AFFIDAVIT

I attest and affirm that the following
statements are true, accurate and withing my personal knowledge.

Richard Myers
LCDR,USN (Ret.)

October 21, 2026

1. Untold numbers of Pennsylvania residents have become sick and even disabled by the pulse modulated microwave radiation of the type transmitted by electric utility smart meters mounted on customers' homes.

2. Thousands of complaints have been filed with the Pennsylvania Public Utility Commission (PUC). These include victims seeking ADA accommodation.

3. FCC's RF/MW Radiation guidelines did not address the effects of pulse modulated RF/MAW Radiation. Many scientific studies report pulse modulated RF/MW Radiation is biologically active compared to continuous wave radiation. *Bioinitiative Report.*

4. Some customers have been forced to move out of their homes, have chosen to go off the electric grid, or spend thousands of dollars to block or mitigate the pulse modulated RF/MW Radiation transmitted by smart meters mounted on their homes.

5. PUC's mission is to ensure safe utility service and protect the public. PUC should be required to make public the number of health related smart meter complaints.

7.Since 2010 the PUC rejected every physician testimony that their patient was harmed and should not be exposed to smart meter RF/MW Radiation of the type transmitted by smart meters.

8.In *Frompovich vs. PUC (C-2025-247-4602)*, for example, the PUC refused to admit into the record Dr. Frompovich's 240 peer reviewed breast cancer scientific studies. PUC ruled that her studies were hearsay, blatantly ignoring the fact that such studies are admissible evidence in such proceedings, including before the U.S. Supreme Court.

9. The medical textbook *Electromagnetic Fields of Wireless Communications Biological and Health Effects by Panagopoulos (2022)* details the research supporting Frompovich's case, especially Chapters 2 and 9.

10. Dr. Frompovich was a breast cancer survivor who filed a Formal Complaint with PUC. However, the PUC ruled that Dr. Frompovich could not refuse an electric utility smart meter on her home. Several months after a smart meter was installed on her home, Dr.

Frompovich's breast cancer which was in remission came roaring back. She died several months later in 2020.

11. The World Health Organization (WHO) has classified RF/MW Radiation of the type transmitted by smart meters as Group 2B: possibly carcinogenic to humans. This was based on a review of the scientific literature.

13. On November 14, 2023 the PUC ordered that electric service be terminated for the remaining 108 customers who were refusing a smart meter.

14. The PUC and electric utility companies have authorized customers to relocate smart meters farther from their homes to reduce smart meter RF/MW Radiation intensities.

15. My elderly sister was battling leukemia. I wanted to minimize the intensity and her exposure to RF/MW Radiation. I spent $5,450 to relocated her smart meter from her dining room wall a distance of 75 feet to her detached garage.

16. I spent $8,250 to relocate the smart meter mounted on my office wall approximately 60 feet to the edge of my property line. After removing it, the frequency of my diagnosed heart premature ventricular contractions were greatly reduced.

17. I feel a pain in my hand if I ever hold a cell phone for about one minute or longer.

I urge HHS to work with FCC to enact more protective guidelines.
