My life has become increasingly difficult since 2012 due to wireless deployment. And government not only does not offer help, but is behind that deployment. As of December 2017 there is nowhere left to work, shop or do laundry anywhere near where I am living without getting symptoms. I have had to move multiple times due to access point installations since 2012. I am 55 and can only wonder how many more attacks my body can endure? And 5G now being deployed everywhere there less and less places to hide to avoid microwave sickness. Wireless technology access/exposure to WiFi in the USA by 2012 had become a massive grid of increasing radiation getting harder every year to hide from. By 2015 we have citywide WiFi in most all communities at work, at home, in school, universities, hospitals, restaurants, coffee shops, cars, buses, public transit, airports, airplanes that literally attack more and more people and by 2020 will saturate every inch of America in 5G and above if all remains on schedule.

Since the introduction of 4G my brain heats up rapidly and my pulse goes up an extra 30-40 beats per minute when in hotspots. If I stay in these areas I get chest pain that keeps increasing until I leave. Now I know it's been proven that microwaves and millimeter waves increase the viscosity of the blood, and certain pulse frequencies raise heart rate, so combining the two it's obviously hard and damaging to the heart. In 2010 I made the connection to cell phone use and weakness/confusion so I started keeping it off as much as possible including marine radar. Since the introduction of 3G my interaction with wireless devices has consistently been getting worse increasingly ruling my life by 2012. There are many others in America like myself that get hit hard from wireless access points and or devices. I rapidly get a fever, migraine, confusion and all over inflammation.

Biomedical research has proven man-made RF and EMF have been shown in countless research studies for over 60 years to interrupt and interfere with natural energy fields from our bodies. Also man-made RF and EMF exposure causes a hardening of cell membranes in the body, which means with increasing exposure increasingly waste products can't get out and nutrients can't get in. That creates damage by the free radicals that can't leave the cells, which in turn alters the DNA and causes cell mutation. These imbalances eventually lead to a compromised central nervous system, compromised immune system, a compromised cardiovascular system, elevated blood glucose, elevated lipid levels, high blood pressure and an imbalanced endocrine system. That process severely affects human development and causes more rapid aging. As time passes adverse impacts on the immune system, the neural system, the endocrine system, the circulatory system, etc. keep increasing toward disease. Any adverse impacts on any one system will have a ripple effect on the others causing physical, mental, psychological, emotional, etc, discomfort.

Today I have no legal recourse for myself with what has forced me out of work, what I can prove has/can disable me mentally, cause chest pain, inflammation everywhere and more, it is slow motion genocide. So my daughter is supporting me. The myth of wireless safety does more than render those most affected today like myself; it also turns the entire public into government/industry accomplices in the exercise of its power increasingly/criminally forcing it onto themselves and all humans, and worst of all children, especially developing children in the womb.
