The Nature of My Disability under ADA – Sickness from Wireless

I have become sick from exposure to wireless technology radiation - to radio and microwave frequencies radiation used for wireless technology. The condition I suffer from is termed Electromagnetic Sensitivity (ES), or Microwave Sickness - the original and more accurate name. I was not told this radiation can cause harm, and I was misled by the S government, the FCC, and the wireless industry who state that it is safe.

The Symptoms Which I Experience When Exposed to Wireless

When I am exposed to radiation from wireless sources such as cell phones, Wi-Fi, cell towers, wireless smart meters and other wireless devices I experience adverse health effects including:

Bleeding hands and feet, tinnitus, insomnia, loss of proprioception and balance to point of collapse, cognitive confusion, inability to make decisions.
I was forced to abandon my Mississippi River apartment to which I had moved Jan 1 2017 after 2 months of high emissions of radiation by Cell tower directly across the street, emitting microwave frequencies 24 hours per day, 7 days per week. Forced to pay for unit all year despite it being unfit for habitation.

Sincerely,
M. Annie Puff
