I started using a cell phone in 1998. I had brain tumor surgery in 2010. Lost hearing and nerve damage. Diagnosed with Fibromyalgia, rheumatoid, sjogrens syndrome and lupus in 1996. I purchased a smart tv 2 years ago and have had sleep problems, bad attitudes, headaches. I can get my medical records. I just had an MRI in September and the tumor is growing back.

I live in Indiana and though I live in a rural area, I have used technology all these years and now just figured it all out.

Thank you for this information.

I am willing to help in any way I can. You have my permission to use this email as documentation.

I wish I had money to donate to this cause.

Contact me at this email if you like. I am on disability social security so I do not work.

Sincerely,

Barbara Welch
