Hello, my name is Jaclyn. I am writing this email for the fact that I have suffered neurological problems ever since living at a location that houses at least 12 smart meters stacked on top of each other in rows in a wooden shed (with no protective sheet-metal), nothing, but wood and smart meters. This shed happens to be less than 5 ft away from where I lay my head at night, asleep in my bedroom.

I recently have had to get an MRI. I suffer now from severe brain fog, major memory problems, lack of focus, inability to multitask, the list goes on and on. This is a major handicap to me as I am only 39 years old. I had graduated at 16 years old, I had a scholarship to John Hopkins at 12 years old, while in 7th grade. I was an engineer, but I now cannot remember the names of any tool, none-the-less on how to use them. I also had a talent in art, but now anything that I try to create ends up looking like it's from the mind of a toddler. It's gotten so bad that now I can't remember what I had just read after putting down the book.

Neurological problems do not run in my family on either side; nobody in my family- on either side of my family, has any history of Alzheimer's, dementia or anything like that.

I feel helpless and hopeless. Being that I live in the Bay Area and that I am currently unemployed due to the fact that I can no longer be confident in my field, I do not have any added resources to allow for moving to another location. As it is, this location is the cheapest rent that I could find anywhere in the Bay Area.

Wireless technology has changed my life without my permission or even being given a warning as to what was going to occur. I cannot imagine what 5G will do to me and to everyone around me and all my loved ones. I can only say this is in my mind modern day eugenics.

I will be more than happy say my peace and to demand rights as a civilian in the United States of America , to whomever will listen, government , a fellow citizen, and especially to the utilities company how is laziness and greed accosting not only lives but the quality of life for those that are actually still alive being bombarded by their evil Deeds. Thank you for your time and consideration and hearing my story and hopefully accepting my testimonial to Aid in stopping this nightmare.

Thank you, God bless.
