To Whom It May Concern:

I am an adult professional with a Bachelor of Arts Degree. My Grandfather, Father, Uncles and cousins are/were Medical Doctors.

I suffer terribly from Electrosensitivity beginning somewhere around the time the "Smart" meter was put on my home. I was using my computer and cellphone constantly at that time. Until I cut cell phone + computer use to the bare minimum I suffered from full body eczema - uncontrollable itching, burning and bleeding - that took over most of my body. I cannot tell you how I suffered. I am not now 100% healed all of the time as it is impossible to avoid all contamination from cell towers, neighborhood wifi, etc. I know when I am near an active cell phone!

I am not making this up. This is provable, irrefutable and serious.

Please Do Not force 5G onto us!

Do not contribute to the blanketing of the planet with electromagnetic toxins, please.

Eventually irresponsible behaviors will lead to class action lawsuits and a huge loss of revenue to perpetrators.
