State: Indiana

Name: Pat Fischer

Occupation: To whom it may concern, in regard to smart meters. My name is Pat Fischer living in Greenwood, IN. I do outside sales working out of my house.

Wireless Health Effects: My family and I's health has deteriorated ever since our smart meter was illegally put on our house. My symptoms are the worst as the smart meter is on the other side of my office wall, but all my family has had two or three of these symptoms. Our symptoms are: forgetfulness, not able to stay focused, easily irritable, skin rash, night sweats, itchy ears, constant fatigue, muscle and joint pain.

Wireless technology has affected my life*:* This has negatively affected our family life with not just the pain and irritation of these symptoms, but also increased arguments, blaming each other, etc…. Luckily, we knew about smart meters before ours was installed, and the effects they have on people, so we were able to recognize the health issues and the possibilities of where they were coming from. (side note; which when we ask our electric company several years ago about if we were going to get the smart meter, they told us no). We are very concerned about everything the smart meter is doing to us and want it removed immediately and replaced with the old style that didn't emit radiation.

Concerns about the future: Please do not come out with any more technology before you thoroughly think through the health risks to the public and then be honest and educate us on what the risks are and then give us a choice if we want to take the risk or not. This is a most egregious act against the public trust and is shameful and unacceptable in every way!

Sincerely,
Pat Fischer
Greenwood, Indiana
