My name is John Nahorny, I live in Lincoln Nebraska.

I am a retired Electronics technician. Currently I work at maintaining rental property and animal rescue. Due to my severe symptoms I am only able to work sporadically, These days I spend most of my time in bed.

I have suffered from EMF contamination/ sensitivity for years. For many years I had no idea what was causing my symptoms until I was finally able to correlate them to chemtrail spraying, wi-fi and microwave. When the smart meter was installed on my home a couple of years ago within days my symptoms increased exponentially. I have every symptom on the u.s. naval list from 1972 except for two or three. I am almost completely incapacitated in every way and suffer continuous pain and discomfort.

I suffer from muscle spasms, balance problems, tinnitus, heart palpitations, inability to gain weight, shortness of breath, numbness, tingling, leg problems, gastrointestinal problems, memory problems, ADHD, brain fog and other symptoms too numerous to mention. My life has been a living hell for years.

I have no quality of life. I spend almost every day in bed because I cannot sleep at night. I am awake all night, have frequent urination, about once per hour, suffer horrible leg spasms and restless leg syndrome. My life is a living hell.
