DATES: October 21, 2026.
ADDRESSES: RFI Docket: **HHS–OASH– 2026–0397,** Docket: HHS–OASH–2026–0397

2.**describe which perspective(s) your comments represent**:

I Joy Mack: individual victim; aggrieved individual to the lack of regulations and overreaching regulations which grants exemptions for the nefarious use of frequency related technologies.

The problems started during my community activism in the 1990;s but I really believe that it started in the 1980's while I was married.
All problems from the 1980's continue to this very day in 2026.

3. Joy Mack **wish to share her experiences regarding potential adverse health effects that she believe may be associated with her exposure to RF/EMF source(s), a., b.,: mobile phones, Wi-Fi, smart meters, other pulsating radar, radio frequency, suspect source of unmanned aerial vehicles, directed energy assaults** *and*

relates to wrongful placement into the Domestic Surveillance Program operations. No one would admit nor deny the patterns of conduct directed against me despite my numerous complaints for help.

I was having different health problems with focus dizziness etc., but I did not understand or realize what was going on and or how it was affecting my life.

Through the years; on two separate occasions all the power went off in my house. None of my neighbors were affected. On the first occasion Florida Power Light came out, went to the affected transformer or substation and came back to my house. One employee walked behind the other employee as if they were both afraid of what was at my house. They asked me a strange question about energy or having something that was running/using energy, but I did not understand their question at the time

My family and I were being blasted with extreme **dirty electrical energy** from the power company and radio frequency assaults from rogue government sources.

I was being assaulted with a type of directed energy at intermittent random times during the day to different body parts: Heart, legs.

I was also being assaulted at intermittent random times during the night between 2am and 5am. In this instance; I would awaken to the sound of crackling noise in my head/skull and I would rise sitting in bed, with both hands on each side of my head and within sixty seconds the crackling noise would cease. I would then pass out and or fall back on the mattress and awaken at some point later.

Years later; I was listening to Dr. John Hall who wrote the book, **Guinea Pigs : Technologies of Control** on a conference call and he described exactly what had been happening to me. He alleged some process of heating/radiating an area in the lower base of the brain which has some connection to the optical nerve.

Maybe near 2014 I was returned home from a trip and my vehicle was parked along the opposite side of the house. A awaken to the sound of someone walking on my roof. When I looked out the window; two FPL guys were putting away their extremely long ladder and proceeded to drive away.

Upon questioning the FPL Rep name Barbara; allege that the power line coming to my house was done the previous year October and we debated this issue for twenty minutes as I always sat with my dog and could easily see my roof; and there was no reasonable explanation of how thing were now changed and or now weatherhead/unbrella (proper name unknown) now was broken or cut and was likely done recently when I was out of town.

Through time; Wi-Fi was causing noticeable swelling in my hands, and environmental discomfort in the home.

In fact; it took years but I finally realized there was a problem when I would visit someone or family members in other states. Usually by the third day; I could tell a big difference in my overall being. It was as if I had walked through an invisible door. Or someone had unplugged my body from some unknown source. My whole body; everything felt different, my body felt cooler. I began to notice that I could tell by the third day that I was not at my house.

Further; my grandchildren were living at my home. I had them in a room that I normally would use to sleep. Somewhere near 2019 and they were attacked/ awaken out of their sleep between 2am and 5am, as if they were being burned (cooked) whatever the proper phrase is.

My Mobile Phone and computer is being used to monitor everything I do.

In 2014, and twice in 2025 I went for a body scan in Pennsylvania and the IEEE Certified professional picked up a frequency number on the bar graph frequency detector which is registered with the FCC. I can produce it if requested.

b. The nature, duration, frequency, and approximate timing of the reported exposure(s).

As stated, It started years before I realized it was happening to me and my family. And continues to this very day.

c. The potential adverse health effects experienced.

I have a horrid medical history related to my environment being saturated with electromagnetic radiation and other types. I was hospitalized several times but I did not realize the connection.

