I am submitting this statement to document a series of events involving the breakdown of my marriage, suspected online harassment, the publication of personal information, concerns about my safety, property damage, and significant physical and psychological symptoms that I have experienced. I am requesting that the incidents described below be taken seriously, documented appropriately, and reviewed to determine whether any applicable Colorado or federal laws have been violated.

In June 2024, after another separation from my ex-husband, I noticed a profile using the name “Romani Ranada” viewing my social media stories and monitoring my page. This raised concerns for me about who was behind the profile and why it was repeatedly viewing my content.

On October 24, 2024, my ex-husband returned to my life expressing a desire to repair our marriage. In light of the events that followed, I believe this period is important to include in the overall timeline of my experiences.

On December 24, 2024, I became aware of what to be an online smear campaign involving the publication and circulation of personal information about me. My father was also targeted through the sharing of personal information.

These events caused me concern about my privacy, reputation, and the possibility that personal information was being circulated without my consent. I request that any available posts, messages, account information, and other relevant evidence be reviewed to determine whether the conduct violated applicable law.

I left my marriage in August 2025. After leaving, I experienced what I perceived as an escalation in the incidents affecting my safety, privacy, and well-being.

I experienced property damage involving my vehicles. I also became concerned about unknown individuals appearing near my former residence and looking through my window. These experiences contributed to my fear for my personal safety and ultimately led me to leave my former home.

I request that any identifiable incidents of property damage, trespassing, stalking, or harassment be investigated based on available evidence.

During this period, I experienced a range of distressing symptoms and experiences, including:

- Hearing voices that I perceived as resembling my former mother-in-law.
- Sharp pain between my eyebrows.
- Sleep disturbances and fatigue.
- Headaches and dizziness or vertigo.
- Tinnitus.
- Nerve pain.
- Shaking hands and symptoms that I associate with complex post-traumatic stress.

I have also experienced phenomena that I have described as voice-to-skull (V2K), mind control, MKUltra-related concerns, and electronic interference. I am documenting these experiences because they have been frightening and have significantly affected my sense of safety and well-being.

I recognize that the cause of these symptoms and experiences would require appropriate medical assessment and, where there is objective evidence of a specific unlawful act, independent investigation. I am not presenting my symptoms alone as proof of a particular person’s involvement or of a specific technology being used against me.

I request a review of the following laws to determine whether the documented conduct meets their legal requirements:

A. Colorado stalking statute — C.R.S. § 18-3-602

This statute addresses stalking under specified circumstances, including certain patterns of conduct involving following, contacting, or surveilling another person, when the required elements are established. I request an assessment of whether any documented pattern of conduct directed at me meets the statutory definition of stalking.

B. Colorado harassment statute — C.R.S. § 18-9-111

This statute addresses specified forms of harassment. I request a review of any documented communications, threats, or other conduct to determine whether the statutory requirements are met.

C. Criminal mischief — C.R.S. § 18-4-501

I request that documented damage to my vehicles or other property be reviewed to determine whether criminal mischief occurred and whether the responsible person can be identified through evidence.

D. Colorado criminal trespass statutes — C.R.S. §§ 18-4-502 through 18-4-504

I request a review of any documented unlawful entry onto or presence on property connected to the incidents involving my former residence. I understand that the applicability of these statutes depends on the specific conduct and available evidence.

E. Colorado civil protection orders — Title 13, Article 14, Colorado Revised Statutes

If the documented conduct meets the applicable eligibility requirements, I request information about seeking a civil protection order to help protect my safety.

I also request an assessment of whether any documented conduct falls within the scope of the following federal statutes:

- 18 U.S.C. § 2261A — Federal stalking: Potentially applicable to qualifying stalking conduct involving interstate travel or electronic communications.
- 18 U.S.C. § 875 — Interstate communications: Potentially applicable to certain prohibited interstate communications, including qualifying threats.
- 18 U.S.C. § 1030 — Computer Fraud and Abuse Act: Potentially applicable if evidence establishes unauthorized access to a protected computer.
- 18 U.S.C. § 1512 — Witness tampering: Potentially applicable if the required elements involving intimidation, threats, or interference with testimony or evidence in an official proceeding are established.

I understand that these federal statutes have specific legal requirements and do not automatically apply to every online dispute or suspected harassment incident.

I request guidance regarding potential civil remedies if evidence establishes that false statements of fact were published about me, that legally protected private information was disclosed, or that my privacy was unlawfully invaded.

Depending on the facts, potentially relevant legal claims may include defamation, public disclosure of private facts, or intrusion upon seclusion under applicable Colorado law.

I also request guidance on preserving digital evidence, identifying the appropriate reporting channels, and determining whether any applicable filing deadlines may affect my ability to pursue legal remedies.

6. Request for Documentation and Investigation

I respectfully request that the appropriate authorities or legal representatives:

1. Document the incidents described in this statement.
2. Review any available screenshots, social media posts, messages, account information, photographs, repair records, and witness statements.
3. Assess documented property damage and any identifiable incidents involving threats, harassment, stalking, or unlawful entry.
4. Determine whether any conduct meets the requirements of applicable Colorado or federal law.
5. Advise me of available protective measures, reporting procedures, and potential civil remedies.
6. Explain how to preserve relevant evidence and request records through lawful procedures.

I am willing to provide additional information and supporting documentation where available. I understand that an investigation must be based on verifiable evidence and that the identity and involvement of any responsible individuals must be established through appropriate procedures.

I am submitting this statement to create a formal record of the events I have experienced since June 2024 and to seek appropriate legal guidance regarding my safety, privacy, reputation, and property.

The combination of the online activity, publication of personal information, property damage, concerns about unknown individuals near my residence, and the physical symptoms I have experienced has been deeply distressing.

I am asking for a fair, impartial, and evidence-based assessment of these events and for information about the legal protections available to me under Colorado and federal law.

I declare that the foregoing is an account of my experiences and recollections, provided to the best of my knowledge and belief. I understand the importance of distinguishing my direct observations from suspicions or conclusions that have not been independently verified.
