Dear Federal Public Officials:

I am 62. I am a citizen of the USA, and resident of Greenville, SC. Greenville, SC has always been an official bird sanctuary city. We had owned a home in Berea, SC, for 4 years, which was teeming with bird activity! I have been an avid bird watcher for 20+ years. Over the span of those particular 4 years, I observed bird behavior during all 4 seasons. I had observed and documented over 15 varieties of birds on or near our property, such as Southern Blue Birds; Blue Jays; Doves; Yellow Goldfinches; Woodpeckers; Ospreys and raptors; Southern robins; Wrens; Cardinals; Sparrows; Canaries; Hummingbirds, etc. In the spring of 2016, as soon as Duke Power Company forced their way on us, and installed 2 new "smart meters": one on our house and one on a separate large garage, I noticed that ALL the birds immediately stopped their normal spring mating! They stopped building nests, and immediately totally abandoned our entire rural property! The popular finch feeding sock suddenly stayed full. My platform bird feeder food was never eaten and was abandoned! My husband, mother and yardman were a witness to this. So, to prevent high RF waves from affecting our health and altering our brainwaves too2, I surrounded those 2 smart meters with 7" deep metal meter guard sleeves and screens. The 2 meters affected an entire 1/2 acre of our yard.

After putting the RF guards on, within 2 weeks, ALL the varieties of birds returned to their regular favorite tree in our yard, and ate from our feeders again! This proves that the RF waves did disturb; annoy; and irritate the awesome navigation and delicate brains of America's beautiful birds! How much more will 5G affect the delicate and awesome human brains which will be bombarded with the new 5G waves?!

Signed,

Barbara Lynn Wilson
