Greetings! Thank you for the opportunity to submit these comments. I do appreciate your openness to hearing my concerns.

The FCC's repeated refusal to consider biological effects from exposure to all types of wireless radiation shows a clear and dangerous intention to disregard the emerging science which must inform its decisions regarding public health. When over 250 Scientists sign a document of concern, shouldn't we slow down and listen? We must know with clarity what our human tolerance is for these levels of high frequency radiation.

I offer words from Dr. Mari Sagi's book, Healing With Information, (O-Books, 2018, pg. 79-81) Radiation with a wavelength longer than 1020nm, i.e. microwave, radar, satellite, television and radio waves, may be harmful to the human body depending on how far we are from the source of the radiation." "…we need to know about the wavelength and origin of the Information reaching our body."

"…, when the electromagnetic radiation reaches the cell, molecules inside the cell come into motion, and this specific energy penetrates the cell because channels in the cell membrane specialized for admitting energy become activated. In 1991 German biophysicist Erwin Neher and German cell physiologist Bert Sakmann received the Nobel prize for Physiology and Medicine for their studies concerning the ion channels found in the cell membrane."

The 5G system, is effectively changing the entire environment on Earth, a rather fool hardy action don't you think? All life will be affected by satellites, and emitters penetrating all animals, plants and humans. Precipitating a very dangerous situation. Please do not expand the limits beyond their already damaging levels. I believe life itself on Earth may be impacted by this.

I am a sensitive person, I don't have wireless devices in my house, or WIFI. I choose to live in a natural way. When you determine that 5G will come to my neighborhood, you endanger my health. I strongly request that healers in addition to scientists and physicists be a part of this discussion. That testing be for biological effects on the body not just thermal effects. Being "unaware" is a good reason to BECOME aware on an issue as important as this.

Thank you for your time. May your world be filled with health and healing and may your children and grandchildren live in a healthy world!
