wondered why. Keep in mind she does not have a cell phone. We have hardwired computer lines and do not allow any type of wireless technology into our home. After investigating around the house, we found that the electric meter was a digital meter that had an RF emitting device on it, so the meter could be read by up to 7 miles. After consulting with the power company, and supplying them with a Doctors letter, they removed it and put on a meter that had no RF emitting device. Once it was removed her symptoms began to improve. She now feels safe in our home however, when she leaves the house and gets close to this RF technology, she starts to have these symptoms again. We have also lost income from her business because she cannot work due to the symptoms she feels when around this RF technology.

I am hoping that the FCC and Congress will amend the current RF exposure limits so citizens of this Free country with issues like my wife can be safe and have a choice of having an RF emitting device, such as a cell phone, smart meter, or wireless routers.

Respectfully,
Brent Dalton