As stated before, there is overall discomfort of my environment

Between 2022 to 2025 I especially noticed my fingers were swollen and complained to City Electric in Columbus Mississippi. The Electric Company Manger refused to do anything or alleged that he could not; and referred me to another person. The other person (name I cannot remember) only spoke of a new technology but did not do anything.

d. When potential adverse health effects first appeared relative to when exposure began and whether any changes in exposure coincided with potential adverse health effects.

Overall discomfort of my environment in my home in Florida and Mississippi but I did not understand it.

The real effect on my Health the severe dizziness; often nearly passing out; caused the need for Neurological care and hearing loss.

My chronic conditions were caused by my frequency assaults. I don't have high blood pressure or diabetes.

I was Diagnosed with Traumatic Brain Injury;
Heart Conditions (Bradycardia) from the assaults to my heart;
leg assaults. I am losing the ability to walk.

e. Whether medical evaluation or treatment was sought, including any diagnoses received

Not for the swelling in my fingers although I may have complained about it. I was hospitalized a lot. But I now believe that the implanted devices were being triggered which forced me to for medical visits.

There was a period of time maybe in 2024 intermittently to 2025 in Mississippi between 2am and 5am I would awaken to what I will call directed energy assault. Initially it would hit my lower left arm and travel to the tip of the third finger.

The pain was so severe that I would jump up in bed and scream. It would take from three to seven minutes or more for the pain to subside.

I am a black American. My skin color is a paper sack brown shade.
At time the assaults would alternate between my left hand and or my right hand. And my hand started turning black.

When I went to the doctor for help; and if I dared to say I was assaulted with directed energy; the nurse assistant used the term; "You need to take your medicine." At first I began to ask myself; what kind of medicine she is talking about. And then I realized that she was threatening to take me to the Crisis Unit.

This is what HHS; the National Institute of Health and the criminal enterprise operating the Domestic Surveillance Program is doing citizens who has engaged in first amendment activity. To keep shielding the clandestine operations using radio frequency to track and surveil us; the medical establishments threaten with discrediting to neutralize.

So I stopped going for help in Mississippi. I did go to a doctor in Florida after a period of awakening to attacks to my hand between 2am and 5am. and thereafter hand started turning black. But I received the same warning. So I did not go back.

I have been placed in the clandestine operations of the Domestic Surveillance Program; and when I go for medical care I am threaten to keep my mouth shut to shield the misconduct.

f. Whether steps to reduce or eliminate exposure were taken and, if so, whether any subsequent changes in potential adverse health effects were observed.

I have suffered for years.

There was/is very little I could do to protect myself from something I could not see; except possibly on a device, instruments for detection. Especially while I was asleep.

g. Any supporting documentation, including scientific reports, exposure measurements, or other relevant information.

I used an acoustimeter for detection at times. At times I took pictures or recorded video. There was no way to log / save that information.

I went for three different body scans with IEEE professionals; in three different states. I have:

Findings of a computational electronic advanced subject analysis of data/signals collected during a Non-liner junction scan, using a full Spectrum Analyzer, from 8KHz to 20GHz Frequency Monitoring Sweep, with a signal recorder running to capture any/all RF of Joy Mack.

Each scan detected frequencies registered with the FCC around my body in certain specific areas. I want the signals turned off and or the implanted devices/technology removed.

I have not given anyone permission to violate me in this way ; implant me with their technology , violate my privacy twenty four hours seven days a

week ; just so the Domestic Surveillance Program can surveil me and assault me at any time without accountability.

Exhibits:

- Congressional Hearing on Silent Weapons
  (this indicate that citizens are being harmed with “silent weapons”/ directed energy devices.
- My Hand Injury (blacken); from the directed energy assaults
- My Brain, Heart, Legs Injuries: to be provided upon request
- Body Scan: to be provided upon request
