Phone: +491755549399

21.10.2026

Dear Sir or Madam,

My name is Harald Brems, I live in Berlin, Germany. I am the president of the Schutzschild association. We are an organization that advocates for the rights of people affected by attacks with electromagnetic weapons and organized stalking. We represent people from German-speaking countries. I myself have been a victim of attacks with energy weapons since at least 2008. During this period up to the present, I have been repeatedly attacked with frequency weapons that have various effects on my well-being and health. These effects include both physical and psychological symptoms.

Pain:
The attacks cause pain in all parts of the body. They can produce a sensation of pressure, stinging, heat, vibration, or itching in various parts of the body. The pain can move around the body and occur in different places within a short period of time.

Difficulty Concentrating:
Mild to severe difficulty concentrating occurs. Short-term memory can be severely impaired.

Cognitive Disorders:
The processing and storage of stimuli and impressions can be severely impaired. This can, for example, lead to a decline in work performance.

Visual Disturbances:
Blind spots and blurred vision may occur.

Insomnia:
Electromagnetic attacks can cause extreme insomnia.

Auditory Disturbances:
The attacks can cause certain sounds, such as buzzing, humming, or tinnitus.

If you have any further questions, please feel free to contact me.

Sincerely,

Harald Brems

Chairman of Schutzschild e.V.
