State: Indiana

Name: Hannah May

Occupation: Stay at home mother.

Wireless Health Effects: Wireless radiation has affected my health in many ways. I get headaches, dizziness, memory loss, nose bleeds, and loss of concentration.

Wireless technology has affected my life*:* Wireless radiation has affected my life in numerous ways. I have poor health, I had to leave school, I have had to spend a lot of money on my health problems directly related to radiation.

Concerns for 5G: As a mother it is very concerning to know my children could possibly be exposed to high levels of radiation without my permission. Our children are the future and they need to be healthy! We don't want our children even sicker than they already are. It is cruel to expose people to these levels of radiation without any sort of informed consent.
