California Department of Public Health

SUBJECT: SmartMeter Health Complaint

Dear CPUC – Consumers Affairs Branch,

I chose the "opt out" position on smart meters because I had done independent research about the hazards. I am extremely concerned about radiation exposure and I studied smart meters in this regard. I am an extremely healthy and fit woman approaching mid-sixties, diet- and exercise-conscious. A couple of months ago, I was afflicted with a condition that I had never had before, which prompted me to get a physical checkup, blood tests, and acupuncture… severe ringing in both ears. Not until a few days ago did I realize that this is a consequence and the subject of many individual complaints caused by smart meters. I have a high frequency, continuous shriek in my ears and since all other possible causes have been eliminated, I am pretty certain it is caused by the smart meters. I have also begun having headaches which I have never had before. **I have grandchildren that live with me on and off, for whom I am quite concerned; one of them, at age 7, has begun extreme temper tantrums – could this be related?** I want the smart meters removed from my environment.
